A new estimator in a contractor's office said to his boss, "Say, I've added these figures up ten times."

"That's fine," exclaimed the boss.

"Yes," said the estimator, "and here are the ten answers."

Official Proposals

STATE OF CALIFORNIA DEPARTMENT OF PUBLIC WORKS DIVISION OF HIGHWAYS NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Highway Building, Sacramento, California, until 2 o'clock P. M., on May 2, 1928, at which time they will be publicly opened and read, for construction in accordance with the specifications, therefore, to which special reference is made, of portions of State Highway, as follows:

Shasta County, between Montgomery Creek and two miles west of Burney (H-SH-28-C), about seventeen (17) miles in length, to be surfaced with crushed gravel or stone.

El Dorado County, between Eagle Falls and Meeks Bay (H-ED-28-B-C), about three and three-tenths (3.3) miles in length, to be graded.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the office of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the District office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the District office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

Dated: April 4, 1928.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS.

C. H. PURCELL,
State Highway Engineer.

NOTICE TO CONTRACTORS

(Coalinga Union High School District—Gymnasium)

Notice is hereby given that sealed bids on the segregated basis will be received by the Board of Trustees of the Coalinga Union High School District of the County of Fresno, State of California, for the erection and completion of a Gymnasium Building in accordance with plans and specifications adopted by said Board, prepared by Swartz & Ryland, Architects and Engineers, Rowell Bldg., Fresno, California.

Bids must be made on proposal forms obtained at the office of the Architects and must be signed by the bidder.

Each bid must be accompanied by a certified check for at least ten per cent (10%) of the amount of the bid or proposal, certified to by some responsible bank or banker, and made payable to J. A. Fluetsch, secretary of the said Board of Trustees. Said check to be forfeited to and retained by the School District should the party or parties to whom the contract shall be awarded fail to enter into a contract within five (5) days after the award, or to give bonds as required.

A good and sufficient bidder's bond will be accepted in lieu of the certified check.

Bids must be plainly marked on the exterior of the envelope, stating that part of the work for which the bid is submitted.

Plans and specifications may be obtained from the office of the Architects, Room 624 Rowell Building, Fresno, California, on a deposit of ten dollars (\$10). This deposit will be returned to the bidder only on the return of the plans and specifications in good condition within the time allotted for the contractor to use the plans.

All bids or proposals must be filed with the Secretary of the Board of Trustees of the Coalinga Union High School District, at the office of the said Board in the High School Building, in the City of Coalinga, California, not later than 7 o'clock P. M., Wednesday, May 2nd, 1928. The Board of Trustees reserves the right to reject any or all bids received.

By order of the Board of Trustees of the Coalinga Union High School District.

Signed:

E. M. HANST,

J. A. FLUETSCH,

President.

Secretary.

NOTICE—BIDS FOR CONSTRUCTION OF SUPERSTRUCTURE OTHER THAN STRUCTURAL STEEL FRAME FOR HANGAR NO. 3.

The Board of Port Commissioners of the City of Oakland at its office, 424 Oakland Bank Building, will receive sealed bids on Monday, April 9th, 1928, between the hours of 4:30 and 5:30 P. M., for constructing the superstructure other than structural steel frame of Hangar No. 3 at Oakland Municipal Airport. Plans, specifications and blank form of proposal will be furnished by the Secretary of the Board on deposit of \$10, check. Certified check in the amount of 10% of the bid to accompany the bid. Bond in the full amount of contract price for faithful performance of the contract to be given by the successful bidder. Contract to be entered into within 3 calendar days after date of award. Work to commence within 3 calendar days after date of Auditor's certificate to contract, and to be completed within 80 calendar days thereafter. The Board reserves the right to award the bid on either Proposal A or Proposal B. The Board further reserves the right to reject any and all bids.

G. B. HEGARDT,
Secretary, Board of Port Commissioners.

NOTICE TO BIDDERS

(Richmond-Parr Terminal)

Sealed bids will be received by the undersigned Clerk of the City of Richmond at his office in the City Hall, Richmond, California, up to the hour of 8:00 P. M., of Monday, April 23, 1928, for the construction of a municipal wharf, under City of Richmond contract, in accordance with plans and specifications therefor prepared by H. J. Brunner, Consulting Engineer, dated March 1, 1928, said specifications being entitled "Specifications for the Construction of Parr-Richmond Terminal, Inner Harbor, Richmond, California" and said plans being entitled "Parr-Richmond Inner Harbor Terminal, Richmond, Calif.," and now on file in the office of the Clerk of the City of Richmond.

All bids must be submitted upon proposal blanks furnished with the plans and specifications.

Copies of plans, specifications, form of proposal, and form of contract, will be furnished prospective bidders upon application to said H. J. Brunner, Consulting Engineer, Sharon Bldg., San Francisco, California.

Each bid must be accompanied by a

certified check on a solvent bank in the State of California made payable to the City of Richmond for an amount equal to at least five (5%) per cent of the bid.

Bids received as above will be opened and declared at regular meeting of the Council of the City of Richmond to be held at the above stated hour.

The Council of the City of Richmond reserves the right to reject any or all bids.

Dated: April 4, 1928.

A. C. FARIS,
Clerk of the City of Richmond

NOTICE TO BIDDERS

(Tent Floors, etc., National Guard Training Camp, San Luis Obispo, Cal.)

Bids For Construction.—Office of the United States Property and Disbursing Officer, for California, room 1021 Forum Building, Sacramento, Cal. Sealed proposals in triplicate will be received here until 11 a. m., April 18, 1928, and then opened, for furnishing all materials and labor required for construction of 200 tent floors, 9 corrals and 27 feed racks, at National Guard Training Camp, San Luis Obispo, Cal. Further information on application.

NOTICE TO BIDDERS

(Refrigerators—Mare Island Navy Yard Hospital)

The Bureau of Yards and Docks invites attention to the fact that it will open proposals in the near future on specification No. 5583, "Automatic Refrigerators, Navy Yard (Hospital), Mare Island, California." The work includes furnishing and installing nine refrigerators with motor-driven compressors, condensers, liquid receivers, expansion coils or units, wiring, piping and accessories.

Any firms to whom this work is of interest should forward immediately to the Bureau of Yards and Docks, Navy Department, Washington, D. C., or to the Commandant, Navy Yard, Mare Island, Calif., a check or postal money order for \$10, payable to the Chief of the Bureau of Yards and Docks, as security for the safe return of the drawings and specification, which will be forwarded to them as soon as available.

Prospective bidders on the West Coast should make application for the bidding data to the Navy Yard, Mare Island, California.

NOTICE TO CONTRACTORS

(Warehouse—Watsonville, Calif.)

We invite contractors and builders to figure on a concrete warehouse, 50x88 ft., to be built on the nursery grounds, head of Main St. Plans and specifications can be seen at our office. Bids will be opened Thursday evening, March 29th, at 8 P. M., at the office of the H. A. Hyde Co. The right is reserved to reject any or all bids. Bids must be accompanied with certified check for 10% contract price.

H. A. HYDE COMPANY.

NOTICE TO CONTRACTORS

(East Bay Municipal Utility District)

Sealed proposals will be received at the office of the East Bay Municipal Utility District, 1924 Broadway, Bay Building, Oakland, California, until 7:30 o'clock P. M., Friday, April 20th, 1928, for furnishing materials for and constructing the Sequoia and Wildcat Aqueducts, Mokelumne River Project. Specifications may be obtained by application to the office of the District.

JOHN H. KIMBALL,
Secretary.

Oakland, Calif., March 3rd, 1928.

1928 EDITION

San Francisco Building Laws

Now Ready for Distribution

With the issuance of this 1928 Edition, the Building Ordinance Books heretofore published will be obsolete, inasmuch as many sections of the law have been amended and additional sections added.

The 1928 Edition contains all the revisions and additions to the code up to and including January 31, 1928.

In addition to the Building Laws, the 1928 Edition contains FIRE ORDINANCES as regards the construction industry—the ELECTRICAL ORDINANCES and RULES of the San Francisco Department of Electricity—the BILLBOARD ORDINANCE and other laws covering regulations concerning the construction interests.

Price Per Copy \$1.00

FRESNO CITY COUNCIL ADOPTS UNIFORM BUILDING CODE

Repealing eighteen individual ordinances, passed by governing bodies of the city in the past, the new uniform building code ordinance, prepared by Commissioner of Public Works Andrew M. Jensen, was passed by the Fresno city commission April 12. The new ordinance is based on the uniform building code, the work of the Pacific Coast Building Officials' Conference.

"Builders have been urging the passage of the code," Jensen said. "They desire it because it gives them something definite, although simple, upon which to base their operations. The Fresno Building Exchange committee and the industrial committee of the chamber of commerce investigated the building code and favored it."

Probably the greatest change provided in the new code is the occupancy clause. Hereafter, all buildings will be constructed for occupancy, rather than being constructed to meet the most hazardous occupancy possible. For structures which are small house businesses with which there is little hazard connected the code provides lighter construction. However, the occupancy must remain in the same class for the life of the structure, and the occupancy may not be changed except with a permit from the department of public works.

The new measure calls for somewhat lighter construction on all types of buildings. Tests conducted by the association building officials have proved the light type of building to be adequate.

Along with the uniform building code the commission passed the new fire zoning measure, rearranging the three present zones and the adoption of a new zone to be known as the industrial zone. The change is minor, Jensen pointed out, being made to conform with the building code.

Both measures will be effective at the end of thirty days.

SAN JOAQUIN MATERIALS TAKES OVER S. P. BRICK & TILE PLANT

Lease of the S. P. Brick and Tile Company plant at Exeter, Tulare County, to the San Joaquin Materials company, jobbers and distributors of building materials and a subsidiary of Gladding, McBean & Co., largest clay products manufacturers west of the Mississippi river, is announced by P. L. Lingren, vice president and manager of the materials company. At the same time Lingren announced his appointment as manager for Gladding, McBean & Co. at Portland, Oregon.

The S. P. Brick and Tile Company, which is controlled by Harry Shields of Fisher, Lake & Shields, Fresno architects and engineers, has been in operation at Exeter for the past 20 years.

The lease is for a period of years not stated, nor is the amount involved announced. The plant is expected to produce between 6,000,000 and 10,000,000 brick during this year and employs approximately 35 men, with an annual payroll of approximately \$50,000.

In making the announcement Lingren stated that Gladding, McBean & Co. feel that within the next few years there will be an expansion in building construction in the San Joaquin valley and so are entering the field, not only as jobbers and distributors, but as manufacturers. The company has manufacturing plants and sales offices up and down the Pacific coast.

"The company has implicit faith in the future prosperity of the San Joaquin valley," he said, "and has laid definite plans for expansion of operations in the valley."

The plant will manufacture common brick, hollow tile and face brick.

Lingren, who has been in Fresno since the organization of the materials company two years ago, will leave shortly for Portland to undertake his new duties. He went to Fresno from Merced, having been in charge of the clay plant there for two years. In Portland he will have charge of large clay manufacturing plant in Portland, and the distribution yards throughout the state of Oregon.

Lingren will be succeeded in Fresno by H. A. Rothgarn, for the past six years actively connected with the building materials business at Fresno. The San Joaquin Materials Company will distribute the products of the S. P. Brick and Tile Company in addition to operating its plant, it was stated.

MASON CONTRACTORS ORGANIZE AT PORTLAND, OREGON

The eliminate cut-throat competition, shoddy construction and to stabilize costs the Mason Contractors association of Portland has been formed, according to F. C. Hofacker, who was elected to the office of secretary. The other officers include Harry Heurer, president; J. Wempe vice president, and Jack Seed, treasurer. Said Mr. Hofacker: "Our purpose in organizing is to promote our business, which is the erection of brick, stone, tile, terra cotta and fire proofing, and to treat with our employes, employers, architects, engineers and the general building public, who may be interested in the above types of construction."

CONTRACTORS OF PORTLAND, ORE., UNDER NEW LICENSE LAW

A Contractor's License Law has been adopted by the City of Portland, Ore., to become effective April 13, according to H. E. Plummer, Portland Inspector of Buildings. The law provides for the licensing and bonding of persons erecting, constructing or repairing buildings in the city of Portland, and makes it unlawful for anyone to engage in business as a building contractor without a license, except the owner or anyone who is subcontracting under a licensed contractor.

A permit will be issued by the Bureau of Buildings only to an owner or a licensed contractor in good standing whose license includes the class of work for which the permit is applied.

A "Board of Examiners for Building Contractors," composed of a registered architect, a registered structural engineer, a building contractor and a realtor, each with five years' experience in his work in Portland, and a building owner who has lived for five years in that city, will be appointed by the mayor. The duties of the board will be to examine into the qualifications and fitness of applicants for contractors' licenses. A fee of \$10 will be paid by each person taking an examination. Licenses will fall into three classes, according to the class of work to be performed by the contractor. Applicants will file surety bond for \$2500 before the issuance of a license as a guaranty that the contractor will perform his work in accordance with city laws and ordinances.

The Inspector of Buildings will have power to suspend any license issued under the provisions of the ordinance for willful violation of any building law or ordinance or for gross incompetency. A report of the suspension will be made by the Inspector of Buildings to the city council stating the reasons for his action, and at the same time make application for revocation of the contractor's license. At a hearing of the licensee, the council may revoke his license or it may refer to the Board of Examiners for Building Contractors for recommendations.

Violators of this ordinance will be punished by a fine not exceeding \$500 or by six months' imprisonment in the city jail, or by both fine and imprisonment.

AMENDMENTS TO LOS ANGELES BUILDING CODE

An ordinance requiring the filing of an application and bond and the payment of a registration fee of \$60, before a "Certificate of Registration as Gas Fitter" is issued, is contained in an amended section of the Los Angeles Building Ordinance.

The certificate entitles the holder to install, remove or repair gas-fired water heaters, gas-burning appliances, gas pipes and piping and vents for gas appliances. The Board of Building Safety Commissioners will examine all applicants for this certificate. The examination fee will be \$2.50, and the renewal fee, \$1.25.

Height of hotels and apartments in the City of Los Angeles is regulated by an amendment to Section 55 of the building ordinances. According to the amendment, a Class "A" building can be 12 stories in height; Class "B", 5 stories; Class "C", 4 stories, and Class "D", 3 stories.

WEYERHAEUSER AFFILIATED MILLS PLANS TO MARKET PACKAGE LUMBER

The accompanying article contains an announcement now being made nationally of an important innovation in the manufacture and merchandising of lumber which the Weyerhaeuser Forest Products interests is inaugurating. The plan described is certain, as we believe our readers will recognize, to have a vital effect upon everyone in the country who has any part in the handling of lumber—the manufacturer, the wholesaler and retailer, the architect, the contractor, the building mechanic and the building owner, as well as the manufacturers and handlers of competitive materials.

EDITOR

In the belief that it will protect the contractor who bids and builds on a quality basis from cut-throat competition, that it reduce the time and improve the efficiency of handling lumber on the job, that it will encourage a high standard of craftsmanship in the building trades, and help the lumber dealer meet the competition of other materials, the Weyerhaeuser sawmill operating companies have begun to ship packaged lumber from their several mills in Minnesota, Idaho and the Pacific Northwest.

Newly invented machinery, which re-buts every board before it is packaged, making each end four-square and absolutely smooth, is in operation. The re-butting is a separate operation, lumber being brought from sheds or planing mills to be put through the pneumatic-controlled re-butter and then packaged.

Lumber by the Parcel

The package itself consists of a pair of caps made of heavy sulphate wood fibre, which fit over each end of the bundle. The caps operate on a combination of the sleeve and hinge principles, to allow for the shifting of the pieces as the package is swung over a loading jack or goes through the other movements of shipment and handling. From three to twelve pieces, according to the kind and size of lumber it is, are included in each parcel. These are brought together in such a way that the faces are entirely protected after which the caps are slipped on and the proper identifying label applied.

Many other types of packages, including spot-welded metal bands, were tried during the 18 months of experimental work that preceded the adoption of this method. Trial shipments have gone across the continent, and have been trucked and dumped from trucks, with the packages remaining unbroken. A quick jerk releases the caps and the lumber is then ready for use.

At present the items being shipped in this manner are square edge finishing grades, bevel and Colonial siding, drop siding, softwood floorings, ceilings, stepping and a wide variety of mouldings. They are brought together in their customary lengths and, where the length requires it, a proportion of shorts is included, as in siding, each one is four-square and of the highest quality. All items that the lumber dealer might sell in broken packages are labeled individually.

Guaranteed Clear Through

This is the first time in the history of the lumber industry that the species and grade of lumber has been guaranteed clear through to the consumer in this manner. Each of the fibre caps bears a bright red and yellow label on its end, which states the kind, species and grade of lumber and the mill that produced it—not in code, but in plain English so that any interested person may read and understand it.

Only the finest products of the mill will be sold under the "four square" label. At all the affiliated Weyerhaeuser properties inspection and grading is done under supervision of the regional inspection bureau and exact standards of size and finished millwork are maintained. But the lumber which is to be packaged goes

through a second rigid inspection when it is re-buted, with the result that architect, owner, contractor and mechanic, as well as dealer, all are assured of a quality product.

Price Is Higher

Packaged lumber will sell for a higher price than ordinary lumber of the same species and grade. The additional price asked by the manufacturer is barely enough to cover the cost of re-butting and packaging, to say nothing of the extra care that will be taken in shipping and handling a material that is prepared with such care. Balanced against this increase in material cost, is a saving due to the elimination of one of the most costly wastes in building—the time the mechanic takes to square up each piece by hand before he uses it. Actual tests on the job have shown that a substantial amount is saved in the application of this lumber and it is believed that this saving alone will more than offset the premium asked.

But in merchandising packaged lumber to and through the dealer, and in advertising it nationally, the originators of this plan do not intend to over-emphasize its economy features. In fact, the whole plan is intended to remove lumber from the field of uncertain, unappreciated and unidentified commodities. Only dealers who have maintained policies beneficial to lumber will be asked to carry the new line. They will be permitted to stock ordinary lumber as well, and to get both of them in a mixed-car shipment. But they will be expected to market the improved labeled product on a quality-basis entirely.

Benefits To Contractor

Likewise, the contractor, Mr. C. L. Hamilton of St. Paul, Minnesota, secretary of Weyerhaeuser Forest Products, in announcing plans for the distribution of the "four-square" line, described its intended benefits to contractors as follows:

"There is a condition in the building trades today that merits serious consideration. It is the type of competition offered the legitimate builder by the inefficient price cutting contractor whose only hope of profit comes from 'skinning the job' with poor construction methods or inferior materials. Wherever the specifications call for a given species and grade of lumber, if it will not show in the finished result and if the owner is not expert enough to detect the substitution, this type of builder will use an inferior species and a lower grade. Moreover, they cheapen the job by poor craftsmanship. Squaring-up the ends of the boards is often neglected in order to save time. Siding and similar items are not tightly butted together, but the joints are left for the painter to fill in. These are merely examples of the innumerable shoddy abuses to which lumber is subjected by the conscienceless builder.

Unfortunately the older mechanics in some instances have been forced into malpractices in handling lumber, in trying to meet this type of competition and many apprentices never have been taught the highest standards of the carpenter's craft."

Many contractors, dealers and mechanics, as well as architects, deplore the condition, according to Mr. Hamilton. It continued:

Will Eliminate Abuses

"This new line—improved, distinctly identified, packaged and guaranteed clear through to the consumer—will help clear away many of these abuses, as we believe help the legitimate builder get credit both for good materials and good workmanship. A contractor may make his bid to specifications which call for a certain species and grade in every piece that goes into the building. If he wishes to do so, he may protect himself by submitting a price also on the job done with ordinary, non-labeled lumber. But, at least by the one method, the owner and the architect will know exactly what they are getting. No substitution for the packaged goods will be possible.

"The contractor will be justified in getting a quality-price for the job done with quality-materials. In fact, the quality lumber will help him materially in selling a quality-job throughout. It will enable him to specialize in quality-work on the finer buildings designed and supervised by architects of good standing.

Pay For Quality

"There are many owners and prospective home buyers who are willing to pay for quality if they can be sure of getting it. The contractor who goes after business on this basis will, we believe, make more money in the long run. The elimination of all unnecessary hand tramping on the job, will release some time for the finer points of good construction. And the price he obtains for his work will justify him in allowing his mechanic to use lumber properly, to build with in the manner in which the master-builders of the American Colonies built."

Lumber dealers also are expected to benefit from this new program of lumber merchandising by being assured of a permanent source of supply, by being listed as preferred customers of the manufacturer, by participating in the results of an extensive advertising campaign—national, local and in the trade press—the has been announced in support of the packaged goods, by having the backing of the finest lumber mills in the country, by being given absolute protection on price by having the inside track on all future developments of the quality line, and by being vested with the reputation of handling the finest lumber made.

"With this development," Mr. Hamilton concluded, "the lumber industry cuts its merchandising eye-teeth."

CULVERT COSTS IN HIGHWAY CONSTRUCTION

To determine the proportionate cost of culverts in highway construction in Missouri 24 projects in five different counties in various parts of the state were tabulated. The total cost of these 24 grading projects, representing a length of 8 miles, was \$589,474. The cost of drainage structures was \$174,373, or 30 per cent of the total cost of construction. If gravel surface is placed on these projects at a cost of \$9,000 a mile, the cost of drainage structures will amount to 1 per cent. If a concrete surface is placed on the graded projects at a cost of \$25,000 a mile, the cost of small drainage structures will be approximately 6 per cent of the total cost of construction.

"From these figures," says T. H. Cutler, state highway engineer, "we believe that the cost of small drainage structures is in the neighborhood of 15 per cent of all money so far spent on the Missouri state road system, or out of the \$116,000,000 so far spent for construction, the sum of \$16,800,000 represents the cost of small drainage structures."

CONSTRUCTION OPERATIONS SHOW NO INDICATION OF SLACKENING PACE

WASHINGTON, April 11.—Construction operations show no indication of slackening in the pace which last year resulted in the establishment of a new twelve-month record, according to statistics just compiled by the Associated General Contractors of America. Carrying surprise even to some of the closest observers of the industry, figures covering last month's operations today were seen to reach the latest total ever recorded for the month of March.

It is thought to bolster the soundness of observations based upon actual shipments of construction materials, the volume of contracts awarded during February

was the greatest to be shown by that month of any year on record.

A fair amount of assurance that the statistics covering construction work carried on during March do not signify a sudden "flare-up" is found in the fact that the volume of activities recorded for the first quarter of this year mounted above the total indicated for the corresponding period of 1927.

A scale which places the 1913 average at 100 as its basis finds the volume of construction activities during March to have reached 137 as an index level, with a gain of thirteen points above the February mark being registered.

VOLUME OF CONSTRUCTION

LARGEST WELDED FACTORY BUILDING IS COMPLETED IN WEST PHILADELPHIA

A factory building designed and built according to modern principles of electric arc welding has just been completed at the West Philadelphia plant of the General Electric Co. It covers 80,150 sq. ft., the main portion being approximately 140 feet wide, 550 feet long and 50 feet high. This portion is connected to an existing parallel building by a transept bay across one end, this bay being 78 feet wide and 170 ft. long. A saving of 15 to 15 per cent of steel tonnage is said to have been effected by using a welded rather than a riveted design. Shop fabrication and field erection each required about two months. As far as is to be ascertained, this is the first welded building to be designed and built in compliance with a city building code.

The structural frame of the main building consists of three lines of columns forming two main aisles over which span parallel chord Pratt trusses about 7 feet deep. One aisle, open from the floor to the roof trusses, is devoted to a 10-ton bridge crane runway, while in the other aisle reinforced concrete gallery floor is placed about midway between the ground floor level and the lower chords of the roof trusses. The transept bay is open over a 10-ton bridge crane runway and spanned by trusses similar to those over the main building aisles, except that the top chords are inclined. In the main crane aisle 2-ton wall cranes are

carried by brackets supported both by the building columns and by special auxiliary columns. The steel totaled about 989 tons. All unit trusses used were those of the Philadelphia building code.

According to Prof. Frank P. McKibben, consulting engineer of the General Electric Co., in charge of the design and erection of the building in cooperation with Harris & Richards, architects, there have been about 35 buildings, 25 bridges and about 15 ships built or repaired in a major way by welding, but this is the first building erected in a city where a building code had to be complied with. The Philadelphia building department issued a special permit for the structure which deviated in only a few details from riveted specifications. A unit stress for welded-joint design of 3000 lbs. per lin. in. for a 3/8-in. fillet weld was one of the main stipulations. It was also required that all welding operators be examined in accordance with best standard practice. The city inspection department expressed its confidence in being able to tell good from bad welds by surface inspection. Professor McKibben listed four major factors the development of which will contribute much to the advancement of welding: (1) Modification of city building codes to include welding; (2) proper control and check of welding employees; (3) development of the use of jigs in shops so as to do away with templates; and (4) development of automatic welding machines that will cut the cost and speed up the work.

PATENTS

Granted to Californians as reported
by Munn & Co., Patent Attorneys

Edward Nauer, of San Francisco. HEATER. This provides an improved device which is operable as an independent heating unit which may be connected to any convenient fuel supply and which may be readily transported and connected for use in desired locations.

George S. Hall, of Chico. GAS FURNACE. This relates to improvements in house heating gas furnaces of the type in which the burning gas is completely enclosed and passes through a radiator or drum and causes the air coming in contact with the radiator to be heated.

Joseph Rigby Watson, of Berkeley. FIRE-RESISTING COMPOSITION. This invention relates to fire resisting compositions and more particularly to such compositions to be used in spraying and painting roofs and walls of buildings.

Mike Koske, of McCloud. COMBINATION TOOL. An object of this invention is the provision of a tool which fulfills the requirements cited in patent 1,663,848, and in which the handle serves as a housing for receiving a foldable wrench element.

CARNEGIE INSTITUTE ARCHITECTURAL COURSES GIVEN SPECIAL ATTENTION

Courses in architecture are receiving special attention in the plans for the Eleventh Summer Session this year at the Carnegie Institute of Technology, Pittsburgh, according to an announcement from Dr. Roscoe M. Ihrig, director of summer courses. Under the plans for the coming summer, the Department of Architecture of the College of Fine Arts will give intensive six weeks' courses from June 11 to July 21 to meet the needs of students who desire to continue their work in architecture in the vacation, whether to make up credit, obtain advanced credit, or to prepare themselves better for entrance. Among the subjects to be offered are Architectural Design, Outdoor Sketching, Descriptive Geometry, Shades and Shadows, Perspective and Mathematics. Six and eight week courses are announced also in Chemistry, Physics, Mathematics, Mechanics, English, Economics, Commercial Law, History, Drawing, Surveying, Psychology and Education, Charcoal and Pastel Drawing, Water Color and Oil Painting, Design, Sketching, Methods, History of Arts, and various shops. Courses of six and eight weeks will be given to teachers and supervisors of Public School Music, Fine and Applied Arts, and Manual and Industrial Arts.

COPPER IMPORTS FROM CHILE

Imports of refined copper from Chile into the United States declined from \$22,884,487 in 1926 to \$12,785,696 in 1927, although imports of unrefined copper in pigs and bars rose from \$4,170,341 in 1926 to \$7,523,510 in 1927.

CANADA STEEL PRODUCTION GAINS DURING FEBRUARY

Production of steel ingots and direct steel castings in Canada during Feb. at 95,820 tons was 17 per cent over the output of 84,295 tons in January and 78 per cent over the 55,620 tons reported for February, 1927. Compared with the tonnages for the previous months, production in February showed increases in all grades; steel ingots advanced to 94,668 tons from 81,316 tons and direct steel castings to 4152 tons from 2979 tons.

THE OBSERVER

What He Hears and Sees On His Rounds

The total capacity of all the power-generating equipment installed in the various industries in the United States in 1927, from the highest type of steam turbine and internal-combustion engine down to the erratic windmill and the farm work animal, was 239,514,000 horsepower exclusive of the horsepower of pleasure automobiles. It is an astonishing fact, says the Department of the Interior, which agency compiled these figures, that the total horsepower capacity of the internal-combustion engines of pleasure automobiles is nearly twice as much as that used in all the industries, the total capacity for 1923 inclusive of pleasure automobiles being 684,044,000 horsepower. This tremendous capacity, if converted into man power, would furnish about 60 able-bodied servants in constant attendance on every man, woman, and child in the United States. The horsepower of industrial prime movers in 1923 was distributed as follows: Manufacturers, 9 per cent; mines and quarries, 2 per cent; agriculture, 17 per cent; electric central stations and electric railroads, 11 per cent; steam railroads, 32 per cent; ships, 4 per cent; work animals not on farms, 1 per cent; automobiles not classed as pleasure cars, 23 per cent; miscellaneous, 1 per cent.

Wide variation in the average sales of stores in different sections of the country are shown in the results of the recent experimental distribution censuses in eleven typical American cities, as compiled by the Domestic Distribution Department of the Chamber of Commerce of the United States. The average sales of hardware stores vary from \$95,000 in the Atlanta area to \$16,719 in Seattle. Plumbing and heating fixtures: Seattle, \$63,541; Denver, \$21,281. The census results lead to the conclusion that the distribution system is decidedly uneven. Some cities appear to have either too many stores of a given kind or others have too few. The average Seattle hardware store does only one-sixth as much business as the Atlanta hardware store.

Building Officials Conference of America will hold its fourteenth annual meeting in Detroit April 21-27. Among the papers listed on the program are "Steel Joists," by W. C. Muehlstein, building engineer, Industrial Commission of Wisconsin; "Future of Metal Lath as Fire Protection," by Wharton Clay, Metal Lath Manufacturers Association; "The Standard Fire Test," by Rudolph P. Miller, consulting engineer, New York City; "The Severity of Building Fires," by S. H. Ingberg, senior engineer, Bureau of Standards, Washington, D. C., and "Building Code Revision Work on the Pacific Coast," by J. E. Mackie, secretary Pacific Coast Building Officials' Conference.

With productive operations in full swing in the lumber camps and sending down a steady flow of logs, double shift activities were inaugurated April 16 at the mill of the Pickering Lumber Company at Standard City. Cutting on the Strawberry and Camp Grandall tracts has fully started. On the West Side territory on the Clear River section, lumbering has been started. The mill at Tuolumne will be completed, it is expected.

Frank E. Webb has filed application with the San Mateo County Supervisors seeking franchise to construct a toll bridge over San Francisco Bay to connect with main boulevard on Bay Farm Island, Alameda County. The bridge would be 47,500 feet in length from shore line to shore line and not less than 69 feet wide.

Forty convicts from San Quentin Prison have been sent to Monterey county for work on state highways in that section. They will start work on a new highway from San Simeon to Carmel. Additional convicts will be placed as the work progresses. Altogether 1,000 convicts from San Quentin are to go to state road camps during the summer.

The simplified practice recommendation concerning concrete building units has been reaffirmed by the standing committee of the Bureau of Standards without change for a period of one year. A survey covering the year 1927 was conducted under the auspices of the Portland Cement Association. Manufacturers of concrete block, concrete tile and concrete brick, to the number of 4,198, representing 90 per cent of the total production and 85 per cent of the firms engaged, contributed data which indicated that the average degree of adherence to the recommendation was 90 per cent.

A non-splitting nail, the invention of Harry S. Stronach, for a number of years industrial market investigator for the West Coast Lumber Mfrs. Assn., has been placed on the market by the Stronach Nail Co. of Pittsburgh, Pa. The nail has a triangular point which cuts the fibre across the grain and permits driving close to the end of a board without splitting.

Authorization for the sale April 26 to the highest bidder of the fourth million of the \$9,960,000 harbor bond issue voted in 1925 has been issued by the Oakland city council. The bonds bear 4½ per cent and mature in 40 years.

Plans for the twenty-third annual convention of the California Building & Loan League, to be held at the St. Catherine, Catalina Island, May 3, 4 and 5, are being arranged by C. Howard Wade, Los Angeles, general chairman of the convention. More than 600 building and loan members, representing 220 State associations with aggregate assets of approximately \$310,000,000, are expected to attend.

Chas. D. Roberts, building contractor of Santa Rosa, celebrated his golden anniversary of his arrival in Santa Rosa and the fifty-second of his coming to California. Roberts has no intention of retiring for many years to come and admits, "California's a great place to live in."

To attend a conference between representative American lumber exporters and division officials of the United States Bureau of Foreign and Domestic Commerce, Peter McNevin, general sales manager of the Pacific Lumber Company, has gone to Washington. McNevin is substituting for the regular San Francisco representative, James Tyson, who is unable to attend the meeting.

Inso Board, the new insulating lumber manufactured from wheat straw by the Stewart Inso Board Co. of St. Joseph, Missouri, has already been exported, the first car leaving the plant consigned to lumber dealers in Holland. After extensive tests, the Holland concerns select Inso Board to sell to their trade and use in their own building operations. "We are very much pleased with the international reception we have received so far," says A. D. Stewart, president, "and the shipment to Holland is only one of many we expect to make in the very near future."

ALONG THE LINE

San Leandro voters have authorized the appointment of a city manager. The measure carried by a vote of 1228 for and 812 against.

Architect Rollin S. Tuttle, formerly located at 505 California Bldg., Oakland is now located at 1580 Vista Ave., Oakland.

Frank W. Fuller, 54, for twenty years vice-president of the W. P. Fuller & Co. paint manufacturers, died April 16 as result of an ailment that had kept him in poor health for five years. His wife and three children survive.

T. A. Bedford, division engineer for the California State Highway Commission, Eureka, has resigned to accept the position of chief engineer of the Kaiser Construction Company at Oakland, which concern has a large highway construction program in Cuba.

William Mullholland, who had charge of the construction of the St. Francis dam, will remain in the employ of the city of Los Angeles as chief engineer of the city's department of water and power. This announcement is made by R. F. Del Valle, president of the Board of Water and Power Commissioners.

Paul D. Pratt, city engineer of Los Angeles for more than two years and recently city manager, has resigned to accept a position as representative of the Portland Cement Association in Orange, Riverside and San Bernardino counties.

Christian Wolf, pioneer general contractor of Winnemucca, Nevada, and a resident of the State of Nevada for the past fifty years, died at his home in Sparks, Nevada, April 14. His widow and two daughters and two sons survive.

Suit of Henry B. Ream, city engineer of Mount Shasta, Siskiyou county, for \$50,000 from seventeen defendants he accused of slandering him, ended in a draw. The jury found that the charges made by the defendants were false, but were privileged, failed to constitute libel and did not entitle him to damages. The defendants were declared to have acted in good faith. Ream sued the signers of a petition asking his removal from office for malfeasance, misappropriation of city funds, and similar charges. The jury cleared Ream on all counts.

TRADE NOTES

Jenik Builders, Inc., of San Francisco, capitalized for \$25,000, have been incorporated. Directors are: Anton Usnik, Frances De La Rue and W. J. Alexander.

Manteca Plumbing Co., at Manteca has been sold by Carl Knudsen to Ed Dumoulin, who was associated with Knudsen the past five years.

Yellow Pine Co., of San Francisco, capitalized for \$200,000, has been incorporated. Directors are: F. W. and P. R. Bradley, J. F. Davis, E. A. Griffen and J. W. Osby.

Oriental Commerce Company of Los Angeles has contracted with the government sawmills in India to sell exclusively the United States, Indian hardwoods which there are about 20 species, used chiefly for cabinet work. P. E. Snel, now spent about 5 years promoting the company is president.

Lincoln Builders Co. of San Francisco, capitalized for \$500,000 has been incorporated. Directors are: K. H. Gates, E. Schindler and J. S. Hodghead.

B. F. Bennett will operate from Florence Ave. and Pine St., Dunsmuir, under the firm name of Siskiyou Electric Company.

Durite Asphalt Co., of America, capitalized for \$250,000, has been incorporated with the following directors: B. L. McKinley, J. B. Lounibos and Jos. Farry. An Francisco is the principal place of business.

Riverside Cement Company, headed by Thomas D. Henshaw, William H. Metcalf and William Donaldson, has obtained a Delaware charter to engage in lime, rock, clay, shale, etc. business. The company, which will be capitalized at 710,000 shares of no par value, will take over the business of the Riverside Portland Cement Company.

Builders Supply Co., is occupying new and enlarged quarters at Twenty-fourth and R Streets, Bakersfield. The company carries a complete line of paints, sash and doors, electric supplies, builders' hardware and plumbing supplies.

Metalweld, Inc., of Philadelphia, announce they are exclusively represented in California, Nevada and Arizona by Smith-Booth-Usher Company of San Francisco and Los Angeles for their entire line of Metalweld-Worthington portable air compressors. These portable air compressors are composed of standard parts and repairs and service are available at many points on the Pacific coast through the factory branches of the different units making up these compressor outfits, as well as Smith-Booth-Usher Company's warehouses.

Gladding-McBean & Co., San Francisco, manufacturers of clay products, have received a supplemental permit from the State corporation department, authorizing the sale of 1000 additional shares. This permit amends a previous one which called for the sale of 26,311 shares. The new permit also eliminated the provision calling for appointment of a registrar for the stock, as it was pointed out that the corporation was practically a close one, with but 300 stockholders. Capitalization of the concern is 500,000 shares of no par value. Atholl McBean is president and Theodore F. Tracy secretary.

HERE — THERE — EVERYWHERE

Winfield Scott, director of public relations of the National Lumber Manufacturers Assn., addressed the San Mateo Rotary Club, April 5. His talk was illustrated with lantern slides.

W. L. Huber, past vice-president of the American Society of Civil Engineers, was the principal speaker at the April 11 luncheon meeting of the Sacramento section of the society in the Sacramento Hotel.

"There is no scarcity of lumber," said Ben S. Woodhead, newly elected president of the National American Wholesale Lumber Association, in convention at Atlantic City, April 12, "but there are plenty of rumors to the contrary, probably given birth by competitors in substitute building materials."

Registered plumbers of Sacramento will hereafter be permitted the option of putting up either a surety bond or a personal bond under the terms of an ordinance amendment proposed to the city council by City Manager Bottorff. The present act required such plumbers to furnish a surety bond of \$2500. This has occasioned considerable complaint from the plumbers.

Organization of an association of subcontractors was perfected in Bakersfield April 13, A. E. Abbott being elected president and A. J. Hendricks, elected secretary. Contractors attending the organization meeting included: B. J. Stoll, C. C. Foley, E. J. Gartley, F. P. Smith, Robert Stone, J. I. Waldon, F. F. Kellar, R. E. Goddard, T. W. Fraser, G. E. Wilson, A. J. Hendricks, A. E. Abbott, E. C. Felling, E. E. Blaisdell, W. T. Drury, M. F. Barnes, Max Klunder, Roy Myers, H. L. Perry and W. M. Fisher.

The annual dinner and entertainment of the Society of Engineers was held at the Fior de Italia Cafe, San Francisco, April 10, with two hundred members and guests present. A diversified musical and dancing program interspersed with short speeches by several members constituted the itinerary of the evening.

Metlox Corp., of Manhattan Beach, Cal., capitalized for \$1,400,000, has been incorporated and will engage in the business of manufacturing tile roofing and materials for advertising displays. Directors are: T. C. Prouty of Hermosa Beach; Geo. O. Noble of Los Angeles, and Horace S. Clark of San Francisco.

Star Lumber Company of Stockton, capitalized for \$50,000, has been incorporated. Directors are: W. E. Bruce, of Stockton; S. E. Dalton, of Oakland, and G. N. Whiteside, of San Francisco.

Chas. Edward Webster, civil engineer, died in Antioch, Contra Costa County, April 13. A widow and two sons survive.

James Atsalinos, Greek architect of international fame, died suddenly in Chicago, April 15. Doctors expressed the belief that ptomaine poisoning was the cause of his death. Atsalinos is famed in Europe as the designer of many churches. He came to America about two years ago, and was in Chicago directing the construction of the Solon, a Greek-American school, from plans drawn by him.

EMPLOYMENT SERVICE ENGINEERING SOCIETIES

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco, (Phone Sutter 1684).

X-4349-C-S NEW BUSINESS REPRESENTATIVE, on industrial report and appraisal work. Prefer graduate engineer 35-45. Must have practical appraisal and selling experience. Apply only by letter. Salary over \$5000 a year. Location, New York City.

X-4610 ENGINEER, to erect and put in operation sulphuric acid chamber plant. Salary \$400 a month and up. Headquarters, New York City. Location, South America.

R-1556-S TOPOGRAPHICAL AND GEOLOGICAL DRAFTSMAN, who is also experienced plane table man for field work in Rocky Mountain States. Remuneration includes board and quarters. Apply by letter with sample of work. Headquarters, Colorado.

R-1568-S CIVIL ENGINEER, M.A.M. Soc.C.E. engaged in developing projects in the northwest desires a young associate on the Pacific Coast with engineering training and experience. Five to ten thousand dollars available capital required. Apply by letter, giving details of experience and photo. Headquarters, Northwest

George J. Trigonis, of San Francisco. WINDOW SEAT. This invention relates to improvements in window seats, and has particular reference to that type of window seat commonly employed for the washing of windows on the outside of a building.

William E. Leibing, of Oakland. CARBONATED WATER COOLER. One of the objects of this invention is to form a reservoir of carbonated water in the refrigerating chamber and to eliminate from said reservoir all pockets now usually present and in which gases separating from the water accumulate. Mr. Leibing assigns his patent to Magnus Fruit Products Co.

Robert C. Forbell, of Long Beach. DIRECTION SIGNAL. This provides a direction signal so constructed as to render it readily accessible for repairs or the substitution of new parts, and further a signal which is constructed to render it immune to the action of the elements so that its proper operation at all times is insured.

John H. Maurer, of Long Beach. COMBINATION FASTENER. This relates to door stops and aims to provide novel means whereby a door may be held in a partially opened position, eliminating any possibility of the door being closed accidentally.

CONSOLIDATED FOUNDRIES IS NEW ORGANIZATION

Merger of three small steel plants and foundries into a new corporation known as Consolidated Foundries is indicated in a permit granted by the State Corporation Department to that concern to issue 60,000 shares to fourteen persons and corporations named in exchange for all the capital stock of the Jewell Steel & Malleable Company, Western Malleable Castings Company and Pacific Malleable Castings Company.

The new company is capitalized at \$2,000,000, par value of shares \$25, and it is understood that Bancitaly Corporation is interested to a considerable extent through having held stock in the former individual units.

Statements filed show assets of the Jewell Steel & Malleable Company at \$621,227 with liabilities \$28,358. Western Malleable Castings Company shows total assets of \$294,934 and liabilities of \$7275, while Pacific Malleable Castings Company has assets of \$404,463 and no liabilities.

MASTER PAINTERS OF STOCKTON PERFECT ORGANIZATION

A Stockton organization of the Master Painters and Decorators' Association of California was perfected April 12, and applied for a charter mark in a meeting held at the Stockton Builders' Exchange building.

Officers elected were J. F. Ecker, president; Carl H. Kiholt, secretary and Elvid Dinger, treasurer. Other signing members were Gibson Ekebergheim, James Garrow, E. J. Blanchard, D. E. Burgess, William Anderson, Matcillin & Carroll, A. H. Davis and Joseph Severn. Meetings will be held on the second and fourth Thursdays in the Builders' Exchange hall.

URGES 100-FT. HIGHWAYS WITH SET-BACK LINES

State highways to be developed in the future should have a maximum width of right-of-way of 100 ft., according to a recommendation made by E. E. East, chief engineer of the Automobile Club of Southern California. East was requested by the Southern California Regional Advisory Council to present his ideas, and in his recommendation he also suggested that set-back lines be established to control future business development and the construction of local service drives where business sections are created along state routes.

It is believed probable that the Regional Advisory Council will seek legislative enactment governing future rights-of-way. It is pointed out that the average width of 60 ft. that served in years gone is no longer adequate, as is proved in many sections of state highways and especially near large population centers. The setback feature would prevent the roadsides from being cluttered up with small businesses to the detriment of through traffic.

EGYPT BUYING CEMENT

Lack of stones and lumber combined with plentiful supply of sand and gravel, has increased Egypt's need for cement, and imports show steady and rather rapid growth. Most of it is bought in Yugoslavia, Belgium, Germany, the United Kingdom and France. Underground cellars, heretofore impractical because of the damp climate, have been made satisfactory by cement and waterproofing materials.

CONCRETE BUILDINGS IN RACE TOWARD SKY

A distinct trend toward the use of reinforced concrete for high buildings is revealed in a survey of this type throughout North America, recently completed by the Portland Cement Association.

South America is the most sensational adapter of the concrete building idea, the Hotel Palacio Salvo at Montevideo, Uruguay, being the highest building of its type in the world. It rises to a height of 28 stories, with its peak 338 feet above the sidewalk level. The Palacio was finished in 1926.

The tallest concrete building in the United States is the recently completed Master Printers Building, New York City, which has 29 stories and an overall height of 319 feet.

While the first concrete building above 16 stories in America, the Ingalls Office Building at Cincinnati, Ohio, finished in 1903, stands 16 stories high, the average number of stories for the 617 reinforced concrete buildings in this country, ten or more stories high, is 11.9 the survey shows.

Florida is the leader among states in construction of tall concrete buildings with a total of 110; California is second with 67. Texas is third with 57 and New York fourth with 47. The remainder of the leading building in the survey is

\$5,000,000 ROAD BUILDING PROGRAM PLANNED BY JAPAN

A comprehensive plan for road improvement and construction for the whole of Japan proper which contemplates the expenditure of about \$5,689,000 over the next ten years has been formulated by the Civil Engineering Bureau of the Home Department. The program will extend over 3600 miles of road. Municipalities, prefectures and the national government are reported aroused to the necessity for providing for increased automobile traffic.

DEPARTMENT OF COMMERCE BE- HIND HARDWOOD STANDARDS

R. M. Hudson, assistant director of the Bureau of Standards, Department of Commerce, has issued a circular letter to hardwood manufacturers, distributors and consumers, unequivocally revealing that the Department of Commerce is firmly behind the hardwood consulting committee and the Central Committee on Lumber Standards. The Hardwood Consulting Committee, which advises the Central Committee in the matter of hardwood standards, has been in existence since 1924. It is made up of thirty representatives of all branches of the hardwood industry and has been guided to a considerable extent by the technical findings of the Forest Products Laboratory, Madison, Wisconsin, which has made a series of comprehensive studies of the grading of hardwood lumber. In addition, the hardwood industry has made a number of tests of results in grading lumber under the present and proposed standards. The outcome was a recommendation that grading rules for hardwood lumber be so revised that all grades shall be determined according to actual utility value of the material—these rules taking the form known as Proposal "C".

TUNNEL SUIT ON EAST BAY PRO- JECT IS TRANSFERRED

On the grounds that it is a "foreign corporation," organized under laws of the state of Texas, Smith Brothers, Inc., builders of the Mokelumne project Lafayette tunnel, has secured from Superior Judge H. V. Alvarado transfer to the U. S. District Court of a \$100,000 suit instituted against it by the firm of Grier & Mead as an aftermath of the tragic Thanksgiving day flood of 1926 at the Claremont tunnel of the East Bay Municipal Utility District.

The suit charges that because of negligence of Smith Brothers, a conduit erected by the firm near the mouth of the Claremont bore failed of its purpose and storm waters from San Pablo creek flowed into the hatch basin and thence into the tunnel to take toll of ten tunnel workers drowned.

Grier & Mead and W. M. Grier and W. S. Mead, the contracting firm, are suing for losses they sustained by the tunnel flooding and to cover indemnities paid to relatives of the flood victims.

L. A. ART COMMISSION APPROVES PLANS FOR STRUCTURES

During the month of March, 1928, the Los Angeles Municipal Art Commission approved plans for buildings and structures estimated to cost \$1,106,003. Of this amount \$893,349 represented ornamental lighting systems for which petitions will be circulated. Among the plans approved were those for the Riverside Drive-Pacific Electric Glendale line undercrossing estimated to cost \$130,000. Plans were approved during the first three months of the current year for buildings and structures estimated to cost \$2,366,817, of which amount \$1,629,229 represented ornamental lighting systems.

NEWSPAPERS BECOME CHINESE WALLPAPERS

Old newspapers have become a considerable item in the list of American imports at Tientsin. These papers, while sell in the wholesale market here at about \$36 a ton, are shipped into the country districts of North China, where they become wall paper or are pasted over windows. Glass windows are still rare in the interior villages. Old newspapers are imported also from Germany and Japan.

BELGRADE SEEKS HIGHWAY CONSTRUCTION LOAN

A highway construction loan is desired for Belgrade, Yugoslavia, to meet the needs of the Belgrade district, which covers much of the rich agricultural lands lying between the capital and the Hungarian frontier. The proceeds of the loan are to be used for the construction of highways and building a bridge across the Tisza River. The amount desired is about \$9,000,000, of which about \$5,500,000 will be employed for road building and about \$3,500,000 for the bridge.

ROAD FUNDS PROVIDED

According to word from Washington the Senate has passed and sent to the House the Phipps bill authorizing an annual good roads appropriation of \$75,000,000 each for the years 1930 and 1931. In addition the measure authorized \$7,500,000 each for the same years for post roads and trails.

STEAM ENGINEERING WILL BE EX- HIBITED AT SMITHSONIAN

The history and development of steam power plant engineering is to be shown in a large permanent exhibit now being assembled by the Smithsonian Institution, according to word from Washington.

About 3000 feet of floor space has been allotted for the new steam unit of the museum, which will include models or originals of the engines which have made history. Beginning with the toylike turbines of the ancients, they will illustrate the progress of steam engineering up to the most modern developments.

The institution already has the upper half of the original cylinder of the Josiah Hornblower engine of 1755, which marked the beginning of American steam engineering; the original engine and porcupine-type boiler designed and used by Colonel John Stevens in his steamboat in 1803, together with the water-tube boiler of his experimental locomotive of 1825.

LOS ANGELES ENGINEERS ELECT

Announcement is made by the Los Angeles Chapter, American Association of Engineers, of the returns of annual election of officers just closed, as follows: Rolf R. Newman, president; Wm C. Hogboom, vice-president; Robert M. Cox and D. M. True, directors. E. Earl Glass is retiring president and holds office on the new board as past president, together with the hold-over directors, J. Wyman Ludlow and R. W. Stewart.

The installation of new officers will take place at the annual meeting of the chapter to be held April 26.

U. S. STEEL CORPORATION ELECTS DIRECTOR

Thomas W. Lamont of J. P. Morgan & Co. has been elected to the Board of Directors of the United States Steel Corporation to fill the vacancy created by the death of E. H. Gary, former chairman. Four directors, whose terms expired this year, were re-elected to serve until 1931. They are George F. Baker, Sr., Eugene J. Buffington, James A. Farrell and Morgan.

UNIFORM STANDARD DESIGN IN WIND-BRACING OF TALL BUILDINGS PURPOSE OF STEEL INSTITUTE STUDY

To provide data that will afford the basis for uniform standard design in the wind-bracing of tall buildings, a research fellowship has been established at the Ohio State University, Columbus, Ohio, by the American Institute of Steel Construction.

While skyscrapers have proved capable of withstanding the most severe winds, it is believed a further study of pressures, stresses, and elastic deformation will enable the engineer to design against wind with a confidence which does not exist at the present time, due to wide variations in practice by different designers.

Until recently the study of wind pressures has been largely confined to storm conditions and to work with models. In the wind tunnels of the U. S. Bureau of Standards, Washington, D. C., models of buildings have been subjected to wind velocities exceeding 100 miles per hour, but the models were too small to show the part played by the powerful vacuum created on the leeward side of a structure, and believed to be responsible for much of the damage caused by hurricanes.

The completion of the American Insurance Union Building in Columbus, Ohio, a short time ago, provided a full-size test specimen for study of the effect of wind upon high buildings. During the construction of this building, gauge points were established on the columns of the tower section from the basement to the upper stories. Movable panels in the fireproof protection of these columns at each floor make the gauge points available at all times for the measurement of stresses caused by wind.

A means of observing the elastic sway in the top of the tower is provided by a theodolite set in the bottom of the longest elevator shaft, with targets at the top of the shaft. In the design of all tall buildings, particularly tower structures, it is known that there must be a sway to the structure proportional to the forces to which it is subjected.

It is expected that the Wind Stress Committee of the American Society of Civil Engineers will cooperate in codifying the data derived from the observations which are made, and that the Committee will make recommendations for uniform practice.

structure always in repair or to modernize it. Second, millions of prospective home buyers and the professional purchasing agents will be told that safety and economy in purchase of building materials will be insured only by dealing with one of the co-operating lumber yards.

The public will be educated to expect and demand a "certificate of safety." This guarantees the purchaser by actual bond, underwritten by the association, that the material sold him conforms in grading with the national manufacturers' standards, and in quantity with the invoice rendered him.

It is expected that these two thoughts—building now and buying safely—when nationalized by this slogan, will energize the merchandising of thousands of lumber dealers. Instead of their maintaining building material storage yards, and bidding for business through second and third parties, allowing mail order houses and direct shippers to take an ever-increasing amount of profitable business that is economically theirs, the lumber dealers' contacts will come more and more directly with the actual prospective homebuilders. Instead of merely competing among themselves as buyers of low-profit lumber bills that have for the most part been already sold by a third party, the co-operating dealers will become active merchandisers of building materials.

The quota system will be used in raising the fund for the advertising. The lumber dealers in each of the 3,400 counties in the United States are asked to put in 80 per cent of the fund, which will actually be spent in advertising, publicity and merchandising in that county. The remaining 20 per cent is asked of the manufacturers and allied industries. (Editor and Publisher.)

\$16,000,000 LUMBER ADVERTISING CAMPAIGN TO BE STARTED IN JULY

The biggest co-operative advertising campaign in history in the amount of money to be spent annually and in the extent to which the campaign will be worked out among various media, will be the campaign of the National Retail Lumber Dealers' Association, to start July 1 and continue for four years.

The purpose of the campaign is to build up the retail lumber business in the country, and especially the business of those dealers who participate in the cost. It will be carried on along two main lines: First, to stimulate the building of new homes and new business structures, supplemented with the thought that it is good business to keep present structures in repair and with modern improvements, and second, to educate the prospective home builder or buyer and the industrial buyer that the retail lumber yard, conducted according to the standards of the national association, is the safe, logical and economical place to buy all building materials.

The total of the advertising fund of the association is expected to range somewhere between \$16,000,000 and \$25,000,000 for the four years, or from \$4,000,000 to \$6,000,000 a year. The actual amount, of course, can not be stated with accuracy until the close of the preliminary campaign among dealers of the country, which has just begun, but there seems little question, according to the confident prediction of leaders of the industry, that at least the minimum amount stated will be reached. In addition to that, it is expected the stimulus which the national campaign will give to retail lumber advertising by individual dealers and allied industry will cause the expenditure of additional millions in local newspapers, trade magazines, posters, direct mail, etc., so that the total amount expended during the four years by the industry is likely to run around \$25,000,000 to \$40,000,000.

The extent of the advertising and its working out among the media to be employed is indicated to some degree by the following:

(1) The bulk of the association's fund will be spent in advertising in daily newspapers in cities and towns where there are subscriber dealers. In each of these cities and towns a 20,000-line schedule will be run each of the four years. The newspapers chosen will be daily papers printed in English, the paper having the largest circulation to be selected, except in case the city circulation of the largest paper does not exceed by 50 per cent the combined city circulation of all other such newspapers in that city. In such cases two papers will be used, the largest and second largest.

(2) National magazine advertising. To be conducted throughout the four years in the standard magazines of national circulation.

(3) National and sectional farm journal advertising. To be conducted throughout the four years in magazines of this character, to reach those communities not thoroughly covered by the national magazines of general character, and especially, to urge building and building repair by farmers.

(4) Beyond these three general divisions, there will be extensive outdoor advertising in the form of poster paper, metal road signs, signs for dealers' trucks and so on, and likewise window displays and similar advertising helps, along with mats and electros for tie-up advertising by local dealers.

The campaign will be conducted by the Millis Advertising Company of Indianapolis, under the direction of a committee of the association termed the trustees of the advertising program. They are: Hawley Wilbur, West Allis, Wis.; Thornton Estes, Birmingham, Ala.; Fred H. Ludwig, Reading, Pa.; L. P. Lewin, Cincinnati, O., and Adolph Pfund, Chicago, Illinois.

For the lumber dealers' campaign, the slogan chosen is "Build Now With Safety." It embodies two sales messages, which will be carried through the campaign. The first will be the "own your home" idea, supplemented with the thought that it is economical to keep a

NATIONAL LUMBER MANUFACTURERS TO PROMOTE HOME BUILDING

The National Lumber Manufacturers Association Trade Extension Committee has authorized cooperation of the Trade Extension staff with the National Home Building Council.

The National Home Building Council is, through their representatives, a group activity of a number of the larger building industries and allied interests. Through promotion of construction and home improvement, its purpose is to establish, maintain and develop volume and profits in industry and to absorb any decline from the "new construction" peak.

The present program of the Council calls for stimulating local interest among dealers, contractors, bankers, building and loan associations and others to the needs and opportunities for local improvements; to provide cooperation of inter-industrial effort, furnishing plans, stimulating local advertising and encouraging sound local financing or re-financing. This program has been based on the theory that industry must, under present conditions, reach out for its market.

1927 MAGNESITE PRODUCTION

The production of crude magnesite in the United States in 1927 was 121,490 short tons, valued at \$1,090,550, according to statistics compiled by J. M. Hill, of the United States Bureau of Mines, Department of Commerce. Three operators working three mines, one each in Santa Clara, Stanislaus and Tulare counties, in California, produced and sold 3,750 tons of crude magnesite, valued at \$97,500. All of the output in Washington was from the mines of the Northwest Magnesite Company, which produced dead-burned magnesite at Chewelah. Two of its six furnaces were operated only part of the year.

ENGINEERS AND DEALERS IN ANNUAL MEET DISCUSS PROGRESS OF OIL HEATING

The Fifth Annual Convention and Exposition of the American Oil Burner Association, held at the Hotel Stevens in Chicago on April 14 and 15 brought together representatives of the greater variety of interests ever assembled to discuss the problems of oil heating. The attendance of more than 1,500 included engineers, architects and dealers in electrical plumbing and heating supplies, as well as officers and employees of the leading firms engaged in the manufacture of oil burners and accessories. The program was ably planned to cover not only the technical subjects of direct interest to the oil burner trade, but also the points at which the new oil burner industry touches a number of allied interests.

The Convention demonstrated that the oil burner industry is progressing not only through mechanical improvements in its products, but also in impressing the value of these products upon the electrical industry, the great oil producers, plumbing and heating engineers, builders and architects. The program contained meat for all of these.

Central Station Companies

One of the most interesting addresses was given by Charles K. Nichols of the New York Edison Company, who spoke of the increased attention which great electric light and power companies are giving to the possibilities of oil heating. "There is a great chance," he said, "for both the oil heating industry and the electric light and power central stations to help each other out." Mr. Nichols went on to say that his industry, through the National Electric Light Association and the Association of Edison Illuminating Companies is investigating oil heating and, if satisfied with the information developed, is preparing to promote the use of domestic oil burners just as it is now pushing electric refrigerators. This interest is due to the needs of the central station companies to build up the use of power by residences and commercial buildings during daylight hours to help balance the use of electric current for lighting, and to the desire to equalize as far as possible the central station "load." The procedure in the case of the oil burners is the same as that which the central station companies have pursued in regard to the electric refrigerator, which received a thorough test for two years and in 1925 was definitely approved by the central station companies, many of which are now not only selling the idea of mechanical refrigeration for domestic use, but also acting as selling agents for particular refrigerators. Since 1925, said Mr. Nichols, half a million electric refrigerators have been purchased and put on the central station lines.

Educational Campaign

Leod D. Becker, Managing Director of the Association and of the Oil Heating Institute, reported that several of the great oil companies were supporting the educational campaign carried on by the manufacturers of oil heating equipment. The directors of the Association voted to continue the co-operative advertising campaign begun last year by the oil heating interests and plans for this campaign were laid by the councilors of the Institute on a two year basis. The interest of the oil producers was explained as due to the desire for a larger market for fuel oil and the need of conserving our immense oil surplus by increased utilization. The educational and advertising campaign will continue to point out the advantages of oil heating due to economy, convenience and health, and special attention will be paid to educating home owners, builders and architects.

In his opening address, Lionel L. Jacobs of St. Louis, President of the Association, reported that the industry had experienced a greatly increased volume of business during the first three months of 1928 and that business in this period was in excess of the corresponding months of 1926, hitherto the banner year of the industry. "Everyone is looking forward with high hopes," he said, "to the balance of the year."

Distribution Problems

President Jacobs stressed the need of improving distribution methods. "Without a well organized man power to take advantage of the opportunities to be produced by the advertising," he said, "the expenditures made would be merely a loss of money instead of an investment made to yield a profit. Having learned its lesson the industry will now step forward to a steady progress at a reasonable speed, leaving in its wake a system of distribution founded on knowledge and experience and supported by the manufacturer in a manner that will establish public confidence and acceptance of a product that offers a greater return in personal comfort to the entire family than any other utility that has been developed in the past."

Mr. Jacobs reported that questionnaires sent out by the Oil Heating Institute to Fire Marshals in cities and towns where fires were attributed to oil burners developed the fact that over seventy per cent of these alleged oil burner fires originated from some other cause.

He announced that at the request of the Association the Department of Commerce was making a complete survey of foreign markets for oil burners which probably will be completed this year.

Speakers who discussed the question of competition with other fuels were uniformly optimistic in their prediction that fuel oil was approaching a position of leadership in the fuel market. The main problem, they found, was to teach the public the truth about the production and utilization of fuel oil and to wipe out the impression that there was any danger within the next few generations of a failure in the supply of oil. The fact that the Board of Underwriters have placed their stamp of approval upon a large majority of representative oil burners now in use was cited as proof that the industry no longer need fear opposition to its products on the ground of danger from the burning of oil in domestic heaters. Government statistics were quoted to prove that while all other commodities, including coal, showed an increase in cost of more than fifty per cent from pre-war level, fuel oil prices today are practically the same as in 1913.

Competition of Gas

In regard to gas, while the value of this fuel was admitted, speakers agreed that the oil burner industry had nothing to fear from this competition. In the words of B. L. Majewsky, Vice-President of the Shaffer Oil and Refining Company of Chicago, "Due to difficulties both as to distribution and price, there is good reason to believe that with aggressive advertising and cooperation between the oil burner manufacturer and the oil industry, oil will win complete leadership in the home field before gas can become a serious competitor."

One of the activities of the Oil Burner Association which received general commendation was the standardization of fuel oil specifications. Heating oils are no longer regarded by the progressive modern day refiner merely as by-products. On the contrary, as much care is used in manufacturing heating oils ac-

cording to strict specifications as is used in the case of cutting gasolines and kerosene from the crude oil. The refiner, having made a careful study of the requirements of the representative burner on the market, can, and does in many instances, manufacture the heating oil generally required.

New Officers

J. C. Johnson, President of the S. Johnson Company of Oakland, California was elected president of the Association for the ensuing year. E. P. Bailey, President of the National Aeroil Company of Philadelphia, was elected Chairman of the Board of Directors. The other officers chosen were: Executive Secretary, Leod D. Becker, New York; Vice President, George P. Kittle, President Aeroil Company, Union City, New Jersey; Edwa M. Fleischmann, President May C. Burner Company, Baltimore; Walter Tant, President Silent Automatic Burner Company, Detroit; George Buloch, President Calorol Corporation, New York.

The Executive Committee was increased from three to five members and now consists of: President J. C. Johnson, Executive Secretary Leod D. Becker, Lionel L. Jacobs, the outgoing president, and Messrs. Fleischmann and Bailey as above.

DECAY OF CONCRETE IS BEING STUDIED BY EXPERTS

An investigation of the deterioration of concrete masonry is in progress in the testing laboratories of the civil engineering department of Columbia University according to word from New York.

The tests, still incomplete after two years of study, indicate that improper construction and workmanship are among the most important factors in the disintegration of concrete, says Professor A. H. Beyer, who is in charge of the laboratories.

"The whole phenomenon of concrete deterioration is extremely complex," Professor Beyer asserts. "In some pieces of construction concrete is affected quite rapidly, while in others, its disintegration with time is almost negligible. No progress can be made against such deterioration until the underlying causes are thoroughly understood."

"Masonry which stands in water, such as bridge abutments and piers, is particularly susceptible to serious wear, whether the water is fresh or salt and whether the climate is tropical or temperate."

David L. Snader, professor of structural engineering at Stevens Institute of Technology and a graduate student at Columbia, is making the tests in collaboration with Professor Roy J. Colony, a Columbia geologist. Their materials are samples of masonry taken from culverts, abutments, walls and other structures which have deteriorated so far as to necessitate repairs. Microscopic and X-ray examinations of these pieces are made by the scientists.

SET-BACK BUILDINGS PERMITTED IN BOSTON

An important change was recently made in the building laws of Boston, Mass., with the signing by Governor Fuller of a bill permitting the erection of so-called terraced buildings above the heretofore maximum height of 155 ft. The measure places a building limitation on volume rather than on height. The law, at the present time, has particular reference to the construction of the proposed New England Building which will be 28 stories in height. Although not high as standards are measured in other cities, this building will be more than twice as high as commercial buildings have been built in Boston. It will cover a plot 270 ft. wide by 450 ft. long and have a gross floor area of about 1,600,000 sq. ft.

TIMBER MANAGEMENT PLANS DESCRIBED BY U. S. FORESTERS

Forest management in America is coming into its own, according to the Forest Service, United States Department of Agriculture.

"For many years," it is declared, "foresters in this country were forced, because of lack of American experience, to teach and practice methods transplanted bodily from Europe. But when a background of actual practice and a better understanding of the silvicultural and economic factors peculiar to this country had been acquired, there came about a general realization that we could not begin where Europe left off; that we must, to a certain degree at least, meet American conditions with American methods."

Presenting the best that has been developed in forest management in this country through experience and study, an exposition of the methods of making forest plans has just been published as Miscellaneous Publication No. 11-M, "Management Plans," written by Inman Eldredge, formerly a forest inspector for the Forest Service. While the publication was written with special reference to the National Forests, it contains much information useful to foresters and timber owners generally, especially those who are engaged in making or carrying out management plans.

Timber is a long-time crop. To grow

a stand of timber to merchantable size and to perpetuate the crop requires usually the work of a succession of forest managers, and it is necessary that a far-sighted plan, which is practicable over a long period, even though capable of modification to meet changing conditions, be established at the outset. The preparation of a management plan involves generally the division of the forest into working circles, the assembling of all pertinent data and maps for study and analysis of the working circle concerned, decision upon the objectives of management, determination of silvicultural systems to be used, calculation of yield, formulation of the policy to govern the timber sale business, choice of areas from which timber is to be cut during the first period, and presentation of the material in a workable plan.

In an appendix to the publication are given the management plans which have been put into effect for the Custer Working Circle, Harney National Forest, South Dakota; Meadow Valley Working Circle, Plumas National Forest, Calif.; Woodland Working Circle, Pike National Forest, Colo.; and the Rio Pueblo Working Circle, Carson National Forest, New Mexico.

Copies of the publication can be obtained without charge, by writing to the United States Department of Agriculture, Washington, D. C.

APPRENTICESHIP PLAN DESIGNED TO TRAIN BUILDING TRADESMEN AT ONTARIO

More than a year ago when the construction industry of Ontario was faced with the problem of supplying skilled workmen for the projects then under way and projected in the cities of Hamilton and Toronto the Association of Canadian Building Construction Industries submitted a plan of apprenticeship to the various organizations of employers and employees in the hope of finding a solution of the problem. Out of this the Construction Apprenticeship Council of Ontario was formed. This council is composed of two representatives from the Canadian Construction Association, one each from the Engineering Institute of Canada, the Ontario Association of Architects and the Technical Branch, Department of Education, and four from the ranks of organized labor appointed by the Labor Congress of Canada. The principal features of the plan were outlined by G. L. Sprague, apprenticeship adviser, Construction Apprenticeship Council of Ontario, in an address before the Winnipeg Conference of the Association of Canadian Building and Construction Industries held during January.

"Management is vested in joint trade apprentice committees, two representing employers and two employees and one appointed by the council, Mr. Sprague explained. Uniform apprentice indentures are used and apprentice records are kept showing the work on which apprentices are engaged during their training. Regular apprentice reports are made every three months giving this information. This practice is to assure proper training in all branches of the trade. Selection and placement of apprentices is through these committees.

"The transfer principle is approved and in use where employers have not sufficient work to keep apprentices employed and when it is necessary to transfer an apprentice to give him training in branches of his trade not provided for by the employer to whom he may be

indentured. For example, an employer may have a class of work in which carpenter apprentices would be engaged chiefly in form work and during his entire four years this apprentice might not obtain training on interior finish. When this is the case the committee may transfer the apprentice to another employer who can give him training in other branches of his trade.

"The important feature of the apprenticeship plan is that which provides for a period of intensive training in trade practice in technical school during the off season for the first and second year apprentices. The most important period in apprentice training is the first two years. Start a boy right, give him continuous employment for 40 weeks in each of the first two years, supplement this with ten weeks' intensive training in trade practice in each of these first two years and you furnish a guarantee that the industry will have a skilled building tradesman at the end of four years. He will be so valuable a worker in his third and fourth years that his employer will keep him employed as continuously as his work will permit.

"Our first difficulty in training boys for skilled positions in the construction industry has been to educate employers. Organized labor is behind our scheme of training one hundred per cent. They appreciate the fact that when we get this plan working throughout the province it will raise the standard of skill in building trades and that this will help their organizations as much as it will benefit employers.

"Labor organizations have very definite regulations regarding apprenticeship but these regulations offer employers ample opportunity to train a sufficient number of apprentices. In fact, it will be some time before we ever have as many apprentices in training as the labor union ratio permits.

"The need today is for organization of

employers in the construction industry to cooperate efficiently with labor organizations in rating and maintaining the standard of skill in the building trades. This is common ground on which labor organizations and employers' organizations can meet and work together in harmony. Out of this common interest in training our boys will grow better understanding and a new spirit of cooperation that will make itself felt in all relations of employers with labor organizations.

"These apprentice committees have been organized in Toronto and Hamilton for the carpenter and bricklaying trades. Carpenter classes of first and second year apprentices are attending the technical schools in these cities, and soon a bricklayer apprentice class will start in the Hamilton Technical Institute. The apprentices are paid \$2 a day for eight hours' attendance, five days a week for 10 weeks in Toronto and 8 weeks in Hamilton. The funds for this purpose have been raised in Toronto by assessment, based upon wages paid apprentices and paid in monthly into a general apprenticeship fund, and in Hamilton by generous action on the part of the employers in paying this educational allowance each week while the class is in progress.

"The apprenticeship plan of the provincial council provides for this assessment upon a 10 per cent basis, but in Toronto the General Contractors' Association paid half of this assessment. Ultimately we contemplate a general assessment of the industry, so that the cost of training apprentices will be borne by the entire group. It may prove practicable before very long to secure an assessment along the lines of the workman's compensation plan to provide funds for apprentice training. If this is done it will be possible to assign first and second year apprentices under supervision of the apprentice committee to employers qualified to provide proper training and also to continue related training in trade practice during the off season.

"So impressed is the Ontario government with progress made so far in establishing this system of apprentice training that legislation is being prepared for introduction at the coming session of the legislature. This legislation will govern and regulate apprenticeship in all trades and branches of industry and will be the first step in a new order of industrial training in Canada."

CARRARA MARBLE QUARRIES MAY BE REOPENED

According to word from Tonopah, Nevada, it is rumored that the marble plant and quarries at Carrara will be re-opened, following the visit of a party of Ohio capitalists on the site. The plant is located between Beatty and Wahmonie.

Members of the party were E. M. Vossler, Findlay, O., formerly district manager of the Mutual Life Insurance Company of New York; Frank Schumacher, Circleville, O.; Harry Miller, Columbus, O., and J. H. Swoyer, manager of the Royal Caramel Company of Hollywood. The latter is interested at Hornsilver and Tokop.

The marble plant represents an investment of over \$1,250,000, chiefly furnished by Marion, O., residents. At its inception the company installed a complete electrically-equipped outfit.

When the works were ready to turn over, the power company abandoned the southern end of Nye county, leaving Carrara without either light or power. Then a gasoline engine was installed and the day it was completed fire destroyed engine house and planing shop.

Afterward a Diesel engine with electric generators was placed and the company appeared headed for a prosperous time when it became financially embarrassed and could not fill orders from Los Angeles builders. The plant has remained idle for four years.

LONG BEACH. Los Angeles Co., Cal.
 Omar H. Hubbard, 310 W. Broadway,
 Long Beach, has purchased site at 429
 W. Broadway for Class A store and partit-
 tioned building which he will erect this
 fall. The property is 50x150 feet. The
 new buildings will be seven stories or
 more in height and of steel frame con-
 struction. John and Donald B. Parkin-
 son, 420 Title Insurance Bldg., Los An-
 geles, were the architects for the pres-
 ent Omar H. Hubbard Building at 310
 W. Broadway, Long Beach.

BONDS

SANTA MONICA. Los Angeles Co., Cal.
 Board of Education has employed Pro-
 fessors O. R. Hull and Willard S. Ford
 of the University of Southern California
 to make survey of school system and to
 make recommendations as to new build-
 ings needed. The board plans to submit
 a bond election to the voters this spring.

SACRAMENTO. Cal.—Until April 23,
 bids will be received by county super-
 visors for purchase of \$85,000 bond issue
 of Washington School District; proceeds
 of sale to finance school improvements.

ELKO. Nevada—School trustees con-
 template erection of new junior high
 school to relieve crowded conditions in
 present schools. Funds will probably be
 raised through a bond issue.

SACRAMENTO. Cal.—Until April 23,
 bids will be received by county super-
 visors for purchase of \$45,000 bond issue
 of Fair Oaks School District; proceeds of
 sale to finance erection of new school,
 plans for which are being completed.

LOMPOC. Santa Barbara Co., Cal.—City
 plans election to vote bonds for the erec-
 tion of new city hall

SAN RAFAEL. Marin Co., Cal.—Elec-
 tion will be held April 27 in American
 Valley Joint Elementary School District
 to vote bonds of \$8000 to finance erec-
 tion of new school. Previous election car-
 ried but proceedings were declared invalid.
 Trustees of the district are: Peter Beau-
 chi, L. C. McDonnell and E. J. Cunning-
 ham.

CORTE MADERA. Marin Co., Cal.—
 Proposal to issue bonds of \$25,000 to
 finance erection of new town hall was
 defeated by vote of 146 in favor and 136
 against. Two-thirds majority required
 to carry the proposition.

NATIONAL CITY. San Diego Co., Cal.
 Establishment of a new junior high
 school district was assured at election
 by a vote of 1052 to 238 in favor of au-
 thorizing the high school board of trus-
 tees to call an election to vote bonds for
 the erection of junior high schools at
 National City, San Ysidro and Chula
 Vista.

VENTURA. Ventura Co., Cal.—Elec-
 tion will be held May 15 in San Buena-
 Ventura School District to vote bonds of
 \$100,000 to finance erection of new
 schools.

Merced, Merced Co., Cal.—County su-
 pervisors sell \$25,000 bond issue of Los
 Banos School District for premium of
 \$4200; proceeds of sale to finance school
 improvements.

 erect a packing house at Highland on
 Pacific Ave., between Palm Ave. and

PRATT'S CONCRETE MIX

by Clarence
Sand Pratt

Tune—"It Ain't Gonna Rain No More"

Oh! We have with us this evening
 Our old friend Sandy Pratt,
 With crushed rock in his gizzard,
 And concrete in his hat.

Oh! He ain't gonna ship no more,
 no more,
 He ain't gonna ship no more
 Of his messed up rock and gravel
 To Bill Dean's lumber store.

SANDY PRATT is again.

AT RICHARDSON'S Springs.

IN BUTTE County.

WHERE THE Chico Rotarians.

ARE HOLDING.

THEIR ANNUAL birthday dinner party.

AND THE above song.

WAS SUNG.

AT THE 1926 party.

AND BILL Dean mentioned.

IN THE last line.

IS AT the head.

OF THE Diamond Match Company.

WHO SELL lumber (and sand).

LEE RICHARDSON owns the springs.

AND THEY say the water.

IS VERY beneficial.

ONLY YESTERDAY.

A FELLOW came here.

ON A pair of crutches.

AND THEY fell.

INTO THE spring.

AND THE crutches.

WALKED AWAY.

JIM TRANSPORTATION Rowray, Gen-
 eral Manager.

OF THE Sacramento Northern R. R.

IS "TRAFFIC Manager."

OF THE Sacramento Rotarians.

WHO ARE here.

IN VAST numbers.

SANDY STOPPED at Lincoln.

AND FRED Clark, President.
 OF THE Lincoln Rotary Club.
 AND WALTER Jensen, Past President.
 OF THE same club.
 ASKED SANDY.
 TO MAKE a speech.
 ABOUT SANDY'S clean sand.
 PRODUCED AT Prattrock (near Fol-
 som).
 MARYSVILLE AND Sacramento.
 PRATTCO (MONTEREY County).
 AND MAYHEW (Sacramento County).
 TOM KELLY of Chico.
 IS A "dry" goods man.
 SELLS LADIES dresses.
 AND NOT liquor.
 ANYWAY THE Rotarians.
 FROM SACRAMENTO.
 TO THE Oregon line.
 ARE HERE in droves.
 BUT SANDY.
 AS THIS goes to press.
 HAS NOT sold one carload.
 OF HIS sand or rock.
 ALTHOUGH SANDY is "rotating."
 WITH THE Rotarians.
 "I THANK you."

If Lee Richardson's springs go dry then
 the Rotarians of Northern California will
 cry. Sandy Pratt, president of the
 Pratt Building Material Company, pro-
 ducer of sand, rock and gravel, will be
 at the "Springs" again next "spring."

Church St. for Fred R. Leuschen, 70x 5 feet, hollow tile construction; cost \$5,000.

DEL NORTE COUNTY. Cal.—Park Schramm Co., Couch Bldg., Portland, Ore., at \$170,479 awarded cont. by State Highway Comm. to const. steel cantilever bridge consisting of two 114-ft. anchor arms, two 114-ft. cantilever arms and one 152-ft. suspended span; on conc. piers and about 1.16 mi. of rdwy to be graded. Bridge will be constructed over Smith River, about 8 mi. east of Crescent City. Eng. est. \$150,799.

SHASTA COUNTY. Cal.—Noble Bros., San Jose, at \$17,960 (eng. est. \$11,532) awarded cont. by State Highway Comm. to const. reinf. conc. bridge over Boulder Creek about 4 mi. north of La Alamo, consisting of one 8-ft. 8-in. open spandrel arch span and two 20-ft. 4-in. girder approach span.

DEL NORTE COUNTY. Cal.—Following bids received April 18 by State Highway Comm. to grade and surface with crushed gravel or stone, 7.3 mi. bet. Klamath River and Wilson Creek and const. four timber bridges:
Vanderheggan, Pearson & Logan, Medford, Oregon \$260,251
J. E. Johnson, Stockton 271,619
Henry J. Kaiser, Oakland 282,071
S. H. Palmer, San Francisco 288,297
Holdener Const. Co., Sacramento 316,308
Mercer Fraser Co., Eureka 342,245
Engineer's estimate 278,281

PLUMAS COUNTY. Cal.—Following bids received April 18 by State Highway Comm. to const. two reinf. conc. girder bridges, one across Rock Creek, 4½ mi. west of Westwood consisting of two 30-ft. spans and another across Bailey Creek 7½ mi. west of Westwood, consisting of one 36-ft. span and two 22-ft. spans:
Carl S. Herziger, 50 Leo Way, Oakland \$ 9,986
J. P. Brennan, Redding 12,134
M. A. Jenkins, Sacramento 12,291
R. C. McKenzie 13
Coolidge & Scott 13,429
Holdener Constr. Co., Sacto. 14
Engineers' estimate 13,524

LOS ANGELES. Los Angeles Co., Cal.—Following bids received April 18 by State Highway Comm. to grade 1.5 mi. bet. Arroyo Sequit and Los Alisos Creek:
Lewis Constr. Co., 429 So. Spring St., Los Angeles \$44,652
S. J. Hales, Santa Ana 46.7
S. W. Glien, Los Angeles 49,231
G. J. Boch 57,833
G. L. Ritchey 58,609
Sanders and Pearson 63,222
McCray Co. 66,955
John Buic 58,833
Kahn Lang Co. 66.7
Francesco & Ellington, Inc. 58,793
Nat S. Ross 63,516
Greenwall Parson, Inc. 63,687
George Mitchell Co. 70,636
J. J. Dam 64,848
Bert Calvert 61,570
F. W. Nighbert 57,329
Roche & Axman 59,000
James Martin 73,000
Engineer's estimate 53,791

FRESNO & MADERA COUNTIES. Cal.—Following bids received April 18 by State Highway Comm. to const. bridge over San Joaquin river about 1 mi. north of Herndon, consisting of four 160-ft. deck steel spans, two 80-ft. deck plate girder spans and one 64-ft. deck plate girder span on conc. piers with pile foundations:
Carl H. Petersen, 2023 Fresno St., Fresno \$188,734
R. E. Mieth, Portland, Oregon 195,516
Chas. & F. W. Steffgen, San Diego 198,182
Butte Constr. Co. 198,767
M. B. McGowan, San Francisco 207,959
Holdener Constr. Co., Sacto. 214,136
Keller Gist Co., Inc. 218,456
C. G. Green and L. Worrel 218,262
A. W. Kitchen, San Francisco 218,063
Ben C. Gerwick, Inc., S. F. 222,142
Rocca & Caletti, San Rafael 229,617
Engineer's estimate 206,052

IRRIGATION PROJECTS

OROVILLE. Butte Co., Cal.—Until May 8, 2 p. m., bids will be rec. by W. J. Munro, secy., Oroville-Wyandotte Irrigation District, to fur. 5,400 hm. ft. 12-in. conc. pressure pipe, also to lay, grade, trench, backfill, etc. Plans obtainable from secretary. See call for bids under official proposal section in this issue.

Larsen's Advance Construction Reports

Your silent salesman—issued every business day in the year—featuring work projected, bids wanted, bids opened and contracts awarded for every class of building; bridges, dams and harbor works; irrigation projects; U. S. Government work and supplies, street, highway and sewer improvements; water works; miscellaneous supplies and equipment, etc., etc.

Larsen's Advance Construction Reports are compiled by a staff of trained correspondents located in the more important business centers in Central and Northern California. Each and every correspondent knows his territory thoroughly and the men most concerned in it, namely, the architects, contractors and material dealers—who keep him or her informed of the latest developments in the construction field in his particular territory.

Larsen's Advance Construction Report Service is a special service compiled at a tremendous cost and yet is sold for a price within the reach of all among which the information should circulate. Each and every report is a prospect for business.

Write for sample copies or have our representative call and explain this service.

Official Proposals

NOTICE TO CONTRACTORS

(Armijo Union High School District—Solano County)

Notices hereby given that sealed bids will be received by the Board of Trustees of the Armijo Union High School District, Fairfield, Solano County, California, until 8 o'clock P. M., the 27th day of April, 1928, at the Armijo Union High School, for the erection and completion of new Shop Building at Fairfield, Solano County, California, according to plans and specifications prepared for the same by Cattman-Sahler-Stafford, the authorized architects.

Bids will be received for General Contract with alternate propositions.

Plans and specifications can be seen during office hours at the office of the Clerk of said Board at Fairfield, California, and may be seen at or obtained from the offices of the architects, 608 Plaza Bldg., Sacramento, California.

A cash deposit of \$25 will be required from all prospective bidders on all copies of plans and specifications loaned out, as a guarantee of the return of the same.

All bids shall be presented on blank forms which may be procured from the office of the architects.

Each bid shall be accompanied by a certified check on some responsible California bank for a sum not less than ten per cent (10%) of the amount of the bid, made payable to Mr. E. L. Dearborn, Clerk of the Board of Trustees, as a guarantee of good faith that the party to whom the contract may be awarded will, within ten (10) days after the award is made, enter into the necessary agreement and furnish the necessary bonds for the faithful performance of said work and in case the bidder to whom the contract is awarded fails to, or refuses to enter into said agreement, or to furnish said bonds, said check shall be forfeited to the School District, in the manner provided by law. The Board of Trustees will not accept a Bidder's bond in lieu of a certified check.

Each bid must be enclosed in a sealed envelope and addressed to E. L. Dearborn, Clerk of the Board of Trustees, Armijo Union High School District, and endorsed "Proposal for Construction of Shop Building."

The Board of Trustees expressly reserves the right to reject any or all bids and to waive any informality in any bid received and to continue the award of the contract at the pleasure of the Board.

By order of Board of Trustees Armijo Union High School District.

By E. L. DEARBORN,
Clerk.

NOTICE TO CONTRACTORS

(Administration Building—City of Oakland School District)

Office of the Secretary of the Board of Education of the City of Oakland.

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, until Tuesday, the 1st day of May, 1928, at 10:45 A. M., at which time said bids will be opened for the Grading of the Administration Building Site of the Oakland School District, located on the West side of Second Ave., bet. 14th and E-11th Sts., Oakland, California.

These bids shall be presented in accordance with plans and specifications for said work on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, 337 15th Street, Oakland, California.

On a deposit of Ten (\$10.00) Dollars, complete set of plans and specifications may be had by any bidder on application

to the Superintendent of Buildings at his office heretofore mentioned, and in each case shall be returned within ten (10) days after securing same, to the Superintendent of Buildings. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to the Board of Education of the City of Oakland and of Oakland School District, to be retained by said School District, as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award or to give bonds required for the faithful performance of the contract or any bond required by law. The amount of said check shall not be less than ten (10%) per cent of the amount bid, provided however, that in no case shall said check be required to be in excess of Five Thousand (\$5000.00) Dollars. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Tuesday, the first day of May, 1928, at 10:45 A. M., in the Board Room, 211 Second Floor of said City Hall, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items in such bids.

JOHN W. EDGE-MOND,
Secretary of the Board of Education of Oakland, California.

NOTICE TO BIDDERS

(Airway Beacons)

SEALED PROPOSALS, in triplicate, will be received in the office of the Chief Clerk, Department of Commerce, Nineteenth St. and Pennsylvania Ave., N. W., Washington, D. C., until 2 p. m., April 30, 1928, and then opened for establishing electric airway beacons and intermediate landing field equipment on the San Francisco-Seaside Airway and on the San Francisco-Blue Canyon section of the San Francisco-Salt Lake Airway. Blanks for submitting proposals may be obtained upon application to the Chief Clerk of the Department at the above address. Proposal No. 19430.

NOTICE TO CONTRACTORS

General Work

M., Tuesday, May 15, 1928, said bids then and there to be publicly opened and read, for furnishing all plant, materials, and labor required for the erection and completion of the General Work of the Single Story Group, Patton State Hospital, Patton, California, in accordance with plans and specifications therefor, copies of which may be obtained upon application to the Division of Architecture, State Department of Public Works, Forum Building, Sacramento, California. Plans and Specifications will be on file for examination at Room 1025, Sun Finance Building, Los Angeles.

The Single Story Group is a one story building with reinforced concrete walls, hollow tile partitions, cement floors, and tile roof.

Bids must be submitted on Proposed Forms prepared and furnished by the Division of Architecture.

Each bidder's bid made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works" in the sum of at least ten per centum (10%) of the amount of the bid, must be enclosed with each bid.

A deposit of twenty-five (\$25.00) dollar will be required on plans and specifications, the deposit to be returned immediately upon the return of the plan and specifications to the Division of Architecture at Sacramento, California, in good condition.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

All bids must be addressed to Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, and plainly marked on the envelope: "Proposal for Single Story Group, Patton State Hospital, Patton, California."

STATE DEPARTMENT OF PUBLIC WORKS, DIVISION OF ARCHITECTURE.

GEO. B. McDOUGALL,
State Architect.

E. B. MEEK,

Director of Public Works.

April 20-27, May 4-11.

NOTICE INVITING SEALED PROPOSALS FOR FURNISHING THE FOLLOWING EQUIPMENT:

Notice is hereby given that the Council of the City of Santa Cruz invites sealed proposals or bids for furnishing the following equipment to the City of Santa Cruz, to-wit:

A complete, operative, modern municipal pumping plant, consisting of Diesel engines, pumps, and all other necessary auxiliary equipment including pipes and valves to provide a capacity of six million gallons of water per twenty-four (24) hours at the present Crossing Street pumping station under physical and discharge pressure conditions now existing, which will remain unchanged at increased capacity. Bidders will include in their proposal adequate building and foundations, retaining wall and abutments in river, and additional filters to meet present requirements and chlorination apparatus for six million gallons. The capacity to be divided into two units.

All proposals to incorporate efficiency of engines and pumps recommended for the conditions and be accompanied with detailed drawings and specifications. Time being of vital importance, bidders will specify when equipment can be furnished and installed ready for operation. Bidders will state terms of purchase and payments.

The installation of the proposed equipment to be completed without in any way interfering with the present system that is or may be in operation to furnish water for the city needs.

Said proposals or bids will be received at the office of the City Clerk in the City Hall, Church Street, in the City of Santa Cruz on or before 9 o'clock in the forenoon of Monday, the 22nd day of April, 1928. Bids will be opened at 9:30 o'clock in the forenoon of said day.

All proposals or bids must be in writing, give total amount of bid submitted and must be accompanied by a certified check or bond for ten (10) per cent of the amount bid payable to the City of Santa Cruz.

The Council of said City reserves the right to reject any and all bids.

Dated: April 11, 1928.

S. A. EVANS,
City Clerk.

NOTICE TO CONTRACTORS

(Watsonville School District)

Notice is hereby given that sealed bids will be received and opened by the Board of Trustees of the Watsonville School District at 7 o'clock P. M., on the 30th day of April, 1928, at the Watsonville Union High School Building in Watsonville, California, for the erection and completion of a frame stucco school building known as the "Elm Street" School in said school district, and the erection and completion of additions to the "Rodriguez" School in said district.

That sealed bids will also be received opened by said Board of Trustees at 2 o'clock P. M. on the same day and as mentioned above, for the erection of a reinforced concrete school building known as the "Palm Avenue" School in said school district.

That all of the above mentioned buildings and additions are to be erected for the Watsonville School District, according to plans and specifications therefor prepared for the same by W. H. Weeks, authorized architect, employed by the Board, which have been adopted by the Board and are now on file with said Board of Trustees, reference to which plans and specifications is hereby made for a particular description of the work to be done.

That separate bids will be received for the erection of the different buildings and additions and for the heating on the different buildings, as follows:

General Contract, Rodriguez School.
Gas Steam Heating System, Rodriguez School.

Electric Heating System, Rodriguez School.

General Contract, Elm Street School.
Gas Steam Heating System, Elm Street School.

Electric Heating System, Elm Street School.

General Contract, Palm Avenue School.
Gas Steam Heating System, Palm Avenue School.

Electric Heating System, Palm Avenue School.

Gas Steam Heating System, Palm Avenue School.

That plans and specifications may be seen during office hours at the office of the architect, W. H. Weeks, Hunter-ultin Bldg., San Francisco, California, at the office of the Clerk of said Board of Trustees in the Watsonville Union High School Building, Watsonville, California.

That all bids shall be made out on blank forms furnished by the architect, and in strict accordance with the Notice to Bidders in specifications.

That bids will be received up to the time set for the opening thereof and each bid must be accompanied by a certified check on some responsible California Bank in a sum not less than five (5) per cent of the amount bid, made payable to H. A. Hyde, Clerk of the Board of Trustees of the Watsonville School District, as a guarantee that a contract will be signed within ten (10) days after award is made and that approved surety bonds will be furnished as required by law.

That each bid must be delivered in sealed envelope, and addressed to the Clerk of the Board of Trustees, and endorsed:

"Proposal for Elm Street School"
"Proposal for Palm Avenue School"
"Proposal for Rodriguez School."

That bids for the Elm Street and Rodriguez Schools may be enclosed in the same envelope.

That the Board reserves the right to reject any and all bids.
Dated: April 14th, 1928.

FRANK RODGERS,
EVA E. LUTHER,
H. A. HYDE,
Board of Trustees of Watsonville School District.

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Highway Building Sacramento, California, until 2 o'clock P. M., on May 9, 1928, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Plumas County, from Westerly Boundary to two and one-half miles south-west of Chester (H-Plu-29-A), about six and two-tenths (6.2) miles in length, to be graded and surfaced with crushed gravel or stone.

Glenn County, through Orland (H-3le-7-C), about one and one-tenth (1.1) miles in length, to be graded and paved with Portland cement concrete.

San Luis Obispo County, a reinforced concrete girder bridge across San Luis Obispo Creek 3 1/2 miles south of San

Luis Obispo (V-SLO-2-E), consisting of seven 38-foot spans on concrete pile bents, also retaining walls, slope paving and grading and surfacing approaches with waterbound macadam.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the District office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the District office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS.

C. H. PURCELL,
State Highway Engineer.

Dated: April 11, 1928.

NOTICE FOR BIDS

(Oroville-Wyandotte Irrigation District).

Sealed bids will be received by the Board of Directors of the Oroville-Wyandotte Irrigation District at the office of the Board, Oroville, California, until 2 o'clock p. m. May 8, 1928, for furnishing 5400 lineal feet of 10-in. concrete pressure pipe.

Also pipe laying, grading, trenching, backfilling, etc.

Contract will be let to the lowest responsible bidder. Plans and specifications can be seen at the office of the Board, Oroville, California.

W. J. MONRO,
Secretary, Oroville-Wyandotte Irrigation District.

NOTICE TO CONTRACTORS

Mechanical Work.

Sealed bids will be received by Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, up to 2 o'clock P. M., Tuesday, May 15th, 1928, said bids then and there to be publicly opened and read, for furnishing all plant, materials and labor required for the erection and completion of the Mechanical Work, Single Story Group, Patton State Hospital, Patton, California, in accordance with plans and specifications therefor, copies of which may be obtained upon application to the Division of Architecture, State Department of Public Works, Forum Building, Sacramento, California. Plans and specifications will be on file for examination at Room 1025, Sun Finance Building, Los Angeles, California.

Mechanical Work includes: Plumbing, Heating and Electrical Work. Separate bids will be received for "Electrical Work," and for "Plumbing and Heating." Combined bids will also be received covering all three branches of the work. Bids must be submitted on forms prepared and furnished by the Division of Architecture.

Cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," to the sum of at least ten per centum (10%) of the amount of the bid, must be enclosed with each bid.

A deposit of twenty-five (\$25.00) dollars will be required on plans and specifications, the deposit to be returned immediately upon the return of the plans and specifications to the Division of Architecture at Sacramento, California in good condition.

The Division of Architecture, State De-

partment of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

All bids must be addressed to Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, and plainly marked on the envelope: "Proposal for Mechanical Work, Single Story Group, Patton, State Hospital, Patton, California."

STATE DEPARTMENT OF PUBLIC WORKS, DIVISION OF ARCHITECTURE.

GEO. B. McDOUGALL,

State Architect.

E. B. MEEK,

Director of Public Works.

NOTICE TO CONTRACTORS

TREASURY DEPARTMENT, Office of the Supervising Architect, Washington, D. C., April 13, 1928.—Bidders are informed that the date for opening proposals for the construction of the N. S. new post office at Fallon, Nev., is postponed from 3 p. m., May 1, 1928, to 2 p. m., May 17, 1928. Not exceeding six sets of drawings and specifications will be furnished to general contractors on request, in the discretion of the supervising architect, provided a deposit of fifteen dollars (\$15.00) is made for each set. Deposits will be refunded on return of the drawings and specifications in good condition. Checks must be certified and made payable to the Treasurer of the United States. JAS. A. WETMORE, Acting Supervising Architect.

NOTICE TO PIPE MANUFACTURERS AND CONTRACTORS

(Terra Bella Irrigation District)

Notice is hereby given that the Board of Directors of the Terra Bella Irrigation District will receive bids or proposals until 10:30 A. M., on Tuesday, May 1st, 1928, for the following:

1. Furnishing f. o. b. Terra Bella 5000 feet of four inch No. 16 gauge riveted steel water pipe wrapped with soil proof covering. Alternate bids may be submitted for plain end O. D. casing or lap welded steel tubing, both for welded pipe lines and dipped.

2. For furnishing all the labor and materials necessary for digging 5000 feet of ditch for a pipe line in the town of Terra Bella, said ditch may be over or alongside or both of a water main now in use.

3. For furnishing all the labor and materials necessary for laying 5000 feet of four inch pipe line as above named.

All bids must be accompanied with a certified check for a sum not less than 5 per cent of the total amount of the bid.

All bids must state on the outside what the bid is for.

The Board of Directors reserves the right to waive defects, and to reject any or all bids, also to limit the amount of

work bid upon to a minimum of 60 per cent of the quantities named and a maximum amount of 135 per cent of the quantities named above.

TERRA BELLA IRRIGATION DISTRICT

EDWARD H. ROBINSON,

Secretary.

1928 EDITION

San Francisco Building Laws

Now Ready for Distribution

With the issuance of this 1928 Edition, the Building Ordinance Books heretofore published will be obsolete, inasmuch as many sections of the law have been amended and additional sections added.

The 1928 Edition contains all the revisions and additions to the code up to and including January 31, 1928.

In addition to the Building Laws, the 1928 Edition contains FIRE ORDINANCES as regards the construction industry—the ELECTRICAL ORDINANCES and RULES of the San Francisco Department of Electricity—the BILLBOARD ORDINANCE and other laws covering regulations concerning the construction interests.

UNSATISFACTORY YEAR REPORTED BY BRITISH COLUMBIA LUMBERMEN

An unsatisfactory year is reported by British Columbia lumbermen despite larger output and exports, states Consul Harold S. Tewell, Vancouver, B. C., in a report made public by the Department of Commerce. A larger production of lumber in 1927, they point out, brought \$3,087,000, or about \$2,000,000 less than the smaller amount the previous year.

Although about 64,000,000 less feet or a total of 2,853,702,462 feet of timber were cut and scaled in British Columbia last year, as compared with 1926 there was an increased output of manufactured lumber of about 28,000,000 feet. Also, export sales totaled 1,003,670,000 feet, or about 77,787,000 feet more than in 1926. Despite these two increases, the value of the output last year was smaller, attributed, it is reported, to the slump in lumber values.

In terms of operation, it is likewise doubtful whether 1927 was as profitable as the previous year. A total of 375 sawmills with an estimated daily capacity of 12,176 M feet of lumber were in operation, compared with 391 mills with a daily capacity of 12,962 M feet in 1926. There were 110 idle mills with a combined daily capacity of 2549 M feet, however, whereas in the previous year, 102 mills with a capacity of 1675 M feet were not in operation. With the exception of 1924 the capacity of idle mills was greater in 1927 than in any year since 1920.

Full importance of the timber industry in the economic life of the Province is evidenced in the fact that it accounts for one-third of the industrial payroll, which amounted to over 175 million dollars last year. Prosperity or depression in this leading industry, therefore, has a direct effect upon the commercial life of British Columbia.

BRICK RESEARCH WORK UNDER- TAKEN BY STANDARDS BUREAU

At the recent convention of the Common Brick Manufacturers' Association, George K. Burgess, director, Bureau of Standards, in a paper on "Industrial Research," outlined the work that the bureau is doing on common brick. According to Mr. Burgess, such matters as the quality of brick, the component materials and the properties of brick, such as strength, color, resistance to heat, sound transmission and porosity, are involved in much ignorance. To better this condition the ceramic division of the bureau with the help of an advisory committee representing the industry is studying some of these problems. Principally of interest to the manufacturers of brick are the bureau's current studies on the drying of clay, on several types of extrusion machines and augers and on the qualities of different clays and shales. With regard to the use of brick in building work, the bureau has completed its study of fire resistance.

Other studies under way include the examination of (1) factors governing transmission of moisture through brick walls, (2) factors governing adhesion of mortar to brick, (3) the acoustical properties of partition walls and (4) heat transmission qualities. Subjects for future study include the following: (1) Relation of the physical properties of brick and its absorption to its ability to resist freezing, (2) ability of walls to withstand lateral forces caused by wind and earthquakes (in which one of the most important factors is mortar adhesion), (3) the stiffening effect that brick walls afford to a building frame of steel or concrete, (4) the efficiency and possible field for reinforced brickwork and (5) the characteristics of different types of mason's mortars.—(Engineering News-Record).

PLUMBERS CONTEMPLATE EDUCA- TIONAL DRIVE FOR PUBLIC

An advertising campaign by the plumbing and heating industries bureau was the main topic of discussion before the Master Plumbers' Association of San Jose at their meeting April 18.

The object of the national campaign is to further the health of the country by having members of the plumbing trade lend them help in "making a health examination of the home," by checking over the plumbing and heating system of any house owner who may call upon them for such an examination, without obligation.

Officers of the San Jose unit elected for the coming term were: William Serpa, president; Herman Moltzen, vice-president; O. C. McDonold, treasurer; Charles A. Merritt, secretary; A. J. Peters, John Peabody, F. A. Hooker and J. Fisher of Snyder and company, members of the executive board.

Considerable interest is being shown by San Jose members in the coming state convention to be held in San Francisco May 14 to 17, with headquarters at the Clift Hotel. All members of the San Jose association have signified their intentions to attend.

BRICK IMPORTS UNDER 1927 RATE DURING FIRST TWO MONTHS OF 1928

Foreign brick (duty free) received at New York, which is the chief point of entry for this material, in the first two months of 1928 totaled 9,971,000, according to Engineering News-Record. The figure for this period a year ago is 11,716,000 or 14.8 per cent higher than this year. The 1926 figure for these two months is 9,938,000, according to the Section of Customs Statistics, Bureau of Foreign and Domestic Commerce. Common brick used in New York totaled 1,314,000,000 in 1926 and 1,280,000,000 in 1927. Of these, foreign brick amounted to 7.7 per cent in 1926 and 7.3 in 1927.

Belgian brick formed 79.9 per cent of the imports, Holland 19.5 per cent, with the remaining 0.6 per cent coming from the United Kingdom. For the whole of 1927 imports were as follows: Belgium 82.9 per cent, Holland 15.5, Norway 1, United Kingdom 0.5, and Denmark 0.1. In 1926 Belgium sent 70 per cent and Holland 30 per cent. Most of the Belgian brick is common, while the Holland shipments are principally face.

Belgian common brick sells for \$16.50 to \$17 per thousand delivered to job in New York, compared with the domestic price of \$17 to \$20. The price for Holland face brick is \$26 to \$27 per thousand delivered, compared with a minimum of \$29.50 per thousand for selected domestic face brick of the Colonial style.

IMPORTS OF DUTY-FREE COMMON BUILDING BRICK INTO NEW YORK

	1926	1927	1928
January	6,459,000	4,331,000	3,982,000
February	3,479,000	7,385,000	5,989,000

June	12,817,000	11,450,000
July	8,298,000	9,083,000
August	17,043,000	5,583,000
September ..	4,676,000	6,193,000
October	9,644,000	4,996,000
November	15,369,000	4,245,000
December	8,119,000	9,688,000
	101,946,000	94,026,000

MARCH BUILDING CONTRACTS AVERAGE \$6.70 SQ. FT.

The square-foot cost of all buildings placed under contract in March averaged \$6.70, compared with \$7.40 in the whole of 1927 and \$7.20 in the year 1926, according to figures compiled by Engineering News-Record, New York. The most expensive type is banks, with theatres next. Apartments and dwellings cost about the same and are at the foot of the list. Two-family houses cost 14 per cent less per square foot than did one-family. Prices for ten types in March are given below.

Banks	\$18.80
Theatres	10.40
Hospitals	8.30
Hotels	8.20
Public	8.00
Office	7.85
Industrial	6.90
Schools	6.25
Dwellings	4.90
Apartments	4.75
All buildings	6.70

Control of Concrete Production on the Twelve Pre-Cast Segments of the Oakland-Alameda Estuary Subway

By JOSEPH A. KITTS

Cons. Concrete Technologist, Kitts and Tuthill, San Francisco

The Oakland-Alameda Estuary Subway, being built by Alameda County, California, and now nearing completion, is one of the outstanding engineering achievements of the decade. It is the first pre-cast underwater tunnel, the largest subaqueous concrete tube in the world.

The Estuary Subway is a vehicular tunnel connecting the cities of Oakland and Alameda, California. It lies under the water and ship channel of the Oakland Estuary. It is 3,500 feet long from portal to portal and 4,500 feet including the open approaches. The outside diameter is 37 feet and the bore 32 feet, the reinforced concrete shell being 2½ feet thick. It will accommodate a 24-foot roadway and two 3½-foot sidewalks. Ventilating ducts are provided above and below the roadway space. Twelve sections 293 feet long, weighing 500 tons each, were cast at Hunters Point Dry Dock, then floated across San Francisco Bay and finally sunk into place. For the completed tube approximately 75,000 cubic yards of concrete were required, and 5,900 tons of reinforcing steel.

Concrete Proportioning Control

The cylindrical tapered, closely reinforced shell required concrete of good workability, flowability and cohesion in the fresh mix; the final location of the structure in sea water demanded that the concrete be dense, impermeable and, of course, of ample strength. With due consideration of these conditions and requirements, ample cement was specified by the Engineer and provisions were made for controlling the testing, proportioning, mixing and placing of the concrete. For the shell, two barrels of cement per cubic yard of concrete in place and a minimum compressive strength of 2,500 lbs. per sq. in. at 28 days were required. For the roadway slab, one and one-half barrels of cement and 2,000 lbs. per square inch compressive strength were required.

The aims in the control of the concrete production were, to maintain:

- The required strength (as a minimum);
- the essential workability, flowability and cohesion in the fresh mix;
- the highest possible density and impermeability under the conditions; and
- a uniform concrete with a minimum of honeycomb, seams between pours, and shrinkage cracks.

New developments in methods of aggregate and concrete testing, proportioning and production control were employed. These comprise:

- A comprehensive physico-mathematics of concrete materials and mixtures;
- Coordination of the tests for the various physical characteristics of aggregates and coordination of aggregate, aggregate mixture and concrete mixture tests;
- Coordination of field and laboratory measurements by actual, dry-rodged, loose-measured, and inundated volume, and by weight;
- An algebraic method of combining any number of sizes of aggregates for uniform grading of any coarseness modulus, proportioning by size and absolute volume of particles;
- Coordination of the fundamentals of the various theories of proportioning concrete mixtures; and
- Establishment of constant technological control as a daily routine of the concrete manufacture.

These are comprehensive subjects and only a general outline of the aggregate testing and aggregate and concrete proportioning methods will be given.

Laboratory Maintained

A concrete laboratory was maintained at Hunters Point. Preliminary research tests on each of the aggregates and of aggregate, mortar and concrete mixtures,

varying and grading, fineness modulus and consistency for two cement contents (1.5 and 2.0 bbl.) to determine the strength, density, water-cement ratio, weight, cement-space ratio, filler-voids relations, etc. One man-hour of advanced laboratory control was maintained for every 10 cubic yards. Routine tests, of aggregates as received, were made to determine specific gravity, density, fineness modulus, grading, moisture, bulking, absorption and content of silt, organic matter and inferior particles. Calculation and readjustment of proportions of aggregates and water were made as required by natural variations in the grading, density, moisture, absorption and bulking of the individual aggregates as received. A laboratory duplication was made of each change of proportions to check the physical characteristics expected for that grading, cement and water content. Routine slump, wash, and compression tests were made for each pour.

Aggregate Test Methods: The new features of the procedure of testing aggregates are the "Weight-Volumetric" Method of measurement, the regular use of a full container, and the co-ordination of measurements. The procedure is as follows:

- | (Measurement) | (Weight-Volumetric Measurement) |
|---|---------------------------------|
| (a) Weigh water filling container | (1) |
| (b) Weigh loose-moist aggregate filling container | (2) |
| (c) Dry (b) and weigh | (3) |
| (c) Make standard sieve analysis | |
| (c) Make standard silt test | |
| (c) Make standard organic matter test | |
| (d) Weigh dry-rodged aggregate filling container | (4) |
| (e) Weigh (d) inundated | (5) |
| (e) Allow (e) to stand three hours, drain, blot and weigh | (6) |

- (Calculations)
- (f) Apparent density of dry-rodged aggregate = $\frac{a-e+d}{a}$

- (g) App. Sp. Gr. of aggregate particles = $\frac{d}{fa}$

- (h) App. Density of loose-moist aggregate = $\frac{cf}{d}$

- (i) Weight of moisture to wt. of dry aggregate = $\frac{b-c}{c}$

- (j) Bulking of dry-rodged volume by moisture and loose measurement

- $$= \frac{d}{c}$$

- (k) Volume of moisture to dry-rodged volume = $\frac{ca}{d(b-c)}$

- (p) Relation of proportion of moisture by volume of dry-rodged aggregate to proportion by weight in the corresponding loose-moist aggregate = $k/i = a/d$

- (m) Weight of dry-rodged aggregate per cubic foot = 62.4 g f

- (o) Weight of water absorbed to weight of dry aggregate used = $(e_1-d)/d$

- (o') Vol. of water absorbed by apparent volume of aggregate = $g/(e_1-d)/d$

The (o) measurement provides a check for the standard container and also makes it possible to use a bucket or other suitable vessel of unknown volume in case of need.

Results of Aggregate Tests: A fine and coarse sand were tested by us at the dealer's before each delivery, and premixed by him in proportions determined

by these tests. Two sizes of rock were premixed in the same manner. The materials varied somewhat in physical character with each delivery. Typical physical characteristics of the sand and rock as received at Hunters Point, were as follows:

	Sand	Rock
App. Density (dry rodged)	0.663	0.5
App. Sp. Gr.	2.654	2.6
Moisture (by absolute vol.)	0.136	0.0
Absorption (by absolute vol.)	0.04	0.0
Bulking of dry-rodged vol.	1.245	1.0
Fineness Modulus	3.136	7.3
Discolored rock		0.0
Inferior rock		0.0

Typical gradings of the aggregates received are as follows:

Sieve No.	Per Cent Retained Sand	Per Cent Retained Rock
100	97.9	100.0
48	82.6	99.9
28	54.7	99.8
14	43.2	99.6
8	29.2	99.5
4	6.0	97.6
3/4"	0.0	86.0
3/4"		47.6
1 1/2"		0.0
Fineness Modulus	3.14	7.30

New Method of Grading Aggregate

An algebraic method of grading three or more sizes of aggregates for practical uniformity of any fineness modulus, as used on this work, should be of considerable interest to those familiar with the graphical cut and try method of determining proportions for uniform grading as developed by William Barnard Fuller, M. Am. Soc. C. E. (See "The Laws of Proportioning Concrete," p. 67, Vol. LL, Transactions, Am. Soc. C. E.)

The new method used on this work combines the fineness modulus principle with the grading equation $r = 1 - (d/D)^n$ in which (r) is the proportion by absolute volume retained by a given screen opening of (d) inches, (D) is the maximum size of aggregate and (n) is an exponent. A grading of any desired fineness modulus is possible by controlling the value of (n). The practical values of (n) vary from 0.45 to 0.60, increasing with the cement content and fineness modulus. When (n) is 0.5 the curve is a parabola corresponding to Fuller's theoretical grading. From this curve is deducted a weight of sand equal to the weight of cement used, thus increasing the fineness modulus with the cement content but losing a measure of uniformity.

The writer's method is to select the maximum desirable fineness modulus for the condition of character of aggregate, cement content and workability, and find the corresponding value of (n).

The desirable fineness modulus for Class A concrete was found in the preliminary tests to be 6.00. The grading equation for F.M. = 5.99, $D = 1\frac{1}{2}"$, is $r = 1 - (d/1.5)^{.59}$ and the grading is as follows:

Sieve No.	Proportions Retained Mixed Agg.	Sand (r-r')/1-r'
100	.9550	.8556
50	.9340	.7882
30	.9032	.6893
16	.8564	.5392
8	.7884	.3209
4	.6884	.0000
3/4"	.5399	
3/4"	.3217	
1 1/2"	.0000	

Fineness Modulus 5.99 3.19
r' is the proportion of coarse aggregates.

The fineness modulus of the coarse aggregate is determined by proportion to be $5.99 - 3.19 (1-r') = 7.25$.

The fine and the coarse aggregates were accordingly premixed for the ideal fineness moduli of 3.19 and 7.25, respec-

the dealer accomplishing this generally with satisfactory accuracy.

Basis of Concrete Proportioning: Uniform grading of particles by diameters and absolute volumes with an absolute volume of cement to a unit volume of concrete and an absolute volume of mixing water to a unit volume of cement, was used as an exact basis of mixture. As an example, the following is a typical basis of mix for Class A concrete (assuming one cubic yard):

absolute volume of cement, $2 \times 1 \times 0.455 = 3.88$ cu. ft.
 mixing water $2 \times 1 \times 0.80 = 6.40$ cu. ft.
 absolute volume of aggregate (graded 10 to 20) $1 - (0.1/1.5) = .56$.
 (Cement) (Water)
 — 3.88 — 6.40 = 17.56 cu. ft.

with aggregates as given preceding (a hypothetical case), the absolute volumes of fine and coarse aggregates are determined from the fineness moduli and total volume of aggregates as follows:

$$\frac{56 \times (7.3 - 5.99)}{(7.3 - 3.14)} = 5.52 \text{ cu. ft. sand}$$

and
 $56 - 5.52 = 12.03$ cu. ft. rock.
 mixing water, correcting for moisture content and absorption of the individual aggregates, is:
 $10 - 5.53 (0.136 - 0.04) = 12.03 (0.014 - 0.025) = 6.00$ cu. ft.

the proportions, measuring aggregates by loose-moist volume, are:

Loose volume
 Cement 2 bbl.
 Mixing water 6.00 cu. ft.
 Sand (5.53/0.663) 1.245 = 10.4 cu. ft.
 Rock (12.03/0.576) 1.069 = 22.3 cu. ft.

should be kept in mind that these calculated proportions are correct only in as long as the characteristics of the aggregates remain as given and that about one man-hour of highly efficient laboratory control for every ten cubic yards is necessary to keep up with the natural variation of the aggregates.

the characteristics of the usual Class A and Class B mixes were as follows:

	Class A	Class B
Fineness modulus	5.9 to 6.1	5.8 to 6.0
Cong. n	0.54 to 0.58	0.52 to 0.56
Els. Cement per cu. yd	2.00	1.50
Water-cem. ratio	0.80 to 0.84	0.90 to 0.94
See Mix, sks. cement to		

u. ft. dry-rodded agg. 1:3.07 1:4.32
 Ins. 0.83 to 0.87 0.82 to 0.86
 Trial proportions for 1 cu. yd:

Cement, sacks	8	6
End, loose-moist	11.4	12.7
Rock, loose-moist	21.3	22.1

Compression Tests: One or more samples of 4 to 6 compression specimens was taken of each pour. Where 6 specimens were taken, two were turned over to the contractor for independent testing. The specimens were tested at 2, 3, 7 and 28 days and some at other ages.

In view of the erratic nature of compression tests and the law of probability of error in measurement, the probable length of the samples was determined by taking the average of the following three determinations:

- (1) The 28 day strength as measured;
- (2) The 28 day strength indicated by the 7-day strength in accordance with the U. S. Bureau of Standards formula, $S_{28} = S_7 - X \sqrt{S_7}$, (X having been determined as 27.7);
- (3) The 28 day strength as indicated by any two strengths at ages greater or less than 28 days as determined by the semi-log rate formula,

$S = k \log a + c$, in which (S) is strength at any age (a) in days and (k) and (c) are constants for the particular sample.

Analyses of 50 samples of Class A and 50 samples of Class B show the following results:

Compressive strength at 28 days (lbs. per sq. in.)

	Class A	Class B
Minimum	2965	1980
Average	3715	2725
Maximum	4415	3390

0% between 3240 and 4415 2240 and 3390
 5% between 3445 and 4415 2460 and 3390
 10% between 3775 and 4415 2670 and 3390
 5% between 3965 and 4415 2950 and 3390
 0% between 4200 and 4415 3130 and 3390

Assuming that the lower 10% strengths of samples are wholly due to the usual diverse errors of compressive tests, the minimum indicated strengths at any age,

in any part of the concrete, based on the highest of the lower 10%, are expressed by the following equations:

$$\text{Class A: } S = 2074 \log a + 248.$$

$$\text{Class B: } S = 1794 \log a - 356.$$

This indicates that the probable minimum strength of the concrete in the shell, at age of 100 days, is about 4400 lb. per sq. in. and that in the roadway slab is about 3200 lb. per sq. in.

Personnel
 Alameda County personnel concerned with the concrete production are as follows: George A. Posey, chief engineer; Charles Derleth Jr., consulting engineer; Lochiel M. King, construction engineer; Joseph A. Kitts, concrete technologist; Richard Barry, assistant concrete technologist; George F. Wright, assistant concrete technologist; J. Neilson, field engineer; H. S. MacManaman, concrete inspector; O. R. Bosso, concrete inspector.

The California Bridge & Tunnel Co., San Francisco, are the contractors: A. J. Crocker, president; Harry Lesser, secretary-treasurer; Francis Betts Smith, consulting engineer; D. E. Root, superintendent (Alameda and Oakland); A. A. Horwege, superintendent (Hunters Point).

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco, (Phone Sutter 1684).

R-1608-S SUPERINTENDENT OF BUILDING & GROUNDS, prefer married man about 35 with pleasant personality and some institutional experience for general supervision of buildings and grounds of resort open all year. Must be willing to carry responsibility and capable of attending to various details in connection with maintenance, repair and operations of low pressure boilers, water heaters, piping, plumbing, wiring and automobiles. Salary \$1800 year and partially furnished house. Apply by letter. Location, California.

X-4630-R-1552-S SALES ENGINEER, preferably technical graduate about 35, with sales and construction experience to estimates and detail structural steel and ornamental iron work for fabricating shop. Some travelling. Apply by letter, giving references and photograph. Salary about \$250 a month to start. Location, Kansas.

R-1597-S SALES ENGINEER, to develop the sale of wire rope for logging operations. Prefer a man about 32 with sales experience and some acquaintance with this trade. Travelling. Salary and expenses depending upon experience. Headquarters, San Francisco.

R-1563-S DETAILER AND ESTIMATOR, prefer C. E. graduate under 30, with some drafting and construction experience and sales personality to detail reinforcing steel. Salary about \$200. Permanent. San Francisco.

ADOPTS BUILDING CODE

The recently completed Building Code of Port Chester, N. Y., follows the arrangement recommended by the Building Code Committee of the Department of Commerce for use in the case of small communities.

Employing this arrangement avoids omission or duplication of items and the requirements are presented in a manner which represents the mature opinion of experts on the subject. Uniform methods of presenting requirements are generally admitted to same architects and contractors much time and energy. The arrangement recommended by the Committee is contained in the publication, "Recommended Practice for Arrangement of Building Codes," which may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C., for 10 cents per copy.

PATENTS

Granted to Californians as reported by Munn & Co., Patent Attorneys

Francis H. Hunt and Frank N. Ropp, of Los Angeles. **APPARATUS FOR FORMING MOLDS FOR COLUMNS WITH BASES**. This invention relates to the art of forming concrete foundation columns and more particularly to a novel method of an apparatus for forming a mold for concrete column, the column having a base formed integral therewith at the lower end. The inventors assign their patent to Raymond Concrete Pipe Company.

William Midgley, of Berkeley. **LEVELING SQUARE**. This provides a tool which will be better adapted to perform the required functions as may be necessary in construction work, than are the tools devised before the needs of modern efficiency methods of construction were known.

Robert M. Strong, of Los Angeles. **SPRAY NOZZLE**. The primary object of this invention is to provide a nozzle which may be mounted on a corner of such a structure and which will effectively produce vertically descending water sprays in the form of vertical walls.

George F. Voight, of Oakland. **WIRE FASTENER**. A further object of this invention is the provision of a spacing element formed of an oblong strip of sheet metal bent to form a triangle, one flat side of which is adapted to seat against the wall sheathing, and one corner thereof adapted for supporting the wire lath. Mr. Voight assigns his patent to Economy Products Corp.

William E. Rawlings, of near San Jose. **JACK**. This invention relates to a device for raising a disc plow or similar implement from the ground whereby to permit rotation of its axle and sharpening of the discs.

ENGINEERING SYMBOLS TO BE STANDARDIZED

Approval of mathematical symbols as American Standards has just completed the first step in a program of unification of the scientific and engineering symbols and abbreviations used in engineering and industry, under the auspices of the American Engineering Standards Committee. The confusion resulting from variations in symbols used in different publications, reports and tables, led to the initiation of a project of unification by the Standards Committee early in 1923. The work has been progressing since that time, with 14 national organizations participating.

The approved mathematical symbols include those for arithmetic and algebra, elementary geometry, analytic geometry, trigonometric and hyperbolic functions, calculus, special functions, and vector analysis. The effort was made to select from symbols already in use those which are more clearly understood and least likely to lead to confusion with other symbols.

Professor E. V. Huntington of Harvard University, representing the American Mathematical Society, was chairman of the Mathematical Symbols sub-committee. This sub-committee is part of the Sectional Committee on Scientific and Engineering Symbols and Abbreviations of which Dr. J. Franklin Meyer of the Bureau of Standards is chairman. The Sectional Committee includes other sub-committees on symbols for hydraulics, symbols for heat and thermodynamics, symbols for aeronautics, navigation and topographical symbols, electrotechnical symbols (including radio), symbols for photometry and illumination, and symbols for mechanics, structural engineering and testing materials.

THE OBSERVER

What He Hears
and Sees
On His Rounds

Under the toll bridge is quite popular with the American motoring public, and that even a rate increase does not reduce travel is revealed in the March statement of traffic passing over the Dumbarton Bridge, which links the San Francisco and Alameda County shores across San Francisco Bay. In March, 1927, when the bridge was relatively new, 30,621 automobiles and trucks passed over the span. Last March the total number of automobiles and trucks which used Dumbarton was 29,118, an aggregate decrease of 1506 cars. Although the toll charges for automobiles was increased from 30 cents to 40 cents on March 1, by order of the San Mateo Board of Supervisors, no permanent falling off in traffic was recorded. The actual decrease was due to seven days of continuous rain, a rain which fell with such force that both the Southern and Northern portions of the states suffered thousands of dollars worth of loss. Analyzing the figures of the Dumbarton Highway Bridge Company from another angle it is seen that although the number of automobiles passing over the bridge in March, 1928, showed a decrease of 17 per cent, the increase in truck traffic was 88 per cent. And on March 1 the charges for trucks was increased 10 cents a ton.

At its triannual meeting at San Jose March 30 and 31 the Millwork Institute of California endorsed the proposed conference by the millwork industry with the Federal Trade Commission and the formation of the proposed National Millwork Association. The recommendation of H. T. Didesch that local branches of the institute supply the domestic science departments of schools and colleges with properly designed built-in kitchen equipment was approved. At the next meeting, which will be held in Los Angeles July 19, and 20, a complete plan for plant certification will be presented for adoption. The millwork schedule will be completed by a committee composed of representatives of the following firms: Hammond Lumber Co., Pacific Mfg. Co., Frank Graves Sash, Door & Mill Co., Redwood Mfrs. Co., Tilden Lumber & Mill Co., Fresno Planing Mill and Boyd Lumber & Mill Co. of Santa Barbara.

A new era in the building industry—a new era of co-operation—began April 11 in Chicago when 140 representatives of 40 groups in the building field organized and voted to incorporate the Home Modernization Bureau of the National Building Industries. A sum of money sufficient to get the work under way immediately was pledged. Headquarters will be opened in Chicago. The immediate object of the Bureau is the rehabilitation of the old home. Speakers at the conference brought out the fact that the building industry has in the used home a business opportunity as great as, if not greater, than that afforded by post-war construction. Speakers also pointed out the significance to the building industry of this meeting in which for the first time plans were made for a united, co-operative effort of all industries interested in home building.

Ludwig Hansen, San Francisco builder, has filed a voluntary petition in bankruptcy in the United States District Court setting his liabilities at \$27,795 and assets at \$5650. His wife, Mary P. Hansen, filed an identical petition.

Under the auspices of the Associated General Contractors of America a conference was held at Cleveland on April 2 to further consider the subject of in some way providing a working agreement between the general contractors and subcontractors throughout the country for an open understanding between the several branches of the building industry and for the further purpose of uniting the entire construction industry in the United States in some form of an organization for the protection and advancement of their mutual interests. The Conference was held at the Hotel Cleveland and lasted all day, an adjournment being taken for further consideration of the matter at which representatives of all branches of the industry will be invited to attend and participate.

Boards of school trustees and city boards of education in California have power to buy land and erect school buildings without an expression of opinion by the electorate, Frank English, deputy attorney general, rules. Pasadena school district authorities had called attention to section 1698 of the political code providing that school boards shall have power to buy land and build schools when they are directed to do so by a vote of their districts. This, they said, would curtail development of some districts in Los Angeles county. Special district taxes provided by other sections of the political code furnish funds for emergency purchases, English ruled.

Literally millions of tons of mud shells will be purchased from the state of Texas and used in the manufacture of a patented, waterproof cement, under a contract entered into with the state by California, Wyoming and Texas interests, according to word from Port Aransas. Industrial sites with a total frontage of 2000 feet on Harbor Island, just inside the government jetties at Port Aransas and on the ship channel which leads to Corpus Christi, have been acquired. A large plant will be built at once to manufacture the product for export.

Formation of a \$10,000,000 holding company for consolidation of 75 per cent of the lumber mills of the Grays Harbor country was assured at a meeting of representatives of the various sawmills at Aberdeen, Wash., April 24. The announcement was made by Clifford M. Weatherwax, San Francisco, owner of the Aberdeen Lumber and Shingle Company, and a leading figure in the Pacific Coast lumber industry.

Dr. Otto Freyermuth of San Francisco heads a group of San Francisco capitalists seeking a franchise from the Contra Costa County Supervisors to construct a toll bridge over Carquinez Straits. The application will be considered June 4. The structure will be of the suspension type, approximately 3200 feet in length, according to plans of Robert Fowler, New York engineer, and will cost \$3,000,000.

Rabbi Silver of Cleveland advocates the passage of a law providing for unemployment insurance. He says Germany has 18,000,000 working men insured and that England has 12,000,000. He also favors the establishment of U. S. Labor Exchanges to supply jobs for the unemployed.

Simplified Practice Recommendation No. 72 of the United States Department of Commerce has been issued by the Bureau of Standards, giving all the standard nomenclature and dimensions types for solid section steel windows. The recommendation went into effect in September, 1927, but has just been published. The first meeting of the manufacturing committee was early in 1926, at which time a committee was appointed to make a survey of current practice within the industry. A conference was held April 28, 1927, and the recommendations reducing number of varieties manufactured by 7 per cent was adopted. It was pointed out that the remaining 7 per cent of varieties covered 90 per cent of the demand.

Herbert Benjamin, chief bridge engineer for the Southern Pacific Railroad, preparing plans for a \$10,000,000 railroad bridge over Carquinez Straits, San Francisco Bay, to carry the Southern Pacific main line tracks to Portland and Ogden. Trains now leaving the San Francisco Bay district for the East and Pacific Northwest are now carried across straits on train ferries.

W. A. Johnstone, president of California State Civil Service Commission, announces that, because of resignations and a greatly increased construction program, an urgent need exists for men who have had executive experience in highway engineering work. The positions to be filled occur in the division of highways and range in salary from \$1,000 to \$400 a month. Full information may be obtained by communicating with the office of the commission at Sacramento. Applications will be accepted until May 16th for the most advanced grade and until May 25th for the other positions.

The National City Company has acquired substantial holdings in United States Realty and Improvement Company, it was learned recently. H. B. Black, former president of George Fuller Company, one of the largest building organizations in the country and most of whose stock is owned by U. S. Realty, has been elected president and chairman. The directors has approved contracts taken by the Fuller Company, which aggregate more than \$12,000,000.

The annual meeting of the Committee on Wood Utilization of the Department of Commerce has been called for May 4 in the Commerce Building, Washington, D. C. This meeting will follow a luncheon conference called by Secretary Hoover for May 3-4, so that representatives of the various branches of the lumber industry may gather simultaneously. Two half-days sessions will be devoted to discussion of the wood utilization committee's program by the principal groups of producers, manufacturers, distributors and consumers comprising the committee.

A book of reprint articles covering number of the important drilling jobs in 1927 was recently issued by the Ingersoll Rand Co., 11 Broadway, New York City. The book was issued to fill demands of miner owners, contractors and quarrymen for descriptive data of recent important projects. Copies will be furnished on request to any of the company branch offices or to the main office in New York.

TRADE NOTES

By cities Steel Products Co., capitalized for \$50,000, has been incorporated in an Francisco. Directors are: O. T. Baer, M. C. Smith and A. D. Duncan.

Specific Electric Manufacturing Co. of San Francisco has been incorporated with a capital stock of \$1,000,000. Directors are: C. J. Goodcell, A. B. Prothro, Helen R. Kalisher, A. Terkel and Dorothy F. Taylor.

W. & S. Lumber Company of Santa Clara county, capitalized for \$250,000, has been incorporated. Directors are: E. I. Dean of Mountain View; M. L. Smith, Los Altos and Ralph Evans of Milfield. Plant headquarters will be maintained at the junction of El Monte Ave. with the main San Francisco-San Jo Highway.

Stewart Manufacturing Co., 4069 Hollis St. Emeryville, announces change of address of the Stewart Hardware Specialties Division of the Parker Regan Co. to 593 Market St., San Francisco.

Albion Hardware Co., of Santa Barbara, recently organized, has purchased the stock, business and assets of the Flor Hardware Co., at 1020 Estado St., Santa Barbara, and will carry a complete hardware line. Members of the company are: Irving L. Newton and John A. Osberry, vice-president and treasurer, and Thos. B. Webb, formerly connected with Taylor company.

J. S. Phillips, president of Devoe & Reynolds Company announces that negotiations have been completed for the purchase of the Peaslee Gaubert Company, Louisville, Ky., said to be the largest manufacturers of paint, varnish and lacquer in the South. The transaction includes physical assets, good will, trade marks and its paint, varnish and lacquer business.

Steel framing for dwellings and other use of small buildings is described and illustrated in a handsomely bound booklet issued by the Steel Frame House Company of Pittsburgh, Pa., a subsidiary of the McCintie-Marshall Corporation. Issuing the booklet to the public, E. Millard, president of the Steel Frame House Company, said: "Every detail in the design, workability and economic practicability of this new system has been carefully and logically worked out and we can say without fear of contradiction that steel framing for dwellings will be the modern method of construction."

C. L. Johnson, formerly of New York City, succeeds Mark Parent, resigned representative of the Atlas Portland Cement Company of Chicago, with headquarters in San Francisco. Mr. Johnson's territory will cover that section of the Pacific Coast north of Bakersfield to the Canadian Line.

Truscon Steel Co., Youngstown, Ohio, has appointed three new vice-presidents:

I. Auten has been made vice-president in charge of sales in the standard building division. Under his charge will be sales of structural steel, steel decking and transmission structures. M. Clark has been made vice-president in charge of sales of the steel window division, with which he has been identified for the last nine years. C. D. Loveland, formerly manager of the Pittsburgh District, is made vice-president of headquarters at Newark, N. J., to be in charge of the distribution in that state.

ALONG THE LINE

California Civil Service Commission announces examinations for the following positions, applications to be filed by May 15: Mechanical engineering draftsman, Grade 3, salary \$170 to \$230 a month; assistant mechanical engineer, Grade 4, \$235 to \$280; junior estimator (building), Grade 3, \$170 to \$230; architectural draftsman, Grade 3, \$170 to \$230; senior architectural draftsman, Grade 4, \$235 to \$280; architectural designer, Grade 5, \$285 to \$350. Examinations for building construction positions, applications to be filed by May 15, are also announced as follows: General foreman on building construction, Grade 4, salary \$190 to \$240 a month; superintendent of building construction, Grade 5, \$250 to \$300.

Fred C. Hermann, San Francisco consulting engineer, has been named by the Los Angeles City Council to a board of three engineers to make an inspection of all municipal water dams. Others appointed to the board, according to press dispatches, are A. J. Wiley of Boise, Idaho, and C. H. Paul of Dayton, Ohio. Wiley served as chairman of Governor Young's commission to investigate the cause of the St. Francis dam collapse.

Architect Wm. H. Weeks, Hunter-Dunlin Bldg., San Francisco, announces removal of his San Jose office from 246 S-First St., to Rooms 819-820 Bank of Italy Bldg.

Edward G. Sheibley has resigned from the position of consulting engineer and superintendent of safety, California Industrial Accident Commission, and has opened offices in the Balboa Building, San Francisco, as consultant in accident prevention and industrial management. Prior to service with the Accident Commission, Mr. Sheibley was successively sanitary engineer for the U. S. Public Health Service, hydraulic engineer for the California Department of Public Works and director of the Bureau of Housing and Sanitation.

W. H. Lynch, formerly district engineer U. S. Bureau of Public Roads, at Omaha, Neb., has been appointed district engineer for district No. 1, embracing Oregon, Washington, Montana and northern Idaho. Mr. Lynch succeeds C. H. Purcell, formerly head of district No. 1, who recently accepted the position of California state highway engineer. Mr. Lynch, a graduate of Lehigh university, has been with the Bureau of Public Roads for the past fifteen years.

The "Blue Book" on Solid Section Steel Windows Simplified Practice Recommendation No. 72, has been received from the Government Printing Office. This recommendation, which became effective on September 1, 1927, reduced the varieties from 42,877 to 2244. Copies of the printed recommendation may be purchased from the Superintendent of Documents, Government Printing Office, Washington, D. C., at 25 cents per copy.

Miss Emma Trotokaja only woman student in the University of California College of Engineering, recently completed four years of engineering study with an excellent scholarship record. Last week she married Derrick H. Lehmer, son of Prof. Lehmer of the university, and today are on their way to Siberia for a honeymoon trip.

HERE — THERE —
EVERYWHERE

With the inauguration of the five-day week by the Bakersfield Carpenters' Union on April 9, and by the bricklayers on April 1, six of the Bakersfield building trades unions are now enjoying the double week-end holiday. Painters, plumbers, electricians and plasterers have been working but five days a week for some time. The change from five and a half days was put through without opposition from the contractors affected, and all parties concerned are well satisfied with the new system.

Master Plumbers' Association of Sonoma County held a banquet at the Howard Inn, Petaluma, April 18. Park A. Van Bebber of Petaluma, president of the association, presided. L. Cruse of Oakland, vice-president of the state association, and Edward Timmons of Richmond, were the principal speakers.

Sixteen members of the Master Plumbers' Association of the central coast cities at a meeting in Salinas April 21 elected delegates to attend the State Convention of the association to be held in San Francisco May 13-17. Towns represented at the meeting were Monterey, Santa Cruz, Watsonville, Gilroy Hollister, King City, Soledad, Gonzales and Salinas. President B. E. Underwood of Salinas presided. One delegate was chosen to represent each town.

Virtually every member of the Monterey Peninsula Builders' Exchange attended a banquet and get-together meeting April 17 at the Flor de Monterey Restaurant at Monterey. W. A. Edwards, secretary of the Monterey County Industrial Association and M. J. Murphy, Carmel contractor, were the principal speakers at the banquet which was staged under the chairmanship of Andrew Jacobsen, president.

The twentieth convention of the National Conference on City Planning will be held at Fort Worth and Dallas, Texas, May 7 to 10, and a preliminary program has already been issued, covering the tentative plans for the conclave. Zoning, street traffic planning and the development of new areas, airports and airways are among the most vital subjects that will receive full discussion.

The irresponsible bidder is one who is a novice, one who has had no experience; one with insufficient funds or equipment for the particular class or volume of work he seeks; one who is a plunger; a gambler who sizes up the field of those he must enter competition with and studies their previous bids in order to submit a bid without knowing or figuring costs. So says an exchange, (outside of that—the irresponsible is O. K.)

Ingersoll-Rand Company, 11 Broadway, New York, has just completed the sixth edition of its 140-page, two-color book entitled, "100 and 1 Ways to Save Money With Portable Compressors." In this book the company has embodied comparative cost data on its portable air compressors and air-operated tools (rock drills, paving breakers, clay diggers, backfill tampers, grinders, hoists, riveting hammers, chippers, metal drills, etc.). The information has been put together in handy-reference, cross-index form. In most cases, figures are presented on a man-hour basis so that they can be readily applied to local conditions in any part of the world.

CONSTRUCTION COSTS LOWER THAN AT ANY TIME DURING LAST 14 MONTHS

Construction costs are lower than at any time during the last fourteen months, according to statistics just compiled by the Associated General Contractors of America. Disregarding the trend generally followed during the early months of recent years, these costs last month showed a perceptible decline after having held a single level since last November.

The drop is accredited to the fact that lower prices recently have been commanded by sand, gravel, crushed stone and cement in several localities. The average of wages, remaining unchanged for the third successive month, played no part in the decline.

As a result of the lower costs recorded

for March, the average for the first three months of this year is shown to have fallen slightly below the figure registered for the corresponding period of 1927.

A scale which places the 1913 average at 100 as its basis indicates the March average of construction costs as holding the 197 level, two points below the recorded for the preceding month. This mark stands in comparison with the figure of 201 held by March of last year. Two years ago, the March figure was 197.

The early months of 1927 witnessed a rapid increase in costs, followed by a gradual decline which continued until a slight increase asserted itself in September. Successive declines were noted in October and November.

COST OF CONSTRUCTION

SHEET METAL CONTRACTORS HOLD ANNUAL BANQUET AT SACRAMENTO

The second annual banquet of the Sacramento Sheet Metal Contractors' Association was held on the evening of April 18, members and guests leaving the headquarters of the Sacramento Builders' Exchange and traveling by auto caravan to the Florida Inn where the banquet had been prepared. President W. H. Gibson presided.

Following the introduction of J. R. Wilson of the Latourette-Fical Co., as toastmaster, an interesting talk was delivered by J. Oakley, sales manager for Foster and Kleiser Company. Other speakers included A. Briggs of Crane Co., C. B. Nelson of Shaw-Batcher Co., and A. J. Boitano of Sinclair and Bessey Sheet Metal Works and Jos. Odgers of Daily Pacific Builder.

Following the speakers a program of entertainment was enjoyed, music being furnished by a seven-piece orchestra. Arrangements for the entertainment fea-

tures were prepared by A. J. Boitano and A. L. Triplett, secretary of the organization, who comprised the Committee of Arrangements.

Among those present were: W. H. Gibson, of Gibson Sheet Metal Works; W. N. Dunphy, of Dunphy & Davis; A. J. Boitano; J. R. Wilson; W. Davis of Dunphy & Davis; B. R. Burgess, of Burgess Sheet Metal Works; A. B. Crouch, Crouch Sheet Metal Works; Frank Z. Ahl, Ahl Sheet Metal Works; C. H. Larson, of Ahl Sheet Metal Works; F. Strader, of Subway Sheet Metal Works; H. H. Hooper, of Hooper Sheet Metal Works; A. L. Triplett, A. Briggs, of Crane Co.; Jos. Odgers, of Daily Pacific Builder; C. B. Nelson; R. Higgs, of Thomson-Diggs Co.; A. N. Brewer, of Geo. H. Tay Co.; John W. Ott, of Holbrook Merrill & Stetson; Elwood Knechler, of Holbrook Merrill & Stetson; Elwood Radcliffe, of Crane Co., and J. Oakley.

PAINTERS LEAD IN FIVE-DAY WEEK MOVEMENT—NATIONAL SURVEY SHOWS

The National Association of Building Trades Employers has just completed a survey of the five-day week throughout the country. More than 75 cities responded to the request for information as to what trades in the building industry were working the five-day week, what was the sentiment among the contrac-

tors for the same and what, if any, demands had been made upon the employers for a reduction of hours of labor per week.

The response indicated that there are four cities in the country where the five-day week is applicable to all building trades mechanics, in all three cities, how-

ever, according to reports, the bulk of the work is being done on the open shop basis.

In Baltimore, where union trades have the five-day week, more than 60% of construction work is being done on open shop basis. Atlantic City, one of the four cities, discloses the fact that hotel keepers on the Board Walk have objected to any construction work being done on Saturday and consequence the of the five-day week prevails throughout the city.

The painters and plasterers appear to be the leaders in the movement for five-day week and apparently have been able to convince their employers in a large number of cities that it is a proper thing to do. In seventeen cities these two trades with the lathers, work only five days. Several other trades are trailing them in a number of cities, they are working only five days, notably, bricklayers, who have to their credit seven cities, the plumbers, electricians and a few other trades along with smaller number for a five-day week their credit.

In reports to the association, there are some twenty or more reasons given by the contractors throughout the country why they oppose the five-day week. The outstanding reasons being the principle of the five-day week is uneconomic and unsound and that the construction business is such that during good weather is essential that men work as long as they can in order to have a building completed on time, the fear being expressed that a five-day week will cause contractors and owners to work a five day on Saturday and Sunday at overtime rates.

TECHNICAL SERVICE ESTABLISHED BY LUMBER MANUFACTURERS

An informational and technical service for users of lumber and wood in other forms has been established by the National Lumber Manufacturers Association. This service will be rendered their request to those having construction, manufacturing or utilization problems, in specific cases, and general through bulletins compiling results various research activities.

Thirty consultant engineers and specialists have already been retained by the association for this service. They are located in groups available to every section of the country and are prepared to handle problems related to construction, architecture, engineering, agriculture and industrial uses, forestry, merchandising, wood technology, lumber grading and a multitude of other topics.

The technical staff of the Association is continuously engaged in fundamental research and in addition maintains continuous association with the Forest Products Laboratory of the United States Forest Service, at Madison, Wisconsin, the Forest Service headquarters in the United States Department of Agriculture, the United States Bureau of Standards and the Wood Utilization Committee of the U. S. Department of Agriculture, all at Washington. It also maintains a system for securing information on the peculiarities of wood and new practices in production and distribution from forests and mills.

Pacific Coast offices from which this information and service can be secured are located at 74 New Montgomery St., San Francisco; 765 Geary St., (Apt. 304) Los Angeles and Pittock Bldg., Portland, Oregon.

Western Security Building Loan Association of San Francisco, has been incorporated with a capital stock of \$1,000,000. Directors are: William M. Abbott, William Schermer and J. Theo. Erlin of San Francisco, and H. J. Stratford of San Anselmo.

som, Federal Realty Bldg., Oakland.

OAKLAND, Cal.—Until May 8, 10:
A. M., bids will be received by John V.
Edgemond, Secty., Board of Education
to furnish and deliver library tables, as

NOTE:—On April 20th, Sandy Pratt spoke before the Lincoln Rotary Club on
Advertising and it was a year to the day since he spoke before the same club.
Last Year immediately after the Lincoln Club luncheon, Sandy attended the
annual birthday party of the Chico Rotary Club at Richardson Springs, which
is always attended by the Sacramento Valley clubs.

Sandy helped the Lincoln Club win the silver cup in the annual singing
contest of the Sacramento Valley Clubs. The judges, however, did not make the
award until Sandy had placed \$5.00 in the charity box. At the Lincoln Club
luncheon of April 20th Sandy was presented with a replica of the above cup
made of terra cotta in the Lincoln Pottery of Gladding, McBean Company. The
inscription painted and burned into the cup was as follows: Replica of Chico
Rotary Club. Cup-Won-By "Sandy" Pratt. Assisted by the LINCOLN RO-
TARY CLUB at Chico, Calif., 1927—Price \$5.00. Two Yards of Sand.

However, before the cup was presented, the following song, written by Dick
Lee and Ferd Liotta, Lincoln Rotarians, was sung to the tune of "Oh, Sussana."

I
Oh, we have a distinguished visitor,
He's here with us today
He is a man of great influence
He comes from 'round the bay.
He comes to Lincoln once a year
His Rotary friends to meet
He likes to hear us fellows sing.
He thinks we're hard to beat.
Oh, dear old Sandy, we like to see you
hear.

We wish that you would visit us
Just more than once a year.

II
Now if you want to get a thrill
Go down to Sand Pratt's Lane
And there you'll see our Sandy
Driving like the insane.
Now Sandy has a car with power
He is a speedy man
His limit's ninety-nine an hour
Fords do the best you can.
Oh, horsepower, song birds and gravel,
too.

They're all alike 'o Sandy
When he goes to Chico.

III
Now Sandy is a good fellow
He likes to advertise
He sells his products far and wide
He boasts them to the skies.
Oh, Sandy sells crushed rock and sand
That's how he got his name
Now if your going to build a home
Have Sandy Pratt explain.
Oh, Mr. Sandy, like the owl.
You are wise
You're just like the Los Angeles bunch
It pays to advertise.

IT PAYS to advertise.

THAT'S WHAT Clarence (Sandy) Pratt
OF THE Pratt Building Material Co.

PRODUCER OF clean, sharp sand.

AND CLEAN rock and gravel.

AT SACRAMENTO, Marysville.

PRATT CO. (MONTEREY County).

PRATT ROCK (NEAR Folsom).

AND MAYHEW (Sacramento County).

CENTRAL OFFICE—San Francisco.

TOLD THE Lincoln Rotary Club.
ALL ABOUT advertising.
THE ABOVE Lincoln affair.
WAS THE most attention.
SANDY EVER had.
AND IF the Lincoln Rotarians.
EVER WANT for sand.
OR NEED a few "rocks."
SANDY WILL supply them.
THE ABOVE cup is unique.
AN ITALIAN moulded it.
A FRENCHMAN decorated the cup.
AN IRISHMAN fired the kiln.
AND FRED Clark, Englishman.
PRESIDENT OF the club.
PRESENTED THE cup.
"I THANK you."

Above photo taken in Women's Club at
Lincoln Rotary luncheon, April 20th. I.
C. U. R. A. Mocking Bird, Lincoln Ro-
tarian, singing the above song about
Sandy Pratt, producer of clean sand,
rock and gravel. Mrs. B. A. Pianoplayer
seated in front of the ivory keys.

chairs, Vienna chairs and school desks. Ct. check 10% req. with bid. Specifications obtainable from Assistant Business Manager, Board of Education, City Hall. See call for bids under official proposal section in this issue.

Official Proposals

State of California
Department of Public Works
DIVISION OF HIGHWAYS
NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Highway Building, Sacramento, California, until 2 o'clock p. m., on May 16, 1928, at which time they will be publicly opened and read, for construction in accordance with the specifications thereunto which special reference is made, of portions of State Highway, as follows:

Del Norte County, between Smith River and the Oregon line (I-DN-1-C-D-E), about thirty-five and three-tenths (35.3) miles in length to be surfaced with crushed gravel or stone and oiled.

Del Norte County between Crescent City and 0.7 mile south of the Oregon line (I-DN-71-A and B), about twenty-one and six-tenths (21.6) miles in length to be surfaced with crushed gravel or stone.

Del Norte County, between the California-Oregon State Line and a point seven-tenths (0.7) mile South (I-DN-71-B) about seven-tenths (0.7) mile in length, to be graded and surfaced with crushed gravel or stone.

Pumas and Lassen Counties, at intervals between Chester and Devils Corral (I-Plu-Las-29-A-B), about twelve and four-tenths (12.4) miles in length, to be surfaced with crushed gravel or stone.

Orange County, from Galivan to one mile north (VII-Ora-2-B), about nine-tenths (0.9) mile in length, to be graded and surfaced with oil treated crushed gravel or stone.

Sacramento County, between Galt and Arno (X-Sac-4-A), five reinforced concrete girder bridges on concrete bents and abutments as follows:

- Station 144+75, one 30-foot span.
- Station 279+13, three 30-foot spans.
- Station 283+02, six 30-foot spans.
- Station 286+68, three 30-foot spans.
- Station 315+39, two 30-foot spans.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the District Office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the District Office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS,
C. H. PURCELL,
State Highway Engineer.
Dated: April 18, 1928.

NOTICE TO BIDDERS

(Water Pipe—Santa Rosa)

Five 4-inch by 4-inch Class "D" all Bell Crosses.

Sixteen 4-inch by 4-inch Class "D" all Bell Tees.

Four 4-inch Bell and Spigot 1/2 Bends.

The above amounts are approximate. All material to be of best grade and subject to the approval of the City Engineer.

Prices bid will include delivery at points within the City Limits of the City of Santa Rosa as designated by the City Engineer.

Immediate delivery is essential and each bidder will fix in his proposal the time of delivery.

Each bid to be accompanied by a certified check or bid bond payable to the City of Santa Rosa for an amount equal to 10 per cent of the amount of the bid.

Bids to be received up to the hour of 5 o'clock P. M. on Tuesday, May 1, 1928. The right to reject any and all bids is reserved by the Council.

By order of the Council of the City of Santa Rosa.
Dated April 18, 1928.

C. B. REID,
City Clerk.

NOTICE TO CONTRACTORS

Office of the Secretary of the Board of Education of the City of Oakland

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland High School District of Alameda County hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, until Tuesday, the 15th day of May, 1928, at 10:45 A. M., at which time said bids will be opened for the erection and completion of the East Oakland High School and East Oakland High School Gymnasium of the Oakland High School District, located 582 feet North of Brighton Ave. on the West side of Foothill Boulevard, in the City of Oakland, County of Alameda, State of California. These bids shall be presented in accordance with plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, 337 17th Street Oakland, California.

Separate bids will be taken on:

- (1) General Work.
- (2) Finish Hardware.
- (3) Blackboards.
- (4) Awning Type Window Fixtures.
- (5) Mastinave Flooring.

On a deposit of One Hundred (\$100.00) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent of Buildings at his office hereinbefore mentioned. Plans taken out by bidders on General Work shall be returned within three (3) weeks, and plans taken out by bidders on other work shall be returned within three (3) days, to the Superintendent of Buildings. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said High School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to the Board of Education of the City of Oakland and of Oakland School District, to be retained by said School District, as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award or to give bonds required for the faithful performance of the contract or any bond required by law. The amount of said check shall not exceed Five Thousand (\$5000.00) Dollars,

but for all bids of less than Fifty Thousand (\$50,000.00) Dollars, said check shall be for at least ten (10%) per cent of the amount of the bid. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Tuesday, the 15th day of May, 1928, at 10:45 A. M., in the Board Room, 211, Second Floor, of said City Hall, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items of such bids.

JOHN W. EDMOND,
Secretary of the Board of Education of Oakland, California.

NOTICE TO CONTRACTORS

(Sewage Disposal Plant, San Luis Obispo)

Sealed bids for the construction of an outfall line and a sewage disposal plant will be received by the City Council of the City of San Luis Obispo, State of California, up to 7:30 o'clock p. m., on the 14th day of May, 1928, at its office in San Luis Obispo, to be there publicly opened and read.

The work is to be done in accordance with the profiles, plans and specifications adopted by the City Council and on file in the office of the City Clerk.

Copies of plans, profiles, cross-sections and specifications, and also blank forms suitable for use in bidding on said work may be obtained in the office of the said City Clerk and no bid will be considered which is not in accordance with and on the form herein referred to.

Each bid must be accompanied by a certified check in the amount of Fifteen Hundred Dollars, made payable to the Mayor of the City of San Luis Obispo, as a guarantee that the bidder, if awarded the contract, will enter into a contract for the performance thereof satisfactory to said City Council. And in addition thereto, the successful bidder will be required a further bond in the sum of fifty (50) per cent of the amount of the contract, with acceptable sureties, to secure the payment of laborers, material-men, etc.

The City Council reserves the right to reject any and all bids not deemed advantageous to the City of San Luis Obispo.

By order of the City Council of the City of San Luis Obispo, State of California, made this 16th day of April, 1928.

CALLIE M. JOHN,
(SEAL) City Clerk.

NOTICE TO CONTRACTORS

(Dunsmuir Joint Union High School District)

Notice is hereby given that sealed bids will be received by the Trustees of Dunsmuir Joint Union High School, Dunsmuir, Siskiyou County, California, at the office of the principal of the high school, at Dunsmuir, California, until 7:30 P. M., May 14, 1928, for the erection of a Dunsmuir Joint Union High School building, to be built at Dunsmuir, California, according to the plans and specifications prepared by Starks & Flanders, the authorized architects.

Bids will be received for the various branches of the work, as follows: For the general work as one contract; for the electrical work, heating and plumbing as separate contracts or a combined figure on all three trades.

Plans and specifications will be on file at the office of the Clerk of the Trustees of said Dunsmuir Joint Union High School Building in Dunsmuir, and may be seen at or obtained from the office of the Architects, Starks & Flanders, Ochsner Bldg., Sacramento, California. A cash deposit of \$10 will be required from all prospective bidders on all copies of plans and specifications loaned

of a guarantee of the return of the

The Board of Trustees of a company by a certified check for a sum not less than ten per cent of the amount of the bid, made payable to Clara J. Hanna, Clerk of the Board of Dunsmuir Joint Union High School District, as a guarantee of good faith that the parties to whom the contract may be awarded will, within ten days after the award is made, enter into the necessary agreement and furnish the necessary bonds for the faithful performance of said work; and in case the bidder to whom the contract is awarded fails or refuses to enter into said agreement or to furnish said bonds, said check will be forfeited to said Dunsmuir Joint Union High School District in the manner provided by law.

The Board of Trustees will not accept a bidder's bond in lieu of a certified check, each bidder must fill out the bid form, which is attached to the specifications, and submit same enclosed in a sealed envelope and addressed to Clara J. Hanna, Clerk of the Board of Trustees of the Dunsmuir Joint Union High School, Dunsmuir, California, and endorsed: Proposal for Building Dunsmuir Joint Union High School Building at Dunsmuir, California.

The Board of Trustees expressly reserves the right to reject any and all bids and to waive any informality in any bid received.

By order of the Board of Trustees of Dunsmuir Joint Union High School District, Siskiyou County, California.

Dated April 18, 1928.

GEO. M. TAYLOR,

Chairman.

Attest:
CLARA J. HANNA,
Clerk

NOTICE TO CONTRACTORS

(Refrigerators—Mare Island Navy Yard, (Hospital))

Sealed bids indorsed "Bids for Automatic Refrigerators, Specification No. 5583," will be received at the Bureau of Yards and Docks, Navy Department, Washington, D. C., until 11 o'clock a. m., May 16, 1928, and then and there publicly opened, for automatic refrigerators consisting of refrigerator boxes, motor-driven compressors, condensers, liquid receivers, expansion coils or units, wiring, piping and accessories at the Navy Yard (Hospital), Mare Island, Calif. Specification No. 5583 and accompanying drawing may be obtained on application to the Bureau or to the Commandant, Navy Yard, Mare Island, Calif. Deposit of a check or postal money order for \$10, payable to the Chief of the Bureau of Yards and Docks, is required as security for the safe return of the drawing and specification. L. E. Gregory, Chief of Bureau, March 29, 1928.

NOTICE TO CONTRACTORS

(Lincoln School District)

Notice is hereby given that sealed bids will be received by the Board of Trustees of the Lincoln School District, Elverta, Sacramento County, State of California, at the office and residence of the Clerk, in said District, Elverta, Sacramento County, California, until 4 o'clock P. M., May 8, 1928, for the erection of Grammar School Building to be erected on the School Grounds at Elverta, Sacramento County, California, according to plans, specifications and proposals for the same as prepared by Frederick S. Harrison, the authorized Architect.

Plans and specifications may be seen or obtained at the office of the Clerk of the Board of Trustees, Elverta, California, or at the office of Frederick S. Harrison, Architect, People's Bank Building, Sacramento, California.

A cash deposit of \$25 will be required from all prospective bidders on all copies of plans and specifications loaned out as a guarantee of the return of the same in good condition.

All bids shall be received for the General Construction, the Plumbing, Heating System and the Electrical work, with alternative propositions, and all shall be presented on blank forms which may be procured at the office of the Architect.

Each bid must be accompanied by a certified check on some responsible California bank for a sum of not less than ten per cent (10%) of the amount of the bid, made payable to the Clerk of

the Board of Trustees, as a guarantee of good faith that the party to whom the contract may be awarded, will, within ten days after the award is made, enter into a contract and furnish a surety bond for the faithful performance and bond for labor and material as may be required by law, and in case the bidder refuses to enter into said contract or to furnish said bonds, said check will be forfeited to the said School District in the manner provided by the law. The Board of Trustees will not accept a bidder's bond in lieu of a certified check.

Each bid must be enclosed in a sealed envelope and addressed to Albert Scheidel, Clerk of Board of Trustees, Lincoln School District, Elverta, Sacramento County, California, and endorsed: "Proposal for Grammar School Building."

The Board of Trustees expressly reserves the right to reject any or all bids.

By order of the Board of Trustees of the Lincoln School District, Elverta, Sacramento County, California.

ALBERT SCHEIDEL, Clerk.

THOS. McKINNON, Jr.,

CLIA B. A. ANDERSON,

Trustees.

NOTICE TO CONTRACTORS

(West Stanislaus Irrigation District)

Sealed proposals will be received by the Directors of the West Stanislaus Irrigation District, at their office in Westley, Stanislaus County, California, up to two o'clock P. M. (2:00 P. M.) Saturday, May 12, 1928, and will at that time be publicly opened, for the construction of approximately two miles of Main Canal and appurtenant structures, in accordance with the contract, plans and specifications therefor.

CONTRACT No. 2.—Construct Main Canal from station 0+00 to station 125+00, including approximately 465,000 cu. yds. of earth excavation; 330,000 sta. yds. of haul; 270 cu. yds. of reinforced concrete in Intake structure and secondary pump houses; 788 lin. ft. of metal pipe varying in size from 18" diameter to 36" diameter; three pile bridges; and placing of necessary gates, trash racks and appurtenances.

All proposals must be accompanied by a certified check for at least five (5%) per cent of the amount of the bid submitted, in favor of the West Stanislaus Irrigation District.

All certified checks accompanying rejected bids will be returned.

Certified check of the successful bidder will be returned when the contract has been executed and the required bonds furnished.

In case of failure to execute contract or furnish the required bonds within the stipulated time, the certified check and the proceeds thereof, will become and remain the property of the West Stanislaus Irrigation District.

Plans, specifications and contract are on file and can be inspected at the District's office at Westley, or at the office of the District's Engineer, W. F. Woolley, at Patterson, California.

A full set of plans, specifications and contract may be obtained at the Engineer's office or at the District's office, on deposit of \$10 for each set, which sum will be returned on the return of the same in good condition within ten days after the date on which bids are opened.

The contract will be let to the lowest responsible bidder, except that the District reserves the right to reject any and all bids. Bids will be opened at the District's office at the home of W. W. Cox at Westley, California, Saturday, May 12, 1928, at 2:00 P. M.

By order of the Board of Directors of the West Stanislaus Irrigation District.

ELBRIDGE SMITH,

Secretary of the Board of Directors.

Contract Awarded.
 SPOKING PARLOR Cost, \$17,000
 COLTSA, Colusa Co., Cal.
 One-story frame and stucco undertaking parlor.
 Owner—Sullivan Bros.
 Architect—W. H. Weeks, Hunter-Dulin Bldg., San Francisco; 1736 Franklin St., Oakland, and 246 S-First St., San Jose.
 Contractor—W. J. Shalz, Chico.

Plans Being Completed April 23, 1928
 CHAPEL, ETC. Cost, \$60,000
 OAKLAND, Alameda Co., Cal. Eighteenth and Grove Sts.
 Two-story hollow tile Class C chapel and undertaking parlor.
 Owner—V. C. Pagornio & Lewis, 952 8th St., Oakland.
 Architects—Harris Allen, 1924 Broadway, Oakland.
 Bids will be taken April 27th.

BUSINESS OPPORTUNITIES

Wheelbarrows. Brooklyn, N. Y. Louis Greenberg, New York Wheelbarrow Mfg. Co., Inc., 114-120 North Sixth Street, Brooklyn, New York, wish to appoint suitable agents or distributors to act as their sales representatives in this territory. They prefer contracts with parties who are acquainted with contractors, industrial plants, builders and other such industries that are buying wheelbarrows.

Manufacturers' Representation in the Chicago Territory. Chicago, Illinois. Mr. E. M. Walker & Co., 327 South La Salle Street, Chicago, Illinois, an established company having for its foundation, marine surveying, with an excellent sales department headed by a technical graduate with experience in general engineering and sales desires to supplement their efforts by the addition of agencies other than marine. They would appreciate hearing directly from

San Francisco firms desiring representation in the Chicago territory.

Buying Agents. London England, M. C. E. Martin, Director, J. R. Martin Co., Limited, 31, Budge Row, Cannon St., London, E. C. 4, England, an established firm of merchants and buying agents, having close connections with United Kingdom manufacturers, offer the services to San Francisco importers and merchants, who are interested in handling British goods.

Drawing and Surveying Apparatus. Walthamstow, England. Holmes Bros. (London) Ltd., Howard Works, Bill Road, Walthamstow, London, E. 1, England, manufacturers of scientific drawing, surveying and photographic apparatus, desire to get in touch with San Francisco buyers of that type of merchandise.

Redwood Lumber. Wellington, New Zealand. Mr. C. F. Organ, Leinster Chambers, Grey Street, P. O. Box 1225 Wellington, New Zealand, is anxious to secure the account of an independent redwood mill, which is looking for business in New Zealand.

Radio Valves. Budapest, Hungary. "Vatea," 1, Csaba Uccs 7/b. 7/c., Budapest, Hungary, manufacturers of radio valves of best quality for all purposes are desirous of extending their trade relations to this country and wish to appoint a suitable San Francisco representative.

Asbestos Shingles. Plaine St. Denis (Seine), France. Societe Francaise de L'Everite, 11 a 15 Avenue du President Wilson, Plaine St. Denis (Seine) France, manufacturers of asbestos shingles are desirous of securing the service of a distributor or agent to handle their products in this district. Representative of the company will be in San Francisco in about two months time.

Mexico Sales Representation. Mexico D. F., Hermanos Delgado, P. O. Box 188 Mexico City, Mexico, merchandise broker desires to get in touch with manufacturing companies who are interested in marketing their products in Mexico.

Lumber. San Juan, Port Rico. Sobrinos de Izquierdo & Co., San Juan, Port Rico, seeks connections with California lumber mills, which might be interested in exporting their lumber to Port Rico.

Redwood Lumber. San Jose, Costa Rica. Vincente E. Gregg, Consulting Engineer, Board of Public Works, San Jose, Costa Rica, requests quotations on rough dimension all heart clear redwood, in dimensions of 2x4 inches to 4x6 inches; and on all heart clear matched flooring. C.I.F. Puntarenas, Costa Rica. Lumber to be used for Governmental construction work in Costa Rica.

Argentina and Brazil Representation. San Francisco, Calif. Mr. Henry S. Jaudson, 823 Kohl Bldg., California and Montgomery Sts., San Francisco, Calif. (Phone Davenport 4240), leaving for Buenos Aires shortly, desires to arrange agencies in Argentina and Brazil for San Francisco manufacturers. He has excellent connections with old established firms and business men in those countries, who could profitably represent San Francisco manufacturers.

New Zealand Representation. San Jose, Calif. Bandeira & Comp., P. O. Box 372, Para, Brazil, wishes to get in touch with San Francisco manufacturers or merchants, not already represented in New Zealand, who are interested in selling their products in that market.

Hardware. Kobe, Japan. Nakayama & Co., 37 Komonoya-Cho, Hyogo, Kobe, Japan, exporters, seek business connection with San Francisco importers of Japanese products, such as lacquer wares, hardware, etc.

Mahogany and Cedar. Mexico City, Mexico. Guillermo Fink, Apartado 1000, Mexico City, Mexico, owner of a valuable tract of approximately 120,000 acres, with a section of 22,000 acres containing some 60,000 tons of mahogany and cedar of great size, the entire tract containing rubber and chicle in a wild state and therefore being suitable for growing plantation rubber and other valuable tropical products on a large scale, wishes to dispose of that property at the rate of \$8.90 per acre.

Colombian Representation. Barranquilla, Colombia. J. De D. Abello, Barranquilla, Colombia, S. A., established in business of foreign representations, directly with San Francisco manufacturers who wish to extend their business in Colombia. References supplied.

TIMPIE HYDRATED LIME

(a true dolomite lime)

for Brick Mortar, White Coat and Sand Float Finish, and for inducing plasticity in and water proofing Portland Cement Concrete.

Used in approximately \$70,000,000 High Class Pacific Coast construction in last 3 years.

EXAMPLES:—

New Standard Oil Building, San Francisco	Central Bank, Oakland
Oakland Savings Bank	New Subway Terminal Building, Los Angeles
New Mark Hopkins Hotel, San Francisco	Federal Reserve Bank, San Francisco
New Hunter-Doolin Building, San Francisco	New Russ Building, San Francisco
Pacific Telephone and Telegraph Building, San Francisco	

Sold by most progressive dealers throughout Pacific Coast.

1928 EDITION

San Francisco Building Laws

Now Ready for Distribution

With the issuance of this 1928 Edition, the Building Ordinance Books heretofore published will be obsolete, inasmuch as many sections of the law have been amended and additional sections added.

The 1928 Edition contains all the revisions and additions to the code up to and including January 31, 1928.

In addition to the Building Laws, the 1928 Edition contains FIRE ORDINANCES as regards the construction industry—the ELECTRICAL ORDINANCES and RULES of the San Francisco Department of Electricity—the BILLBOARD ORDINANCE and other laws covering regulations concerning the construction interests.

SACRAMENTO PLUMBERS WAGE WAR ON ILLNESS

Master plumbers and heating con-
tractors of Sacramento are starting an
intensive advertising drive and a co-
operative campaign with civic organiza-
tions and women's clubs to carry out
locally the national movement of the
plumbing and heating industries bureau
to "Make a Health Examination of
our Home."

This movement, which joins the efforts
of the medical profession to combat
diseases and their causes, was begun
recently with national advertising. Large
reproductions of the first advertisements
are being displayed in the windows of
heating contractors and master plum-
bers in the capital city.

Leading heating contractors and
master plumbers point out that serious
bacterial infections often have their
beginning in insanitary plumbing equip-
ment, while colds and pulmonary dis-
eases usually are traceable to in-
efficient heating methods within the
home.

Regular check-up and examination
services will be rendered to Sacramento
residents by plumbers and heating con-
tractors. Frequently they will be able
to make suggestions that will lead not
only to health conservation, but also to
actual savings in money.

APRIL BUILDING SUMMARY

Building operations in San Francisco
for the month of April, 1928, represent an
expenditure of \$3,701,861. During the
month 744 permits were issued, as com-
pared with 963 permits in April, 1927, for
improvements costing \$4,939,212.

Following is a report of April activi-
ties:

Class	Number	Total
A	1	\$ 90,000
B	1	1,000,000
C	15	318,650
Frames	273	1,765,870
Alterations	452	332,052
Public	1	105,289
Harbor	1	90,000
Total	744	\$3,701,861

WEB STRESSES IN REINFORCED CONCRETE BEAMS STUDIED

Bulletin No. 175 of the Engineering
Experiment Station of the University of
Illinois contains the report of an in-
vestigation the purpose of which was to
study the action of web reinforcement in
overhanging or restrained beams in which
there are both positive and negative
bending moments.

A large proportion of the reinforced
concrete beams used in buildings and
other structures are continuous or at
least partially restrained beams. The
simple beam has been used for test pur-
poses principally because of ease of
making and testing; however, there has
been some question as to whether the
data obtained from tests of simple beams
will apply equally well to restrained
shearing unit stress in the restrained
beam in general is subjected to higher
shearing stresses in proportion to the
flexural stresses than a simple beam.
Thus, if the beam section is governed by
consideration of flexural stresses, the
shearing unit stress in the restrained
beam will be considerably higher than
in the simple beam. It is important to
know how high a shearing stress may be
allowed in design and under what con-
ditions of reinforcement satisfactory action
of the beam may be assured. At present
rather high allowable shearing stresses
are being advocated when certain re-
quirements are met as to the design of
the longitudinal and web reinforcement.
The results of the tests in this bulletin
should serve to indicate some of the re-
quirements necessary to the attainment
of high shearing stresses.

The tests were made on fifty-nine re-
strained beams of reinforced concrete, of
a size comparable to that of beams com-
monly used in buildings and other struc-
tures. The tests were arranged to pro-
duce conditions of restraint similar to
those found in continuous beams. Ex-
tensive strain measurements were made
at regular increments of load on both
longitudinal and web reinforcement.
The measured strains obtained in the in-
vestigation have been invaluable in show-
ing definitely what was the primary, and
what the secondary cause of failure, as
well as indicating the potential web re-
sistance of beams that failed in different
ways.

Copies of Bulletin No. 175 may be ob-
tained without charge by addressing the
Engineering Experiment Station, Urbana,
Illinois.

STATE WILL NOT MAINTAIN COUN- TY HIGHWAYS IN N. Y.

A bill providing for the maintenance of
county highways at the sole expense of
the state, passed by the Legislature of
New York, has been vetoed by Governor
Smith. In a memorandum accompanying
the veto the Governor said:

"The object of the bill is to relieve the
towns from paying the \$50 per mile tax
and the villages from paying the 1½c.
per sq. yd. tax which they now pay to-
ward the maintenance of state highways.
If the policy of our state department of
highways were bad, I would approve this
bill, but I am informed by the depart-
ment of public works that our policy is
not only good for the state but for the
local communities, since the cost of main-
taining the ordinary earth road is more
than \$50 per mile."

COLONEL SAWYER APPOINTED TO WOOD UTILIZATION COMMITTEE

Secretary Hoover has appointed Col. D.
H. Sawyer, of Washington, Secretary of
the Associated General Contractors of
America, to membership on the National
Committee on Wood Utilization of the
Department of Commerce. This organ-
ization, of which Mr. Hoover is chairman,
includes about 140 manufacturers, dis-
tributors and consumers of wood, as well
as other technical experts working for a
more complete utilization of the tree.

Colonel Sawyer has been prominent for
years in the construction field, and is a
director of the American Society of Civil
Engineers. He will represent the As-
sociated General Contractors upon the
committee in the aspects of its program
dealing with the use of wood in building
and construction. As the principal com-
mittee activity in this field, at the pres-
ent time, is the compilation of a most
complete manual on the use of wood in
construction, he has been assigned to the
control committee supervising prepara-
tion of this important publication.

RIVERSIDE CEMENT STOCKHOLD- ERS TOLD OF NEW PLANS

Stockholders of Riverside Portland Cem-
ent Company, one of the outstanding
leaders in that industry, have been ad-
vised in detail of the plans for the forma-
tion of a new Delaware corporation carry-
ing the same name as the California
company. The Delaware corporation, ac-
cording to a letter to stockholders from
Griffith Henshaw, chairman of the board
of directors of Riverside Portland Cem-
ent Company, will have a capital struc-
ture consisting of 70,000 shares of first
preferred stock, 240,000 shares of class
A stock, and 400,000 shares of class B,
all of which is without nominal or par value.

Upon completion of the organization,
Henshaw announced, the California com-
pany will be liquidated as rapidly as pos-
sible and stockholders will receive one
share of first preferred, four shares of
class A stock and four shares of class B
stock of the Delaware corporation for
each share of stock now held in River-
side Cement Company of California.
More than 5 per cent of the stockholders
have sanctioned the reorganization.

It is understood that the new preferred
will pay dividends on the basis of \$6 per
annum and the class A \$5 per annum,
payable quarterly instead of monthly, as
has been the case with the present issue
of Riverside stock.

GERMAN ARCHITECTS EXHIBIT BALL-SHAPE HOUSE

A spherical house, designed by the
Munich architect Peter Birkenholz for
the Dresden exposition, is declared to
point the way to relief from traffic con-
gestion in cities. The height of the
globular structure designed by Birken-
holz is 98 feet, and its diameter is 82
feet. It rests on a base 16½ feet wide,
with four lower stories for business of-
fices and an upper hemisphere for apart-
ments, with a cafe at the top. Birken-
holz says that with ball-shaped houses
it will be possible to lay out streets
three times as broad as modern thorough-
fares. Other advantages he claims are
access of light and air from all sides and
unobstructed perspective from any point
in the structure.

EARTHQUAKE INSURANCE RATES ARE PROTESTED AT STATE BUILDERS' MEET

By E. W. Shaw, Secretary, California State Builders' Exchange.

Industrial Relations Committee To Study Standard Wage Scale—Organization Committee In Southern Section Reports Progress—Northern Organization Committee Named—Quantity Survey To Be Studied by Committee—President Sanford Points Out Need of Legislation—"Intention To Build" Proposal Discussed—Standard Building Code Endorsed—Grand Ball Is Feature of Convention.

The third quarterly conference of the California State Builders' Exchange was held in order at 2:00 P. M. Friday, April 27th, 1928, in the Assembly Hall of the Hotel Lincoln, Stockton.

Mr. E. H. Grogan, president of the Stockton Builders' Exchange, welcomed all present and introduced Mr. Charles Ashburner, City Manager for the City of Stockton. Mr. Ashburner spoke as follows:

"We are always glad to have such meetings as this held in our city, for the reason that it gives us a different point of view and will let some of you take back to your homes a vision of our city."

"Stockton is a city that has wonderful ambitions. For the size of the community I think it is wonderful—the desire we have to progress—the will that we have to do big things in this community."

"We are planning our deep water channel. For seventy years Stockton has dreamed of making an inland port here. Today the situation is that this project has been approved through both Houses of Congress—has been approved by the President. Stockton's money is ready and has been ready for three years, waiting for the Government to put up their money."

"We welcome you to our city. We know who you are because we know with whom you associate."

"I know something about the troubles you have had—something about the problems—but you have so many more appliances to work with—so many more advancements."

"I hope that your conference will be a benefit to you, if that is the case it will be a benefit to us all."

President Sanford Presides

President E. H. Grogan, Stockton Builders' Exchange, next introduced Mr. P. M. Sanford, President of the California State Builders' Exchange, expressing his appreciation of the great service being rendered to the Building Industry by this organization. President Sanford accepted the gavel with thanks and took charge of the meeting.

President Sanford said, "Just before our City Manager goes I would like to say to him that we have none other than the finest words of praise for the hospitality being shown us by the people of Stockton."

"We are going to transact something in the State Builders' Exchange that will be of benefit to Stockton as well as the whole State. We are going after this as earnestly as we can."

Those In Attendance

The Secretary called the roll, and the following delegates and guests were present: P. M. Sanford, Richmond; Geo. T. Boyer, San Francisco; J. M. Burke, Stockton; S. J. Cinnamond, Napa; J. E. Flannery, Stockton; Mano Zamm, Los Angeles; Geo. Finney, Los Angeles; R. E. Grogan, Stockton; E. H. Grogan, Stockton; Walker Harrison, Stockton; Ralph C. Hogan, Los Angeles; Geo. W. Israel, Pasadena; Fred W. Jackle, Napa; C. E. Kennedy, Stockton; Albert Le Roy, Oakland; F. L. Marks, Stockton; Wm. E. Thompson, Stockton; A. J. Nolder, Santa

Barbara; Wm. F. O'Keefe, Stockton; J. S. Peletz, Stockton; Chas. W. Pettifer, Long Beach; D. H. Schoebel, Stockton; Wm. Shifflett, Napa; Chas. F. Thompson, Stockton; J. H. Vickers, San Francisco; Joe Waugh, Santa Monica; Harry Reynolds, Stockton; E. W. Shaw, Oakland.

O. H. Chain, Stockton; H. L. Sweeney, Santa Barbara; E. D. Bass, Stockton; H. J. Capion, Oakland; R. B. Tomlinson, Stockton; Carl Hokholt, Stockton; Arthur Piddle, San Francisco; J. E. Odgers, San Francisco; Geo. R. Gage, Stockton; Emil Brown, Los Angeles; James Walker, Richmond; Leonard C. Dexter, Richmond; E. P. Dobson, Stockton; N. W. Tatterson, San Francisco; J. A. Wagner, San Jose; Wm. J. Feary, San Francisco; T. M. Robinson, Fresno; P. M. Powell, Stockton; Harry Cayford, Fresno; W. F. Neider, Stockton; Robt. Davidson, Stockton; W. B. Hogan, Stockton; Harry Hanson, Stockton; Carl Overaer, Richmond; E. H. Higgins, Richmond; W. H. George, San Francisco; D. Farquharson, San Francisco; William Wright, Stockton; W. Herman, San Jose; John Pittendagh, Pasadena; Wm. Loesch, Pasadena; A. H. Wilhelm, San Francisco.

The Secretary read the minutes of the last quarterly meeting which was held at Fresno, January 14, 1928, which were approved as read.

The Secretary read a letter from Mr. E. P. Smith, of Fresno, Manager of the San Joaquin Light and Power Co. He also read a telegram from Geo. W. Peltier, President of the Sacramento Chamber of Commerce, and H. C. Bortorff, City Manager of Sacramento, inviting us to hold the next conference at Sacramento. The Secretary was instructed to extend them our vote of thanks for their kind invitation, which it will be impossible for us to accept at this time.

Industrial Committee Reports

The Chair called for the report of the Industrial Survey Committee, better known as the Industrial Relations Committee, as follows:

"Your Industrial Survey Committee beg to report as follows:

"That the Industrial Survey or Relation Committee, after a careful study of the work that local Industrial Relation Committees are doing in stabilizing industrial conditions in the building business for the State in advising local members and agents against adoption of agreements with labor that will disturb the industrial conditions of the State. In protecting our membership against injury by the adoption of rules by our employees or others that would injure their business, advising and gathering information for distribution among our membership, your committee believes that by applying this principle thru the State Exchange thru their Industrial Relation Committee much good can be accomplished."

"We further recommend that all local Exchanges that have not organized local industrial relation committees be instructed to do so at once."

"We also recommend that in the future appointing of Industrial Relation Committees that the committees be as representative as possible."

Standard Wage Scale

"We have given considerable study to this subject. We do not find a great difference in wages paid in various parts of the State. There are

considerable differences in various sections in the wages of certain crafts. We find much misinformation spread about wages in various sections. Much of this propaganda can be offset by the proper distribution of information of actual conditions and wages in the various sections of the State."

"As the standard wage scale idea is new to many of our local Exchanges who desire more information and believe that more study should be given it, we recommend that the matter be placed in the hands of the Industrial Relations Committee who shall gather more information on the subject and release same to the various Exchanges at their request for their investigation in their local study of the subject, and the subject be given further consideration at our future meetings."

The Industrial Survey Committee is composed of: H. L. Sweeney, J. M. Burke, Wm. T. Loesch, and Geo. T. Bowen.

Mr. H. L. Sweeney of Santa Barbara Chairman, reported as follows: "We gave considerable study to this situation. We came to the conclusion that the Industrial Relation Committee of the State Exchange handling the industrial situation of the State could be made the live wires through which the President of the Exchange could function between meeting times."

Industrial Committee Advantages

"The contracting business, as well as contractors and employees are being helped. Also the Industrial Relation Committee gives us an official body that is able to take up the various questions with bankers, financiers, and others, with regard to helping to solve our problems. We believe that this Industrial Relation Committee can be made a real live thing for the State Builders' Exchange. We feel that this matter should be given further study, and should be able to stop a great amount of propaganda going on."

A motion was made by Mr. Loesch and seconded by Mr. Robinson for the adoption of this report from the Industrial Survey Committee. Motion unanimously passed.

Work of Organization Committee

Geo. W. Israel, of Pasadena Exchange, Chairman of the Exchange Organization Committee, Southern Division, reported great progress throughout the Exchanges of Southern California, as they all work together in the Presidents' and Secretaries' Conference which meets once a month at the various Exchanges. Whenever they feel there is a chance for a new Exchange to be organized they all lend a hand and put the job over. Mr. Israel recommended that a similar organization be formed in the northern part of the State to function along similar lines through the Exchanges in this section of the State, and co-operate with their Conference.

O'Keefe Reports on Vocational Education

The Chair called for a report from the Vocational Education Committee. Mr. Wm. F. O'Keefe, Stockton, Chairman of this committee, reported at some length on this subject. This was followed by a general discussion in which practically all delegates present took part, each one giving a different viewpoint on the subject. The committee was instructed to go further into the subject and make a

comprehensive report at the next meeting of the conference. A motion made by Mr. Burke, of Stockton, the duly seconded, the Secretary was instructed to write to all the various organizations, such as Radio K. G. W., Stockton; Daily Pacific Builder; the Stockton Daily Independent; the Stockton Record, and thank them for their services in making this meeting a success. Motion carried and so ordered.

Quantity Survey Discussed

President Sanford introduced Mr. Al. Le Roy, Oakland, who made a short speech on the Quantity Survey system. He explained the operation of the Quantity Survey and the benefits to be derived by the contractors in the building business. Various questions were asked Mr. Le Roy regarding the Quantity Survey, which Mr. Le Roy explained fully. The matter was discussed pro and con for several minutes. The meeting was then open to discussion on this matter. Mr. Walker, of Richmond, Mr. Israel, of Pasadena; Mr. Burke, of Stockton, and others spoke on the question of Quantity Survey. A motion was duly passed and so ordered that a committee be appointed to investigate further into this matter and report at the next meeting.

George On By-Laws

Mr. George, San Francisco, was called on to make a report on his committee on Constitution and By-Laws.

Mr. George said: "As far as the committee on the Constitution and By-Laws is concerned there is nothing new except an amendment. We propose that the Constitution and By-Laws be amended Article 4 Section 1, as follows:

"Each constituent body paying an annual per capita tax on more than 100 members shall be entitled to six delegates. Each constituent body paying an annual per capita tax on less than 400 members shall be entitled to three delegates. Each constituent body represented at any regular or special meeting shall be entitled to vote the full number of votes which such constituent body is entitled to."

Legislation Needed

Under new business President Sanford said: "What we need is legislation that will make more secure the legitimate contractor in his business. The biggest question before us is how we can protect our business—how we can eradicate some of the evils that are ever apparent. It has been thought by several that there is only one way that we can ever get proper backing in this business. There must be some way in which the man who has fitted himself for the business can enter into that business and conduct it with some assurance of success other than that which we have at the present time. It seems almost impossible for that man who is fitted for business and is qualified to make a success of his business. There are but few men in business who are competent to do so in his business. Good men are not responsible for that. The building field has been an open field. I have had a great many letters written to me since our meeting in Fresno asking that the thing we consider in this meeting is the matter of legislation—how we can protect the interests of our building business—now we can protect the man who is legitimately created in it and is capable of attending to his business.

"I understand the sentiment of all those engaged in the business—not only contractors but material men too, are looking for some sort of legislation that will protect their business.

"That is what we are here for. If we can't recommend some way to make our building business more profitable and better for those engaged in it I don't think our State organization will do much for us if it can't do this.

"I will be very pleased to appoint a committee to work on this question of legislation to protect the interests of those in the building business. We want to know if it is legislation that is required."

A discussion followed in which Mr. Homan, Mr. Sweeney, Mr. Grogan, Mr. Dexter, Mr. Loesch, Mr. Cinnamond, Mr. Israel, Mr. George and Mr. Farquharson took part.

The meeting adjourned at 5:20 P. M. "Intention To Build" Act Is Considered

The meeting opened at 9:20 A. M. Saturday morning in the Assembly Room of the Hotel Lincoln, Stockton. President Sanford stated that the first order of business would be the request of Mr. Israel, of Pasadena, for an endorsement by this body of the Notice of Intention to Build Act as drawn up by Mr. J. W. Morin, attorney of Pasadena. It was moved by Mr. W. H. George and seconded by Mr. Farquharson that we endorse the Notice of Intention to Build Act subject to it being referred to our Law and Legislative Committee, they in turn to take it up with Mr. Morin personally and present their recommendations to the next Conference. Motion carried and so ordered.

Standard Building Code

The Chair called on Ralph Homan, Chairman of the Building Code Committee, for his report. The Secretary read the report as follows:

"Your Committee has made a survey of what is being done in this State in regard to a standard building code and finds as follows:

"We believe that the subject has now been thoroughly aired, that all interests have been coordinated and that the general anxiety of all those interested is for a speedy production of the standard building code.

"We are heartily in sympathy with the efforts thus far made along the line but believe the building fraternity has not been sufficiently or properly considered.

"We, your Committee, therefore urgently suggest that the State Builders' Exchange do pass the following resolution and forward it at once to the California Development Association:

Resolution Adopted

RESOLVED that inasmuch as the building fraternity must be governed by any standard building code that may be adopted, that the State Builders' Exchange respectfully requests that the Builders' Committee of six appointed by the President of the State Builders' Exchange be added to the California Building Code Committee working under the auspices of the California Development Association, and that it be

FURTHER RESOLVED that in the interest of accomplishment and harmony that a contractor be added to the editors of the standard building code, and be it

FURTHER RESOLVED that in the interests of speed that a contract should be entered into with the editing committee of three thus constituted to produce the standard building code within a given time and that their remuneration be fixed to be paid to them upon the completion of the work.

"Your committee duly moves the adoption of the above resolutions and asks that a copy of it be sent at once to the California Development Association, Attention of Mr. Chas. S. Knight, Director, Industrial Department."

It was moved by Mr. George and duly seconded that the report of the Building Code Committee be adopted as submitted. The motion was carried and so ordered.

The Secretary then read a statement of Receipts and Disbursements to date covering the finances of the State Exchange.

Educational Plan Considered

The Chair called on Mano Zan, Secretary-Manager of the Los Angeles Builders' Exchange, for a short talk on an educational plan as put into effect by the California Real Estate Board. It was moved by Mr. Zan, seconded by Mr. Feary that a committee be appointed to investigate the proposition and to present a plan whereby the California State Builders' Exchange can utilize a similar plan to the one in use by the Real Estate

Board, and report back to the next meeting of this organization. The motion was carried and so ordered.

The Secretary read two telegrams, both inviting us to hold the next conference at Pasadena, one from the Hotel Huntington and the other from the Secretary of the Chamber of Commerce of Pasadena. The Secretary was instructed to write them expressing our appreciation for their kind invitations and tell them we are unable to avail ourselves of the same at this time.

Santa Barbara Gets Meet

Mr. Sweeney renewed his invitation for the next meeting to be held in Santa Barbara, stating they had already made plans for it. It was moved by Mr. Robinson and duly seconded that the next meeting be held in Santa Barbara. Motion carried unanimously.

It was moved by Mr. Serpa, of San Jose, and duly seconded that the following meeting after Santa Barbara be held in San Jose. Motion carried and so ordered.

Earthquake Insurance Rates

Mr. George presented the following resolution:

"The California State Builders' Exchange in convention duly assembled this 28th day of April, 1928,

"RESOLVES that the earthquake insurance rates now in force as promulgated by the Board of Fire Underwriters of Pacific is

"1. Entirely out of line as compared with earthquake insurance in the East and other places.

"2. That it is bad advertising for the State of California.

"3. That it puts a serious unnecessary burden on the owner who intends building.

"4. That it puts an unreasonable burden on the intending borrower for the purpose of building.

"5. That it puts an unreasonable burden on the intending renter of buildings.

"6. That present earthquake insurance rates are based on erroneous information in some sections of the State.

"THEREFORE BE IT RESOLVED that the California State Builders' Exchange in convention duly assembled respectfully urges the Board of Fire Underwriters of the Pacific to reconsider the proposition and readjust these rates to the end that they may be consistent with rates charged in other places and proper protection to the owner which they are not now, as the owner must carry 10 per cent of earthquake damage under the deductible clause, and

"BE IT FURTHER RESOLVED that the Secretary be instructed to send a copy of this resolution to the Board of Fire Underwriters of the Pacific and respectfully request their attention and reply thereto."

It was moved by Mr. George and seconded by Mr. Farquharson that the above resolution be adopted. Motion carried and so ordered.

It was moved by Mr. Homan and duly seconded that the date of the next meeting to be held in Santa Barbara be left to the President and the delegates from Santa Barbara to decide. Motion carried and so ordered.

It was the consensus of opinion that each fully accredited delegate be allowed a vote but it was unanimously decided that there would be no voting by proxy for another Exchange other than he is a member of.

It was moved by Mr. George and duly seconded that we hold a one-day session at the next meeting, with committees meeting the day before to complete their reports. Motion carried and so ordered.

Organization Committee Named

The Chair announced the appointment of the Exchange Organization Committee for the Northern Division as follows: Harry Cayford, Fresno, Chairman; Henry J. Capion, Oakland; E. H. Grogan, Stockton; Emil Hoberg, San Francisco; Wm. F. Serpa, San Jose.

Resolutions Adopted

The Secretary read the resolutions as

CONSTRUCTIVE CRITICISM OFFERED TO REGULATE BUILDING INDUSTRY

BY J. W. MORIN

Suggested legislation, prepared by Mr. J. W. Morin, attorney of Pasadena, is submitted to the Builders' Exchanges of California and other organizations interested. Mr. Morin has taken a great deal of time in correspondence with the many classes at interest in this remedial legislation with a view to interesting all organizations which may be affected by its passage. Careful consideration and constructive criticism and suggestions are solicited by the author. Mr. Morin's work in connection with this measure has received the endorsement of the Presidents and Secretaries of Southern California Builders' Exchanges.—EDITOR.

presented by the Committee on Resolutions reported by the Chair, as follows:
RESOLUTION NO. 1.

We, the Joint Legislative Committee appointed at the third State Conference of the State Builders' Exchange of California, do hereby respectfully submit the following resolutions:

That we do hereby endorse and commend the Builders' Exchange of Stockton for the wonderful business meeting and entertainment program furnished during the two-day session of the Conference of the State Builders' Exchange.

Especially do we mention the personal work of the Stockton Exchange, their President, E. H. Grogan, and Secretary-Manager, Miss Ada Jackson, and the splendid words of welcome addressed to us by the Honorable Mayor Raymond J. Wheeler, and City Manager, Chas. E. Ashburner.

We heartily endorse and feel that we are voicing the sentiment of every delegate, member, and all present that it has been a more than successful meeting.

RESOLUTION NO. 2.

That this meeting of the State Exchange members fully realizing the value of the support of the daily press in all worth while movements, do commend the liberal way in which the Stockton Daily Independent and Stockton Evening Record have so generously given of their columns in connection with our general work and especially in Stockton.

RESOLUTION NO. 3.

"That, we as your committee, feeling we speak with full appreciation for the assemblage on the wonderful work and earnest endeavor being subscribed to the State meeting by our efficient President and State Builders' Exchange.

RESOLUTION NO. 4.

"That we have received with appreciation the report of all committees pertaining to the great work that must and will be accomplished in the working out of the great and grand principle embodied within the word 'Association,' and as pertaining to the State Builders' Exchange of California."

The above resolutions were offered by: George W. Israel, E. H. Higgins and Henry J. Caplan.

On motion duly seconded the resolutions as read were adopted. Motion carried and so ordered.

It was moved by Mr. Israel and duly seconded that we give a standing vote of thanks to those responsible for making this meeting the most successful yet held.

There being no further business the meeting adjourned at 12:35 P. M.

Friday evening after adjournment the delegates, their wives and friends assembled in the Municipal Auditorium where an elaborate banquet was held. About 250 persons were present.

E. H. Grogan presided as toastmaster, introducing Mayor Raymond J. Wheeler, who spoke on the State of California, the great building state. He also told of the deep water way proposed for Stockton harbor.

State President P. M. Sanford spoke on the aims and ideals of the California State Builders' Exchange.

Ralph Homann, president of Los Angeles Builders' Exchange, extended greetings from the Southern California Exchanges with a few appropriate remarks.

W. H. George, president of the San Francisco Builders' Exchange, answered for the exchanges of Northern California on the splendid work being done.

Wallace Harrison of the Yolland Ice & Fuel Co., entertained by singing three solos. Mr. J. R. Burke, Jr., rendered several selections on a hand saw, using a violin bow. John F. Muldowney, accompanied by his wife, rendered a number of solos mostly of his own composition.

Following the banquet members and guests adjourned to the main floor of the auditorium where dancing was enjoyed until midnight.

For many years the building industry, which is the largest industry in the State, has been regulated under a rather elaborate mechanic lien law, designed with a particular view to the protection of laborers, materialmen and contractors, with one way out for the owner about as wide as a needle's eye, to-wit, a narrow method by which through the prior filing of contract, specifications, blue prints and fifty per cent surety bond, and the meticulous following of the exact details of these exhibits through construction, the owner might protect himself from having to pay more than the contract price of the structure.

It has become increasingly evident to all business interests, however, that the law leaves much to be desired, in that while the certain interests in the building industry have protection for their services and materials furnished, there are two other classes of persons involved in the building industry who, under the present methods of regulation, get little or no protection, to-wit, the honest owner and the honest investor in building finance paper.

At the last meeting of the Legislature there was considerable pressure in the direction of the taking care of a peculiarly weak point in the building industry by the regulation of incompetent and dishonest contractors, and at that time the most apparent method was to follow the precedent set by brokers, that of licensing and bonding.

Bonding Is Not Answer

After mature consideration, however, it has come to be the better thought of many of those concerned in the improvement of conditions, and it is at the present time the opinion of the writer that perhaps the bonding of a contractor is neither feasible nor an answer to the desire for the adequate regulation of the contractor, and in the meantime an interesting thing has occurred in that the real estate fraternity have themselves started a movement to abolish the bonding of brokers, but to retain their regulation and discipline through other measures. Taking a leaf from the experience of the real estate fraternity, therefore, who have been through this matter for some years, it would now appear to be feasible to consider seriously the regulation of the contractor in ways other than by mere surety bond.

Opportunities For Destruction

The contractor under the present state of the California law has a greater opportunity to do destruction to the business and property interests of his customers than perhaps any other class of business man in the community. The banker, the home building concern, the trust company, the executors and administrators, lawyers, real estate brokers and almost every class of person who handles the or property interests of another, is subject to supervision, regulation and discipline in a more or less adequate way. With the contractor, however, there is no present regulation. Any person can be a contractor who is over the age of twenty-one years, of either sex, and of any nationality. He need know nothing about building; he need have no property; he need not be solvent; he may be a convict with a prison record. He has the power to commit his customer to an enterprise in-

volving intricate details which neither he nor the customer may understand, and some of the details may involve performance of technical services which in themselves are regulated by law, as for example, plumbers and electrical workers. It is one thing to regulate a contract, as he should be regulated. It is another thing to leave the situation as it now is, where the law merely says "sue the contractor after the damage has come and let us see you try and get it."

Irresponsibles Go On

The curious thing is that irresponsible contractors continue to go about the business in given communities for years notorious in their incompetence or the dishonesty, and yet there is no present way of stopping them, so that they will stay stopped. Attachments and judgments roll off of them, like water off a duck's back, and for a customer to become involved with an incompetent and dishonest contractor is an infection with trouble, as if a healthy person were to come in contact with a yellow fever patient. In other words, the crooked, incompetent contractor means nothing but grief for everybody and anyone with whom he comes in contact, involving jobs that are past, jobs that are current and jobs that are in the future all in common mess. Many of them keep no books, no statement of assets and liabilities; some do not keep a bank account; keep their property and their reputation in their wives' names and defy the world to come and analyze their true financial situation, and these contractors are not always small contractors nor their operations inconspicuous. Some of them are ambitious, and many are visionary, and they are at the bottom of losses involving millions of dollars in Los Angeles County alone.

License Proposed

License—It is, therefore, obvious that something should be done, that contractors should be licensed for regulation, not for revenue, that a nominal registration fee should be charged, and that the license should be granted more or less as a matter of course; but withdrawn upon proof of certain gross offenses. In order that there be no danger of manipulation or favoritism, there is no practical difficulty in letting proof of the wrongful acts be submitted to a court of law in the usual way, and let the court decide whether or not the offense has occurred. It would seem that certain minimum rules should be observed.

First: That a contractor must keep books showing at least his assets and liabilities, to the end that in case of tangles over building jobs wherein he is not in a position to pay his losses, creditors involved should know of a certainty that money has not mysteriously disappeared, but has been honestly lost. United States rules make it an offense for a bankrupt not to have kept books, and a contractor, above all classes in society, should know his condition; and those with whom he deals, if a financial tangle results, are entitled to this information also.

Second: Proof of loss due to gross incompetence should justify discipline.

Third: Fraudulent substitutions in disregard of specifications.

Fourth: Diversions of funds from one

customer to another, knowing oneself to be insolvent at the time.

Fifth: Failure to follow specific directions from a customer for the application of payments made in pursuance to contract, for the contractor is constantly in the position of receiving money for a certain specific payment on a specific job, and by withholding information to the materialman by merely giving a payment of money, permits the materialman to make application of this money to an earlier and unsecured account, to the astonishment and disgust of a customer who learns only by sad experience that he is stuck, and that this same materialman can come back and will collect for his mechanic lien account, which the customer, of course, thought he had paid. These different offenses might be described in more or is aggravated form, and should readily justify a court in either suspending or terminating without further recourse the right of contractor to contract.

The suggestion is made to the building fraternity at this time for what it is worth, but a law along this line should be put upon the statute books, for the protection particularly of the honest owner. Incidentally, of course, it will tend to reduce the losses of laborers, materialmen, sub-contractors and all other persons involved in the industry.

Notice Of Intention To Build

As a second suggestion, however, the idea is advanced that a method should be found for the regulation of scheming owners who are sometimes as troublesome to the industry as irresponsible contractors, and the present state of the law is utterly inadequate to reach the responsible owner of a building project, and to that end the notion of requiring a verified layout of the title of the property prior to the beginning of construction is advanced. This has been the subject of more or less discussion for some months in the building fraternity, and is commonly denominated as a Notice of Intention to Build.

It is felt that if, prior to the beginning of construction, the owner of property or some person acting with knowledge of the facts, and by the authority of the owner, files a verified statement in the Recorder's Office, containing the information hereinafter set forth, that it will form a convenient method of estimating the set-up of the project prior to the furnishing of labor or materials. This notice should give the name and address of the owner, the name and address of each and every encumbrancer, that is, holders or mortgages and/or deeds of trust, and a statement as to whether or not the monies have been advanced under these encumbrances, or if not advanced a general statement of the terms and conditions under which the advances are to be made. For example, in case of one or both of them being so-called building loans and dependent upon the progress of construction, the condition of the building specified to exist as each payment is to be made should be set forth. A payment due when plastering is completed if set forth of record, is a convenient method for those who are invited to furnish material to advise themselves as to when money is to be forthcoming. They do not need to take anyone's word for it, or gossip; they can look to the record, if a payment is made in anticipation of plastering, instead of when the plastering is actually done, it then becomes a permanent payment under the encumbrances, and in that case would likely be subordinated to the materialman who was misled by this premature payment. It is not claimed that a verified notice so recorded would necessarily at all times be a statement of truth, but a great majority of citizens will not knowingly sign and record a false statement. The law should require that all persons who conspired to make such a false statement filed should be subordinated in their interests to

those persons who were injured in reliance thereon.

ADDITIONAL EFFECT

This notice of intention will have an additional effect, which may not at first seem apparent, and that is that persons who are invited to purchase the mortgages and/or trust deeds, commonly known as building construction paper, will have a source to which they can go for any reference, and have an additional bit of evidence to sustain them in their assumption that in buying building construction paper that they are buying bona fide and valid obligations that are really what they purport to be on their face. At the present time, as is commonly well known, a person who buys a mortgage and/or deed of trust, buys something which is only guaranteed by a Title Company to be regular insofar as the record is concerned. As a matter of fact, there may be all sorts of conditions existing not of record which tend to affect the paper and to embarrass the parties concerned therein. There are numerous instances of junior liens, particularly, which do not represent actual bona fide transactions to the full amount of their face, but represent inflated and watered transactions, usurious transactions, and all manner of weird ideas, and after a person buys such paper, oftentimes through paying the face value thereof, they are buying a law suit. There is no logical reason why the building construction paper growing out of this large building industry should not be at least as good as other legitimate commercial paper. If it were as good as ordinary commercial paper, there would be a favorable reaction upon the industry, and everyone concerned therewith. It would permit the building industry to be more readily financed and it would very strongly tend to smoke out and eliminate, by these methods suggested, the irresponsible owner and the kiter of inflated, usurious or otherwise irregular building construction paper.

The writer therefore suggests this second notion of a Notice of Intention to the first notion of Licensing of Contractors For Regulation, as to companion ideas for the advancement, security and prosperity of the industry, and for the welfare of the general public directly or remotely concerned therein.

Intention To Build

"Prior to the beginning of any work or construction and not more than ten days prior thereto, there shall be filed in the office of the County Recorder of the County wherein said real property is situated, a notice in writing duly verified upon the oath of the owner or some other person acting for and on behalf of the owner and with his authority, having knowledge of the facts, which notice shall be called A Notice of Intention to Build; said notice shall be in writing, shall contain a legal description of the property upon which it is proposed to erect said improvement sufficient for the ready identification thereof, the name and address of the owner or owners thereof and the nature of the so-called owner's title, whether the same be in fee or held under contract or otherwise; also the names and addresses of all persons holding encumbrances against said property and the amount and nature thereof, and also a statement as to whether or not the amounts represented by the obligations referred to in said encumbrances have been advanced or not, and if not, in general terms the conditions under which said advances are to be made. Any persons who shall enter upon the erection of a building or improvement or other structure under the terms of this Act, either as owner or contractor, without the declaration of intention to build having first been recorded shall be deemed guilty of a misdemeanor and any person who willfully makes a false statement in said declaration of intention or shall conspire to fur-

nish a false statement in a declaration of intention to be recorded shall be guilty of a misdemeanor and his right, title and interest, if any, in said property shall also be subordinated to any other claimant who may be injured thereby.

EMPLOYMENT SERVICE ENGINEERING SOCIETIES

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco, (Phone Sutter 1684).

R-1613-S BUILDING INSPECTOR, under 50, not less than 10 years' experience of a general nature in the construction of all classes of buildings, at least 4 years of which must have been in responsible charge as general foreman or supt. of construction, or the equiv. 4 years credit in experience will be allowed for suitable engineering training. Apply by letter. Salary \$250-300 mo. Location, California.

R-1623-S ENGINEER, 28-30, with some sales experience; preferably in machinery line to train for sales promotion executive. Must be a good talker, writer and mixer and free to travel. Salary \$225-275 month. Headquarters, San Francisco, but will eventually be Northwest.

X-4630-R-1552-S SALES ENGINEER, preferably technical graduate about 35, with sales and construction experience to estimate and detail structural steel and ornamental iron work for fabricating shop. Some travelling. Apply by letter, giving references and photograph. Salary about \$250 a month to start. Location, Kansas.

X-4318-C-S LUBRICATION SALES ENGINEER, single, not over 35, graduate mechanical engineer with practical experience in mill and railroad lubrication to make plant surveys and recommendations. Apply by letter. Headquarters, New York City. Location, Orient. Salary open.

R-1565-S ESTIMATOR, with at least 3 years' experience where he specialized on automatic sprinkler system and fire protection work. Salary open. Local.

X-3810-C-S SALES ENGINEER, for company manufacturing high tension insulators for power and transmission companies. Single man preferred. Apply by letter. Headquarters New York City. Location, South America.

PORTLAND BUILDERS ROW OVER LICENSE LAWS

Excessive city restrictions have made home building a difficulty in the city and have reduced the value of real estate, the Portland, Oregon, city council was told by Fred S. Wilhelm, attorney, in opposing the examination, licensing and bonding of contractors.

On the other hand, the council was told that the small home owner is being short changed because of the irresponsibles in the building industry, and that the city restrictions are necessary to make certain the homeowner gets what he pays for.

"Building of homes has become complicated in the city and is getting to be more and more of a mystery," said Mr. Wilhelm. "You have the building code, the housing code, the electrical code, the plumbing code and now you are planning a furnace code and a roofing code. You can't go on forever putting restrictions on the use of property and jeopardizing real estate values. In many parts of the city one can buy lots for only the cost of the improvements. Is there any incentive for one to invest any real estate under such conditions as that?"

THE OBSERVER

What He Hears
and Sees
On His Rounds

Compared with the past few years the phenomenal increase in average height of metropolitan office buildings is a phenomenon may be said to be one of our million-population cities. Quite recently there has come a new increase of maximum building heights which are advancing into a new era. Not long ago 20 to 25 stories was the effective maximum, but now 40-story projects are numerous and within the last two months several pyramid or tower buildings of some 50 stories have been announced. One of these is planned for 61 stories, a height of 800 ft., topping by a safe margin the Woolworth tower, which is still the world's tallest office structure. Thus is the skyscraper continuing its onward and upward march. Only two decades have passed since the erection of the famous Singer, Metropolitan and Woolworth buildings. But while these older works of surpassing boldness were mainly monuments to family or commercial pride, the current projects have a purely economic basis. Each primarily owes its existence to the fundamental truth that rising property values and constricted building areas justify increasingly taller structures for adequate investment return. But there are some essential auxiliary factors. Due to the resources of modern engineering, steel framework and long-run elevators are practicable to heights far beyond those yet attained. Again, it has developed that building costs do not increase greatly with height. And finally, business men nowadays will travel to a 50-story height as readily as to one of 25 stories, and will pay as much or more rental at the higher level. With these conditions in control, the limit of height increase is not subject to present prophecy. We may be certain, at any rate, that the limit will not be set by technical inability to build higher.—Engineering News-Record.

A five-day week, affecting more than 2,000 workers, will be inaugurated in Assembly Park, N. J., on May 5 through an agreement just reached between the Monmouth County Building Trades Council and the Master Builders Association. Following a joint meeting of the two organizations, it was announced that the arrangement will be kept in force until Dec. 31, 1928, and if it proves satisfactory, will be extended for another year. The hope was expressed that subsequent arrangements may include an upward revision in the wage scale to offset the difference between the weekly wage which will be received under the new scheme as compared with that of the 5 1/2-day week. The arrangement has been under consideration for more than a year and was definitely advocated by the Assembly Park Building Council about three weeks ago. The final approval of the arrangement includes all of Monmouth County.

San Francisco County of San Francisco voted bond of \$11,000,000 to finance purchase of George V. Box Water Company's property to operate in connection with Hetch Hetchy Municipal water project. The issue was voted 51,377 votes in favor as compared with 1,942 against. Bonds of \$21,000,000 also voted to finance construction of the Hetch Hetchy project. This proposal was voted 51,377 favorable votes as compared with 1,942 against.

Sale of the National Magnesite Company, Redwood City, to the Celite Company, with headquarters at Lompoc, Cal., is announced by C. E. Miller, retiring president of the Redwood City industry, one of the largest in San Mateo County. The price was reported at more than \$500,000. Miller, one of the largest stockholders in the company which manufactures building material and insulation for boilers and steam pipes, will no longer be interested in the business, although Manager Elmer S. Hurrell will remain in his present post, it was announced. President August Fitger of the Celite Company becomes managing director of the magnesite manufacturing plant. A development program which will include additional buildings and new machinery to cost more than \$200,000 was announced by President Fitger. There will be no change in the personnel of the present force at Redwood City which includes about 200 men including office workers and executives.

Pacific-Atlantic Lumber Corporation will be formed shortly by Charles Nelson Co., Sudden & Christenson, St. Paul & Tacoma Lumber Co. and Charles R. McCormick Lumber Co. The new concern will not be a merger, but an independent shipping firm organized to cut shipping costs to the East. Articles of incorporation will be filed in Delaware with 10,000 shares of no par value.

J. D. Tennant, president of the West Coast Lumbermen's Association has classified as "very satisfactory" the current barometer of the association's business, which for the week ending April 21 shows for 115 mills a production of 127,628,099 feet, new business of 149,213,941 feet, and shipments of 116,831,316 feet. For the first sixteen weeks of this year the report from an average of 113 mills is: Production, 1,831,969,384 feet; new business, 1,979,686,535 feet, and shipments, 1,778,838,437 feet.

An intensive highway safety campaign designed to cut down highway accidents which exacted a toll of 141,437 lives during the six years previous to 1928, will be planned during the annual meeting of the American Road Builders' Association which convenes in Washington, D. C., May 11. A meeting of the County Highway Officials' Division will be held the following day. It is pointed out by the Association that the accidents are the result of the failure of the human machine rather than errors of engineering or mechanics. The major cause of highway accidents and the estimated number resulting from each during 1927 were listed.

Wage scales in the Canadian building trades are not yet decided, though reports are current that certain trades will demand increases. This is already noted in Winnipeg where the bricklayers have requested \$1.50 an hour and a five-day week. At present the scale is \$1.25 with 5 1/2 days. The request of the bricklayers is said to be presented annually. So far the Winnipeg Builders' Exchange has taken no action one way or the other in the matter. The carpenters', plumbers', painters', and other building trades unions have asked the Builders' Exchange to meet them for the purpose of discussing wages and working agreements, but have not made any specific demands in regards to wages.

A survey completed by an Eastern university reports that strikes in 1927 were reduced 75 per cent compared with 1917. The high wage scale paid skilled workers throughout the country is attributed for this reduction.

Construction of a transcontinental rapid transit highway, designed to speed motor transportation between the Atlantic and the Pacific coasts and curbing accidents, is called for in a bill Representative Henry R. Rathbone of Illinois filed in the House. Under the measure President Coolidge would appoint a special commission to recommend a route.

The senate committee on commerce ordered a favorable report to the senate April 17 on the bill (S. 2475) designed to create a "prosperity reserve" by making appropriations available for undertaking public works in periods of industrial depression. The bill was introduced by Senator Jones (Rep.) of Washington, chairman of the committee. A total appropriation of \$140,000,000 would be authorized by the bill, the money to be spent during periods when it had been ascertained and reported to Congress by the President that the volume of construction contracts during a three-month period had fallen 10 per cent below the average for the corresponding three months of the three preceding years.

Dissension among Seattle building trade unions is still rife as the referendum to determine the stand of the organization on the five-day week proposal gets underway. The carpenters' union appears to be unalterably opposed to any agreement which might prevent the making of an issue of the five-day week for the next three years. This was indicated by an unofficial count of the votes of four locals on the question, union officials declare. Officers of the Building Trades council have refused comment until all votes from all crafts are counted on May 4.

The American Society of Mechanical Engineers, at its spring meeting in Pittsburgh, May 14 to 17, is to award its Holley medal to Elmer A. Sperry of Brooklyn for his achievements in the invention of gyroscope. The medal was endowed in 1925 by George R. Rockwood, a past vice president of the society, to honor the memory of Alexander Lyman Holley, one of the organization's founders. It is awarded "for some great and unique act of genius of an engineering nature that has accomplished a great and timely public benefit."

California Building & Loan Reserve Corporation, capitalized for \$3,000,000, has been incorporated. The principal place of business is San Francisco. Directors are: C. E. Tucker, H. C. Jones, W. M. Sontheimer, S. C. Symon, H. A. Stern, P. A. Oliver and others.

Motor vehicles registered in all of Russia totaled 21,035, as of July 1, 1927, according to figures furnished the U. S. Department of Commerce, 78 per cent being stated owned, 7 per cent co-operatively owned, and 15 per cent privately owned. Figures compiled by the American Motorists Association show that this is one motor vehicle to every 6723 inhabitants in Russia, compared with one automobile to every five persons in the United States.

TRADE NOTES

George M. Frisbie and Mintie Eliza Frisbie will operate from 1625 Filbert street, Oakland, under the firm name of Nottingham Heating and Ventilating Co.

Street Illumination and Construction Co., of Reno, Nevada, capitalized for \$1,000,000, has filed articles of incorporation in Oakland. Directors are: M. F. Taylor, L. Robinson, E. Barkeloo, and D. Wilson, all of Reno.

Hobbs, Wall & Company's sawmill and logging operations on Mill Creek at Crescent City started operating on a 5-day week basis May 1 and will continue indefinitely.

Otto A. Boehm, contractor of Menlo Park, has filed a voluntary petition of bankruptcy with liabilities of \$30,025 and assets of \$26,275. Martin M. Friedman, Oakland contractor, filed a like petition stating liabilities at \$29,425 and assets at \$3,856.

Sawmill at Hobart Mills, Nevada county, has started the Summer run. Logging camps have been operating about ten days. The mill when running at capacity cuts about 170,000 feet of lumber a day and operates about six months out of each year.

Electrical Products Corporation net earnings for the quarter ending March 31 amounted to \$57,250, after all charges, compared with \$42,000 for the same period last year. The regular quarterly dividend on the preferred stock was declared, payable June 30 to stock of record June 25. The dividend rate is 1 1/4%. The expected action looking toward inauguration of dividends on the common stock did not develop, although it was discussed. Definite action on this phase was postponed until the next meeting, probably in June.

W. B. Jones, formerly with the Baugh Hardwood Lumber Co. of Los Angeles, is now manager of the Jones Hardwood Co. of San Francisco, succeeding his brother, Nelson Jones, who is now giving his time to commercial aviation.

Redwood is seeking its share of business in the Argentine, in company with other Pacific Coast woods, and the result of the trial parcel sent to the River Plate last year are being watched with interest by exporters. This shipment made by the Redwood Export Co. of San Francisco, to its agents, Juan y Jose Drysdale, comprising several hundred thousand feet, was well advertised in leading newspapers of Buenos Aires.

Members of the building fraternity of Stockton, as guests of the Stockton Lumber Company, were addressed April 24 at the Hotel Lincoln, Stockton, by Tom V. Sawyer, sales manager of the Celotex Company in the Pacific Coast district. O. F. ("Doc") Folsom, district representative, was a guest of honor. Sawyer spoke on general business conditions, cited home building activities and pointed out the value of house insulation. Chas. G. Bird, manager of the Stockton Lumber Company, was also a speaker.

California Construction Co., general engineering contractors, formerly occupying offices at 58 Second street, was moved to larger quarters at 225 Bush street, San Francisco.

ALONG THE LINE

James Glenn Day of 1839 Catalina Ave., Berkeley, has been granted a certificate to practice architecture by the California State Board of Architecture, Northern District. Arthur D. Janssen, 8152 Fairfax Ave., Oakland, was also granted a certificate.

Newly elected officers of the Modesto Chapter, American Association of Engineers, presided for the first time at a luncheon meeting of the chapter, April 26. Officers are: S. J. Van Winkle, president; T. B. Townsend, vice-president, and S. E. Courtney Jr., secretary-treasurer.

NORTHWESTERN TERRA COTTA TAKES OVER ADVANCE PLANT

Official announcement is authorized by The Northwestern Terra Cotta Company of the purchase of the Advance Terra Cotta Company located at Chicago Heights, Illinois. The Northwestern Terra Cotta Company now owns and operates four terra cotta plants and one crucible plant. The latter is the Chicago Crucible Company located at Chicago. The four terra cotta plants are located at Chicago, Chicago Heights, St. Louis and Denver. The new plant at Chicago Heights considerably increases the facilities of The Northwestern Terra Cotta Company, already the largest, as well as the oldest manufacturer of terra cotta in the world.

The story of this institution is one of the romances of business. When it was founded sixty years ago the capital investment represented only a few thousand dollars. Today its worth and resources run into several million dollars. Starting with a working force of a dozen people more than half a century ago, the company now employs in excess of 2000 men in its four plants.

The present officers of The Northwestern Terra Cotta Company are: Gustav Hottinger, President; H. J. Lucas, Vice-President and General Manager; George P. Fackt, Vice-President-Assistant General Manager; George W. Van Cleave, Vice-President-Sales Manager; George G. Lawson, Vice-President-General Superintendent; John G. Crowe, John Fackt, J. P. Foraker, R. F. Grady, Charles H. Sierks, Vice-Presidents; Adolph F. Hottinger, Treasurer; Arthur H. Kaepfel, Secretary-Assistant Treasurer; Stephen E. Hurley, George Williams, E. J. Dykes, Assistant Secretaries. Mr. Herman Pronger, former president of the Advance Terra Cotta Company, will join the Northwestern organization as a vice-president.

The history of The Northwestern Terra Cotta Company has been marked by unique events in the annals of American business. In 1923 a \$4,000,000 interest in the company was turned over by the then owner and present chief executive, Gustav Hottinger, to a group of executives and workmen who under the long years of his guidance had helped to build the business to its present position in the industry.

In March, 1928, Mr. Hottinger's contribution of \$50,000 was the deciding factor in the establishment of an Industrial Art School in Chicago. The Art Institute will supply space for the school, which is the second of its kind in this country. It will train American modelers and sculptors for service in all the different industries employing talent of that character.

HERE — THERE — EVERYWHERE

Progress in Foreman Training (Bulletin 127) has been issued by the Federal Board for Vocational Education, Washington, D. C. The bulletin covers a study of the results of eleven leader-training conferences conducted by the federal board during the years 1926 and 1927. The bulletin sells for ten cents, and is obtainable from Sup't. of Documents, Government Printing Office, Washington, D. C.

San Jose city council has been petitioned to adopt the uniform building code sponsored by the Pacific Coast Building Officials' Conference. Those urging adoption of the code included R. O. Summers, general contractor; Ralph Wyckoff, architect, M. C. Woodruff, city building inspector and Wm. Barkuloo, secretary of the Surety Building & Loan Association.

Richmond Builders' Exchange at the May 31 meeting will nominate officers to serve for the ensuing year. Installation will be set for the June meeting.

San Mateo County Contractors' Association has appointed a committee to draft a set of rules and code of ethics for dealing with architects.

Sacramento Builders' Exchange had adopted the policy of the more active construction organizations throughout the country in issuing a weekly "Exchange Bulletin." The current issue advises the members of plans on file in the exchange headquarters and is followed up with a summary of contemplated construction of interest to builders in the Sacramento district.

Directors of the Napa County Builders' Exchange in organizing for the ensuing year, elected Wade Shifflet president. Other officers chosen were: Henry Vienop, vice-president; William Noble, secretary, and C. C. Money, treasurer. The directorate is composed of: John Cinnamond, Wade Shifflet, E. W. Doughty, Fred Jackle, Frank Pond, A. McNear, Henry Vienop, Thomas Jessiman, William Noble, S. H. Wyckoff and C. C. Money.

ARTHUR BROWN IS HONORED WITH EXPOSITION COMMISSION

Arthur Brown Jr., San Francisco architect, who designed the Horticultural building for the Panama-Pacific Exposition, has been selected as a member of the architectural commission for the World's Fair and Centennial to be held in Chicago in 1933. This is the second signal honor to come to Mr. Brown from Eastern sources, his selection as a member of the United States Board of Architectural Consultants having been announced last June.

Architect Brown is a former member of the firm of Bakewell & Brown. He was the only Westerner to be named on the United States board selected to prepare plans for rearrangement of the Government buildings in the Big Triangle, Washington, one of the largest construction projects in the Nation's history.

Among the notable structures designed by Mr. Brown are San Francisco's City Hall, Pacific Gas & Electric Building, California School of Fine Arts and a number of the buildings at Stanford.

Four other architects of the East were named.

APARTMENTS AND FLATS ACTIVE IN CONSTRUCTION—DWELLINGS DECLINE

A comparison of the erection of apartments and flats and a corresponding decline in the building of dwellings in the Pacific Coast states for 1926 and 1927, just completed, is shown by S. W. Straus & Co., San Francisco.

The following table gives the construction costs totals for building operations authorized, as reported to S. W. Straus & Co. by building department executives:

	Individual housing	Multi-family housing	All other buildings	Total annual buildings
1926				
Seattle	\$ 11,165,020	\$ 5,207,200	\$ 17,835,480	\$ 34,207,700
Portland	11,851,170	5,615,800	12,091,645	32,588,875
Oakland	11,076,095	3,021,674	13,977,526	28,075,295
San Francisco	17,332,199	10,347,751	30,273,998	57,953,948
Los Angeles	45,007,959	19,126,251	58,872,005	123,006,215
San Diego	10,120,111	1,201,517	8,380,071	20,001,729
Total	\$109,852,844	\$14,550,193	\$141,430,725	\$295,833,762
1927				
Seattle	\$ 9,464,525	\$ 7,282,900	\$ 12,322,655	\$ 29,070,080
Portland	9,885,360	2,669,000	16,119,095	28,972,455
Oakland	6,082,070	2,966,056	11,746,543	20,794,669
San Francisco	11,926,069	13,959,954	18,146,825	47,032,848
Los Angeles	39,211,681	22,866,436	60,949,022	123,027,139
San Diego	6,977,630	1,120,190	6,153,555	14,251,375
Total	\$ 86,517,335	\$ 50,861,536	\$125,737,695	\$263,149,566

LOS ANGELES CONSIDERING NEW TILE ROOF COVERING SPECIFICATION

A new specification for tile roof covering has been approved by the Building and Safety Commission of Los Angeles to supersede the one adopted about a year ago, according to the Southwest Builder and Contractor. Some features of the first specification were not satisfactory to all interests and the new one has been revised to meet any objections to the former. If the new specification works out to the satisfaction of the trade and to the city it will be embodied in an ordinance. In the meantime inspectors will require all work to be in conformity to it. The specification which was drafted by C. Makutehan, research engineer of the Building and Safety Commission, follows:

Tile of any description used for roof covering shall not absorb more than 15 per cent of the dry weight of tile immediately after immersed in water for 18 hours.

All tiles classified as one-piece tile shall be securely nailed and or wired to supporting roof construction. Two-piece tile classified as top or cover-tiles and trough or under-tiles shall be applied as follows: On roofs not exceeding one-third pitch all such cover or top tiles shall be securely nailed and or wired to supporting roof construction, and all tiles including trough or under-tiles in first lower course at eaves and at all hips and ridges shall be securely nailed and or wired to supporting roof construction. All other trough or under-tiles shall be nailed or wired to the supporting roof construction or shall be securely interlocked and held in place to prevent displacement in a manner that each such trough or under-tile shall have its lower end about the upper end of cover or top tile immediately below. On roofs exceeding one-third pitch each cover or top tile and each trough or under-tile and or separate pieces thereof shall be securely nailed and or wired to the supporting roof construction.

Any type of one-piece hook-tile made interfittingly with lug or lugs at one end thereof may be used on roofs as herein prescribed, providing the lug or lugs and the tile are at least five-eighths inch thick of the same material, project at least three-quarter-inch below the bottom surface of tile and the lug or lugs shall extend and extend across 50 per cent of the width of tile. Such hook-tile shall be applied as follows: All such tiles shall be securely nailed and or wired to supporting roof construction on such roofs all tiles shall be securely nailed and or

wired to the supporting roof construction or effectively hung or hooked with projecting lug or lugs over substantial wooden or metal strips not less than 1x2 in. Each such wooden or metal strip shall be securely attached or nailed at least every 24 in. to the supporting roof construction. On roofs exceeding two-thirds pitch each such hook-tile shall be securely nailed and or wired to supporting roof construction; provided, however, that on roofs not exceeding a one-third pitch there may be used an approved type of one-piece hook-tile with lug or lugs approximately one-third the width of tile, or an approved type of combination hook and inter-locking tile laid so as to overlap and effectively interlock with tile next immediately below thereof.

Tiles of every description and/or separate pieces thereof required to be attached immediately below at least 3 in.; except that approved tile which effectively interlocks with tile next immediately below may be laid to overlap not less than 2 in.

Tiles of every description and/or separate pieces thereof required to be attached to supporting roof construction shall be securely nailed with copper nails or wired with copper wire of not less than No. 14 & X gauge, and when wired and nailed copper nails shall be used; except that, on roofs not exceeding one-third pitch, when tiles are nailed only, galvanized wire nails may be used. All nails shall penetrate the supporting roof construction at least three-quarters of an inch after passing through tile or effective fastening device; provided, however, that in lieu of the wire and nails herein specified other fastening devices may be used in case such devices are first approved by the Board of Building and Safety Commissioners. The requirements prescribed in this section relating to wiring and or nailing of tile shall not be deemed to apply to flat-surfaced tile laid flush, used to ornament and face concrete roof slabs or other masonry roof backing, provided such tiles are firmly embedded in the concrete or other masonry backing with cement mortar or are otherwise attached in an approved manner that will prevent displacement.

Except where open construction is desired, as over porches and eaves, before the tile is laid the wood sheathing or similar roof deck shall be covered with at least one layer of felt saturated and coated roofing that weighs not less than 12 pounds to the 100 sq. ft.; or, in lieu thereof, the covering shall be one layer of 30-pound asphalt impregnated rag felt, or two layers of 14-pound asphalt impregnated rag felt well mopped with hot asphalt between the laid two layers of felt. Such roofing, or felt, shall be laid to overlap so as to readily shed water.

STATE TO WAGE SAFETY CAMPAIGN IN BUILDING INDUSTRY

Aroused by the large number of deaths and injuries to workers in the building industry of California, due to the lack of proper safety inspection, a campaign of safety is to be launched by Will French, state director of Industrial relations.

In 1924, 1925 and 1926, declared French, there were 463 men killed while engaged in building and engineering construction in this state; 556 employees were permanently injured and 53,875 sustained temporary injuries.

"As the industrial accident commission," said French, "does not have the men nor the money adequately to cope with the serious situation, it has been decided to enlist the wholehearted support of employers, employees and insurance companies in a campaign to reduce the accident toll."

"It is believed the response to the call of co-operation will be general. What can be done is illustrated by the construction of several of California's largest new buildings. For instance, the splendid new twenty-six-story administrative structure of the Pacific Telephone and Telegraph Company in San Francisco was built under the watchful eye of a safety engineer."

"Not one life was lost in the building there were no serious accidents and the contractors secured a substantial return on the insurance premium because of the fine experience. It used to be claimed that each floor of a skyscraper would be baptized with blood."

BOOKLET TO TELL OF GRADE MARKING OF LUMBER

The National Committee on Wood Utilization of the Department of Commerce today announces early publication of a bulletin on the grade marking of lumber.

Grade marking, it is explained in the booklet, means placing on every piece of lumber a stamp or mark indicating its quality or grade, for the purpose of assuring consumers that they receive what they specify and pay for. This can best be done at the sawmills, because every mill has an expert grader who classifies the lumber according to specifications under American lumber standards.

The Committee has long advocated grade marking because it has found that most consumers of lumber are unable to tell one grade from another. This naturally results in wasteful and inefficient use of lumber.

Grade marking is not a new idea, some lumbermen having practiced it for several years, to the benefit of their business, so they report; and European lumbermen have been grade marking for a century or more. But it has not been universally practiced in all lumber districts in America.

"Grade Marking of Lumber, For The Consumers' Protection," the new pamphlet, will soon be available for distribution at a nominal price. It has been written expressly for the benefit of consumers and explains the many advantages of using properly grade marked lumber.

STANDARD ISSUES FOLDER

To stimulate interest in bathroom color Standard Sanitary Manufacturing Co. has issued an attractive folder, showing the eight shades in which Standard enameled and vitreous china fixtures are available. This folder features the original bathroom designs by Standard, and brings out the harmonies available in the use of color for fixtures, dressing benches, shower curtains and seats. Stools, seats and benches are available in nine shades, with the additional shades in mother-of-pearl effect.

DAY LABOR BILL OF ASSOCIATED GENERAL CONTRACTORS RECEIVES O. K.

The Campbell bill, a congressional measure sponsored and supported by the Associated General Contractors of America, which has as its purpose the curbing of the increasing tendency of federal agencies to handle governmental construction work by the day labor system, has been favorably reported to the house by the committee on the judiciary.

The measure as it rests before the present congress holds generally the same form in which it was presented to the last session. The house committee on the judiciary reported the bill favorably during the closing days of the last session, but the rush of legislative activity which always characterizes the closing hours of a congress made postponement of "the big drive" until the present session a wise move.

Members of the association are urged to make a careful study of the report, full text of which follows:

Text of Bill

"The committee on the judiciary to whom was referred the bill H. R. 5772, after hearings and consideration reports the same favorably and recommends that the bill do pass.

"The hearings on this bill held in the sixty-ninth congress developed that there was a universal demand for the carrying out of the principles of the bill. At these hearings there appeared 22 men representing the construction industry. They came from all sections of the country, including Wisconsin, Alabama, Pennsylvania, New York, California, Illinois, Michigan, Missouri, Minnesota, Washington, Arkansas, Louisiana and Massachusetts.

"Not one appeared before the commit-

tee expressing opposition to the principles involved. The hearing disclosed that the proponent of the measure, Representative Campbell, of Pennsylvania, in answer to questionnaires sent to state highway and city engineers in different sections of the country, disclosed that 89.7 per cent of the whole amount expended for public and private construction was by competitive-contract system, leaving but 10.3 per cent by day labor. This clearly indicated that the competitive-contract system is the commercial practice as well as the general state and city practice. This is ample proof of its worth and that the American people desire the government to do as little as possible of this work and as much as possible should be done by private concerns and individuals.

To Curb Practice

"We believe the enactment of this legislation into law will retard and prevent encroachment on the part of governmental agencies and lessen the disposition to encourage day-labor construction in competition with private concerns and corporations.

"The late World war afforded sufficient opportunity for observation on methods of governmental work to fully fix the policy, or, rather, demonstrate the wisdom, of following the principles involved of the legislation proposed.

"The construction of public works in the United States approximates two billion annually. This sum will increase rather than decrease. The soundest and most economic system should be employed. We feel that the enactment of this legislation is a guaranty of the best and most economic plan to follow."

SPRING VALLEY CALAVERAS DAM HELD TO BE MENACE

Immediate inspection of the Calaveras dam of the Spring Valley Water Company in Alameda County, which was claimed to be of questionable construction and constituting a hazard to some 7500 people living below it, is asked by William H. Ford, San Francisco capitalist in a letter to State Engineer Edward Hyatt Jr.

Ford said the dam was built against the advice of Herman Schussler, consulting engineer for the Spring Valley Water Company, and that it constitutes a continual menace to the towns of Niles, Centerville, Newark and Alvarado, and possibly Sunol and Decoto, and the entire area between the Calaveras dam and the bay.

Further, he told the state engineer, that when only a comparatively small amount of water had been backed up behind it, the upper half collapsed, but has been rebuilt.

Hyatt, however, has informed Ford his office was without jurisdiction to inspect the structure. Reservoirs built by public utilities are controlled by the railroad commission. Those works of municipalities or municipal districts and the federal government also are beyond state inspection.

Ford, in his letter to Hyatt, named William Mulholland, the engineer who had charge of the planning and construction of the St. Francis dam which collapsed last month with a loss of life exceeding 400, as the engineer for the Spring Valley project whom, he said, advised and planned construction of the Calaveras bulwark against the recommendations of his consultant.

NATIONAL SPECIFICATION PROPOSED FOR REFRIGERATORS

The establishment of national specifications for domestic refrigerators to permit their purchase on the basis of quality and performance is to be undertaken shortly by a technical committee representing manufacturers, dealers, purchasers, government departments and all other interests concerned, it is announced by the American Engineering Standards Committee, under whose auspices the work will be conducted. A general conference of all interests concerned with domestic refrigerators, called on March 30 at the request of the American Home Economics Institute and the American Institute of Architects, voted unanimously in favor of standardization work under the procedure of the Standards Committee. The general conference decided that standardization activities, for the present at least, would be devoted chiefly to ice boxes and other refrigerators which may contain units operated by gas or electricity.

ROOFING SLATE REVISIONS ARE NOW IN EFFECT

A sufficient number of written acceptances having been received for Simplified Practice Recommendation No. 14, roofing slate, recently revised by the industry, the Division of Simplified Practice of the Department of Commerce, announces that the project is now in effect, as of February 1, 1928, subject to annual revision or re-affirmation by the industry. Eighty per cent of the known manufacturers, distributors and organized users, must accept the recommendation in writing before it can be placed in effect by the Department of Commerce. This recommendation was originally developed January 23, 1924, and has been in effect with satisfactory results since July 1, 1924. A factual survey conducted by the standing committee revealed an average degree of adherence to the recommendation of 98 per cent. This project established a simplified list of 48 items, whereas previously there were 98 items in use.

RIGHT PAINTING OF WOOD TOLD BY FORESTS PRODUCTS LAB.

Paint blister can be prevented by care in seeing that wood is dry before putting on the first paint coat and by care in constructing houses to see that moisture does not seep through from the interior to the exposed face of the exterior siding, according to a bulletin of the Forest Products Laboratory of the United States Department of Agriculture.

Blistering and peeling of paint, according to the bulletin, results when the wood in contact with the paint coating becomes wet. Ordinarily it is impossible to get the lumber wet after a good coating of paint has been applied, but where an outer surface only is covered, as in the siding of houses, moisture caused by contrast of room and wall temperatures may percolate through the boards from the inside and cause bubbles or blisters to arise on the coated surface.

Wood in the air dry condition, roughly containing from 10 to 15 per cent of moisture, is below the danger line and within the fibre saturation point, the bulletin states.

"The variations in the moisture content of commercially dried lumber as it is delivered to the job are hardly likely to be great enough to lay any of it open to danger of paint peeling," it says, "unless there has been some very gross departure from accepted standards of good practice in handling it. When blistering and peeling has been observed the large amounts of moisture required to cause it have almost always appeared to have gained access to the wood after its delivery to the job."

Wood that has been allowed to take up moisture after delivery to the job may or may not have soaked up enough to

cause early blistering of the wood, but it may weaken the adhesion of the entire coat of paint and become apparent later in cracks or peel in long shreds. The bulletin advises delay in painting where the wood has become wet until the weather has had an opportunity to thoroughly dry it.

Winter building is not conducive, under ordinary circumstances, to a good paint job result. Special note is made of the likelihood of such construction being occupied and heated before the walls have had a chance to dry. Then the drying process becomes an artificial one in which warm interior heat forces the moisture of plaster walls out through the house siding, a direct method of producing blistering under the exterior painted surface. Drying of new houses by opening doors and windows is advocated because this method permits circulation of air of nearly the same temperature as that of the outdoor atmosphere, and not only is the dampness carried off on the inside air currents, but no new moisture is caused from wall and room-interior temperature contrasts. Single coat painting on winter built construction is also encouraged where it is possible to let the completing of the painting job go until the warm weather has had a chance to thoroughly dry the outside lumber or siding.

"In many cases where there has been no peeling and only small blisters have developed," says the bulletin, "it may be possible to repaint without removing the original coating. Before doing so, care should be taken to see that the walls are thoroughly dry, so that there will be little likelihood of a recurrence of the difficulty."

APARTMENTS

Work Completed
APT. BLDG. Cost, \$35,000
OAKLAND, Alameda Co., Cal., Merritt
Ave. 30.
Three-story and basement frame and
stucco apt. bldg. (18 3-room apts.),
terra cotta tile roof.
Owner—None withheld.
Architect—Irwin M. Johnson, Thayer
Bldg., Oakland.
With certain electric refrigeration, in-
stalled, steam heat, oil burner, 20-car
lift, with turn table.
Bld. will be taken in about three weeks.

Preparing Working Drawings.
APARTMENTS Cost, \$50,000
SAN FRANCISCO, Greenwich Street.
Six-story reinforced concrete apartment
building (10 2- and 3-room apts.)
Owner and Builder—Bell & Sylvester,
2029 Ocean Ave., San Francisco.
Architect—D. A. Jackle, 395 Justin Drive
San Francisco.

Permit Applied For
APARTMENTS Cost, \$150,000
BERKELEY, Alameda Co., Cal., Dwight
Way and Ellsworth St.
Six-story reinforced concrete apartment
building (50 2- and 3-room apts.)
Owner—J. T. Fletcher, 479 Kentucky Ave.,
Berkeley.
Architect—H. C. Baumann, 251 Kearny
St., San Francisco.

LOS ANGELES, Cal.—Architect F. A.
Brown, 1189 W. Washington St., preparing
plans for a ten-story Class A apts.
to be erected at 1915 N. Wilcox Ave. for
B. W. Morning; 90 apts., 67x172 ft.; re-
inforced concrete construction; cost,
\$100,000.

TACOMA, Wash.—Architects Sutton,
Whitney & Dugan, Tacoma, preparing
plans for \$250,000 apts. to be erected for
Oscar F. Volk, local plumber, in Tacoma
Ave.; will be 5-story, 80 by 120 ft., brick,
containing 82 2-room apts.

Grading & Steel Sash Contracts Awarded
APARTMENTS Cost, \$150,000
SAN FRANCISCO, N. Pine, E. Gough.
Six-story and basement Class C apart-
ment building (18 apts.)
Owner and Builder—Chas. A. Laughlin,
419 Gough St., San Francisco.
Architect—H. C. Baumann, 251 Kearny
St., San Francisco.

**Grading—L. Devincenzi & Co., 118 Blake
St., San Francisco.**
**Steel Sash—Trucon Steel Co., Sharon
Bldg., San Francisco.**

Sub-bids are being taken on other parts
of the work.

will be received by U. S. Engineer Of-

San Francisco, May 1st, 1928

Presidents of Auburn, Lincoln and Grass Valley Rotary Clubs,
Superior California.
Fellow Rotarians:—

Please be advised that Mrs. Sandy and I have tickets No. 1 and No. 2 to
your joint Conference luncheon (luncheon No. 11 at the Fremont Presbyterian
Church) on Friday, May 11th, or the second day of the big Rotary Conference
in Sacramento. Although Tom Kelly of the Chico Rotary Club asked us to
attend the Chico-Corning Conference luncheon (luncheon No. 3) at the Y. M. C.
A., you are our "first choice" as Tom says. If the Lincoln Club is going to
sing, I will bring the terra cotta cup that the Lincoln Club gave me.

On Thursday, May 10th, we are going to attend luncheon No. 7 in the
Masonic Temple and conducted by the Fresno Rotary Club, for we were raised
at Tulare, only a few miles south of Fresno and Mrs. Sandy and I have tickets
No. 1 and No. 2 for this luncheon. We believe in the early bird and the juicy
worms.

Rotarily yours,
SANDY PRATT.

BEGINNING MAY the 10th.

THE ROTARIANS of the west.

OR THE second district.

INCLUDING CALIFORNIA, Nevada.

AND THE Hawaiian Islands.

WILL MEET in Sacramento.

FOR A three-day Conference.

MR. AND Mrs. Sandy will be there.

TO MEET old friends.

AND ENJOY the Conference talks.

SACRAMENTO KNOWS how.

TO ENTERTAIN.

AND SANDY will forget.

ALL ABOUT his clean sand.

AND CLEAN rock and gravel.

PRODUCED AT Sacramento, Marysville.

PRATTCO (MONTEREY County).

PRATTROCK (NEAR Folsom).

AND MAYHEW (Sacramento County).

ENTRAL OFFICE—San Francisco.

AND "ROTATE with the Rotarians."

"I THANK you."

ROTATING
WITH THE
ROTARIANS

The City of Sacramento will lock up all the gray squirrels in beautiful
Capitol Park while the Rotarians and other nuts are in town. Clarence (Sandy)
Pratt, President of the Pratt Building Material Company and producer of clean
sand, rock and gravel will be there and the poor squirrels will lose their free-
dom.

flee, 85 2nd St., to fur. and del. Rio Vista, Solano county, one submarine cable (1500 ft.) in 1 length, composed of 5 conductors for 110 volts. Further information obtainable from above.

OAKLAND, Cal.—City sells \$1,053,013 bond issue for premium of \$53,013; proceeds of sale will finance dredging in harbor and construction of warehouse to be leased to Rosenberg Bros. Bids for this work will be taken at the Oakland City Port Commission, Oakland Bank of Savings Bldg., Oakland, on completion of plans.

POMONA, Los Angeles Co., Cal.—County of Los Angeles will start plans near future for exposition building to be built on county fair grounds, Pomona. Est. \$160,000, will be 800x135 ft. and 40 in height, with 108,000 sq. ft. of unbroken floor space and a stage at one end. Plans will be prepared in the office of the county architect. C. B. Afflergh is secretary-manager of the County Fair.

LOS ANGELES, Cal.—Until 2 P. M., May 28, bids will be received by county to construct 3-story brick and concrete incinerator building (not including mechanical equipment) at the General Hospital. Work will include bridge and roof paving; 62x34 feet, with brick and art one exterior, Silcock and fire brick linings for combustion chambers, elevators, pe railings, roller doors, etc. Plans on file at office of clerk, Miss Mame B. Beatty, 303 Hall of Records.

LOS ANGELES, Cal.—Until 2 P. M., May 28, bids will be received by county for mechanical equipment, including jacket conveyors, digesters, vacuum system, wash tanks, traveling hoppers, etc. Plans obtainable from clerk of the board, Miss Mame B. Beatty, 303 Hall of Records.

CLOVERDALE, Sonoma Co., Cal.—Junior Chamber of Commerce announces it has been obtained on which to establish a municipal airport. Grading operations will be started at once.

PITTSBURG, Contra Costa Co., Cal.—Junior Chamber of Commerce backs proposal to construct pedestrian subway in Railroad avenue at tracks of Santa Fe and Southern Pacific; est. cost \$2000.

VALLEJO, Solano Co., Cal.—George Lanchi, 921 Kentucky St., Vallejo, awarded contract by Parmisano Bros., 16 Georgia St., to erect one-story fish market, 25 by 65-ft. at 119 Georgia St.

BERKELEY, Alameda Co., Cal.—The following bids were received by Emma Mann, city clerk, to construct tennis courts at Grove Playground:
Malott & Peterson, 3221 20th St., S. F., (A) \$3349; (B) —; (C) —;
Immel & Siedel, Oakland, (A) \$2425; (B) —; (C) \$1940.
Heafey-Moore Co., Oakland (A) —; (B) \$1890; (C) —.
Bids taken under advisement for one week.

VENICE, Los Angeles Co., Cal.—Taggart Aston, consulting engineer for Frank Garbutt, 275 Orange St., Long Beach, and associates on Long Beach yacht harbor project, is working on preliminary plans for a combined yacht harbor and recreational park off shore at Venice. Rough draft of the plans has been submitted to the Playground Department of the city. This plan embraces a proposed area of 6000 ft. along the shore south from Avenue 25 to a point near Avenue 51. Building the shore line out so as to allow for an 80-ft. boulevard to distribute traffic along the face of the development area, a 90-acre fill is constructed in the plan, including a 600x1000-ft. open air swimming pool. The project involves the following: Park and picnic grounds, also parking, yacht club gardens and tennis ground, wading and model yacht pool, municipal bath houses, public tennis courts, university boat house, public boat houses and cafe, boy scout and public schools boat house, hydroplane station, restrooms and lockers, aquarium, bandstand, municipal luncheon room, children's bath house, municipal auditorium. The harbor designed by Aston, in the plan shown herewith, would contain 195 acres of water behind a concrete crib breakwater with which a promenade and fishing pier would be combined. The estimated cost of constructing this concrete breakwater about one and one-third miles in length and the filled-in park of 90 acres behind concrete bulkheads will not exceed \$2,500,000.

SAN FRANCISCO.—Until May 7, 11 A. M., under Proposal No. 375, bids will be received by Leonard S. Leavy, city purchasing agent, to fur. and del. under Class 7, hardware and castings and under Class 11, lumber. Materials may be ordered from time to time during the semi-annual term commencing July 1 and ending Dec. 31, 1928.

SAN FRANCISCO.—Until May 7, 11 A. M., under Proposal No. 376, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to fur. and del. enamel wares, aluminum ware, tinware, Japanned and galvanized wares and kitchen utensils. Further information obtainable from above.

LOS ANGELES, Cal.—Until 2 P. M., May 28, bids will be received by county for steam and return piping for heating system at Juvenile Hall. Plans on file at office of clerk of board, Miss Mame B. Beatty, 303 Hall of Records.

LOS ANGELES, Cal.—Until 2 P. M., May 28, bids will be received by county for general contract to construct new tunnel for steam heating system at Juvenile Hall. Plans on file at office of the clerk of the board, Miss Mame B. Beatty, 303 Hall of Records.

LOS ANGELES, Cal.—Until 2 P. M., May 28, bids will be received by county for constructing an electric lighting system in tunnel at Juvenile Hall. Plans on file at office of the clerk of board, Miss Mame B. Beatty, 303 Hall of Records.

UKIAH, Mendocino Co., Cal.—Chamber of Commerce, Lions Club and Rotary Club have started campaign to raise funds to finance construction of community swimming pool; 45 ft. by 105 ft.

RENO, Nevada.—City Council has purchased site in southeast section of city on which to establish municipal baseball and athletic field. The sum of \$10,000 was paid for site.

EUREKA, Humboldt Co., Cal.—Until May 7, 8 P. M., bids will be received by A. Walter Kildale, city clerk, to construct chain link wire fence around portion of Elk and Deer paddocks in Sequoia Park. Cert. check 10% payable to city req. with bid. See call for bids under official proposal section in this issue.

LODI, San Joaquin Co., Cal.—City Engineer L. F. Barzellotti preparing plans for sprinkling system for Lawrence Park.

MONTEBELLO, Los Angeles Co., Cal.—Until 7:30 P. M., May 11, bids will be received by the trustees of Montebello School District for electric wiring and for clocks and bell system for the Fremont and Montebello Park School buildings in Montebello School District in accordance with plans and specifications prepared by Architects Jeffery & Schaefer, 1104 Kerckhoff Bldg.

BUSINESS OPPORTUNITIES

D-2827—System of Permanizing the Finish on Automobiles. Denver, Colorado. Mr. Ellsworth Lucore, General Manager, Permanizing Stations of America, 1235 Broadway, Denver, Colorado, desires to secure a suitable representative to handle the exclusive "permanizing" contract in this city.

D-2828 — Safety Telephone Holder. Chicago, Illinois. National Phone Holder Corp., 105 W. Monroe St., Chicago, Illinois, manufacturers of a new metal telephone holder, which can conveniently be fastened to wall or desk, are seeking San Francisco or California distributors.

D-2829—All-Rubber Traffic Marker. Kansas City, Mo. A. J. Stephens, 516 Manufacturers Exchange, Kansas City, Mo., manufacturers of new traffic markers, made of special weather-resisting black rubber with white letters moulded in, furnished in "stop," "slow," "no left turn," "school" or "safety zone," desire to secure the services of a suitable San Francisco representative to work on a commission basis.

D-2830—San Francisco Representative Desired. Harrisburg, Pa. Mr. Daniel N. Casey, Secretary, Harrisburg Chamber of Commerce, Harrisburg, Pennsylvania, represents manufacturer desirous of securing the services of a heating and plumbing jobber to act as distributor of his products in this territory.

D-2831—Electric Heater for Use in Radiators. St. Louis, Mo. Mr. E. Johnston, General Sales Mgr., Commonwealth Laboratories, Inc., Gravois Avenue at Kingshighway, St. Louis, Missouri, is starting to manufacture an entirely new electric heater for use in radiators, for the purpose of heating homes, which they claim will heat faster and store heat longer than any similar heater now on the market. They wish to secure the services of a distributor in this territory.

D-2833—Pacific Northwest Representation. San Francisco, Calif. Mr. Frank Jay Deffry, % Overland Freight Transfer Co., 214 Front St., San Francisco, Calif. (Phone—Davenport 4700), leaving San Francisco June 16 for Pacific Northwest, Spokane, Portland, Seattle and Tacoma. All business transacted—personal and commercial. References.

D-2836—Milwaukee, Wisconsin. Mr. Hyman Ledeen, Mechanical Engineer, 794 No. Cambridge Ave., Milwaukee, Wisconsin, is looking for a California manufacturing business, preferable machinery, that is now established, but is capable of expansion under the guidance of an experienced management engineer. He would like to know of such a firm which the owners would sell either outright, or by controlling interest, or by profit sharing management. He plans to visit California early this summer to investigate all propositions coming to his attention.

12952—Silvered Mirror Frames. Lodelinsart, Belgium. Victor Jacquet, Lodelinsart, Belgium, manufacturer of a line of patented silvered mirror frames wish to appoint Pacific Coast agents to sell their product, together with window glass, putty, etc.

12955—Covers and Drapes. Holland. Mr. J. H. Hymans, Secretary, Holland-American Chamber of Commerce, 53 Post St., San Francisco, Calif., represents company wishing to get in touch with firms interested in the importation of cotton and artificial silk covers and drapes in a large variety of design and shapes.

12957—Oregon Pine. Amsterdam, Holland. (Same as above), desires to get in communication with lumber exporters dealing in Oregon pine.

12960—Fire Extinguishing Apparatus. Athens, Greece. Antoine Anastassios Fils, 18 Rue Praxitelous, Athens, Greece, seeks connection with manufacturers of fire extinguishing apparatus.

12962—British Columbia Representative. Vancouver, B. C. Mr. R. T. Watkins, % Cosgrove & Co., Inc., 343 San in heavy lines, such as chemicals, fertilizers, colors, flotation oils, etc.

12965—Scrap Aluminum. Osaka, Japan. S. Sano & Co., No. 2 Higashi Shimizu Machi, Osaka, Japan, is in the market to purchase a large quantity of scrap aluminum and waste aluminum, to be used for remanufacture.

\$7,000,000 EXPENDED FOR STATE HIGHWAY CONSTRUCTION

More than \$7,000,000 in highway construction work has been placed under contract by the State of California since the beginning of the present biennium on July 1, 1927, according to Bert B. Meek, state director of public works.

The exact amount is \$7,102,508.65, and in addition work estimated at more than \$5,000,000 is in prospect for the next few weeks.

Showing that the highway-building program is being speeded up, Meek's figures reveal that contracts for the first twenty-four days of April total nearly double for any previous month in the ten-month period. Up to today, April contracts have amounted to \$2,315,658.08.

In July, 1927, highway awards amounted to \$1,221,994.60; August, \$723,664.70; September, \$749,550; October, \$421,312.80; November, \$297,312.30; December, \$378,746.55; January, 1928, \$233,361.27; February, \$268,184.37; March, \$492,813.98.

Engineering News Section

BRIDGES

SEATTLE, Wash.—Until May 18, 9:30 A. M., bids will be rec. by C. B. Bagley, Secty., Board of Public Works, to const. piers for steel bascule bridge and approach spans over West Waterway at West Spokane St., involy. 5200 cu. yds. excavation; 9000 cu. yds. conc.; 155 tons reinf. steel; 55,000 lin. ft. piling. Cert. check 5% payable to City Comptroller req. with bid. Plans obtainable from Secty. on deposit of \$10, returnable.

TEHAMA, Tehama Co., Cal.—I. W. Brunk, Coming, at \$8,000 awarded cont. by city to const. reinf. conc. bridge at NW entrance to city, includ. 2,000 cu. yds. fill.

Official Proposals

STATE OF CALIFORNIA
DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS
NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Highway Building, Sacramento, California, until 2 o'clock P. M., May 23, 1928, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Marin County, between Ignacio and Allinas Creek (IV-Mrn-1-A), about four and nine-tenths (4.9) miles in length, to be graded and paved with Portland cement concrete.

Mono County, between Dogtown and Joint Ranch (IX-Mno-23-I), about two and one-tenth (2.1) miles in length, to be graded.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the District Office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the District Office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS.

C. H. PURCELL,
State Highway Engineer.
Dated: April 25, 1928.

NOTICE CALLING FOR SEALED BIDS
(C. I. Pipe—Lindsay, Calif.)

Sealed bids will be received by the City Council of the City of Lindsay up to 8 o'clock P. M., May 14th, 1928, for furnishing the following:

874 feet 10-inch Cast Iron Pipe, Bell and Spigot, f. o. b. Lindsay, Calif. Bidder must specify Class of pipe bid is on, or number of pounds pressure pipe will stand.

The City Council reserves the right to reject any or all bids.

Bid, to be marked, "Bid on Cast Iron Pipe."

E. V. BOGART,
City Clerk. 37

NOTICE CALLING FOR BIDS
(Pump—Lindsay, Calif.)

Sealed bids will be received by the City Council of the City of Lindsay, up to 8 o'clock P. M., May 14th, 1928, for the furnishing and installation of

One, Belt Drive, Centrifugal Pump, having a capacity of 800 gallons per minute at 120 foot head or 600 gallons

per minute at 200 foot head, suction nil. Said pump to be installed in pump house at Plant 3, City Water Works and to be equipped with requisite pulley to meet speed requirements of pump connected with Gasoline Engine Jack Shaft, Engine Pulley being sixteen inches in diameter, ten inch face, Engine Speed 1200 R. P. M.

Bidder to show in bid the efficiency of pump under both of the above heads, and which efficiency shall be guaranteed by the bidder.

The said pump to be installed ready for operation and for connection to seven inch standard pipe suction and to ten inch cast iron pipe discharge, bidder to furnish connections for same to pump.

The City council reserves the right to reject any or all bids.

Bids to be marked, "Bid on Centrifugal Pump," and delivered to the City Clerk of the City of Lindsay not later than 8 o'clock P. M., May 14th, 1928.

Certified or Cashier's Check for ten per cent of the amount of the bid must accompany bid.

Manner of installation to be shown in bid, either by description or sketch or both.

E. V. BOGART,
City Clerk. 37

STATE OF CALIFORNIA
DEPARTMENT OF PUBLIC WORKS
DIVISION OF HIGHWAYS
NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, 414 Highway Building, 11th and P Streets, Sacramento, California, until 2 o'clock P. M., May 14, 1928, at which time they will be publicly opened and read, for performing work as follows:

In San Joaquin County, across the South Fork of the Mokelumne River at New Hope (X-S.J.-53-A) about two hundred eighty (280) feet in length, to remove present timber approaches and dolphins and construct new timber approaches to draw bridge.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the above address.

No bid will be received unless it is made on a proposal form furnished by the District Engineer. Each bid must be accompanied by cash, or a certified check made payable to the Director of Public Works, for an amount equal to ten (10) per cent of the amount bid, such guaranty to be forfeited should the bidder to whom the contract is awarded fail to enter into the contract.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

State Highway Engineer.
By R. E. PIERCE
Acting District Engineer, Dist. X
Dated: May 2, 1928. 37

NOTICE TO CONTRACTORS
(Walnut Creek School District)

Notice is hereby given that sealed bids will be received by the Board of Trustees of the Walnut Creek School District, Walnut Creek, Contra Costa County, California, until 7 o'clock P. M., 14th day of May, 1928, at the present Grammar School Building, Walnut Creek, California, for the erection and completion of new grammar school building and alterations and additions to the present grammar school building at Walnut

Creek, Contra Costa County, California, according to plans and specifications prepared for the same by Coffman-Sahlgren-Stafford, the authorized architects. And adopted by the Board of Trustees of the Walnut Creek School District on the 23rd day of April, 1928.

Bids will be received for the Concrete and Mason and Brick Work combined; for the Carpenter Work; for the Plastering Work; for the Painting Work; for the Roofing Work; for the Plumbing Work; for the Heating Work; for the Sheet Metal Work; for the Electrical Work; for the Concrete, Mason, Brick Work and Carpenter Work combined; for the Plumbing and Heating Work combined; for the Plumbing, Heating, Sheet Metal and Electrical Work combined. All with alternate propositions.

Plans and specifications can be seen during office hours at the office of the Clerk of said Board at Walnut Creek, California, and may be seen at or obtained from the offices of the architects, 602 Plaza Bldg., Sacramento, California.

A cash deposit of \$25 will be required from all prospective bidders on all copies of plans and specifications loaned out, as a guarantee of the return of the same.

All bids shall be presented on blank forms which may be procured from the office of the architects.

Each bid shall be accompanied by a certified check on some responsible California bank for a sum not less than ten per cent (10%) of the amount of the bid, made payable to Morgan Jones, Clerk of the Board of Trustees, as a guarantee of good faith that the party to whom the contract may be awarded will, within ten (10) days after the award is made, enter into the necessary agreement and furnish the necessary bonds for the faithful performance of said work and in case the bidder to whom the contract is awarded fails to, or refuses to enter into said agreement, or to furnish said bonds, said check shall be forfeited to the School District, in the manner provided by law. The Board of Trustees will not accept a bidder's bond in lieu of a certified check.

Each bid must be enclosed in a sealed envelope and addressed to Mr. Morgan Jones, Clerk of the Board of Trustees, Walnut Creek School District, and endorsed "Proposal for Construction of Grammar School Buildings."

The Board of Trustees expressly reserves the right to reject any or all bids and to waive any informality in any bid received and to continue the award of the contract at the pleasure of the Board.

By order of the Board of Trustees of Walnut Creek School District.

By MORGAN JONES,
Clerk. 37

NOTICE TO CONTRACTORS
(Tubercular Unit—Santa Cruz County)

Office of the Board of Supervisors of the County of Santa Cruz, State of California.

Sealed bids are invited by said board of supervisors for the construction of a one-story frame building as a unit for the Santa Cruz County Hospital, Santa Cruz County, California, in accordance with the plans and specifications, strain-sheets and working details therefor, prepared by L. D. Esty, and approved by said board of supervisors, and filed in the office of the county clerk April 23, 1928.

Copies of plans and specifications, strain-sheets and working details may be obtained from the county clerk on deposit of \$5, which will be refunded upon the return of said copies in good condition.

Bids will be received up to and including 4 o'clock P. M. on May 23, 1928, at which time said bids will be publicly opened.

Said bids must be addressed to the Clerk of the Board of Supervisors and

County, between Tinnemaha Dam and Big Pine (IX-Iny-23-B-C), about six and eight-tenths (6.8) miles in length, to be surfaced with oil treated crushed gravel or stone.

Inyo County, between Diaz Lake and Alabama Gate (IX-Iny-23-1), about eight and five-tenths (8.5) miles in length, to be graded and surfaced with crushed gravel or stone oil treated.

Yolo County, between the Yolo Causeway and one and one-half miles east (X-Yolo-C), about one and five-tenths (1.5) miles in length to graded and oil treated rock borders constructed.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located in Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the District Office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the District Office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

State Highway Engineer.

Dated: May 2, 1928.

STATE HIGHWAY COMMISSION TO RELIEVE UNEMPLOYED

Arrangement of California's highway building program so that the work will be continuous rather than seasonal, thus eliminating to a certain extent unemployment in that end of the state's industry, in contemplated by the state administration.

Efforts of officials toward this end were disclosed by E. B. Meek, director of public works.

Speeding of highway construction was started several weeks ago in an effort to reduce unemployment as much as possible during the early spring, and to this end has succeeded materially.

Meek reports his engineers have advised him recent contract awards have had the effect of taking up considerable slack in labor conditions, and at the same time have been advantageous to the state, for the contractors, in their attempts to hold their organizations together and to keep their equipment in operation, have submitted very low bids.

Aside from this, Meek reported the contractors have been co-operating by getting the jobs on which they have been given contracts under way as rapidly as they can assemble their machinery.

The contractors, the public works director said, at present are rushing their work, in some instances with augmented crews, in an attempt to clear up the jobs they now are on before winter sets in.

Two jobs which will do much to provide work for great forces of men are the grading and surfacing of more than six miles of the Pacific Highway in Shasta County, on which a contract was awarded this week, and the grading and surfacing of a long unit of the Skyline Boulevard on which an award is expected within a few days.

CONSTRUCT A HOME TO SUIT THE PURSE SAYS ARCHITECT

In planning a modern home there are many features that can be eliminated in the interests of economy, but there is one thing the prospective home builder just cannot get along without—money.

"Don't try to build a bigger or better house than you can pay for," said Gwynn Officer, Berkeley architect, in a talk before the Knights of the Round Table at the Hotel Oakland.

The architect can stretch a dollar until it cracks, if necessary, but there are certain limits that no amount of clever planning can pass.

"Every architect who has had experience in dealing with clients can tell you that there is the strongest kind of tendency in the average person to want more house than he has money for."

"When you go to an architect, tell him, the first thing, how much you have to spend. We'd like to forget about this in planning a home, but it can't be done."

The California home builder, on account of the even climate, has many advantages over the builder in the east and north, Officer pointed out.

Dealing with various types of roofing materials, Officer said that the element of fire hazard with respect to the shingle roof has been over-rated. He said he did not agree with some authorities that the Berkeley fire proved the extra hazard of shingle roofs. Most of the houses on that occasion, he said, caught fire from the inside and not from the roof.

INTERNATIONAL CEMENT CORP. TO ACQUIRE TWO NEW PLANTS

Negotiations by the International Cement Corporation for the acquisition of two new plants in the United States are now pending, according to announcement made in connection with its new financing.

The corporation, which owns practically all of the stock in ten separate companies operating eleven plants in the United States, Cuba and South America, is represented on the investment market through the offering of \$18,000,000 twenty-year 5 per cent convertible debentures by Hayden, Stone & Co., at 97, to yield about 5.25 per cent. Application will be made to list on the New York Stock Exchange.

A continuous growth has been enjoyed by the company since its incorporation in 1919. Taking into consideration the two plants mentioned above, the number of plants have increased from five to thirteen, productive capacity has grown from 2,800,000 barrels to 20,000,000 barrels, while net tangible assets have risen from \$6,507,497 to \$49,000,000.

The privilege of converting these debentures into common stock is given to holders in the ratio of from eleven shares to eight for each \$1000 debenture up to May 1, 1948.

What architects and all who build have learned to expect from Quandt craftsmanship:

"Co-operation for Quality"

Materials applied efficiently and expeditiously by brush or spray application to achieve the best result at the minimum cost to the owner.

A. Quandt & Sons
Painters and Decorators

SINCE 1885

374 GUERRERO STREET, SAN FRANCISCO
Telephone Market 1711

Quandt-quality is available for the small job as well as the large. Pioneers and Specialists in the application of Lacquer in the architectural field. Complete decorative color schemes designed and furnished. Advice for technical painting requirements furnished. Our operations are state-wide.

NOTICE TO BIDDERS

Chain Link Wire Fence—Eureka, Calif.)

Notice is hereby given that sealed proposals or bids will be received at the office of the City Clerk in the City Hall on or before 8 P. M. on Monday, May 7, 1928, for the construction of a chain link wire fence around a portion of the Elk and Deer paddocks in Sequoia Park according to the plans and specifications thereof now on file in the office of said City Clerk and a copy of which may be obtained at the office of the City Engineer.

All proposals or bids shall be accompanied by a check payable to the City of Eureka and certified by a responsible bank for an amount which shall not be less than ten per cent of the aggregate of the proposal, or by a bond for the said amount and so payable, signed by the bidder and two sureties, who shall justify, before any officer competent to administer an oath, in double the said amount, and over and above all statutory exemptions.

The Council reserves the right to reject any or all bids.

Dated this 26th day of April, 1928.

A. WALTER KILDALE,
City Clerk of the City of Eureka, and
Ex-officio Clerk of the Council of
said City.

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, at Redding, California, until 2:00 P. M., Monday, May 21, 1928, at which time they will be publicly opened and read, for performing work as follows:

The erection and completion of a farmman's cottage, bunkhouse, truckshed, blacksmith shop, woodshed, oil house and septic tank at the Ft. Goff Creek Maintenance Yard in Siskiyou County.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the above address.

No bid will be received unless it is made on a proposal form furnished by the District Engineer. Each bid must be accompanied by cash, or a certified check made payable to the Director of Public Works, for an amount equal to ten (10%) per cent of the amount bid, such guaranty to be forfeited should the bidder to whom the contract is awarded fail to enter into the contract.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS.

C. H. PURCELL,

State Highway Engineer.

By H. S. COMLY,

District Engineer, Dist. II

Dated May 2, 1928.

THE CONTRACTORS' ROOM

BUILDING AND ENGINEERING NEWS maintains a Contractors' Room where plans and specifications may be filed by Architects, Engineers and Owners for the convenience of bidders in San Francisco and the Bay Coun- ties.

Architects, Engineers and Owners are invited to forward plans of their projects to BUILDING AND ENGINEERING NEWS. No charge for this service. The plans will be returned in good condition when contract for work is let.

Russian Peasant Women Placing Straw
Around Their Dwelling to Keep the
Cold Out

Applying time - proved methods of insula- tion to modern day needs

NO one knows the value of building insulation as do the inhabitants of either extreme cold or extreme hot climates. These natives have realized for hundreds of years the value of insulation—particularly straw insulation. These people, not having a complete scientific knowledge of heat and cold values, made their selection of an insulating material by actual test. After their many crude experiments on different products—straw was finally chosen as their most perfect means of protection against heat and cold.

And today, this time-proved method of insulation is offered in a perfected form—INSO BOARD—manufactured in sturdy panels 7/16" thick, 4 feet wide and any length desired. It has many structural insulation uses such as—(1) Plaster Base, (2) Sheathing under stucco, brick or wood exterior, (3) Roof Insulation, (4) Under Flooring, (5) Wall and Ceiling finishing panels, (6) Sound Deadener, and (7) Insulating inner Walls.

DEALERS will find INSO BOARD a profitable connection, combined with the sales and advertising co-operation which will be WHOLLY AT OUR EXPENSE. Write today for particulars.

Congress of March 3, 1879.

EATING CONTRACTORS OF L. A. CONDEMN BID PEDDLING

As an active step in the campaign
against bid peddling by general contrac-
tors, the following resolution has been
adopted by the Los Angeles Heating and
Cooling Contractors' Association, and is
printed on the back of the newly issued
membership list:

"Whereas, bid begging is a menace to
the welfare of the public, contractor, ar-
chitect, material man, in fact every re-
sponsible element that comes in contact
with the construction industry, and

"Whereas, bid peddling destroys the
confidence and co-operation that is so
necessary to uphold the standards of
the industry, and

"Whereas, bid peddling causes a loss
of time and money to the responsible
contractor, and this loss is passed on to
the consumer eventually, and

"Whereas, bid peddling causes busi-
ness failures that affect the community
at large, and

"Whereas, bid peddling benefits in a
monetary way only those who practice
this evil, and

"Whereas, bid peddling has caused a
loss to the heating contractors, in both
time and money, and has been the means
by which the irresponsible heating con-
tractor has installed improper heating
plants that are not conducive to the
health of the owner and are expensive
to maintain,

"Therefore, be it resolved, that the
practice of bid peddling in whatever
guise, or form, is condemned without re-
serve by the members of this associa-
tion, and no members of this associa-
tion will participate, directly or in-
directly, nor seek to take advantage, di-
rectly or indirectly, in any manner in
such practice, and,

"Be it further resolved that any con-
tractor, architect or owner, who know-
ingly indulges in or continues the prac-
tice of bid peddling, shall be deemed to
be not reputable or responsible by mem-
bers of this association."

LOS ANGELES BUILDING IN APRIL SHOWS SLACKENING

Los Angeles' building for the month of
April, 1928, slackened during the closing
week, and the total valuation for the
month fell short of that for April a year
ago, being \$8,711,040 on 2812 permits. For
the same month last year the valuation
was \$10,458,622 on 3296 permits, while for
the month of March, 1928, it was \$9,791,-
942 on 3278 permits. The recession for
April was chiefly in Class A, Class B, and
Class C construction.

For four months of the current year
Los Angeles' building total was \$33,570,-
401, as compared with \$37,040,098 for the
corresponding period in 1927.

Class A construction for April, 1928, to-
taled only \$1,473,900 on six structures;
Class B, \$225,000 on two buildings; Class
C, \$1,087,625 on 64 structures, and Class
D all-frame construction, \$4,775,175 on
1728 buildings.

Housing operations for April, 1928, ex-
ceeded in valuation and the number of
families provided for any previous month
since March, 1926. They comprised 873
dwellings and apartment houses estimat-
ed to cost \$6,554,497, and providing ac-
commodations for 2221 families. Hous-
ing made up 31 per cent of the total
number of permits and 75.2 per cent of
the total valuation for the month. Janu-
ary, number of permits, 660; value, \$4,-
256,271; number of families, 1544; Febru-
ary, permits, 780; value, \$4,092,086; fam-
ilies, 1527; March, permits, 882; value, \$5,-
990,628; families, 1086; April, permits,
873; value, \$6,554,497; families, 2221. Total
permits, 3195; total value, \$20,893,482;
total number of families, 6388.

U. S. DEPARTMENT OF LABOR RE- PORTS ON WAGES INCREASES

The rate of wages of bakers in the
United States increased from 92.5 cents
per hour in May, 1926, to 95.7 cents in
May, 1927. The building trades as a
whole increased from \$1.278 to \$1.323 per
hour. Bricklayers went from an average
of \$1.565 to \$1.602, carpenters from \$1.267
to \$1.311, painters from \$1.305 to \$1.349,
plasterers from \$1.595 to \$1.628 and
plumbers from \$1.381 to \$1.409. With few
exceptions the building trades generally
showed similar changes. Slight reduc-
tions are shown both in the granite cut-
ters and stone cutters rates, the com-
bined rate receding from \$1.330 to \$1.321.

The figures above given are taken from
Bulletin 457, published by the Bureau of
Labor Statistics of the U. S. Department
of Labor and recently off the press. The
bulletin includes reports for 862,308 trade
union members employed at time rates in
66 leading cities. Summary figures from
the above bulletin were published in the
September and November, 1927, Monthly
Labor Review.

The workers in these time work trades
had an average full time of 45.2 hours
per week. The building trades are al-
most entirely on a 44-hour week with an
average of 43.7 hours due to many trades
working only a 5-day or 40-hour week.

The union trades referred to as a whole
had an hourly time wage rate per hour
2.6 times the hourly rate of 1913 and 2.9
times the rate of 1907. Between 1913 and
1927 the full time hours per week were
reduced 7.6 per cent.

The building trades as a whole had an
average rate in 1927, 2.57 times the rate
of 1913.

BAD ROADS ARE EXPENSIVE, EX- PERIMENTS DISCLOSE

Motorists of the United States pay a
bad roads tax equivalent to 22.3 cents
on every gallon of gasoline consumed on
a poor highway, the American Road
Builders' Association declares. It will
cost that much more to consume a gallon
of gasoline on poor roads than if the
same car were driven on good roads, ac-
cording to the Association.

The figures were derived from the re-
sults of elaborate experiments conducted
at Washington State College, Iowa State
College, and the North Carolina State
College. They are estimated for a car
making 10 miles to the gallon on a rough
highway.

"On a basis of a speed of thirty-three
miles per hour," the Washington report
states, "the test shows the cost in gaso-
line and tires per one thousand miles
over a certain rough road for an average
four cylinder car weighing 3,500 pounds
loaded, was \$35.10. At the same speed,
the cost for the same car over a very
smooth improved road was only \$12.80."

To attain the highest degree of econ-
omy for highway transportation it is es-
sential that road construction methods
be standardized in order that roads may
be built which will handle traffic at a
minimum of cost. An effort is being
made to standardize county road con-
struction through a County Highway Of-
ficials' Division of the American Road
Builders' Association.

A little over one-fifth of the total mile-
age of roads in the United States have
been improved to some degree, and the
American Road Builders' Association es-
timated that there are still at least 2,-
000,000 miles of roads that are inade-
quate for economic handling of traffic,
and must be further improved before
they may be classified as economic high-
ways.

BEAUX ARTS INSTITUTE OF DESIGN MEDAL AWARD

For performing the best work among
the competing universities and colleges
in the competitions of the Beaux Arts
Institute of Design in New York, N. Y.,
this year, the University Medal of the
American Group of the Societe des Ar-
chitectes Diplomes par le Gouvernement
Francais, has been awarded to the De-
partment of Architecture of the Carnegie
Institute of Technology according to an
announcement. This is the first year in
which the award has gone to the Pitts-
burgh institution.

In reporting the award to Professor
W. Frank Hitchens, head of the Depart-
ment of Architecture of Carnegie Insti-
tute of Technology, Edwin H. Denby,
president of the Societe des Architectes
Diplomes par le Gouvernement Francais,
wrote as follows:

"I take great pleasure in announcing to
you that after a thorough study of the
work done in the past year by the stu-
dents of Architecture among the various
competing Universities and Colleges in
the competitions of the Beaux Arts In-
stitute of Design, the Architectural De-
partment of Carnegie Institute of Tech-
nology has merited the medal which is
awarded every year by the American
Group of the Societe des Architectes
Diplomes par le Gouvernement Francais,
known as the University Medal. The
medal will be engraved and sent in time
for presentation at your commencement
exercises."

EARTHQUAKE INSURANCE AND CONSTRUCTION RISK IS TOPIC AT ANNUAL BUILDING AND LOAN MEET

(Address by John H. Schively, Secretary, Insurance Federation of California, before the 23rd Annual Convention of the California Building-Loan League at Catalina Island, May 5, 1928.)

Bank Commissioner Will C. Wood, in a recent address, made the statement that during 1927 the business transacted in the United States amounted to 550 billions of dollars, and that at least 95% of this vast amount was made through evidences of credit, consisting of checks, notes, mortgages, etc.

This statement being accepted as a fact, and practically all of this credit finding its basis in some form of insurance, it is of easy understanding that at least 80% of the business carried on in this nation would be seriously crippled if all policies now carrying coverages should be canceled.

A word, therefore, as to some of the fundamentals of insurance will be in order before discussing the subject of earthquake insurance.

In the first place, it is to be frankly admitted that those who invest their capital in insurance as in any other business enterprise expect a reasonable profit and a fair wage. But in the settlement of costs and adjustment of profits controversies naturally arise between what is assumed as oppressive by the purchaser and protective by the seller. This statement finds its justification in the present problem facing insurance companies as to what is a just and fair rate to charge for earthquake insurance. And it is a problem because of the fundamental principle upon which the cost of insurance is based.

Cost of Insurance

Generally speaking the cost of insurance is founded upon the law of average and spread of liability. As applied to fire insurance, the law of average and spread of liability have been intensely studied since the great London fire in 1666, the result being the establishment of certain standards of measurement including equipment and efficiency of fire departments, man power and apparatus proportioned to population, water supply, and innumerable other features. Out of this study the axiom has been evolved that the cost of insurance must be commensurate with the hazard and corresponding loss.

Accepting this fundamental of the law of average and spread of liability you can readily see that earthquake insurance is not a scientific or rational function of the fire companies. How they ever came to be joined is an anomaly which can only be explained on the basis that fires frequently follow the occurrence of earthquakes. But since the fact remains that fire insurance does now include earthquake coverage withdrawal is out of the question and the problem of fairness to all parties is the insistent problem to be solved.

What has the law of average and spread of liability to disclose concerning earthquakes and how is the cost of coverage to be settled? The word average precludes experience, and spread of liability includes extent of territory having common hazards of some nature. In earthquake hazards there is practically no experience upon which to found a theory, and in spread of liability there is very little record of California. Premiums for

earthquake insurance in 1927 amounted to \$2,755,000, of which California paid \$2,712,000, leaving only \$13,000 to account for extent of territory or spread of liability. The entire question, therefore, falls back on the one State of California, leaving no room for the application of insurance fundamentals in settling the question of costs.

What Will Nature Do?

No one can foretell what nature will do. Two of the leading earthquake experts of the United States are at variance with each other, one holding a fault to exist in a certain part of this state, the other declaring that fault to be closed. In the face of these divergent views on the part of scientists who are supposed to know the facts, what are insurance companies to do? How are they to solve their part of the problem? And it is a problem. An executive of a prominent California company recently made the statement that out of a premium income of over \$20,000,000 which his company had received, less than \$60,000 was earthquake premiums, for which an earthquake liability of \$12,000,000 in California had been placed.

We now come to the problem as at present presenting itself, and which is of peculiar interest to the members of this convention: After the Santa Barbara earthquake, which occurred in 1925, there was an immense demand for earthquake insurance in California, which was met by a rather free writing on the part of the companies on a three-year term and at ridiculously low rates, as shown by the experience of the company to which reference has been made of \$60,000 premiums against a \$12,000,000 liability, with a 40% reduction of the premium allocated to overhead expense. The result of this demand for earthquake coverage was the piling up of a large liability, and when the companies realized all that their act involved they naturally commenced to give the subject fuller consideration, with the result that reduction in liability, through cancellation and otherwise, became very common, and ultimately led to a material increase in rates. In fact, I think there have been two increases in rates since the Santa Barbara earthquake in July, 1925.

Rate Increase Checks Building?

The California Development Association took up the entire subject, statewide, as the result of the last rate increase. There was a feeling that the attitude of fire underwriters would materially check building, particularly in San Francisco and Los Angeles. This committee was called the "Disaster Insurance Committee of the California Development Association," and in its membership included representatives from Los Angeles and San Francisco commercial banks, savings banks, finance institutions, building owners, merchants, etc., of which Mr. J. B. Levison, president of the Firemen's Fund Insurance Company, was the representative of insurance companies.

A number of meetings have been held at which Mr. Levison was successful in convincing the committee that some constructive work was necessary before there would be any change in the pres-

ent attitude of the fire companies; that in the first place, the demand should be reduced through prevailing upon the Corporation Commissioner not to insist upon earthquake insurance where mortgages were not entitled to it by reason of the equity over and above liens, etc. This, I think, was finally done.

The savings banks were urged, similarly, not to ask for earthquake insurance where there was enough value left in the land to protect them in the event of disaster, and so on down the line, the upshot being a very definite reduction in the demand upon the insurance companies for this class of coverage.

Uniform Building Code

Hand-in-hand with this has gone movement for a uniform building code, which is now taking definite shape, and while naturally nothing can be done with the buildings already completed, it is not too much to say that as far as the future is concerned we will have before very long a building code and building inspectors in the large cities to see that the code is properly enforced, whereby we will have a class of earthquake resistant construction both for the protection of life as well as property.

The Board of Fire Underwriters of the Pacific, from its responsibility in this entire matter, is now giving careful consideration to a revision in earthquake rates in anticipation of the large volume of business which will be expiring late in the summer, as the three-year business placed immediately after the Santa Barbara earthquake will then expire. The Fire Underwriters will confer with representative engineers and architects from the north and south in the matter of classification of buildings before coming to a determination as to the rates.

Fair Treatment

From my experience with insurance underwriters I am convinced that they are earnestly endeavoring to give the insuring public, along all lines of indemnity, the fairest treatment possible consistent with all interests at stake. That insurance rates have not shown any increase in recent years, but rather a leaning towards a lower level, while practically all other commodities have registered an upward tendency, is evidence that the business of insurance is not conducted on any basis save that of fair dealing and justice both to policy holders and the shareholder who has invested his resources in the insurance business.

Let us say for the moment that Bailey Willis is pessimistic and that Robert T. Hill is an advocate of optimism. Both of these gentlemen are acknowledged leaders in earthquake science. Can it be other than a natural outcome of their divergent views, that building owners are influenced by Mr. Hill and insurance underwriters, on the other hand, yield to the fear that Mr. Willis may be correct in his conclusions? Even among the underwriters themselves, let it be frankly confessed, opinions are at variance as the Willis or Hill star happens to be above or below the horizon.

In conclusion, a general remark or two by way of recapitulation may not be out of order:

Every fire is a potential conflagration. Every slight tremor of the earth is a potential catastrophe.

Prevent Hazards

The plain duty presenting itself is to prevent the flowering of hazards into real reality, and to modify the damage should disaster or loss occur. This can be largely achieved, as related to fire, by prevention and fire protection. Related to earthquake shock, prevention seems out of the question. No one can tell with any degree of certainty when or where the earth shall register on the surface the action and reaction taking place in the depths below.

But one lesson of large import has been learned with respect to the earthquake hazard and that lesson applies to the question of building construction. San Francisco and Santa Barbara both intensify the strength of the statement. Construction to resist and modify earth tremors is possible and should receive serious attention.

Human ingenuity is generally successful in solving problems affecting the public welfare, and the present problem of earthquake insurance doesn't bulk so large as to be incapable of proper handling. Whatever the rate decided upon may be, if determined by a generous regard for all interests involved and settled by cool-headed, level-minded underwriters and policy-holders in harmonious conference, each placing himself in the other's position as far as possible, then a fairly acceptable working agreement will be reached. No perfect agreement is possible simply because, in the very nature of things, the law of average and spread of liability cannot be invoked in the final determination of the vexed question of the cost of earthquake coverage. This being so, and human nature being what it is, some dissatisfaction from both sides will be expressed and the self-styled solver of all human ills will doubtless step to the front.

But with the grave interests at stake, and with so little real knowledge at hand, the wise one will be careful of his steps and cautious in the selection of his advisers.

COMPETITION

Practically everything in the building and construction business is on a competitive basis, except in cases where sentiment is the dominant influence. Owners or owners' agents, agents invariably select an architect only after they have consulted several or a great many. The architect, in turn, invites bids from a number of general contractors before the award is made, and the general contractor follows the same line of procedure by taking bids on the sub-trade items. Competition rules supreme from the inception to the completion of a building or construction project. It serves as a balance wheel of trade, protecting the owner against exorbitant prices.

There is a great deal to be said in favor of competition in the building industry. For instance, it eliminates all chances of monopoly and price fixing, which in some cases prevail in other lines of business endeavor to the detriment of the community and business itself. On the other hand, competition may become a deadly weapon if it is allowed to become unfair or too keen. It is against this type of business rivalry that architects, contractors, sub-contractors, material dealers and manufacturers object. No responsible, competent architect or contractor feels that he is given an equal chance when he is forced to bid in competition with an irresponsible or incompetent. The former basis his bid on quality and service, while the latter offers an attractive bid price. There is no comparison between the two.

"Competition is the life of trade," but unfair competition is the death of trade. —Los Angeles Journal of Commerce.

CONSTRUCTION THROUGHOUT U. S. ON INCREASE, A. G. C. REPORT SHOWS

Construction operations have swung into the stretch of increased activity which they will follow throughout the summer, according to statistics just compiled by the Associated General Contractors of America. The volume of construction registered for April showed a strong increase over the March total. This increase is virtually identical with the rise which took place during the corresponding period one year ago when mid-summer operations that later were to shatter records were started.

The volume of work handled by the construction industry during the first four months of this year is equal to the figure registered during the corresponding period of 1927.

These statistics, it is stated, are based upon actual shipments of basic construction material and include all types of construction work.

A scale which places the 1913 average at 100 as its basis, shows the index number for the April volume of construction to be 164, increase of twenty-seven points over the March figure.

A close similarity between the trend of operations since January of this year and the comparative figures for the corresponding period one year ago. Index numbers for the first four months of this year are: January, 125; February, 124; March, 137, and April, 164. The corresponding figures for 1927 are: January, 129; February, 121; March, 135, and April, 166.

Awards of contracts reached a high total during March, indicating that actual operations during months of the immediate future will hold close to the lively pace maintained during the mid-summer period of last year.

VOLUME OF CONSTRUCTION

CURRENT CONSTRUCTION PRACTICES TO BE SCRUTINIZED AT A. G. C. MEET

Current construction practices are to be closely scrutinized this week by leading builders from all parts of the country at a conference opening in Washington today. The sessions are being held under the auspices of the Associated General Contractors of America.

"All branches of the construction industry, and the building public as well are responsible for existing wasteful business methods in the industry," the official call for the meeting declared. It is stated several factors are leading to "defaulted contracts, delays in completions of work, poor quality of construction and other causes of loss."

Among the specific topics outlined for consideration of the conference are:

Pre-qualification of bidders; relationships between general contractors and sub-contractors; destructive effects of present-day sales policies and non-standard credit terms for purchase of equipment and material used in construction operations; accident prevention; over-expansion in construction industry and use of hazy or incomplete plans and specifications.

Delegates to the conference, representing local construction groups in virtually every state will be called upon to give

major consideration to unsound bidding and the award of contracts to irresponsible or incapable bidders. Intensive attention to these matters will be given in divisional session to be attended by constructors of buildings, highways, railroads and public works.

The work confronting the conference today was summarized by D. A. Garber, veteran New York builder and now general manager of the contractors' association. His statement in part follows:

"Responsible representatives of all elements of the construction industry steadily are becoming disgusted with the present state of affairs. Architects, engineers, general contractors, sub-contractors material dealers, bankers and all others whose daily activities bring them into relationship with operations of the construction industry are coming to realize that they and those who pay for construction work are being sorely penalized by existing practices.

"During recent years appreciable efforts have been made to wipe out conditions which safely may be stated to be inviting immediate losses of approximately \$5,000,000 annually. It is in the hope of bringing these efforts closer to satisfactory accomplishment that the Washington conference is being held."

BUSINESS AS SEEN IN THE BRICK INDUSTRY

The monthly digest (No. 90) of the Common Brick Manufacturers' Association of America, says:

There are some weak spots in the construction market. It is difficult at this time to say whether the conditions are seasonal and due to a late start of activities, or whether it is an indication of an all-year depression in construction. Chicago, which has had almost uninterrupted capacity business for past 6 years, is considerably behind 1927 records in the delivery of brick. Other mid-western cities, including Detroit and Cleveland, have not yet shown the volume which was expected at this time of year.

There are other sections, however, where the year's anticipations are being realized. The shipments in the New York market were particularly large during the past thirty days. The Southeast and Southwest are having unusually large demands for brick.

With almost exactly the same number of companies reporting, the April record of 1927 was nearly 50% above that of the past month in the number of orders on the books.

Commenting upon the condition, many brick manufacturers believe it is simply a retarded season. The architects' offices are busy with a very satisfactory number of jobs on their boards. Contracts let are maintaining the 1927 stride, and all indications seem to point to a normally good building year.

In some of the Southeastern states, where the business has been unprofitable for a year or more past, there is strengthened price, \$9.00 per thousand being the minimum quoted in the past month's reports. Even with a good demand for brick, the plants in that section are capable of producing more than their markets will consume. This has demoralized profits. Even though the Southeastern states still have the lowest priced brick to be found in this country, there is an improvement over preceding months. The composite price of brick, taking the country as a whole, is \$13.37 per thousand.

SACRAMENTO WINS MEETING

Sacramento has been chosen the 1929 convention city by the California Building and Loan League. At the annual meeting held at Avalon, Catalina Island, May 5, Edwin M. Einstein of Fresno, was chosen president for the ensuing year. Other officers named were: First vice-president, J. M. Abbott, Santa Barbara; Second vice-president, H. S. Wanzer, Sacramento; Third vice-president, C. H. Wade, Los Angeles. These officers and the following will compose the executive committee: Charles H. Tucker, Long Beach; P. A. Oliver, San Mateo; Sanford Anderson, Inglewood. Five delegates to the United States League convention to be held at Dallas, Texas, the week of May 22, were named to represent various sections of the State. They are W. A. McCormick, Pomona; Henry Stern, Culver City; R. Holtby Meyers, Los Angeles; H. S. Wanzer, Sacramento; C. H. Wade, Los Angeles. Edwin M. Einstein, newly elected president, was chosen executive committeeman of the American Savings Building and Loan Institute, which has headquarters in Kansas City.

ISSUES SPECIFICATIONS

Tech Brothers, New York, N. Y., have made available complete sets of their architects' and engineers' loose-leaf specifications arranged in a folder for convenient filing. The specifications cover most of the company's technical paints and waterproofing compounds, and of the latter, both the membrane and integral types.

MARKED REDUCTION IN PACIFIC COAST BUILDING ACTIVITY LOOM

April Building Permits Total 13% Less Than for March and 22% Less Than for April of Last Year—100 Cities Reported in Survey Issued 11,244 Permits for New Construction Costing \$36,001,179, During April, as Compared With \$41,668,733 During March and \$46,746,785 During April, 1927—More Than Half the Cities Report Reductions.

A marked reduction in building activity during the immediate future in Pacific Coast cities is forecast by building permits issued during April which total 13% less than for March and 22% less than for April of last year, as shown by the National Monthly Building Survey of S. W. Straus & Co.

The 100 cities comprised in this report issued 11,244 permits for new construction to cost \$36,001,179, during April, as compared with \$41,668,733 during March and \$46,746,785 during April, 1927. More than half the cities report reductions.

Of the major cities, increases over the totals for both comparable periods are reported from Vancouver, B. C., Sacramento and Long Beach, while Seattle and San Jose show gains over last April. Los Angeles, San Francisco, Portland, Oakland and San Diego show reductions from both comparable periods while Salt Lake reports a loss from last April's figure but a gain over March.

Notable increases in building activity are reported from several of the smaller cities as follows:

Bakersfield, issuing 84 April permits for \$157,055 of new construction, shows a 24% gain over March and a 52% gain over last April.

Fresno, issuing 99 April permits for \$401,947 of new construction marks a 60% gain over March and a 27% gain over last April.

Modesto's April total, 34 permits for \$140,084 in new construction is 77% above that of March and 190% above that of last April.

Stockton, issuing 80 permits for \$261,500 in new construction, shows a gain of 104% over the March total but a 13% reduction from last April.

Following are the official construction cost figures for April, 1928, as reported by building department executives from cities comprised in the Pacific Coast Section of the Survey.

City	April, 1928 No.	Cost	April '27	March '28
CALIFORNIA				
Alameda	57	\$ 97,315	\$ 109,429	\$ 156,000
Albany	20	65,000	245,161	75,077
Alhambra	86	184,254	249,300	160,635

EXCHANGE NAMES COMMITTEES

San Francisco Builders' Exchange has appointed the following committees to serve for the ensuing year: Finance, J. B. Keenan, D. J. Sullivan, R. J. H. Forbes; rooms, A. H. Wilhelm, J. H. Pinkerton, J. D. McGilvray; publicity, R. G. Guyett, S. F. Cohn, J. D. McGilvray; entertainment, Emil Hogberg, J. Ahlbach, G. D. Clark, S. A. D. Schenck; grievance, J. H. Pinkerton, L. D. Frasier, V. Lemoge, W. Jamieson, H. C. Matthies; membership, Alexander Mennie, D. J. Sullivan, R. J. H. Forbes; industrial relations, W. H. George, A. H. Wilhelm, D. B. Farquharson, G. T. Bowen, C. S. Allred; intercraft relations, D. B. Farquharson, C. W. Fitzpatrick, J. E. Connell, F. C. Herrick, W. T. Kowalkowski; rules and by-laws, J. B. Keenan, J. W. Cobby, L. J. Neal, J. D. Kerr, R. J. Button; safety, R. G. Guyett, E. M. Hundley, W. Pfeiffer, H. E. Brace, J. G. Williams; public affairs, G. A. Wieland, W. J. Feary, H. Kindt, A. H. Bergstrom, A. S. Mangrum; legislation, G. A. Wieland, E. T. Peterson, J. T. Prince, N. A. Dickey, C. W. Carle; sergeant-at-arms, Walter S. Jamieson.

DISPUTE WAGED ON BUILDING STONE DUTY

Although the average builder has no confusion in his mind as to the distinction between marble and limestone, a hearing in which it was sought to determine into which of these categories a shipment of imported stone properly fell, proved a stumbling block to the customs authorities at the port of New York recently. The importance of the distinction grew out of the fact that the shippers claimed the stone was limestone, dutiable at 16 cents a cubic foot, whereas the authorities contended it should bear the 65-cent rate assessed for marble.

A university professor was called in to give expert testimony, but even his answers were confusing. It was explained that there is no chemical distinction between marble and limestone, and the only criterion is whether the stone in question is of sufficient luster to be used in ornamental work or useful only for ordinary building.

LUMBER CONCERN SEEKS TO ENJOY RIVALRY IN NAME

The value of a name is the basis of a complaint filed in superior court at Sacramento by the Sacramento Box and Lumber company against F. E. Baker, operating under the name of the North Sacramento Box and Lumber company. The plaintiff claims that the defendant company so named its organization that it might take advantage of the good will of the plaintiff company by giving the impression that they are one and the same business. The complaint claims that the name was chosen with no regard to geographical relationship. The complaint petitions for a restraining order enjoining the defendant company from using the name of North Sacramento Box and Lumber company.

ELECTRICITY OUTPUT

The output of electricity by public utility power plants in the United States in 1927 was 80,205,000,000 kilowatt hours, an increase of 9 per cent over 1926, the Interior Department announces. Despite this heavy production, it was necessary to import from Canada, 1,629,000,000 kilowatts, in order to meet growing demand. Thus the total amount of electricity utilized in the United States was 81,834,000, kilowatts. This is a per capita consumption of 690 kilowatts.

Bethlehem Steel Corporation will establish in Los Angeles, San Francisco and either Portland or Seattle, three large steel depots to be stocked from Eastern plants from its own ship lines.

WOOD PRESERVATIVES SOLVE CROSS-TIE PRODUCTION PROBLEM

The increasing use of wood preservatives has practically solved the production and future-supply problems of the railroad cross-tie industry in this country.

This statement, of momentous importance to the railroads, to lumbermen and to construction engineers, was recently made public in a paper read before the American Forestry Association by E. E. Pershall, vice-president of one of the leading tie producing companies. An abstract of Mr. Pershall's paper is published in the April 5th issue of the Engineering News Record, and was considered of sufficient consequence to elicit editorial comment.

"With the increasing use of preservative processes for wood ties," reads the editorial comment, "the increased varieties of species made available by such treatment, and the resultant great increase in life of ties, the problem of a future supply of timber for ties has become of much less importance than heretofore."

The editor of the engineering magazine further described the present status as a change in a situation that at one time threatened to be serious.

The use of preservatives, according to the Pershall paper, has increased the life of ties to a point where a re-growth can be brought on in time to supply the demands for tie renewals. He points out

that trees of from 10 to 20 inch diameter at the stump are the most desired from the viewpoint of the roads and the producers and that this preference is based on experience. Such trees do not fall within the class of timber especially valuable for sawing into lumber. Also cutting such stumpage leaves a stand of younger trees of from ten inches in diameter down, which within the succeeding seven year period have grown to tie size, in the case of southern pine and in the case of slower growing trees, in proportionately longer periods.

The annual cross-tie demands on the forests, approximately four billion feet, board measure, for 110,000,000 ties, have been tremendous and at one time threatened to eat into the supply of timber available for other needs. In addition to the treatment with preservatives the steam and electric roads are now boring ties for spikes and adzing them out to give a uniform base for the rail or tie-plate. In this manner, according to Mr. Pershall, we are "also making progress against mechanical wear."

"This is conservation," he states, "through preservation and is the largest single factor guaranteeing this country a supply of ties that will eventually have a track renewal rotation of twenty years, instead of from seven to fifteen years to grow another crop of trees."

THE OBSERVER

**What He Hears
and Sees
On His Rounds**

Determined to defeat efforts by two persons seeking the rights to a \$100,000,000 bay at Candlestick Point near San Francisco, business men of San Mateo county and of San Francisco will appear before the Board of Supervisors at Redwood City next Monday. A second application on the part of interests represented by Attorney Albert Mansfield, Redwood City, will come before the board, as will an application from interests represented by Frank Ellbridge Webb. The former application, denied by the board last March, is being again presented by Mansfield, who declares his associates are ready to finance a \$100,000,000 bay span at the point. Webb is well known to students of the bridge situation, having been first associated with a project to bridge the bay at San Mateo. Although neither the Mansfield nor the Webb application has any probability of approval by the board, according to business leaders throughout the county, a strong delegation representing business interests of the Peninsula and of San Francisco will attend the meeting to oppose any action toward granting either permit, it is stated.

Recent figures compiled by the National Association of Manufacturers disclose that 74.4 per cent of American manufacturing plants employing 81.3 per cent of the workers operate open shop, 12.7 per cent of the plants employing 7.1 per cent of the workers operate closed shop, 11.9 per cent of the plants employing 11.3 per cent of the workers operate non-union, with definite discrimination against union members. A tentative estimate made in connection with this report is that 9 per cent of the workers employed in "open shops" are union members. These figures apply exclusively to manufacturing plants.

Steel magnates from England and Sweden are in San Francisco, drawn by the \$100,000,000 worth of steel business which will accrue from the proposed trans-bay bridge, it is reported. Sir William Ellis, official of the John Brown & Co., steel plant, Sheffield, England, is at the Fairmont with a group of other Britons. He admits he is touring the United States to find business openings for his corporation, which sells its products here despite the high American tariff. The Swedish magnate, Olaf Hjorth, who is accompanied by H. Dordenfelt, makes the same observation as Sir William. They are at the Palace Hotel.

A sufficient number of written acceptances having been received for Simplified Practice Recommendation No. 3—Metal Lath—recently revised by the industry, the Division of Simplified Practice of the Department of Commerce announced that the project is now in effect, as of January 1, 1928. Eighty per cent of the known manufacturers, distributed and organized users must accept the recommendation in writing before it can be placed in effect by the Department of Commerce. This recommendation was originally developed in 1923, and was made effective January 1, 1921. It reduced the varieties of the commodity from 25 to 4. A factual survey recently conducted by the standing committee revealed a 99 per cent degree of adherence to the recommendation of 29 per cent for

A tentative revision of sections 5 and 6 of the second draft of a Uniform Mechanics' Lien Act, has been adopted by the Standard State Mechanics' Lien Act Committee, the Department of Commerce announces. The amendment to section 5 provides that an owner of property who has contracted for its improvement shall retain from the contractor ten per cent of all money as it becomes due instead of requiring the contractor to give the owner at the time of each progress payment a sworn statement showing his outstanding obligations as was contemplated in previous drafts of the section. The contractor would still be required, however, to submit such a sworn statement before receiving the final payment and the amounts retained by the owner.

Keith Narbett, son of Jas. T. Narbett, East Bay architect, has been awarded a captain's commission in the University of California cadets. Young Narbett was a former first lieutenant and received his coveted promotion at the close of activities this year. This entitles him to a second lieutenant's commission in the regular army.

The Iron Age says the sustained volume of demand, in view of developments in prices and production, is the most impressive feature of the steel market. Steel ingot output in the first third of the year probably established a new four-month record; finished steel prices are no longer advancing and in some lines are weakening and buying is increasingly cautious. Individual tonnage placed are growing smaller.

Stockholders of North American Cement Corporation have approved recommendations of the directors to consolidate with Penn-Dixie Cement Corporation. The new company to be known as General Cement Corporation.

American Window Glass Company has advanced prices an average of 10%, effective May 11, according to Associated Press dispatches.

International Cement Co. has purchased the Phoenix Portland Cement Company with a plant located at Nazareth, Pa., and Warrior Cement Corporation, with a plant at Demopolis, Ala. These additions to the International system bring their total number of plants to 13 and annual production capacity to 2,000,000 barrels.

Wm. J. Serrill, assistant general manager of the United Gas Improvement Co. of Philadelphia, has been elected to the chairmanship of the American Engineering Standards Committee, succeeding C. E. Skinner of the Westinghouse Electric & Manufacturing Co., chairman of the committee, for the past three years. Lloyd M. Chapman, engineering specialist of New York City and representative of the American Society of Mechanical Engineers will serve as vice-chairman during the coming year.

Western Door Manufacturers Association, recently formed, has opened headquarters in the Washington Bldg. at Tacoma, Wash. Objects of the organization are to promote the fir door industry by co-operative advertising, rigid grading and inspection and grade marking to guarantee quality. Geo. J. Osgood of Wheeler-Osgood Co., Tacoma, is president and W. L. Rawn of Tacoma, secretary.

Albert Mansfield, Burlingame attorney has filed an acceptance of the franchise granted him by the San Mateo County supervisors to construct a \$40,000,000 bridge over San Francisco Bay from Candlestick Point to Alameda county. The franchise was granted Mansfield on March 5 and rescinded seven days later due to protests from San Mateo county and San Francisco interests. The 30-day time limit for filing acceptance of the franchise expires May 12. Mansfield declares his franchise is valid regardless of the action of the supervisors.

Sacramento reports the issuance of 15 building permits in April, 1928, for improvements involving an expenditure of \$758,470 bringing the total number of permits for the year to date to 650 for work costing \$2,443,188 as compared with 865 permits for the corresponding period in 1927, when the work involved an expenditure of \$3,200,140. April, 1927, permits totaled 912 for improvements costing \$491,556. Home building is most active in Sacramento. During the month of April, 1928, 81 permits were issued for one-story one-family dwellings, costing \$323,360.

Palo Alto reports the issuance of 51 building permits in April involving an expenditure of \$112,120 as compared with \$259,591 for the corresponding month of 1927. New residences comprised the largest single item in the permits, the aggregate being \$94,550. In April, 1927, the value of residences was \$116,391.

Federal Judge John R. Hazel of Buffalo, N. Y., has directed National Gypsum Company to show why preliminary injunction restraining them from manufacturing gypsum wallboard in alleged infringement of Gustafson patent 1,665,168 should not be issued. Order issued on complaint of United States Gypsum Company, which filed suit against National Gypsum Company. In bill of complaint United States Gypsum Company asks for damages resulting from manufacture by the National Gypsum Company of wallboard charged to infringe Gustafson patent and for an injunction restraining defendant from further manufacture of this product. Hearing on preliminary injunction was set by Judge Hazel for June 4.

Reductions of approximately 42 per cent in earthquake insurance rates in Los Angeles are announced by the Building Owners' Federation of Mutual Fire Insurance Companies. As a result, fire insurance officials said, Los Angeles property owners will be able to obtain earthquake insurance at the regular board of underwriters' rate. Recently, Dr. Robert T. Hill, geologist, after an extended study, has declared that stresses and strains which would cause severe earthquakes were absent from the Los Angeles area, an opinion opposite to that of Dr. Bailey Willis, a geologist who has held that this district was particularly subject to seismic disturbances.

Tri-county district of San Francisco, San Mateo and Santa Cruz counties to finance construction of the Ocean Shore Highway from San Francisco to Santa Cruz will be organized at once, all counties having agreed to finance its portion of the total cost which is placed at \$5,300,000. San Francisco county will pay 55%, San Mateo county 30% and Santa Cruz county 15%.

TRADE NOTES

Frank E. Carlson and Elwood W. Wright will operate from 1562 Hayes street, San Francisco, under the firm name of Star Roofing Company.

Standard Metal Weather Strip Co. has opened offices in the Builders' Exchange bldg., Oakland, with C. M. Vance in charge. The company specializes in the installation of metal weather strips of the interlocking type.

Oregon Lumber Co. dry sheds at Baker, Ore., together with 2,000,000 feet of lumber was destroyed by fire May 3. The loss is estimated at \$150,000.

Herzog Electric & Engineering Co., announces a special meeting of stockholders for May 12 to be held at 172 Stuart Street, San Francisco.

Western States Construction Co. of San Francisco, capitalized for \$50,000, has been incorporated. Directors are: C. F. Waterbury, J. E. Trabucco and G. A. Richardson.

E. V. McClintock, formerly cost accountant of millwork operations for the Hammond Lumber Company at Los Angeles, has taken up full mill bid estimating for the Redwood Manufacturers Company, Pittsburg, Calif.

George C. Cornitius Hardwood Co. of San Francisco has been incorporated with a capital stock of \$100,000. Directors are: G. C. Cornitius, W. H. O'Neill and C. J. Carey.

Wm. W. Hicks will operate from 215 Rialto Bldg., San Francisco, under the firm name of Wesix Heater Company.

Palo Alto Lumber Co. of Palo Alto capitalized for \$200,000 has been incorporated. Directors are: Elmer R. and Arthur W. Ellis of Palo Alto and Frank W. Ellis of Menlo Park.

Henry F. Kalvelage will operate from 1 Drumm St., San Francisco, under the firm name of McCullough Lumber Company.

B. H. Grove, recently of Sacramento, has taken over the management of the Woodland plant of the United Concrete Pipe & Construction Company, known as Plant No. 4.

Isidor Landman and A. Starke will operate from 310 Eighth Ave., San Francisco, under the firm name of Modern Sheet Metal Works.

The Genfire Steel Company, formerly the General Fireproofing Building Products, had long felt the need of a factory on the Pacific Coast in order to better service the building field, and this need is now realized in their factory located in Maywood, Los Angeles. Not only is metal lath manufactured in the Pacific Coast plant, both in double-mesh and diamond-mesh types, but also a complete line of steel castings, steel sash, steel doors, T bar joists, corner bead, wire mesh and channels are manufactured in this plant, thereby saving from three to eight weeks' time in supplying carload or special orders. Heretofore all proceeds derived from the sale of these materials was sent back East. Now all sheets and bars are purchased from California steel mills and fabricated in the Genfire Los Angeles plant, giving employment to a great number of men. The Genfire Steel Company plant is another advancement in the Pacific Coast building industry.

ALONG THE LINE

Fred A. Whiteman, mechanical engineer in the employ of an Oakland paving concern, died in Berkeley May 2. He had been in poor health for the past six months. He was 42 years old and a native of Somerset, England.

A state-wide search has been started for Edgar A. Peacock, San Diego civil engineer, who has been missing since April 23.

W. B. Hogan, city engineer of Stockton, addressed the Kiwanis Club at Modesto, May 2. His topic was the "Stockton Deep Water Project." Mr. Hogan was introduced by Frank Rossi, city engineer of Modesto.

R. S. Patterson of Los Angeles formerly connected with harbor work at Newport Beach, has been elected city engineer of that city at a salary of \$450 a month. He succeeds Paul Kressly, resigned.

Dwight A. Smith, construction engineer and Robert E. Branch, mechanical production engineer, associated, announces removal to larger offices at 114 Sansome street. The firm specializes in the design, construction and management of industrial plants as well as handling problems in mechanical and structural design.

H. C. Henry, 34, of Sacramento, lumber salesman, was killed in an automobile accident seven miles east of Clements, San Joaquin county, May 3. He was found dead under the machine, which had run into a ditch and upset on the Clements-Ione road.

H. Randall Ellis, San Francisco utilities valuation expert, has been appointed as consultant for the City of Fresno in its anticipated clash before the State Railroad Commission with the California Water Service Corporation over valuation of the properties of the former Fresno Water Company, which the city of Fresno seeks to acquire.

Matthew J. Graham, pioneer San Mateo contractor, died at his home in that city, May 4. Graham was a resident of San Mateo for the past twenty-two years.

Oscar Knecht, San Diego building inspector, and Harold Angier, president of the San Diego city planning commission, are advocating the creation of a municipal architectural commission. Such a commission would tend to check the present tendencies toward nondescript architecture in San Diego, in Mr. Knecht's opinion.

George L. Herndon, general contractor of Sacramento, died in the Sisters' Hospital, that city, May 8, following a month's illness. Mr. Herndon a number of years ago established the firm which bore his name and which more recently was known as Herndon & Finnegan. This company is at present erecting the new machinery building at the State Agricultural grounds in Sacramento. Mr. Herndon was a member of Sacramento Lodge, No. 6, of the Elks, Red Men and Odd Fellows. For a time he served as a member of the Sacramento Municipal Utility District board of directors. Mr. Herndon was born in Sacramento sixty-three years ago. He leaves a widow, Mrs. Carrie P. Herndon; a brother, Harry H. Herndon, and a sister, Mrs. Ida H. Mel.

HERE — THERE — EVERYWHERE

Regular monthly banquet meeting of the Richmond Builders' Exchange will be held in the Exchange headquarters, May 31. Members serving on the committee include: J. O. Dahl, Herbert D. Baker, Thos. P. Bolger, A. H. Winchcole and Fred Jurgewitz.

Employment Department of the East Bay Industrial Association has moved to larger and more centrally located quarters at 251 Twelfth St., Oakland. Since 1921 the department has placed more than 82,000 men to the building trades including mechanics, laborers and clerical help.

Arrangements are being completed by the San Francisco Builders' Exchange for a smoker and entertainment to be held on the evening of May 24. Emil Hogberg, chairman of the Exchange Entertainment Committee, is in charge of the event. He will be assisted by Joseph Ahlback and G. D. Clark.

A five and one-half day week, recently decided by lumber associations of the Pacific Coast, was put into effect May 5 by the Pickering Lumber Company at its sawmills at Standard City and Tuolumne. Only sawmill employees will be affected by the ruling, all other divisions remaining on their former schedules. Saturday afternoons and Sundays will belong to employees.

Plans for the third mid-summer convention of the Northwest Concrete Products Association are being made by Ed. Warner of Tacoma. It is proposed that members of the organization meet July 16 and 17 at Paradise Inn, Rainier National Park. The convention business program will be so arranged that opportunity will be given the members to enjoy the trip to the mountain. A general invitation is extended to all interested in the concrete products industry to attend the meeting.

Twelve painters of Martinez have petitioned the city council to adopt an ordinance requiring a license or bond for all painters and builders operating within the city limits. Those signing the petition are: Charles Hertzog, G. Hollicay, C. A. Jeffers, G. A. Smith, M. Silva, George Bitcon, M. E. Venegas, V. R. Pease, A. J. Coats, E. B. Kearns, M. A. Philpot and Charles Volpi.

Associated Concrete Pipe Manufacturers Association has selected Santa Cruz for the 1928 convention. The convention will draw about 150 delegates and will be held from Aug. 31 to Sept. 3. Headquarters will be at the Casa Del Rey Hotel.

The system of awards to building artisans to encourage better craftsmanship, inaugurated in New York by the New York Building Congress, has brought such satisfactory results that it will be extended to other cities as a means of promoting nation-wide interest in improved workmanship. The project will be carried out in other cities by chapters of the American Institute of Architects. Under the plan adopted in New York, the best mechanic in each trade represented in construction of the most important buildings of the city received a certificate of craftsman, suitably framed, and also a gold button to be worn on the lapel. Over 500 of these awards have already been made.

CONSTRUCTION ONE OF MOST ACTIVE INDUSTRIES—5-DAY WEEK IS OPPOSED

(Reprint from Engineering News-Record, New York)

In the absence of adequate machinery for getting complete data for all trades, the total extent of unemployment in the United States is difficult to measure. For example, Secretary Davis places the number of idle workers at 1,871,050, whereas Senator Wagner of New York estimates it at 2,766,920. Babson's data indicates that employment of labor throughout the country is about 7½ per cent under that of a year ago.

The most active industries are the construction, automotive and steel. Government figures, released April 27, show notable increases in employment during March in the following industries: shipbuilding, toundry and machine shops, machine tools, sawmills, cast-iron pipe, iron and steel, agricultural implements, stamped ware, automobiles, brick, glass, fertilizers, ice cream and sugar refining. Decreases are reported in four industries: wooden textiles, book and job printing, tobacco and rubber boots.

A survey of the five-day week question, conducted in April by the National Association of Building Trades Employers, shows that in only four cities are all building trades working a five-day week. However, in 66 out of the 75 cities included in the survey, the five-day plan has been adopted by one or more of the building crafts. Contractors' organizations are unanimously opposed to the five-day system. The chief reason given is that it will mean increased costs with consequent discouragement of prospective building. Contractors see in the shorter week the necessity of overtime in order to complete, on a given date, jobs already started. The loss of time occasioned by the shorter working week, together with bad weather, will render the mechanics unable to average their usual weekly or annual incomes. They will then, according to the survey, press for overtime on Saturday evenings and Sundays, thereby increasing contractors' costs.

Cities where the five-day week is be-

ing worked by practically all trades are Miami, Atlantic City, Portland, (Ore.), and Seattle. The following trades have the five-day week in the cities or localities named:

Painters—Denver, Boston, Long Island, Hammond (Ind.), Baltimore, New York, Atlantic City, Bridgeport, Miami, Portland (Ore.), St. Louis. Five-day week begins June 1 in Schenectady, Scranton, Utica and Seattle.

Plasterers and Lathers—Denver, Pittsburgh, Buffalo, Detroit, Long Island, Baltimore, New York City, Atlantic City, Boston, Dayton, Hammond, Miami, Portland (Ore.), Philadelphia, St. Louis and Seattle.

Carpenters—Denver, Baltimore, Atlantic City and St. Louis.

Bricklayers—Denver, Vancouver, Baltimore, Atlantic City, Miami, Portland and Seattle.

Plumbers—Detroit, Vancouver, Baltimore, Atlantic City, Miami, Portland and Seattle.

Electricians—Miami, Portland, Seattle, Schenectady and St. Louis.

Cement Finishers—St. Louis, Baltimore, Atlantic City and Seattle.

Elevator Constructors—St. Louis.

The average skilled labor rate for the entire country is \$1.36 1-3 per hour, compared with \$1.35 last month and \$1.31 in May, 1927. The slight decrease this month was due to wage advances granted bricklayers in Birmingham and Dallas. Common laborers receive an average rate of 55c. per hour, the same as in April compared with 55½c. in May, 1927.

Following are the wage changes noted in the last month:

	May	April
Dallas	\$1.67½	\$1.62½
Birmingham	1.50	1.33½
Minneapolis	1.25 to 1.37½	1.37½
Hoisting Engineers:		
Birmingham	1.25	1.00
Pittsburgh	1.43¾	1.56¼ 1.37½ 1.50
Structural Ironworkers:		
Montreal	0.80	0.75

ANTIQUATED BUILDING CODES BOOST CONSTRUCTION COSTS IS CLAIM

Antiquated building codes are making construction costs in many large cities unnecessarily high, Arthur R. Lord, president of Lord & Hollinger, civil and architectural engineers, declared before a meeting of the Western Society of Engineers at Chicago. Lower rents, reduction in merchandise prices, and safer, more attractive buildings will result when municipal building codes are revised to recognize modern advances in construction science, he said.

Mr. Lord is a member of the new Chicago code committee, which is making a revision of the Chicago building code. Similar committees in New York and Philadelphia are working on the same code material and there is a prospect that uniform municipal building regulations may be adopted by all large cities. Many large cities are laboring under the same difficulties as Chicago because their building codes have not been revised for years and consequently prevent architects, engineers and contractors from taking advantage of recent developments and improvements in construction technique. Mr. Lord told the meeting of en-

"Chicago building ordinances were slightly revised in 1917, yet since that time many advances have been made in engineering which make construction both cheaper and stronger," Mr. Lord asserted. "But on these advances, our present code and similar ordinances in other cities, are silent. If they were incorporated into and recognized by the codes, building costs could be cut, rents could be lowered, and the general public would benefit by lower prices because merchants' overhead would be reduced.

"For example, the present Chicago code specifies six sacks of cement to a yard of concrete in order to secure a strength of 2000 pounds. Yet our experience with Wacker Drive showed that with exactly the same materials we can get 3500 pounds, or an increase of 75 per cent in strength, without any additional cost." Mr. Lord's paper describing the Wacker Drive project, for which he was consulting engineer on design and construction, won for him the Wason medal, awarded by the American Concrete Institute.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715 57 Post Street, San Francisco, (Phone Sutter 1684).

X-4447-C-S SALES ENGINEER

about 30, technical graduates, preferably structural engineers, to promote among architects, engineers and contractors, steel roof decking and maintain enthusiasm and help salesmen company's various branch offices. Must be trained in roofing and especially insulating material. One man for Eastern for Middlewest and one for South. Will be required to travel to headquarters at their own expenses for one month's special training and the will be assigned to a territory. Salary: \$250-\$300 a month with all expense paid when away from assigned central branch office. Apply by letter. Headquarters, Middlewest.

R-1625-S BUILDING ESTIMATOR,

preferably under 30, with technical training and some actual experience with a contracting company, to figure concrete and steel industrial jobs. Will lead to selling and is permanent for right man. Salary open. Headquarters San Francisco.

R-1633-S STRUCTURAL DRAFTSMEN

pref. technical graduates, with several years experience as detailer of structural steel and reinforced concrete office buildings. Salary open. Location, San Francisco.

K-57-X-4783-C-S STRUCTURAL ENGINEER,

capable of designing and estimating on steel structural work, ore bins, trestles, at concentrator and mines. Salary \$225 month. Apply by letter. Location, Mexico.

R-1639-S EXPERIENCED TIMEKEEPER

on building construction. Must be typist and bookkeeper and able to keep costs on a good sized job. Salary about \$175 to start. Location, San Francisco.

R-1629-S SALES ENGINEER, 26-40,

preferably technical graduate with several years field experience as engineer or executive to sell construction equipment. Sales experience not necessary, but must have right personality and be willing to learn. Salary open. Headquarters, San Francisco.

LUMBER MART AID REQUESTED AT WASHINGTON MEET

Recommendations for strengthening the position of American lumber exporters in the markets of the world were placed before the United States Department of Commerce by a group of lumbermen at a recent conference in Washington. California was represented at the meeting by Peter C. McNevin of San Francisco.

Stating that profitable exports of lumber are dependent to a large degree upon expert investigations of market conditions abroad, the committee recommended extension of the Government's service in this respect by the addition of a few lumber specialists detailed to some of the more important markets of the world not now covered by the department.

An authentic lumber export manual is needed by the trade, according to the committee, which recommended that the Government undertake the compilation. It was urged to exhibit American wood products at foreign fairs and to show foreigners American construction methods.

The lumber export committee is one of eighty committees of business men working with the Bureau of Foreign and Domestic Commerce to establish more helpful relations between the Government and branches of industry represented by the committee.

FAVORING OF AMERICAN MATERIALS FOR FEDERAL CONSTRUCTION WILL BE SETTLED OUTSIDE OF CONGRESS

Differences between contractors and manufacturers over the best method of favoring American materials in federal construction work will probably be settled outside of Congress, according to a letter recently issued from the Interdepartmental Board of Contracts and Adjudgments. This letter was sent to Representative Wood of Indiana, who has a bill on the calendar seeking to give precedence to American materials. The Associated General Contractors, however, declared themselves in opposition to Mr. Wood's bill, not because they were out of sympathy with using home products but rather due to their fear that the bill was too general and would impose additional burdens on the contractors.

The letter from the Interdepartmental Board calls attention to the fact that the board itself adopted resolutions on April 1, 1927, which give priority to American materials. It is believed that the objections raised by the Associated General Contractors to the Wood bill are met by these resolutions. The particular objection of the A. G. C. to the Wood measure is that no definition is given whether materials fabricated in this country are to be considered as foreign or domestic and that the contractors would be seriously hampered therefore in specifying this type of product. The resolution

adopted by the Interdepartmental Board meets this objection, domestic articles or materials being defined as meaning articles or materials manufactured or assembled in the United States or its possessions. The text of the resolution is as follows:

"Preference for domestic articles or materials will be given, conditions of quality and price, including duty, being equal. Unless otherwise stated in the bid it will be understood that domestic articles or materials only will be used and the use of foreign articles or materials will not be permitted unless they are of better quality, or, being of equal quality, will be furnished at a lower cost to the government, or where domestic articles are not available. The term domestic articles or materials in this connection means articles or materials manufactured or assembled in the United States or its possessions.

"This Board also recommends that the departments and establishments be instructed that hereafter when preparing specifications for the construction or repair of public buildings or works, the foregoing paragraph will be inserted in the specifications or other appropriate papers forming a part of the contract and that, when practicable, it also be used in the procurement of supplies."

Tornado-Resistant Buildings Are Possible—Forest Engineer Declares

Structural damage to buildings by tornadoes and the loss of life incident thereto, may be avoided or reduced by signing buildings so they can more readily resist internal pressure, declares V. Teesdale, of the Forest Products Laboratory of the Forest Service, United States Department of Agriculture.

Property damage to buildings by tornadoes may be divided into two classes—at least caused by the explosive effect and at least caused by flying debris. The explosive effect, usually the more serious, occurs as a result of a difference in atmospheric pressure set up by a tornado between the inside and the outside of a building. The sudden drop in external pressure produces an internal pressure which frequently results in the blowing out of some portion of the building.

"It is possible to relieve the internal pressure of air thus set up in a building by providing automatic vents in it," says V. Teesdale. "Observations made following the St. Louis tornado last September indicate that from 10 to 15 per cent of the outside walls and a similar

area in the roof should be vented. There are a number of methods by which this could be done. If a sufficient number of windows or panels were designed so that they would open outward from internal pressure the necessary venting could be accomplished. Special windows equipped with hardware which would work on the same principle as the panic bolts used on exit doors in theaters would do the trick. Hinged panels for use in the spaces between window sills and floors or elsewhere in the side walls of a building is another venting possibility. Roofs may be vented by automatic dormer windows, by special skylights, or by hinged roof panels.

"Such automatic vents could be installed in existing buildings as well as in new buildings. They could be used in all types of buildings, large or small, public or private, in the city or in the country—even to the farmer's barn or poultry house. The practicability of various venting methods could be tested in laboratories. This would offer opportunity to work out the most suitable types of vent construction."

DETAILS OF GRAYS HARBOR LUMBER MERGER ARE ANNOUNCED

Details of the formation of the \$10,000,000 holding company which is affecting the consolidation of 75 per cent of the lumber mills of Aberdeen, Hoquiam, Montesano and Cosmopolis were disclosed upon the return to San Francisco of Cliff F. Weatherwax, owner of Aberdeen Lumber & Shingle Company, and the guiding figure in the merger negotiations.

The objective of the consolidation, according to Mr. Weatherwax, is to stabilize the lumber industry of the Grays

Harbor district through the economies to be gained through elimination of duplicate production and through unified marketing. He reports that the consolidation committee is receiving the active support of the 19 companies of the district to which merger invitations have been extended, and the lumber interests of the Pacific Northwest generally look upon the project with optimism.

Mr. Weatherwax stated that Bond & Goodwin & Tucker, Inc., are perfecting

the financial phases of the consolidation, while the mill men are arranging a plan for unification of the physical properties.

Representatives of the lumber companies will meet in San Francisco next week to complete the merger negotiations which were begun at Grays Harbor last week. It is understood the negotiations will proceed upon a plan based upon valuations of the various properties which have been determined by an appraisal committee and the individual companies will receive stock in the new holding company in exchange for their plants.

Discussing the prospects of the merger, Mr. Weatherwax said:

"Without a doubt the manufacture of lumber by the mills of Grays Harbor could be accomplished much more advantageously if the entire efforts were under one direction, than under present conditions where some 20 mill companies are producing products with wasteful duplication of effort. Important economies should be effected through proper co-ordination.

"The merger of the mills will not preclude the possibility of a shutdown on the part of several mills, but it will reduce the time the mills will be closed, and will place them in a position to operate on a continuous basis after the merger is concluded. Also the grouping of the mills under single ownership will make it possible for the mills to retain the present wage scale and to avoid cutting, as has been contemplated by several companies.

"The general principles underlying the thought of a merger of the Grays Harbor saw mills are in keeping with the principles of individual business efforts in other lines of industry. It is only necessary to point to the chain groceries, clothing stores, etc., where mergers have enabled the respective industries to manufacture and market their product as a fair and stable profit."

Mr. Weatherwax expects that the successful consummation of this consolidation will be followed immediately by other regional mergers in British Columbia, Puget Sound, Willapa Harbor, Columbia river and Coos Bay.

The relative importance of the new company in the lumber industry may be inferred from the schedule of shipments from Grays Harbor in the past five years. In 1923, total shipments were 774,000,000 feet, and each succeeding year witnessed a substantial increase, so that in 1927 the total was 1,252,000,000 feet.

Mills involved in the present negotiations have a present total daily capacity of 3,500,000 feet. Those associated with the Grays Harbor mills say that it is safe to state that in the near future Grays Harbor will be shipping in excess of 25 per cent of all waterborne shipments from the Northwest.

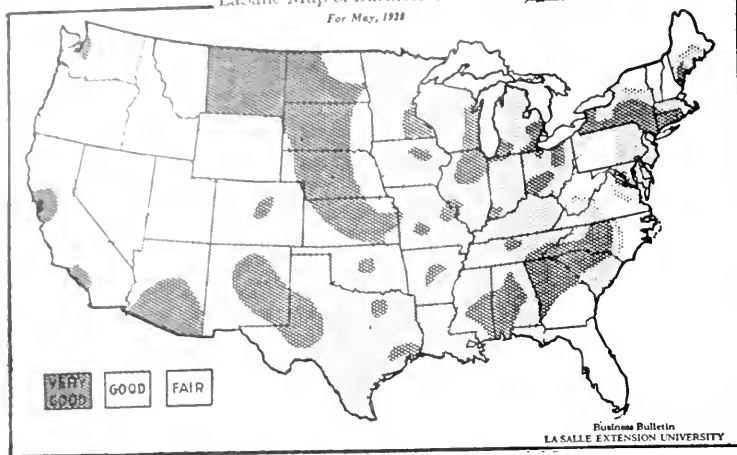

HUNDREDS OF ARCHITECTS ENTER LIGHTHOUSE COMPETITION

Reports from Washington, D. C., are that 362 architects from 29 different countries have entered the competition for a design for the Columbus lighthouse to be erected in the Dominican republic. Entrants to date are distributed as follows: United States 225, France 46, Italy 16, Germany 16, Sweden 7, England 3, Norway 3, Austria 2, Hungary 1, Switzerland 4, Spain 2, Portugal 1, Denmark 2, Czechoslovakia 2, Bulgaria 1, Belgium 1, Serbia 1, Canada 5, Japan 2, Mexico 8, Peru 1, Cuba 4, Haiti 1, Costa Rica 2, Panama 1, Venezuela 1, Porto Rico 2, Dominican Republic 1, Chile 1.

The competition is being handled by a special committee of the governing board of the Pan-American Union, which is promoting the lighthouse project. The date for the first award, set for Jan. 1, 1929, may be advanced to March 1 or April 1 of that year if the committee yields to the prevailing opinion of individual members.

LaSalle Map of Business Conditions

For May, 1928

Many Sections of the Country Show Improvements Map Supplied by Research Division of LaSalle Extension University

Following the precedent set last month, the Business Conditions Map shows the best commercial and agricultural areas in heavy shading. The industrial centers continue to stand out in bold relief; this month, the Providence, Cleveland, Akron, Milwaukee, and Twin City districts are added, so that the northeastern quarter of the map carries a large quota of very good shading. Eastern Tennessee, the western part of South Carolina, and certain portions of Alabama and Mississippi have also won election to the select circle, along with sections of the Dakotas, Kansas, Colorado, and Montana. Parts of Maine, Maryland, Michigan, Missouri, Nebraska, Iowa, Utah, and Washington show improvement, and merit a change from the fair to the good classification.

As is to be expected, wholesale and retail

trade are not yet showing the full measure of improvement recorded by manufacturing activities, but conservative optimism as to the next few months is fully warranted. For example, a hopeful sign is afforded by the national forecast of second-quarter freight-car requirements, published by the Shippers' Advisory Boards. A net increase of 3.7 per cent over the car loadings of the second quarter of 1927 is predicted. Gains are expected in all but five of the twenty-nine classes of commodities listed. Automotive products, agricultural implements, and printed matter show the greatest percentage increases. As the map indicates, conditions over the country are by no means uniform, but improvements are outweighing declines, and the scales lean to the prosperity side.

GRADE MARKING OF LUMBER MEANS A BETTER HOME AND AT LESS COST

How the home builder can have a better home at less cost by following some of the economy recommendations of the National Committee on Wood Utilization of the Department of Commerce, was outlined today by William S. Quinter, Washington banker, before the annual meeting of that body.

The use of grade-marked lumber, alone, would justify a building association to make a larger loan on a home because this system of marking each piece of lumber with a symbol denoting its quality gives assurance of good construction material, said Mr. Quinter, who is President of the District Building and Loan Association.

"I represent on this committee the United States League of Local Building and Loan Associations," he stated, "a league composed of local associations from all of the United States, over 12,000 in number, with a combined membership of over 11,500,000 savers and home owners, and over seven billion dollars in assets. These associations made mortgage loans in excess of two billion dollars during 1927, providing funds for the buying and building of 600,000 homes, or about 1,600 a day.

"You can well understand that such an army of savers and home owners is vitally interested in the work being done and the facts being accumulated by this committee.

"To my mind the biggest and most important work yet undertaken by it is the movement for grade-marking. While the supporters for building and loan associations are usually men who have had experience in both the building and selling of homes, they are not lumbermen or even builders, and grade-marks would be

of very great assistance to them, giving them the assurance that the grade of material called for by the specifications was actually going into the construction of the home. I am sure that in my own case, when I have occasion to inspect a job for the purpose of making an advance on a loan, grade-marks would be of great assistance.

"Home owners, who in most instances are building for the first time, would be even more anxious to see that first grade lumber is being used.

"An association would be justified in making a larger loan where grade-marked lumber was to be used throughout, giving the assurance that the home was to be constructed of the highest class of material.

"The Committee has done fine work in the introduction of short-length and end-matched lumber, two forward movements which have cut the cost of building without reducing the quality. The more important feature, from my standpoint, is the education of the public in the use of short-lengths and end-matched lumber, and the Committee has done wonderful work along this line.

"The Building Association as a whole," he added, "is solidly behind this Committee and we are in hopes that its work will be broadened and enlarged so that the public may reap the full benefit of the work the Committee is doing so well."

Harlan Thomas, former president of the Washington Chapter, A. I. A., is seeking the appointment of a permanent City Planning Commission for Seattle. Expenses of the commission would be about \$20,000 a year.

SUPREME COURT DECISION AFFECTS RIGHT TO LIEN

Rights to lien once expired cannot be restored by sale and delivery to the job of insignificant items. This means of obtaining extensions of time for filing liens recently was found not valid by the Supreme Court of Washington in *Pioneer Sand and Gravel Co. vs. Thomas L. Taylor*, Seattle home builder.

The case was originally tried before Judge Moriarty in the Superior Court, King County with the Petro Paint Company of Seattle and the Pioneer Sand and Gravel Company attempting to foreclose liens on the same property. Judge Moriarty disallowed both claims and the Pioneer Sand and Gravel Company appealed.

Taylor was the owner and builder of five houses in King County, and for four of the homes the Pioneer Sand and Gravel Company furnished most of the cement. The first delivery of cement was made on February 26, 1926, and on July 1, they commenced to deliver it to the fourth house. During this time Pioneer had been trying to make collections but Taylor put them off with the plea that he could get no money until the homes were completed. No liens were filed.

On July 3 an agent of the Pioneer Sand and Gravel Company inspected the property to ascertain when the jobs would be completed, and word was sent to Taylor to call at its offices. Taylor called on the appellant July 6, stated that he was unable to pay the account, and that he needed additional material to do some insignificant patching about the premises. He ordered two sacks of cement to be delivered to each of the residences. It was shown, however, that these sacks of cement were not used in any way to complete the work but were, at Taylor's request, thrown into a shed and left there. Taylor did nothing more to complete the homes.

The Pioneer Sand and Gravel Company filed a lien on September 16, against Taylor's property, asserting that by reason of the small delivery of July 6, they were justified in filing a lien any time within 90 days after that date, rather than 90 days after delivery of the original materials.

The Supreme Court said, "the evidence and logical deductions from the evidence in this case show that the small item furnished by appellant on July 6, although at the request of the owner, were not made for the purpose of fully completing the contract, but merely for the purpose of fixing a later date. The materials were not used at all in any kind of construction in or about the premises. They were not in fact delivered to any of the premises except en masse to one. They were obtained by Taylor, as he testified, for the purpose of obtaining further time for himself, which appellant well knew, and knew the necessity, either of obtaining payment of its accounts, or of extending the time in which to file its lien. It knew that Taylor could not pay his indebtedness, and knew that the time for filing lien had almost expired on several, and had expired on one of the houses. The order for material was so insignificant in amount and value that it must inevitably have known that it was not ordered in good faith for the purpose of completing the construction of whatever was left to be constructed on any one of the premises."

The Court then gave appellant judgment against Taylor personally for the value of materials but refused a decree of foreclosure on the grounds that the deliveries of July 6 were not made in good faith, and that notice had not been filed within 90 days after the last delivery.—Pacific Reports, Vol. 256, Page 155

Herbert E. Wood has been appointed building inspector of El Cerrito, Contra Costa County, succeeding John Hayes, resigned.

Building News Section

APARTMENTS

Bids Being Taken

APT. BLDG. Cost, \$100,000
OAKLAND, Alameda Co., Cal.
 Six-story Class A apartment building.
 Owner and Builder—Fletcher & Mason,
 479 Kentucky Ave., Berkeley.
 Architect—H. C. Baumann, 251 Kearny
 St., San Francisco.

LOS ANGELES, Cal.—Architect Mil-
 ton M. Friedman, 6001 Santa Monica
 Blvd., will take segregated bids for 5-
 story brick apts. to be erected in Nor-
 mandie Ave. for Francis J. Murphy; 80
 apartments, 120x125 feet

LOS ANGELES, Cal.—Jack Olerich 4414
 2nd St., is taking sub-bids for 3-
 story apts. at Second St. and Gramercy
 Ave. for himself; plans by C. Roderick
 Spencer, architect, John L. Landon and
 Harrison Clarke, associated, 4250 Beverly
 Blvd.; 60x150 feet, 40 apartments; steel
 frame and steel joists and reinforced
 concrete floors and walls, hollow tile
 exterior partitions; \$300,000.

LOS ANGELES, Cal.—Dwight C.
 Howell, 682 S. Alvarado St., completes
 plans for 4-story and part basement
 apartments to be erected on S. Bonnie
 Ave. for client; 100x145 feet, brick con-
 struction. Contractor is being arranged
 for.

LOS ANGELES, Cal.—Dwight C.
 Howell, 682 S. Alvarado Ct., preparing
 plans for a 5-story apartment and gar-
 age building to be erected at 912 S.
 Vestlake Ave. for Oscar Reilly; entire
 first floor will be used as a garage; 100
 x145 feet, concrete and steel frame con-
 struction.

Preparing Preliminary Plans

APT. BLDG. Cost, \$125,000
RESNO, Fresno Co., Cal., Franklin &
Yosemite Aves.
 Seven-story class A apt. bldg. (132 rooms,
 garage, swimming pool, tennis courts,
 etc.)
 Owner—J. A. Manning, 421 Mills Bldg.,
 San Francisco.
 Architect—J. C. Hladik, Monadnock Bldg.,
 San Francisco.
 Modern steam heating and cooling sys-
 tem, electric refrigeration, etc., to be
 installed.

HOLLYWOOD, Los Angeles Co., Cal.
 Architects Cramer & Wise, 567 I. W.
 Hellman Bldg., desire bids on all sub-
 contracts for 5-story apts. in Hollywood,
 or a client; 175 rooms, 58 apartments,
 65x114 feet; steel frame and concrete
 construction.

LOS ANGELES, Cal.—M. H. Deal,
 964 Fountain Ave., awarded contract
 for 5-story and basement Class A apart-
 ments, 50x136 feet, at 906 N. Bonnie
 Ave. for John Barth. Plans by Jones
 & Edwards, 5880 Maywood Ave.; 60
 apartments. A 40-car garage will be pro-
 vided in the basement; steel frame con-
 struction, brick filler walls, tile parti-
 tions; \$170,000.

EMERYVILLE, Alameda Co., Cal.—A.
 M. Fearey, plumbing contractor, 4377 Ad-
 eline St., Emeryville, seeks building per-
 mit from city to erect three-story \$20-
 000 apartment house in Adeline St., near
 13rd St.

SEATTLE, Wash.—Chapman & Chap-
 man, Seattle, at approx. \$110,000 award-
 ed contract by Architect Earl W. Morris-
 son, Lloyd Bldg., Seattle, to erect 3-
 story and basement masonry apartments
 at Second Ave. and Eagle St., for
 Bridges & Chapman; will be 60 by 108
 feet, containing 31 two and three suites
 25 two-room and 6 three-room suites.
 Brick facing trimmed with cast stone.

Plans Complete

APT. BLDG. Cost, \$100,000
OAKLAND, Alameda Co., Cal.
 Six-story Class A apartment building.
 Owner—Fletcher & Mason.
 Architect—H. C. Baumann, 251 Kearny
 St., San Francisco.

ROSEVILLE, Placer Co., Cal.—Geo.
 E. Miller, 3148 B St., Sacramento, gen-
 eral contractor, will erect for himself
 a sixteen 3-room apartment building at
 Berkeley and Main Sts.; will have
 stucco front with brick trimmings. Est.
 cost \$26,000

LOS ANGELES, Cal.—J. P. Stein, 610
 Commercial Exchange Bldg., is taking
 segregated bids for 5-story class C apts.
 60x135 ft. to be erected at 204 S. Manhat-
 tan Pl. for himself. Plans by C. Waldo
 Powers, 608 Hibernian Bldg. Will con-
 tain 50 apts.; brick construction.

LOS ANGELES, Cal.—King and Fried-
 man, 6161 Whitworth Dr., having plans
 prepared for a 5-story class B apart-
 ments which they will erect for them-
 selves by day work and subcontract.
 Plans being prepared by Stanley A.
 Fleisher, 740 S. Stanley Ave.; brick and
 steel with brick and plaster exterior.

LOS ANGELES, Cal.—Samuel Gitelson,
 435 Merchants National Bank Bldg., will
 build 4-story class C apartments on Wil-
 son Pl. south of 8th St., for Chas. L.
 Hoxie; will contain 80 rooms, divided into
 16 single and 16 double apartments; brick
 construction, 60x136 ft.; cost, \$100,000.

LOS ANGELES, Cal.—Bessolo and
 Gualado, 349 Pacific Electric Bldg., com-
 pleting plans and will build a 4-story
 class C apartment-hotel in Sunset Blvd.
 near Golden Gate Ave., for O. McGinnis;
 32 single and double apartments and 20
 hotel rooms with 100 per cent baths;
 brick construction.

PHOENIX, Ariz.—Lincoln Mortgage Co.
 has prepared plans for apartments to be
 erected on N. Central Ave. for A. R.
 Hansen; cost, \$100,000.

Plans Being Prepared

ALTER & ADDITIONS Cost, \$—
BERKELEY, Alameda Co., Cal., Clara-
mont Ave. near Ward St.
 Alterations and additions to present store
 and apartment building.
 Owner—Glenn Connelly.
 Architect—B. Reede Hardman, First Na-
 tional Bank Bldg., Berkeley.

Plans Being Prepared

APT. BLDG. Cost, \$650,000
SAN FRANCISCO, 2160 Pacific Ave.
 Fourteen-story class A apartment bldg.
 (250 rooms, all modern conveniences).
 Owner—E. Trapp, 105 Montgomery St.,
 San Francisco.
 Architect—Douglas Stone, 354 Hobart St.,
 Oakland.

Segregated Bids Being Taken

APARTMENTS Cost, \$35,000
OAKLAND, Alameda Co., Cal. Thirty-
fifth St. and Telegraph Ave.
 Two-story frame and stucco apartment
 building (12 2 and 3-room apts.)
 Owner—Harry Fitzgerald.
 Architect—Leonard H. Ford, 1435 Har-
 rison St., Oakland.

Sub-Bids Being Taken

APARTMENTS Cost, \$100,000
SAN FRANCISCO, SE Waller and La-
guna Streets.
 Six-story Class C reinforced concrete
 apartment building.
 Owner and Builder—W. Van Herrick,
 Hearst Bldg., San Francisco.
 Architect—J. C. Hladik, Monadnock
 Bldg., San Francisco.

LUCILE ALWAYS was bright.
SHE IS now cashier.
IN A San Francisco office.
NEAR THE central office.
OF SANDY Pratt, President.
OF THE Pratt Building Material Co.
PRODUCER OF clean sand.
AND HARD rock and gravel.
WHEN LUCILE was five.
THE NEIGHBORHOOD kids.
GAVE A circus.
AND IT cost one bottle.
OR A good sack.
FOR GENERAL admission.
NO EXTRA charge for reserved seats.
LUCILE'S MIND was always working.
SO SHE took two sacks.
AND EXPECTED special attention.
SECURING A front seat, etc.
THE SHOW had only commenced.
WHEN THE ring master.
TOLD THE multitude assembled.
THAT THE next act.
WAS THEIR star number.
AND IT had only begun.

WHEN LUCILE yelled "Rotten."
THEY THREW her.
OUT OF the tent.
ONTO THE hard ground.
AND LUCILE went straight home.
AND TOLD her mother.
ON THE circus management.
"I THANK you."

Photo of Mr. "Barnum," manager of the Kid Circus, telling Lucile to walk out, but she argued. Then she passed through the "canvases" (an old bed sheet), lit on a pile of rock (from Sandy's crushed rock plant at Prattrock, near Folsom). Sandy also produces sand, rock and gravel at Sacramento, Marysville, Pratto (Monterey County) and Mayhew (Sacramento County).

by county for road imps. in the vicinity of Pittsburg, involve 2,358 tons rock; 153 tons asph. conc. Hutchinson Co., Oakland, only other bidder at \$11,307.

WROUGHT IRON MANUFACTURERS FORM ASSOCIATION

Representatives of the leading manufacturers of wrought iron in various parts of the country formed on April 5, the Wrought Iron Research Association, the principal object of which is to gather and disseminate information about wrought iron. The headquarters of the association will be in Pittsburgh, Pa.

The origin of the association is based upon the belief that the wrought iron industry has long suffered for lack of knowledge on the part of the public about the characteristics of wrought iron, especially for those uses where a high degree of resistance to corrosion and vibration are necessary, and where a high welding quality is desired. The association believes that the public at large does not realize that it is possible today to purchase genuine wrought iron of exactly the same enduring quality as that which has been in use for over 150 years. It is the association's plan to inform the public of such facts as this, and to point out the applications where wrought iron can be used advantageously. Snowden Samuel of the American Swedo Iron Company, Philadelphia, is secretary-treasurer of the association.

MEDUSA

White Portland Cement

(WATERPROOFED)

ONE of the real beauties about Medusa White Portland Cement is the fact that it is the perfect base for color stucco work. Colored aggregates or mineral oxides can be used. The Medusa White Stucco home in a properly-landscaped setting is a picture that grows more beautiful through the years—a lasting tribute to you, its builder.

NOTICE TO CONTRACTORS

(McClymonds High School Gymnasium—
Oakland)

Office of the Secretary of the Board of Education of the City of Oakland.

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland High School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, until Tuesday, the 22nd day of May, 1928, at 10:45 A. M., at which time said bids will be opened for the erection and completion of the McClymonds High School Gymnasium of the Oakland High School District, located on the North side of 28th Street, between Filbert and Linden Streets in the City of Oakland, County of Alameda, State of California. These

bids shall be presented in accordance with plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, 337 Seventeenth St., Oakland, California.

Separate bids will be taken on:

- (1) General Work.
- (2) Finish Hardware.
- (3) Mastipave Flooring.

On deposit of Twenty-five (\$25.00) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent of Buildings at his office hereinbefore mentioned, and in each case shall be returned within ten (10) days after securing same, to the Superintendent of Buildings. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District, as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to the Board of Education of the City of Oakland, and of Oakland High School District, to be retained by said School District as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award, or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check shall not exceed Five Thousand (\$5000) Dollars, but for all bids of less than Fifty Thousand (\$50,000) Dollars, said check shall be for at least ten (10%) per cent of the amount of the bid. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Tuesday, the 22nd day of May, 1928, at 10:45 A. M., in the Board Room, 211 Second Floor, of said City Hall, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items of such bids.

JOHN W. EDGEMOND,
Secretary of the Board of Education of Oakland, California.

NOTICE INVITING BIDS

Ward Buildings—Sonoma County Hospital

Office of the Clerk of the Board of Supervisors, Sonoma County, California, April 25th, 1928.

Sealed bids will be received by the Clerk of the Board of Supervisors of Sonoma County, California, at his office until 12 o'clock P. M., May 15th, 1928, and will be publicly opened and read at 1:30 P. M. for the construction of Three Frame Buildings for County Hospital, in Third Supervisorial District, in Sonoma County.

Specifications for this work are on file in the office of the Clerk of the Board of Supervisors, which bidders are hereby referred to.

Total estimated cost \$11,000.

W. S. COULTER,
 Clerk of the Board of Supervisors.

NOTICE INVITING SUBMISSION OF PLANS AND SPECIFICATIONS FOR AN ELECTRIC WIRING SYSTEM, ETC., IN THE CITY OF SANTA CRUZ

Notice is hereby given that the Council of the City of Santa Cruz invites,

The submission to the City Council of plans and specifications for an electric wiring system adequate to, and designed to supply all of the street lights and lighting of city buildings and public places now lighted in the City of Santa Cruz, and with extension adequate to supply an additional 1000 lights of 250 candle power each, to be distributed throughout the City and located at points designated on the map of the City of Santa Cruz, on file in the office of the City Engineer, also a Diesel engine electric plant to be constructed on lands belonging to the City of Santa Cruz, at or near the City Sewage pumping plant, with a capacity to generate electricity to supply all of the lights herein mentioned. And plan submitted shall be accompanied by an estimate of the cost per kilowatt hour for supplying electricity for said lights and also a plan of financing the installation of the plant and system out of the proceeds to be derived from said power plant and wire system.

Any plan not designed to supply electricity for the lighting of the aforesaid lights at a rate not to exceed one and one-half (1 1/2) cents per kilowatt hour, need not be submitted and will not be considered by the Council.

Sealed plans, specifications and estimate will be received at the office of the City Clerk of the City Hall, Church Street, in the City of Santa Cruz, on or before 9 o'clock in the forenoon of Monday, the 14th day of May, 1928. Same will be opened and read at 9:30 o'clock in the forenoon of the next day.

Dated May 9th, 1928.

S. A. EVANS,
 City Clerk.

NOTICE TO CONTRACTORS

(Pump—Antioch, Calif.)

Notice is hereby given that sealed bids will be received by the Town Clerk of the Town of Antioch, Contra Costa County, State of California, at his office in the City Hall until 8 o'clock P. Plans and specifications for the work are on file in the office of the Town Clerk and the Town Engineer of said Town of Antioch to which bidders are hereby referred.

Bids shall be marked "Bids on Pumping Unit."

All bids must be accompanied by a certified check on some solvent bank or a cash deposit in the sum equal to ten per cent of the amount bid on whole contract, conditioned that if the contract is awarded to the party submitting the accepted bid, he will enter into a contract and furnish such bonds as may be required by said Board of Trustees, within ten days after notice of award, or failing to do so, the amount of such deposit or certified check to be forfeited as liquidated damages for such failure.

All checks to be made payable to the Town Clerk of the Town of Antioch, Contra Costa County.

Said Board of Trustees reserves the right to reject any or all bids and waive any informality in any bids received.

By order of the Board of Trustees of the Town of Antioch, Contra Costa County, State of California.

Dated April 30th, 1928.

J. E. MCLEHENEY,
 Clerk of the Board of Trustees, Town of Antioch, California.

NOTICE TO BUILDERS AND CONTRACTORS

(Office Building—City of Alameda)

Notice is hereby given that the Board of Public Utilities of the City of Alameda will receive bids for the construction of a one-story concrete building to be used as an office building for the Municipal Electric Light Plant. Said building to be erected at the southwest corner of Santa Clara Ave. and Everett St. in the City of Alameda.

Bids to be in accordance with plans and specifications heretofore adopted and on file in the office of the secretary of said Board to which bidders are referred to for full particulars.

A deposit of fifteen dollars (\$15) will be required on the plans and specifications to guarantee their return in good order and they must be returned with the bid.

All bids must be sealed and marked "Bid for Office Building" and must be delivered to the Secretary of the Board of Public Utilities, 1414 Park street, Alameda, Calif., before 5 o'clock P. M., Wednesday, May 16th, 1928. No bids will be considered which are handed in after the time mentioned.

The Board of Public Utilities reserves the right to reject any and all bids.

By order of the Board of Public Utilities, City of Alameda, Calif.

A. D. GOLDSWORTHY,
 Secretary.

(D)

NOTICE TO BIDDERS

(West Side Union High School District)

Notice is hereby given, that sealed bids will be received and opened by the Board of Trustees of the West Side Union High School District of San Joaquin County, at 7:30 o'clock P. M., on the 15th day of May, 1928, at the High School Building in Tracy, for the erection and completion of a five-room brick and concrete addition to the present High School Building of the above named district in Tracy, as described and shown on the plans and specifications made for the same by W. H. Weeks, architect.

Plans may be seen at the office of the Clerk of the Board of Trustees in Tracy, or at the office of W. H. Weeks, Architect, 111 Sutter St., San Francisco. Separate Contract and Heating System with their several alternates.

Each bid must be accompanied by a

certified check on some responsible California bank, in a sum not less than five per cent (5%) of the amount bid, made payable to J. N. Lamb, Clerk of the Board of Trustees of the West Side Union High School District, as a guarantee that a contract will be signed within five (5) days after date of opening of bids and approved surety bond furnished as required.

Each bid must be delivered in a sealed envelope and addressed to the Board of Trustees and endorsed, "Proposal for School Building," and must be in the hands of the Clerk of the Board on or before the above mentioned hour and date.

The Board reserves the right to reject any and all bids.

(Signed) J. N. Lamb,
 Clerk, West Side Union High School District.

ADVERTISEMENT

SEALED BIDS, in triplicate, subject to the conditions contained herein will be received by the U. S. Veterans' Bureau, Room 791, Arlington Building, Washington, D. C., until 11 A. M. June 5, 1928, and then publicly opened, for furnishing all labor and materials and performing all work for Infirmary Building No. 1, including roads, walks and drainage at U. S. Veterans' Hospital, Fargo, North Dakota. This work will include excavating, reinforced concrete construction, hollow tile, brickwork, cast stone, marble work, floor and wall tile, linoleum, rubber tile, iron work, steel sash, iron stairs with slate treads, fire escapes, built-up roofing, roof ventilators, metal lathing, plastering, carpentry, dumb-waiter, metal weather strips, insect screens, painting, glazing, hardware, plumbing, heating, including boiler plant equipment, electrical work, electric elevator, radial brick or concrete chimney and outside sewer, water and electric distribution systems. Separate bids will be received for electric elevator. Bids will be considered only from individuals, firms or corporations possessing satisfactory financial and technical ability, equipment and organization to insure speedy completion of the contract and in making awards, the records of bidders for expedition and satisfactory performance on contracts of similar character and magnitude will be carefully considered. At the discretion of the Director, drawings and specifications may be obtained upon application to the Construction Division, Room 791, Arlington Building, Washington, D. C. Deposit with application of a check or postal money order for \$25.00 payable to the TREASURER OF THE UNITED STATES is required as security for safe return of drawings and specifications within ten days after date of opening bids.

FRANK T. HINES,
 Director.
 May 12, 1928.

PROPOSALS FOR CONSTRUCTION

OFFICE CONSTRUCTING QUARTERMASTER, March Field, Riverside, Calif., May 5, 1928. Sealed proposals in triplicate will be received here until 10 o'clock A. M., June 8, 1928, for construction: 10 Hangars and 1 P. M. June 8, 1928, for 2 Double Barracks, 4 sets Field Officers Quarters, 32 sets Company Officers Quarters, 36 Garages. Copies of plans and specifications may be seen at the office of Constructing Quartermaster, Fort Mason, Calif., and can be obtained from Constructing Quartermaster, March Field, Riverside, Calif. \$25 deposit on each set of plans will be required for return.

STATE PLUMBERS TO MEET

The California State Association of Master Plumbers will hold its twenty-seventh annual convention at the Clift Hotel next week, opening Monday morning and continuing until Thursday. One of the highlights of the gathering will be a review of the accomplishments of the association in co-operating with State and municipal authorities in the interest of sanitation and health. Mayor Rolph will welcome the delegates. More than 1000 are expected to attend the session.

THE CONTRACTORS' ROOM

BUILDING AND ENGINEERING NEWS maintains a Contractors' Room where plans and specifications may be filed by Architects, Engineers and Owners for the convenience of bidders in San Francisco and the Bay Counties.

Architects, Engineers and Owners are invited to forward plans of their projects to BUILDING AND ENGINEERING NEWS. No charge for this service. The plans will be returned in good condition when contract for work is let.

TIMPIE HYDRATED LIME

(a true dolomite lime)

for Brick Mortar, White Coat and Sand Float Finish, and for inducing plasticity in and water proofing Portland Cement Concrete.

Used in approximately \$70,000,000 High Class Pacific Coast construction in last 3 years.

EXAMPLES:—

New Standard Oil Building, San Francisco	Central Bank, Oakland
Oakland Savings Bank	New Subway Terminal Building, Los Angeles
New Mark Hopkins Hotel, San Francisco	Federal Reserve Bank, San Francisco
New Hunter-Doolin Building, San Francisco	New Russ Building, San Francisco
Pacific Telephone and Telegraph Building, San Francisco	

Sold by most progressive dealers throughout Pacific Coast.

Russian Peasant Women Placing Straw
Around Their Dwelling to Keep the
Cold Out

Applying time - proved methods of insula- tion to modern day needs

NO one knows the value of building insulation as do the inhabitants of either extreme cold or extreme hot climates. These natives have realized for hundreds of years the value of insulation—particularly straw insulation. These people, not having a complete scientific knowledge of heat and cold values, made their selection of an insulating material by actual test. After their many crude experiments on different products—straw was finally chosen as their most perfect means of protection against heat and cold.

And today, this time-proved method of insulation is offered in a perfected form—INSO BOARD—manufactured in sturdy panels 7/16" thick, 4 feet wide and any length desired. It has many structural insulation uses such as—(1) Plaster Base, (2) Sheathing under stucco, brick or wood exterior, (3) Roof Insulation, (4) Under Flooring, (5) Wall and Ceiling finishing panels, (6) Sound Deadener, and (7) Insulating inner Walls.

DEALERS will find INSO BOARD a profitable connection, combined with the sales and advertising co-operation which will be **WHOLLY AT OUR EXPENSE**. Write today for particulars.

SAFETY CAMPAIGN IN CEMENT PLANTS SHOWS RESULTS

Sixty-nine cement mills and quarries in the United States and Canada, out of a total of 151, finished the first quarter of 1928 without a lost time accident or fatality. These 69 plants form the basic membership of the Portland Cement Association's Trophy Club. To the mills going the entire year free from accident the Association awards an eight ton concrete sculptured monument, modeled by the Art Institute of Chicago.

Twenty-nine more mills operated during the first quarter of 1928 free from accidents than during a similar period in 1927. On March 31, 1927, only forty mills had completed three months minus accidents and were members of the Trophy Club.

"This remarkable showing in safety work points the way to even a better record in 1928 than we had in 1927," says W. M. Kinney, general manager of the Association. "Last year ten mills went through the year without accident and if the present ratio is maintained for the next nine months we may well expect 18 or 19 mills to eliminate mishaps and fatalities this year."

During the first quarter of 1927 the cement industry suffered 395 lost time accidents and nine fatalities. The first three months of 1928 recorded 292 lost time accidents and eight fatalities. Lost time accidents decreased 26 per cent in the first quarter of 1928 over the similar period of 1927 which at that time was considered a record breaking achievement. There was an increase of 11 per cent in the number of mills reporting their accidents to the Association in 1928, over 1927.

Comparing the first three months of 1928 with the first three months of 1926 shows a decrease of 271 accidents or 46 per cent. During this time the number of mills reporting increased over 21 per cent.

MORE EFFICIENCY AND LESS WASTE URGED ON BUILDING INDUSTRY

Greater efficiency in building and less wasteful use of building materials, as a means of preserving high living standards, were advocated by N. Max Dunning, Chicago architect, before the annual meeting of the National Committee on Wood Utilization of the Department of Commerce. Mr. Dunning spoke highly of the work of the Committee and foretold material economic benefits to accrue from utilization and co-operation under its leadership.

"The Architect, as a professional man with a responsibility to the public, is vitally interested in the work being accomplished by the National Committee," he said. "If present high standards of living are to be maintained and increased—as we all hope and believe they will be—the burden of the higher wage and better working conditions must be offset by a greater application of scientific methods in building operations, and to a more intelligent and less wasteful use of the materials entering into buildings.

"Wood, from many considerations, is the most important of these materials, and without question, the material where waste in the past has been the most extravagant.

"The work of the National Committee on Wood Utilization that seeks to develop ways and means for making a larger percentage of the tree merchantable, accomplishes many purposes. It stabilizes the lumber industry; it reduces the cost of lumber to the consuming public; it extends the scope and knowledge of appropriate uses of various kinds of lumber; and, most important, it goes far toward making reforestation commercially feasible in the United States, thus insuring for future generations a continuous supply of this indispensable material.

The Architect is primarily interested in the use of lumber in buildings and realizes that great economies can be effected by improvements in methods of framing that will develop the full strength of lumber sections and secure permanence and durability of construction; that for many purposes short lengths of lumber can be used as well as long; that, with the perfection of modern joining machinery, blocks and odd sizes can be worked up for floors, wainscoting and for other purposes, thus eliminating waste and utilizing far greater proportions of the log than are commercially possible now.

"In this important problem there is a great field for co-operative effort, and under the leadership and co-operation of the Department of Commerce, great benefits may be expected to accrue.

"The architect, as always, is glad to lend his professional view-point and experience to any effort that makes for progress and the public weal."

S. F. ENGINEER STRICKEN

George J. Calder, vice-president and chief engineer of the American Toll Bridge Company of San Francisco, was operated on May 9 in a New York hospital for appendicitis. Mr. Calder went east a week ago with Oscar H. Klatt, president, and Dudley Sales, attorney for the company, to be present at a million dollar damage suit trial in which the Raymond Concrete Pile Company seeks damages for recision by a bond house of its contract to sink the piers for the Carquinez bridge.

REAL ESTATE CORPORATIONS MAY PAY GREATER TAX

Most real estate operating corporations will hereafter be called upon to pay a considerable greater annual tax to the State, under an amendment to the tax law that has just been enacted, according to M. L. Seidman, tax expert of Seidman & Seidman, Certified Public Accountants.

"The amendment," Mr. Seidman explained, "applies to all cases where two corporations have been organized, one to hold the building and the other to operate it. The amendment provides that the annual franchise tax on the building corporation shall be computed in the same way as on the operating company; that is to say, $4\frac{1}{2}\%$ of the net income.

"Heretofore," Mr. Seidman added, "the building corporation was subject to a relatively small tax, based on the value of its stock. The amount of the corporation's income was relatively immaterial. As a result, from a tax point of view, besides other practical consideration, many real estate operating companies found it expedient to separately incorporate the building, and to pay the building corporation a substantial rent. This gave the operating company a deduction from its income, saving it the $4\frac{1}{2}\%$ tax to that extent, whereas it did not appreciably affect the tax of the building company, since the latter was not measured by income. The amendment is aimed at this very situation, and directs that hereafter where one company owns or controls the other, both may be required to file consolidated returns, and that the tax on both corporations shall be computed at $4\frac{1}{2}\%$ of their combined incomes.

"While the new law is not mandatory, and provides that the returns of both corporations 'may' be consolidated, it can, of course, be expected that they will be consolidated if, as in most cases, consolidation will yield the State a higher tax. The State will probably not require a consolidated return where the operating company has a loss and the building company a profit, since the offset of the loss against the profit would reduce the tax that would otherwise be paid.

Concluding, Mr. Seidman said, "real estate operating companies affected may find some source for consolation in the fact that the technical wording of the amendment is such that through a proper readjustment of the manner in which the building corporation's stock is held, it would appear that the effect of the amendment could be overcome and the tax kept on the old basis."

ASBESTOS PRODUCTION IN 1927

The total quantity of asbestos sold or used by producers in the United States in 1927 was 2986 short tons, valued at \$338,066, according to figures compiled by the Bureau of Mines, Department of Commerce, from individual reports furnished by producers. Imports of unmanufactured asbestos for consumption amounted in 1927 to 23,693 short tons, valued at \$8,150,340, and the exports were 309 short tons, valued at \$48,744. Corresponding figures for 1926 were: imports, 257,621 short tons, valued at \$8,142,505; exports, 1104 short tons, valued at \$85,922.

SCIENCE APPLIED TO ARCHITECTURE

(By G. Szmak, Economist, Bridgeport, Conn.)

Unfair Competition

The evolution of the construction industry is so rapid that we are compelled now and then to survey conditions, lest we continue to follow methods that were suitable yesterday, but which do not meet the problems of today. Under such conditions the competent architect begins to wonder why he has to compete with services that are inferior to his own in quantity, quality and price.

Architects who have built up firm and wide reputations for competency do not, as a rule, have to meet unfair competition. The question arises, "Should the architect who is competent to produce a good piece of art but whose reputation is not yet established, be compelled to suffer the consequences of degenerated practices? Is it possible to prevent conditions that are detrimental to honest, efficient and truly economical architectural services?"

The answer is, that no profession is fully matured or able to reach its highest state of efficiency without having partly become a science. The majority must apply science to their profession in order to advance and achieve the position of the minority who do not have to meet unfair competition. The architect who knows that he can and does give economical service to the client places himself beyond the reach of unfair competition.

Unfair competition is practices indulged in by the other fellow beyond your power of equal defense. An architect often accepts work wherein the receipt of the fee for designing is a pure gamble, depending on the job maturing. How can this architect be expected to give economical service? Yet, if such a job matures, the client and the public in general only appreciate the cheapness of this architect's fee and know nothing of the quantity and quality of service rendered. What can you do about it?

At times, commissions are accepted at a very low rate through unfair competition and the contractor and sub-contractors are compelled to do most of the designing. How does your complete service compare against odds of this nature? There are even cases where the designer, possibly unknowingly, pads the client's payroll by accepting gratuity from contractors or others. These are only a few methods of unfair competition. There are many others which reflect disadvantage, not only upon the one who indulges in them, but the profession and the entire industry; although probably no harm is intended.

The prevention of such practices can only come about if the majority of architects will publicly declare a definite itemized list of their services with the corresponding charge. Discrepancies could then be detected by the client who has knowledge of what he should receive for a certain sum of money.

The construction survey will do more good than anything else in educating the client. Plans and specifications which are not properly made or written can not be properly surveyed or built from and the client will be sure to find this out when a surveyor is on the job from the preliminaries to the finish. Every architect owes it to himself to use methods which will show every possible evidence of the right intent and economy of his service. The survey is both an aid to and proof of it. Only thus will the public learn the difference between competent and incompetent service.

There are now a number of trade and professional organizations who are fighting against "incomplete" drawings and "unspecific" specifications. Construction surveying is an entirely new profession, and it has not yet occurred to the existing professions or trades to utilize surveys as a means of bettering conditions. The surveyor makes it his business to prevent insufficiency of information and misinterpretation. This means of prevention is a safeguard to the architect as well as the client and builder.

Cooperation with the surveyor will bring about quick and effective results without cost or disruption between the various branches of the industry. The surveyor does not propose to clean up the industry. He does, however, provide the means whereby the industry and the public will be encouraged to play fair.

Application of Science

In the present practice of architecture the architect has come more and more in contact with the engineering and business phases of his profession in a degree unknown to the architect of years ago.

The architect's business knowledge is being made more complete as it becomes necessary for him to carry on transactions with and for his client. His contact with the management branch of engineering, which is the builder, is of long standing. More recently the architect has begun a closer cooperation with the structural and mechanical designing divisions of engineering. The next step in the evolution of his profession is to secure the cooperation of the first essential division of engineering knowledge, the surveying of construction.

Architecture alone is art or negative knowledge but through coordination with each division of engineering, architecture becomes economically productive because the negative and positive forces commune in absolute harmony; art having become mated with science. This fusion of architecture and engineering, through the division of surveying will provide the architect his most needed helpmate, the construction surveyor.

Construction surveying is the science of measurement, tabulation and analysis by uniform units applied to the quantity and quality of material and workmanship in the physical members of a civil structure.

Benefits to the Architect

There is no particular benefit which will not reflect on the client, architect and builder. All services are interdependent, and a loss to one is a loss to all.

Surveying:

(1) Encourages honesty by exposing the facts otherwise unknown to buyer and seller. Every architect is a buyer and seller of material and service.

(2) Creates fairness in competition between architects and contractors by positively showing that quantity and quality, instead of price, are the basis of fair competition. Gambling and special privileges are eliminated and construction contracting becomes a direct buying and selling transaction.

(3) Produces confidence, good will and satisfaction by honest and fair dealing.

(4) Provides accurate preliminary records on the relative values of material and workmanship essential for economical design, by analysis.

(5) Creates positive current records of the quantity and quality of material and workmanship required for buying, constructing and selling by measurement and tabulation.

(6) Produces future reference records which are permanently available for arbitration, investigation and valuation purposes by appraisers, architects, attorneys, bankers, builders, building officials, contractors, dealers, engineers, estimators, insurance companies, investors, manufacturers, municipal boards, owners, realtors, sub-contractors, tax officials and tax payers.

(7) Prevents costly errors and omissions by verification.

(8) Interprets plans and specifications by tabulation into the every day language of buyer and seller.

(9) Simplifies design, survey and management by systematic classification of the actual requirements.

(10) Eliminates wasteful duplication in competitive designs, alternate designs, blueprints, specifications, surveys generally, general and sub-contract bids, overlapping of sub-contract bids and unreasonable alternate bids, etc., by efficiency.

(11) Increases efficiency of entire industry by systematic measurement, tabulation and analysis of construction.

(12) Puts the construction industry on par with other commercial enterprises of finance, manufacturing and transportation, by improved methods.

(13) Excludes "unforeseen contingencies" by reducing the "real items" to their actual quantity and quality value.

(14) Speeds progress starting with the preliminary designs through to the final accounting of a structure by defining where, who, and what can, shall, or has been done, and when.

(15) Lessens speculative projects which would never mature and thus reduces the burden of expense on an increased number of real projects.

(16) Reduces construction cost by increasing the public's satisfaction and the industry's efficiency.

(17) Increases volume of construction by elimination of waste, speedier progress and reduced cost.

(18) Stabilizes profits by excluding the gamble on "unforeseen contingencies," speculative projects, "misinterpretations" and "extras".

(19) Increases utility of services by simplification, correct interpretation and prevention of errors.

(20) Improves and increases production by creating future, providing present, and utilizing past records of the industry.

(21) Creates economy by increased satisfaction, reduced cost and greater production.

(22) Produces prosperity by assured economical results.

Practical Applications

There are many reasons why architects should investigate, recommend and use professional surveys. Here are a few practical everyday occurrences which illustrate. An architect, after having some preliminary drawings made on a project, requests a contractor friend to furnish him with cubic foot cost data. The information thus received may or may not be consistent with the type, grade or elemental resistance of the structure under design. However, this is only half of the architect's disadvantage who has prepared a computation of the cubage in a fashion all his own, or has someone donate this information. Such data is often found to be 1 to 100% incorrect after being checked up by an experienced surveyor who works by a uniform method of measurement and structural classification.

Recently a dispute arose between an

architect and a contractor over a clerical error. It happened that a professional surveyor was employed on this particular job and it took a matter of minutes to show that the contractor acted within his rights, although clerically in the wrong, which was confirmed by the surveyor's records. The question was settled immediately to the full satisfaction of the client, architect and contractor. Without the disinterested professional surveyor, neither party could have proved or disproved anything and the result would have been a continual lack of confidence and good will all around.

It is a daily occurrence to find that certain contractors' and sub-contractors' estimates are 100% high or low. Upon investigation, it is usually found that the quantity and quality survey of one or all parties is wrong.

Contractors and sub-contractors often prepare sheaves of survey sheets covering the material and workmanship to be furnished, but you can be sure these surveys are rough. They are done without direct remuneration and at best are padded on the safe side. On a recent project sub-contractors submitted estimates that varied more than 100% between one low and several high bids. Upon rechecking it was found that the low bid was correct in every respect—in quantity, quality and value.

On many projects after the job has been awarded it is not unusual for the contractor to make revision in quantities and qualities of the general and sub-contracts by rechecking estimates and calling in new sub-bids and thus saving 1 to 25%, or more, for himself, without benefitting the client.

Architects know and practice this method of revision and can confirm the economy of such procedure well enough. Why not have a profession survey to begin with and eliminate the wasted efforts of the architect, contractor and sub-contractors used in reducing the items to their final values? This would save the unnecessarily duplicated expense to all parties.

It is a common practice to use construction surveys on engineering projects of all kinds.

Disadvantages of Surveys

The industry and public have not yet learned of its benefits, methods and applications. While it is too soon to discuss or know of failures or disadvantages, yet there have been some very apparent objections raised which are very easily answered.

(a) Who shall control surveying, the architect or the builder, and what is the attitude of each towards the use of surveys?

The fact that neither the architect nor the builder is responsible for the preparation of a professional survey is the most essential thing in its favor and makes the professional survey valuable as a non-partial equalizing medium. A prominent consulting architect says: "The architect holds the anomalous position of being not only both judge and jury but also the attorney in fact for one of the interested parties." This practice has already been too long in existence to the disadvantage of all.

(b) Can, are or should professional surveys be guaranteed?

The surveyor, as an indication of true competency, is ready to guarantee his survey. The form of guarantee is a matter of choice left to the client, architect or builder.

(c) Who pays the cost of surveys?

The cost of the survey is paid by the client in any case and the more directly he pays it the less it costs. The surveyor's fee may be paid by the client, incorporated in the fee of the architect or specified to be included within the contract of the builder.

The average fee for surveying does not exceed 1½% of the structural value and is saved several times over through elimination of waste. Any professional sur-

veyor will provide the architect with the information necessary for specifying the construction as part of the contract.

(d) Under what forms of contract may surveys be used?

Construction surveys are used on lump sum, cost plus percentage, unit price or any form of contract. The survey in any case performs its economic function. It may be utilized in three principal ways:

(1) As the basis for comparison of bids. For this purpose it is not essential that the survey be guaranteed for positive accuracy, and yet it will assure fairness in competition to all concerned.

(2) As the actual basis for lump sum contracts. All adjustments, plus or minus, in the quantity and quality of material and workmanship are made by the surveyor at the completion of the work. This method assures positive fairness, not only in competition, but also in price.

(3) As the basis for unit price contracts. The payment being made on the items computed by the surveyor as the work progresses. This method not only assures positive fairness and competition and price but also in quantity and quality of production.

To efficiently use the survey, it should be furnished to the bidders along with the architect's plans and specifications, giving them an absolutely definite instrument of purchase as a part of the contract documents.

Advance in Surveying

Research work on professional construction surveying is showing good progress in the following subjects:

1. Uniform progression of specifications.
2. Uniform symbols to be used on drawings.

3. Chart showing the physical growth of a structure. This will be a great aid to every designer, surveyor and builder.

4. Uniform method of cubing structures.
5. Uniform classification of structural types, grades and elemental resistance.

6. Chart of the construction industry showing the function of each division to be used for the education of the public on the real value of the architect's, surveyor's and builder's services. The chart will enable the buyer to gauge the exact value of the services available.

A universal system is now lacking in the design, survey and management of construction and the surveyor is well on the road to provide it. With the aid of a uniform system the work of the designer will be greatly reduced and many benefits will be derived by those that follow after the designer.

That the growth and development of construction surveying is very rapid may be readily seen from the replacement of many slang and misused terms of long standing such as, "take offs," meaning "surveys," the word "quantities" being used when "item" is meant and the use of "quantity" when in fact "construction, quantity and quality" should be used or could be implied by the word "construction" alone. Construction must consist of quantities and qualities or else it is not construction, or anything else.

The architect in the majority of cases has been playing a waiting game. The contractor, on the other hand, has knowledge of some sort concerning surveys dating back to the beginning of his profession and today contracting organizations are making every effort to utilize the surveying idea to assure themselves of the accuracy of their own surveys. While their actions are of no direct economic value to the buyer of building, yet the contractors are receiving a good education in the use of construction surveys and are far ahead of the architects concerning their uses, methods and benefits.

The architect owes it to himself as well as his client to provide a positive survey. There is no better way of proving or disproving the benefits to be derived from construction surveys than to try them out. The architect can, will and should encourage the employment of a surveyor

on every project if for not other reason than the development, improvement and protection of his own welfare.

Equilibrium Between Buyer and Seller

Surely the buyer has a right to have the facts in a form which he is capable of understanding. Just imagine the predicament of the buyer who would hand the seller a ten dollar bill for goods but who did not have the ability to count his change and had to depend upon the conscience of the seller for the proper refund. The conscience of the seller and buyer, let alone their science, varies too greatly to be adequate for the progressive business of today, especially in the construction industry. This is a day of science. Positive knowledge must prevail for both buyer and seller or else business will be destroyed.

It is the construction surveyor's positive knowledge of measurement, tabulation and analysis of quantity, quality and value that produces the equilibrium, between the conscience of the buyer and the science of the seller, essential to an ethical, efficient and economical transaction.

The architect who is competent in his line of work is in a position to tell what is good for the client. Reputable architects will testify to this. If having a positive survey is good for the client's interest the architect owes it to his profession to investigate, recommend and use surveys as the basis for contracts. The question of fee does not enter into the matter because it is readily proven from many angles that the survey enables economical design and management. The lack of initiative on the part of the architect is to be wondered at because most architects are familiar with the positive benefits of surveys and readily admit them. Is it because both buyer and seller naturally prefer to play the game "catch as catch can?" Procrastination on the part of the architect will bring him closer and closer to unfair competition. When that condition becomes unbearable, possibly only then, will he do the wise thing and stop thinking that it is possible to gain advantages without reaping the inevitable disadvantage of an unfair transaction. While some of the more competent architects are much too busily engaged in the mass production of their art degenerated practices are eating into the vitals of their business through lack of science applied to art.

To be benefitted you must benefit others. To the extent that the architect will apply the positive knowledge of engineering management, design and survey to his art, in that degree architecture will become a science and the architect benefit the client, industry and himself.

MODERN PALACES DO NOT PLEASE LOVERS OF OLD PARIS

Modern "palaces," too big, too high and too new, do not please some of the lovers of old Paris, quaint in architecture and seasoned by centuries.

Public officials and private organizations have battled to enforce all the laws there are against violation of what they esteem the city's harmonious beauty. They have caused some of the electric signs to be moved, forced the remodeling of a few buildings and preserved the ancient aspect of historic spots.

They are aided now by a new and private censor of taste, Eugene Marsan, a writer of note, an arbiter of fashion and style.

"Paris is being spoiled" is the title of a long series of first page articles running in the aristocratic old Figaro, in which Marsan flays the builders whom he thinks offend public taste and he calls for "a committee of men of taste" to do something about it. If he can't tear down new structures he doesn't like, he says he is determined to make those responsible for them unhappy and prevent others from imitating them.

JESSE LASKY IN SAN FRANCISCO TELLS OF MOTION PICTURE'S PART IN THE CONSTRUCTION BUSINESS

"Millions of dollars worth of business has been given builders and engineers in the last decade by the motion picture business."

This was the declaration made by Jesse L. Lasky, first vice-president in charge of production for the Paramount Famous Lasky Corporation, who is in San Francisco to attend the western division sales convention of the company at the Palace Hotel.

"Starting hardly a score of years ago as a 'fly-by-night,' 'nickleodeon' venture, the motion picture business is now rated as the country's fifth largest industry," the Paramount picture chief declared. "This includes the three branches of the business—production, centered largely in Hollywood and its environs; distribution, a world-wide proposition (Paramount pictures, for instance, being sold in 70 countries); and exhibition, or in other words, the theatre end of the business."

"Ten years ago, the industry was just finding itself, and beginning to realize that it was fast outstripping all other forms of public entertainment. Then the era of building began."

"In Hollywood, studios were enlarged, and in many cases new ones built. In important centers film exchanges were constructed to house the district sales and distribution offices and the vaults for their films. And in every city in the land builders reared huge theaters against the skylines."

"Now, these cities have theatres such as never have been seen before, huge palaces of entertainment, vast acres of seats. The new Paramount theatre and office building in New York City is but an outstanding example of a wave of theatre construction that has been nationwide, and which now is spreading throughout the world. In all lands, our foreign department reports, this public demand for modern, comfortable theatres for motion pictures is heard and is being answered."

"The result, naturally, has been to stimulate building construction in all lines, for theatres draw crowds, and where crowds are, business booms. There

are many instances of a theatre pioneering a new district of a city and at once enhancing property values within several blocks."

The end of this theatre building era is not yet in sight, according to Lasky. He cited many cities in which new theatre construction programs are being planned.

"There is another way in which the movies have stimulated building," Lasky said. "It is more indirect than that I have just mentioned, but it is a force, nevertheless. This is the desire for fine homes created by those seen in pictures. Many pictures are laid in wealthy and sumptuous backgrounds, for the public likes to see on the screen that which is lacking in its own life. So we show them fine homes, fine buildings, fine houses, and when they can afford it, the movie homes provide models for their own. It is an intangible, but yet a powerful force."

Lasky is one of several of the motion pictures most important executives who are here at the Paramount convention. Among others are Adolph Zukor, president of the corporation, S. R. Kent, general manager; E. E. Shauer, head of the foreign department, and Emanuel Cohen, in charge of short subjects. John D. Clark, western division sales manager, is presiding, and Herman Wobber, sales manager of the San Francisco district, is acting as host of the convention.

The purpose of the sessions is to announce to the company's sales organization the Paramount program of screen entertainment for the theatrical year beginning August 1. Fifteen branch offices west of the Mississippi are represented here by their entire sales force.

The program to be announced by Mr. Lasky at the convention will include starring vehicles of Emil Jannings, Clara Bow, Richard Dix, Esther Ralston, Pola Negri, Wallace Beery, Adolphe Menjou, Charles Rogers, George Bancroft, Florence Vidor, and many others, as well as many special attractions with all-star casts. More than 200 pictures, including features, short comedies, novelties and news reels, are expected to be on the list.

STATE-WIDE ORGANIZATION OF CERTIFICATED ARCHITECTS IS PLAN PROPOSED IN SOUTHERN CALIFORNIA

A state-wide organization of certificated architects was launched at a recent meeting in Los Angeles with a view to securing adequate legislation governing the practice of architecture in California at the next session of the general assembly, according to Southwest Builder and Contractor. The meeting coincided with the May meeting of Southern California Chapter, American Institute of Architects, and invitations to attend had been extended to all certificated architects of Southern California. There were also present representatives of the architects of Northern California and members of the northern and southern districts, California State Board of Architecture. It was probably the largest gathering of architects ever held in Southern California, if not in the state. Pierpont Davis, president of Southern California Chapter, A. I. A., presided.

Following a free discussion of the objects for which the meeting was called, it was voted unanimously to form a state organization to which all certificated architects of California will be eligible, and

a committee was appointed to meet with a committee representing the certificated architects of Northern California and work out a plan of organization. The Southern California committee consisted of William Richards of Los Angeles; Winsor Soule, Santa Barbara; Natt Piper, Long Beach; John S. Siebert, San Diego; Stanley Wilson, Riverside, with A. M. Edelman and Pierpont Davis members ex-officio. The committee representing the Northern California architects were Fred Meyer, Harris Allen, John J. Donovan, Albert J. Evers, Wm. I. Garren, Mark Jorgensen, Ralph Wyckoff and Chester Miller. The last three named were unable to be present.

At a meeting of the two committees a plan of organization was agreed upon. There will be a permanent board of directors, consisting of one member from the State Board of Architecture, one from the American Institute of Architects, and two architects not members of the institute for the northern district and a like representation from the southern district. Myron Hunt of Los Angeles, as the regional director of the American Insti-

tute of Architects, will be president ex-officio of the permanent board of directors. The state will be divided into districts corresponding to the congressional districts. There will be a chairman for each district appointed by the directors whose duty it will be to get all the architects in his district together. William Richards was chairman of the organization committee, Winsor Soule vice-chairman and Natt Piper secretary.

Harris Allen, president of San Francisco Chapter, A. I. A., opened the discussion on the matter of a state association, expressing the desire of the chapter and certificated architects of the northern district to secure legislation for the protection of the building public and their great appreciation of the co-operation which they are receiving from the southern district.

Fred Meyer, member of the State Board of Architects, Northern District, reviewed the present act regulating the practice of architecture, and told of some of the cases coming before the board where applicants for certificates had never studied architecture and had never worked in an architect's office, yet were practicing architecture and had charge of some important building projects.

Albert J. Evers, member of the State Board of Architecture, Northern District, pointed out as one of the weaknesses of the present state law regulating the practice of architecture the lack of means for its enforcement. He urged that the board be empowered to employ special investigators with funds derived from the license fees now paid to the state by certificated architects, just as the State Board of Medical Examiners are empowered to employ their own investigators. Mr. Evers suggested two ways of accomplishing this proposed change in the present law: First, that all certificated architects in the state of California organize, so that there may be a concerted effort; and, second, that a committee of that organization be formed to draw up the proposed amendments.

John J. Donovan of Oakland, member of the State Board of Architecture, Northern District, recommended raising the fine for violation of the law, so that enforcement would fall in the Superior Court instead of the police court, feeling that better enforcement would be had from the higher court. Mr. Donovan told of an effort four years ago to secure certain changes in the law and of the defeat suffered on account of lack of organization. Mr. Donovan said that, according to a statement by the chief building inspector of Oakland of all building permits issued, architects were connected with the work in only 12 per cent, 88 per cent being outside of the architects' offices. The Oakland chief building inspector had offered to sit with the Oakland architects, to formulate a local ordinance making it mandatory for an architect to prepare plans for buildings where permits were necessary for their construction, and offered to sponsor it on the floor of the city council, stating that the city of Oakland felt the need of such an ordinance. Mr. Donovan stated it was his opinion that if the people of the city of Oakland felt the need for such protection, that it must be so in every city of the state.

William Richards, director of the Southern California Chapter, A. I. A., outlined a tentative plan for the organization of the state certificated architects.

President Pierpont Davis then announced that the meeting was open for discussion from any architect present. A free discussion followed, in which a large number participated, and there was practical unanimity on the necessary for united action to secure legislation that will make the existing law more effective.

Hydraulic Brake Co., Inc., of Bakersfield, capitalized for \$1,000,000 has been incorporated. Directors are: E. W. Lewis M. De Bolt, Edward V. Jones, Peter H. Heslin, Richard Cole, William F. Viou and Dr. H. George Crease, all of Bakersfield.

TREND OF NEW APARTMENT HOUSE AND RESIDENCE BUILDING STUDIED

A notable increase in the construction of apartment houses and flats and a corresponding reduction in the building of individual dwellings in the Pacific coast cities is shown by a comparison of building activities for 1926 and 1927, just completed by S. W. Straus & Co.

The construction costs of new dwellings was 21 per cent less and that of

multi-family housing was 14 per cent greater last year than the year before, according to aggregate figures for Seattle, Portland, Oakland, San Francisco, Los Angeles and San Diego.

The following table gives the construction costs totals for building operations authorized, as reported to S. W. Straus & Co., by building department executives:

	Individual housing	Multi-family housing	All other buildings	Total annual buildings
1926				
Seattle	\$ 11,165,020	\$ 5,207,200	\$ 17,835,480	\$ 34,207,700
Portland	14,851,430	5,645,800	12,091,645	32,588,875
Oakland	11,076,095	2,021,674	13,977,526	28,075,295
San Francisco	17,332,199	10,347,751	30,273,998	57,953,948
Los Angeles	45,007,959	19,126,251	58,872,005	123,006,215
San Diego	10,420,141	1,201,517	8,380,071	20,001,729
Total	\$109,852,844	\$44,550,193	\$141,430,725	\$295,833,762
1927				
Seattle	\$ 9,464,525	\$ 7,282,900	\$ 12,322,655	\$ 29,070,080
Portland	9,885,360	2,669,000	16,419,095	28,973,455
Oakland	6,082,070	2,966,056	11,746,543	20,794,669
San Francisco	14,926,069	13,959,954	18,146,825	47,032,848
Los Angeles	39,211,681	22,866,436	60,949,022	123,027,139
San Diego	6,977,630	1,120,190	6,153,555	14,251,375
Total	\$ 86,547,335	\$50,864,536	\$125,737,695	\$263,149,566

LOCAL ENGINEER CITES LAW ON EARTHQUAKES IN CALIFORNIA CITIES

Henry D. Dewell, consulting engineer of San Francisco, in writing a series of articles for Engineering News-Record of New York on "Earthquake-Resistant Construction," says:

"Until very recently no American city has recognized the necessity of making provision in its building ordinances against earthquakes to the extent of definitely mentioning earthquake shock. San Francisco, in framing its new building ordinance in 1907 after the disaster of 1906, made a purposely indirect provision against earthquakes by specifying a 30-lb. wind pressure for certain types and sizes of buildings. Subsequently this specified unit wind pressure was reduced to 20 lb. per sq. ft. and finally to 15 lb. per sq. ft. the present specification.

After the Santa Barbara earthquake of 1925, Santa Barbara and Palo Alto made definite provisions in their building laws for design against shock. Sacramento has adopted similar clauses, so that the building laws of three California cities now require definite design against earthquakes. The nature of these provisions will be indicated by the following extracts from the building laws of two cities:

SANTA BARBARA (Wind and Shock Bracing)

A. All buildings and structures shall be built so as to resist wind loads, shocks and vibrations by one of the following methods:

1. Rigid connections at the intersection of beams, girders, floor systems and roof trusses with their supports;
2. By means of knee or diagonal bracing; or
3. By bracing in walls.

B. All buildings not having inherent stability in their structural design equal to the bracing herein required shall be braced to resist a horizontal thrust acting in any direction. This bracing shall be applied at all points of support in such a manner that each tier of columns or stories shall resist a horizontal thrust applied to the center of gravity of the supported load equal to 10 per cent of the load which they support when the foundation rests on material upon which a bearing of 4 tons per square foot is allowed; 15 per cent when 3 tons per square foot is allowed, and 20 per cent when less than 2 tons per square foot is allowed or when piling or raft foundation is used.

C. All buildings and structures hereafter erected having large open spaces

therein such as garages, theaters, churches and lodge halls, and those buildings or structures which have rooms or spaces of a width in excess of 35 ft. shall have their roof trusses supported on structural steel or reinforced-concrete columns, and all such roof trusses and columns shall be braced with kneebraces.

D. The wind load on all structures less than 30 ft. high shall be computed as a horizontal force equal to 10 lb. for each square foot of surface exposed by a horizontal projection of the building or structure. The wind load on higher buildings shall be computed at 15 lb. per square foot acting on an area equal to the horizontal projection of the said building or structure.

SACRAMENTO (Earthquake Provisions)

Sec. 2512. (a) Lateral bracing—All framed buildings shall be braced to resist lateral stresses which shall be calculated by two independent methods and that one of the calculations which calls for the stronger structure shall be used in the design and construction. By the first method the stresses shall be calculated as the effects of a pressure applied horizontally to the elevation of the building above foundation, figured in pounds per square foot of area as hereinafter specified. By the second method the stresses shall be calculated as the effects of a force applied horizontally at the center of gravity of the dead load. In both methods of calculation the pressure or force, as the case may be, shall be assumed to come from any possible direction any right angles to any elevation of the building.

The factors to be employed to fix the pressure per square foot of area on the side above the foundation or the lateral force applied at the center of gravity shall vary with the character of the foundation material and shall be as follows:

1. When the foundation rests upon material upon which a load of 4 tons per square foot is allowed, the lateral pressure employed in the first method shall be assumed as equivalent to 20 lb. per square foot; in applying the second method the horizontal force applied at the center of gravity shall be assumed as 1 per cent of the load upon the columns.

2. When the foundation rests upon material upon which a load of 3 tons per square foot is allowed, the lateral pressure employed in the first method shall be assumed as equivalent to 30 lb. per square foot; in applying the second method the horizontal force applied at the center of gravity shall be assumed as 15 per cent of the load upon the columns.

3. When the foundation rests upon ma-

terial upon which a load of 2 tons per square foot is allowed, the lateral pressure employed in the first method shall be assumed as equivalent to 45 lb. per square foot; in applying the second method the horizontal force applied at the center of gravity shall be assumed as 20 per cent of the load upon the columns.

EMPLOYMENT SERVICE ENGINEERING SOCIETIES

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715, 57 Post Street, San Francisco, (Phone Sutter 1684).

R-1623-S ENGINEER, 28-30, with some sales experience preferably in machinery line to train for sales promotion executive. Must be a good talker, writer and mixer and free to travel. Salary \$225-\$275 month. Headquarters, San Francisco, but will eventually be Northwest.

R-1647-S ESTIMATOR & DETAILER of reinforcing steel. Must have both inside and outside experience and be able to do rapid work. Salary open. Location, San Francisco.

R-1614-S CIVIL ENGINEER DRAFTSMAN, familiar with street work and sewer designs. Salary \$160-\$175 month depending upon experience. Permanent. Apply by letter. Location, Southern California.

R-1656-S STEAM-ELECTRIC POWER PLANT OPERATOR, to take charge of the operation and maintenance of buildings having extensive mechanical equipment. At least 6 years operation, installation or maintenance experience required with 3 years in responsible charge. Must be citizen, under 48 year and in good physical condition. Salary \$2400-\$3000 to start. Apply by letter, requesting formal application blank.

K-57-X-4733-C-S STRUCTURAL ENGINEER, capable of designing and estimating on steel structural work, ore binds, trestles, at concentrator and mines. Salary \$225 month. Apply by letter. Location, Northern Mexico.

K-61-X-4809-C-S CIVIL ENGINEER, to teach steel and reinforced concrete design of higher type. May also have to give some graduate courses in structural engineering. Term 10 months. Apply by letter. Location, South.

WHERE TO GET OFF

This is a wonderful country! It is especially wonderful when you think what it will stand for without rearing up on its front legs and kicking all the boards out of the side of the stall. It is the land of the free—where one is free to get away with almost anything provided he has a well organized minority behind him to silence the faint complaints of the majority. In Chicago, for instance, the plastering trades propose to demand that plastering on all buildings within the jurisdiction must be three-coat work. The owner, the architect, the builder—no one but the plasterer himself is to have anything to say about this, whether he likes it or not. The plasterers want plenty of work for themselves, and a little left over for any of the brethren from other cities where work may be slack, so they have thought up this delightful idea for increasing the total amount of plastering work. It will apply to all classes of buildings with the possible exception of large structures where plastering is over tile or metal lath. On an ordinary bungalow it means an additional \$100, on a two-story house \$200, and for the average apartment house \$100 per apartment, so that it naturally becomes considerable of an item for the budget of the small-home builder. Just what the industry as a whole will have to say about this we have not yet heard, but we imagine it will be plenty!—(Building Industry).

THE OBSERVER

What He Hears
and Sees
On His Rounds

Statistics of hydraulic cements, other than Portland cement, in 1927, which include masonry, natural, and puzzolan cements, as compiled by the United States Bureau of Mines, Department of Commerce, show that the nation's production of 2,123,868 barrels exceeded that of 1926 by about 1 per cent. Shipments of these cements from mills in 1927 increased over 6 per cent in quantity and over 2 per cent in gross value. Stocks at the mills decreased and were about 19 per cent lower at the end of 1927 than at the end of 1926. These statistics represent the output of 11 plants, which are located as follows: one each in Alabama, Illinois, Indiana, Kansas, Kentucky, Ohio, and Pennsylvania; and two each in Minnesota and New York. The output has been expressed in terms of 376-pound barrels to correspond with the statistics of Portland cement.

X-Rays are being used to discover defects of growing trees by the City of Rochester, N. Y. Pictures taken with the rays show character of the grain, various types and stages of decay, worm holes and even worms at work.

Secretary of War Davis has granted the request of the Belgian government that two Belgian engineers be allowed to study the work of army engineers on the Mississippi river. The two engineers will come to this country soon.

Second national fuel meeting, under the auspices of the Fuels Division of the American Society of Mechanical Engineers will be held in Cleveland, Sept. 17-20. An interesting and instructive technical program is being prepared at the present time to cover a wide variety of subjects. A dinner, a buffet luncheon and smoker and other forms of entertainment, as well as a number of plant inspection trips are being arranged.

During the first nine days of May the Los Angeles city building department issued 116 permits with an estimated valuation of \$3,027,130. For the corresponding period in April the number of permits was 956 and the estimated valuation \$3,131,885, while for the first nine days of May, 1927, the number of permits issued was less with an estimated valuation of \$2,702,423. The total for the month of May, 1927, was \$11,563,303. For the current year up to and including May 9, Los Angeles building total was \$36,897,531 as compared with \$39,976,922 for the corresponding period last year.

"The National Committee of Wood Utilization of the Department of Commerce has developed, through its investigations, more practical methods of real timber conservation through proper utilization, than have been shown during the past fifty years," it was stated by Everett G. Griggs of Tacoma, Wash., addressing the annual meeting of that body. "The proof of the effectiveness of the committee's work is very evident," he said, "where the Federal Government departments have been the first to change their wood-using practices so as to aid in the movement for better utilization."

Paul Gillon, 28, Rue de Liège, Paris, 111, France, wishes to represent American concerns interested in various public works contemplated by the French Republic. He states that he is well known engineers of the French Republic, as well as to engineers in various municipalities, departments, etc.

Fisher Body Corp., builder of automobile bodies, is completing negotiations for the purchase of a 29-acre site in the south industrial district of Seattle, Wn., on which will be erected a plant costing from \$2,500,000 to \$3,000,000. The plant will be served by both rail and water.

Considerable gain during the first three months of 1928 was shown in exports of hardware and allied products from the United States, which were valued at \$17,629,930, an increase of \$1,481,941 compared with shipments for the same period in 1927 of \$16,147,989, according to the iron and steel division, Department of Commerce.

City of Eugene, Ore., has adopted the uniform building code of the Pacific Coast Building Officials' Conference. The law is effective May 10, according to City Recorder Geo. A. Gilmore.

Sacramento City Board of Education sets June 16 as the date to vote bonds of \$2,716,000 to finance erection of new school buildings and additions and alterations to standing structures. The bonds will run over a period of thirty years rather than twenty years as was first contemplated.

All plants united in Germany's steel trust have decided to discontinue sales until new prices are fixed for all kinds of productions. This measure was caused by low coal prices and is considered necessary to prevent speculative purchases with subsequent depression on the iron and steel trade generally.

Unfilled tonnage of the United States Steel corporation decreased 463,073 tons in April. Forward orders on April 30 amounted to 3,872,133 tons, against 4,335,206 tons on March 31 and 4,398,189 tons on February 29.

Plans for a forty million dollar highway between Tracy, San Joaquin county, and Fillmore, Ventura county, to provide Los Angeles, Oakland and San Francisco with a fast through artery, have been presented to Governor C. C. Young by a delegation of west San Joaquin valley citizens. Plans for the highway provide for two 20-ft. roads with a concrete barrier between.

Celite Products Co., 11 Broadway, New York City and 1320 Hope street, Los Angeles, has issued a bulletin on designing concrete for workability as well as strength. In this bulletin, test data is shown that indicates better workability and consequently greater strength of concrete may be secured economically through the use of Celite as an admixture. This matter is discussed quite thoroughly.

City of Piedmont, Alameda county, defeated proposal to issue bonds of \$337,000 to finance erection of new grammar schools and additions to standing structures. A proposal to provide \$200,000 for a high school was also defeated.

Hycolite Liquid Wall Paper Manufacturing Co., Ltd., 36-38, Victoria St., London, S. W. 1, England, manufacturers of a wall and ceiling paint, called liquid wallpaper, are anxious to make arrangements with an American firm which would be interested in manufacturing their product in San Francisco.

An appropriation of \$2,500,000 for the construction of a Panama Canal Memorial, in commemoration of those who built and help build the Panama Canal, would be authorized by a bill introduced in the House, May 12, by Representative Thatcher of Louisville, Ky. The bill also would provide for the creation of a commission of seven members to be known as the Panama Canal Memorial Commission, to carry out the plans. The memorial would be in the form of a building, containing a hall adequate to hold meetings, conventions, etc., and would be adorned with commemorative sculpturing. The bill was referred to the Committee on Interstate and Foreign Commerce.

Three courts of New York State—Supreme, Appellate and Appeals—have ruled that the zoning regulations of New York City cannot be changed by the local Board of Standards and Appeals for the benefit of a single property owner. The decisions uphold the superintendent of buildings in refusing to grant a corporation a permit for a 21-story building at the southwest corner of Park Ave. and 40th St., in a locality zoned for residences, known as the Murray Hill section.

Marburg Bros., Inc., (L. C. Marburg), 90 West street, New York City, is seeking a representative on the Pacific Coast to handle their combination die sawing and filing machine. The machines are now in operation in a number of manufacturing plants throughout the country.

Richmond Builders' Exchange has advanced the date from May 31 to May 24 for the regular monthly social meeting of the organization, according to L. C. Dexter, secretary-manager. Archie Winchcole, chairman of the Exchange Entertainment Committee, is completing arrangements for the affair.

G. H. Phelps of the Oil Burner Division of the Boyle-Dayton Co., 52nd and Santa Fe Ave., Los Angeles, distributors of a line of oil burners for use in heating homes, apartments, stores, theatres, churches, schools, hospitals, office buildings and factories, is now perfecting dealer organizations throughout the state and have an opening for a dealer in San Francisco.

Bids will be considered by the Oakland city commissioners next Thursday to furnish one or more, but not to exceed three in all, motor-driven pick-up street sweeping machines for street department. A bond of \$2,000 for each machine awarded will be required of the successful bidder. Delivery is to be made thirty days after award of contract, according to Geo. N. Londe, city engineer. Specifications and blanks for bidding are obtainable from Frank C. Merritt, city clerk.

A bird in the hand is worth two in the bush. And so it is in the construction game. Larsen's Advance Construction Report is an aviary of birds in your office every morning waiting to be fed by your sales force. Send for sample copies. Larsen Advance Construction Reports, 547 Mission St., San Francisco. No charge. No obligation.

TRADE NOTES

Wm. Macnider has been appointed assistant general manager of the Calaveras Cement Company. H. C. Maginn has been appointed sales manager succeeding Macnider and will have charge of sales and distribution, according to an announcement of Arthur B. Shelby, general manager for the company.

G. L. Cunningham, general manager of the Concrete "Form-Hold" Corp., Culver City, manufacturers of a device for the use in concrete construction, desire to appoint a firm in San Francisco to act as their exclusive distributors or jobbers, on a commission basis.

Authority to sell 500 shares of preferred stock and 1078 shares of common stock of the D & S Lumber Company of Santa Clara has been granted by the State Corporation Department. The company, which is located on the state highway near El Monte Ave., is managed by E. H. Dean of Mountain View.

Ray Ruggeri will operate from 178 Thirteenth St., San Francisco, under the firm name of Western Artificial Stone Works.

H. E. Macauley and F. M. Butler will operate from 19 California Street, San Francisco, under the firm name of Pacific Construction Company.

The McCloud River Lumber Company of McCloud has purchased 1,250,000,000 feet of standing timber from the Red River Lumber Company, the tract being known as the White Horse tract, in Shasta, Modoc and Lassen counties. It will take ten years to transform the timber into lumber at the McCloud saw-mills. A railroad twenty-five miles long will be built to tap the timber. The timber is to be paid for as it is cut.

Construction of one of the largest lumber mills in the Pacific Northwest will be started June 15, five miles from Klamath Falls, Ore., according to George S. Long of Tacoma, general manager of the Weyerhaeuser Lumber Company. The capacity of the mill will be between 250,000 and 275,000 feet per shift.

J. L. Davidson Co., manufacturers of steel furniture with main offices at 632-648 Mateo St., Los Angeles, has opened a branch office at 812 Newhall Bldg., 260 California St., San Francisco, to handle business in Central and Northern California. The branch is in charge of T. O. Sullivan. The Davidson Company manufactures the "Roll-top" steel coin guard coin and currency omnibuses, coin racks and trays in addition to a complete line of steel filing equipment, metal library shelving, steel counter and cage work.

Granite Quarry Co., now operating at Academy and running a polishing plant in Clovis has leased claims of R. J. and J. B. Houghton of Sanger, on the steel-gray granite lands on the San Joaquin Light and Power Company road above Balch Camp in Fresno county. It is proposed to start operations early next month. Granite will be trucked 30 miles to Piedra from where it will be shipped to the consumer.

Bruce Bidwell, for seven years connected with the Great Western Power Company, has become associated with the sales organization of the A. R. Hancock Electrical Stores of Oroville and Willows. He will specialize in Copeland electrical refrigeration.

ALONG THE LINE

The feature of the midsummer meeting of the Northwest Concrete Products Association planned for July 16 and 17 at Paradise Inn, Rainier National Park, Wash., will be "Effective Merchandising of Concrete Products," according to F. R. Zaugg, executive secretary of the association, who stated that W. D. M. Allan, manager of the Cement Products bureau of the Portland Cement Association, Chicago, has agreed to attend the convention and appear on the program.

After declaring themselves "merchant plumbers" and selecting Long Beach as the 1929 convention city, the California State Master Plumbers' Association, closed its 1928 annual meeting in San Francisco. Members of the association will hereafter refer to them selves as "merchant plumbers" and not "master plumbers" as heretofore.

Ben S. Woodhead, president of the Beaumont Lumber Company of Beaumont, Texas, was elected president of the National-American Wholesale Lumber Association at its recent annual meeting at Atlantic City. He was president of the American Wholesale Lumber Assn., 1922-23, and has been vice-president of the National-American for three years.

R. C. Steeple of the Braun-Steeple Co., 1088 Howard street, San Francisco, a responsible sales representative, residing in Seattle and soliciting in Portland, Spokane, Tacoma and other Northwestern cities, desires additional line, or lines, applicable to the lighting fixture or ornamental iron trades. Prefers to work on commission basis.

Chas. A. Carson, secretary-treasurer of Fox and Co., plumbing concern of Portland, Ore., died in that city May 8. Mr. Carson was born in Bozeman, Montana. His widow, a mother, one sister and two brothers survive.

City trustees of Woodland are considering adoption of a building code as proposed by the California Development Association.

W. G. Knox has been appointed city engineer of Santa Ana to succeed E. B. Collier, resigned. Mr. Knox resigned as city councilman to accept the position. He was city engineer of Santa Ana from 1922 to 1925, retiring to engage in private practice.

Herbert J. Hart, 54, manager of the Turlock Lumber Company branch yard at Hilmar died as the result of injuries received in an automobile accident May 13, when his car overturned on the Turlock-Denair highway.

H. H. Larsen Co., general contractors, announce removal of offices from 68 Post street to 64 South Park, San Francisco, where the company has erected its own office quarters and established yards.

O. W. Bauer, San Francisco engineer, has been appointed superintendent of the State Land Colony at Durham, effective June 1, it is announced by Chas. W. Cleary, chief of the Division of Land Settlements.

T. R. Peters, general contractor of Chico, has opened branch offices in the Lingscheid Bldg., Main street, Red Bluff.

HERE — THERE — EVERYWHERE

The next convention of the National Association of Builders' Exchanges will be held in Youngstown, Ohio.

Howard J. Perry, formerly of the advertising department of the Morning Oregonian, has been appointed executive secretary of the Oregon Building Congress, which is the so-called "big tent" of the construction industry in Oregon state. Of recent months, Perry has been a contributor to national magazines, and only recently completed an important survey for the West Coast Lumber Trade Extension bureau.

San Francisco has been selected as the 1928 convention city of the California Retail Lumberman's Association. The meeting will be held in November and will attract about 300 members of the organization. Paul Hallingby of Los Angeles is president of the association and Mrs. J. E. Fraser of San Francisco, secretary.

The summer convention of the Pacific Northwest Clay Workers' Association and the Pacific Northwest Brick and Tile Association will be held in Yakima, Wash., during the latter part of August, probably Aug. 31 to Sept. 1. The members of these organizations, comprised of all the manufacturers of clay products in Oregon, Washington and Western Idaho, hold conventions twice each year. Programs of speakers are arranged on various technical subjects involved in the manufacture of brick, tile, terra cotta and other clay products, as well as discussions of merchandising methods.

Petaluma Local, No. 293, Painters, has adopted the five-day week schedule, to go into effect May 19. The proposal was presented to the boss painters some time ago and all favored the proposition. Heretofore the painters have been working five and a half days a week and now they will have all Saturday as a holiday.

C. M. Burchell of Wheatland, was named president of the Sacramento Valley Retail Hardware Dealers' Association at a recent meeting in Sacramento. R. P. Shorrock was chosen vice-president, W. R. Britland, secretary and R. W. Fitzgerald, all of Sacramento, treasurer. LeRoy Smith of San Francisco, secretary of the California State Retail Hardware and Implement Association, was a guest at the election meeting.

John Graham, A. I. A., at the third joint dinner meeting of members of the Washington State Chapter, American Institute of Architects and the Seattle Chapter, Associated General Contractors of America, at Seattle, April 19, in speaking on the general contract system, declared it is much more satisfactory than segregated contracts, in his experience. He declared that he is obtaining better results with one contract for an entire project, including even heating and plumbing under the general. "The best interests of the industry," he said, "will be served by building up strong general contractors and thus obtain organizations competent to carry out a project in all its details, competent to act as real partners of the architects completing the structure."

JOHNS-MANVILLE IMPROVES EAST BAY HOLDINGS TO MEET DEMAND OF PACIFIC COAST FOR PRODUCTS

To better serve the rapidly increasing population of the Pacific Coast with its various materials and allied products, the Johns-Manville Corporation, in September, 1920, started construction of a California factory at Pittsburg, Contra Costa County.

Pittsburg was found to be ideally located for a plant of this kind. It is less than fifty miles from San Francisco, Oakland, Sacramento and Stockton, principal distribution points for Northern California. It is served by three transcontinental rail lines, besides being situated on the headwaters of Suisun Bay where deep water development now under way will permit of direct call by ocean-going vessels, providing prompt deliveries to all Pacific Coast points and the Far East. Other large industries, a mild and healthful climate and comfortable homes insure very satisfactory labor conditions.

The original factory consisting of two units, each of them really a factory in itself, was completed in the latter part of January, 1926, when local manufacture was started of rigid asbestos shingles, steam and cold insulation materials, insulating and refractory cements.

That their recognition of the possibilities for greater sales through the establishment of a well located western manufacturing plant has been thoroughly justified is indicated by the extensive additions which the Johns-Manville Corporation is now making.

Because of largely increased demand for other materials heretofore manufactured only in their Eastern factories, Johns-Manville Corporation have recently purchased two additional tracts of land

adjoining their present Pittsburg holdings. It was found necessary to purchase this additional land, as present plans contemplate a manufacturing plant much larger than originally planned; also to give them dock facilities necessary to handle the large coastwise steamships.

The plans are well under way for the construction of a 600-foot wharf, and warehouse, at the water's edge, and the building of two more manufacturing units. Contracts for structural steel have already been let, and it is expected to have a portion of this new plant, comprising the paper mill and roofing units, in operation by July 1. Construction of this plant will be under the direct supervision of Mr. P. A. Andrews, Pacific Coast Manager, assisted by Mr. D. C. Renton, Chief Engineer, and a staff of engineers who have recently arrived from the Company's large Eastern factory at Waukegan, Illinois.

The addition to the plant when completed will manufacture asbestos paper and board, asbestos roofings, asphalt prepared roofings, slate surfaced shingles, deadening felts, roofing cements and coatings, brake band lining and packings, and other specialties which the Company plans on marketing on the Pacific Coast. The equipment will be of the most modern design and will consist of a complete paper mill, roofing plant and asphalt refinery. The capacity of the present boiler plant will be doubled.

This represents another chapter in Western development and in the progress of Johns-Manville Corporation who occupy an enviable position in the manufacturing world.

day depends upon general business conditions and national prosperity than to say, as we used to, that business activity and prosperity depend upon the amount of building that is done. Vast as the building industry is, our business activity has grown more rapidly in extent and variety so that business is relatively less affected by building construction than the building industry is by business. Building is affected now no longer by minimum needs, but by the operation of powerful economic and social factors which grow out of the general business situation and its effect upon standards of living.

"From a construction point of view most of the United States looks like the devil and is 50 years behind the times, even as compared with most of the impoverished countries of Europe. We may, therefore, expect to be occupied with the enormous task of reconstructing and improving our national building equipment for years to come; and by the time we have caught up generally with even the current standards, these in turn will have shifted to a still higher level.

"Cautious and conservative people will ask where the money for all this is coming from, whether continued expansion in building will not invite speculative excesses and raise building costs to prohibitive levels. There may be some reason for feeling that building in some of the larger cities has run ahead of existing standards and effective demand, but I doubt whether this is true even in New York, where large portions of the population still live under conditions that are inexcusable from either an economic or social point of view.

"There is no ground for fearing any stringency of capital for building purposes in the long run."

U. S. ROAD CONSTRUCTION

Road building projects completed in the United States since the beginning of the fiscal year on July 1, 1921, amounted to 6,592.5 miles at a cost of \$155,177,915.59, of which the Federal Government paid \$68,289,824.77, the Bureau of Public Roads reports. Federal aid funds still available for Federal aid highway construction now total \$84,115,118.45.

The Bureau states that projects under construction for a mileage of 11,510.8 miles, will cost \$306,185,374.92, with the Federal Government paying \$126,486,015.43. These figures include projects reported completed whose final vouchers are not yet paid, totaling 3,178.9 miles at an estimated cost of \$87,211,295.12 and a Federal-aid share of \$36,351,738.01.

Projects approved for construction, according to the Bureau, will total 2,363.5 miles, costing \$75,742,973.54, of which the Federal-aid allotment is \$28,725,350.11.

TROLLEY TUNNELS PROPOSED TO RELIEVE OAKLAND TRAFFIC

Solution of the Twelfth street dam "bottleneck" problem in Oakland by the use of street car tunnels at the eastern end of the dam to First avenue and to East Fourteenth street is advocated in a plan submitted to Commissioner Wm. H. Parker by Harland Bartholomew and the major highway and traffic committee of one hundred.

Presenting a novel idea for the relief of traffic congestion on the dam the plan would eliminate the most dangerous grade crossing in the Twelfth street dam area.

In addition, a pedestrian subway to the municipal auditorium from the loading platforms on the Twelfth street dam would also be constructed.

Cost of the tunnels would be between \$1,600,000 and \$1,700,000, according to Parker.

Henry C. Reid will operate from 289 Clementina street, San Francisco, under the firm name of Northern Street Lighting Company.

ECONOMIST SAYS CONSTRUCTION LEVEL IS DEPENDENT UPON GENERAL BUSINESS AND NATIONAL PROSPERITY

The general level of building activity that has prevailed during the past three years probably represents the new normal level for the industry in this country, and there is no reason to expect any material recession from this level in the future, Virgil Jordan, chief economist of the National Industrial Conference Board told the Credit Association of the Building Trades of New York.

"The immediate outlook for building," he said, "depends chiefly upon general business and credit conditions in the next few months, and in these respects there is nothing to worry about, even though money may be temporarily tighter and business a little hesitant during the summer. It is far more reasonable to expect that after the stock market has had some of its speculative enthusiasm knocked out of it, easier money and rising prices will stimulate speculation in commodity markets and lead to a rapid and general expansion of business which will carry building along with it to still higher levels next year.

"In the building industry as in all other fields of business, it is high time that we throw overboard some of our traditional ideas of what is normal and proper, and recognize that we live on a radically different plane of public demand and industrial accomplishment than before the war.

War Deficit Insignificant

"Economist and statisticians like to fit the ups and downs of business into

regular cycles and to make its development conform over long periods to a smooth curve of growth. These formulas may be true enough as a historical record of our brief past, but there is no reason to suppose that we are chained to them for the future. Business is no mere machine following purely mechanical laws; it is determined fundamentally by changes in human psychology, but these the statistician has no means of taking into account.

"This is particularly true in its application to the building industry. During the past five years statisticians have been wrangling about the length of time before the war-time 'shortage' in building will be made up and the probable return to some 'normal' of building activity. Invariably these calculations have been upset by the facts, because the future growth of any fundamental type of consumption demand, such as building, cannot be measured by any purely statistical means.

"The deficit in building during the war has been very little, if anything, to do with the level of building activity in the past few years or at the present time. The level of building, like that of industrial and trade activity, is not determined by what happened in the past, but by the way we feel and the things we want now and in the future.

Construction 50 Years Behind

"It is far more accurate, therefore, to say that the level of building activity to-

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department

SEATTLE CONTRACTORS MUST WATCH STEP IN BIDDING

"Be it resolved by the Board of Public Works, That hereafter, the Board will not take cognizance of claims of errors or omissions made by bidders on public work, which claims are made after the opening of the bids, but that in all cases any relief afforded the bidder must be received by court action."

"That in black and white is a warning against carelessness in estimating city work in Seattle. It is a clause incorporated in the bid sheets on every job."

Yet, says the Pacific Builder and Engineer, a careless bidder, and a veteran contractor at that, found himself \$11,000 low on two jobs totaling \$37,000. After seeing his competitors' bids he wanted to enig. This publication believes the board of public works should make that contractor carry out his bid—only by such drastic measures can the careless be made careful. The careless constitute a great menace to sane contracting.

A newcomer in the Seattle field recently bid, by error, \$4.73 for brick paving between railway tracks. He will drop not less than \$1 a yard on that job.

How much better for both of these men if they would win one job a year at a profit rather than a dozen at or below cost!

PACIFIC COAST BUILDING CODE TOPIC AT SAN JOSE MEET

The uniform building code was the magnet which drew leading central California builders together at a meeting in San Jose May 11.

Members of the central section, Pacific Coast Building Officials' conference, discussed the code at a meeting at the Sainte Claire hotel. The program opened with lunch, and continued throughout the afternoon.

Code advantages were illustrated in a tabloid drama in which M. C. Woodruff, San Jose building inspector, and J. E. Mackie, section managing secretary-treasurer, had the principal roles.

State Housing Director Robert Grieg said his commission recommended code adoption for the reason that it is workable and practicable, and covers virtually all points liable to arise.

Woodruff and S. P. Koch, Berkeley, section chairman, spoke on the code. Koch acted as chairman of the meeting. Following the regular program, open forum occupied a couple of hours.

It was announced at the session that another district meeting will probably be held in one of the bay cities before the annual meeting of the conference, scheduled at Fresno in October.

LOS ANGELES BUILDING EXCHANGE ELECTS OFFICERS

Entering on its thirty-sixth year, the Los Angeles Builders' Exchange last week re-elected Ralph E. Homann of the Ralph E. Homann Co., president, with L. B. Webster of the W. P. Fuller Co., first vice-president, W. H. C. Ness of the National Cornice Works as second vice-president, and W. J. Davies of W. A. Davies & Son treasurer. Mano Zan is continued as secretary and general manager of the exchange.

Members of the new executive committee include George Finney of the Gas Furnace Association of Southern California; George D. Marcy, manager of the National Surety Co.; W. C. McColl, the Austin Co. of California; Guy E. Living-

ston, Angelus Roof Paper & Paint Co.; Guy C. Boynton, Baker Iron Works; Harry L. Masser, Los Angeles Gas and Electric Corporation, and with Lou B. Webster as chairman.

A constructive program for the coming year has been laid out, according to Mano Zan, general manager of the exchange.

"NON-COMPETITIVE CLASS"

Says the weekly bulletin of the Pasadena Builders' Exchange, edited by Geo. W. Israel, secretary-manager:

"Recently a San Francisco concern came to Los Angeles, it is reported, and obtained work in a great many cases without the usual competition due to the high character of work and materials turned out by the firm. While this was outside competition, it received the approval of many because the quality of workmanship placed the firm in the non-competitive class. In the foregoing is a potent lesson for the various elements of the construction industry. When a concern is able to come from a rival community and obtain contracts in a field already overcrowded with competition, without resorting to unfair tactics, it deserves commendation of the highest type. Undoubtedly, this firm has learned that quality and service mean more to the discriminating buyer than an attractive bid price. It may take years for a firm or individual to establish a reputation for quality, but once established it forms the basic foundation for prosperity. Superior quality is invariably lifted from the competitive class and placed on a pedestal, where it is seldom touched by the irresponsibles and incompetents. Quality has no fixed price and commands its worth."

CLAY PRODUCTS MANUFACTURERS PERFECT STATE ORGANIZATION

Manufacturers of clay products throughout California announce the formation of a new organization to be called the Clay Products Institute.

Thirty manufacturing organizations have joined and headquarters are to be established in San Francisco and Los Angeles. One of the purposes of the new institute is to bring about better standards for building construction by advocating public tests of building materials.

The organization is developing plans to insure the manufacture of clay products in the best approved methods and the proper use of the materials after they are manufactured. It is hoped to have these plans adopted in building codes and ordinances of cities throughout the State.

Robert Linton of Los Angeles has been chosen as president; George D. Clark, vice-president; H. B. Potter, treasurer; Seward C. Simons, secretary and manager. Those named as directors are E. M. Davids, Gus Larson, F. H. Wild, W. Dennis and N. A. Dickey.

CARNEGIE ENGINEERING COURSES

Excepting a few great instructors and special lecturers, none but members of the regular faculty staff has been appointed to the summer session staff this year at the Carnegie Institute of Technology in Pittsburgh, according to an announcement. Guest members of the staff will be on duty at various periods during the six and eight weeks' courses for teachers beginning June 11 and June 25. For the undergraduate courses in engineering and industrial subjects, beginning June 11, only members of the regular faculty have been engaged.

UNIONS WIN FAVOR

A worker who does not belong to one of the trade unions in Russia is very much out of work. A recent order providing for the rationing of butter, soap, macaroni and eggs, gives double portions to all members of trades unions. In addition clothing, rice and potato flour may be sold to union members only.

LUMBER GRADE-MARKING FAVORED BY AMERICAN BUILDERS

Builders of the United States sponsor the universal grade-marking of every piece of lumber to show its quality, Wm. F. Chew, Managing Director of the Builders' Exchange of Baltimore, declared before the annual meeting of the National Committee on Wood Utilization of the Department of Commerce.

As the representative of the National Association of Builders' Exchanges, Mr. Chew declared that foremost among the interests of the exchanges is the desire to effect improvement in the building industries, and one of the most important problems in this field has to do with the use of building materials.

"We are interested in all of the projects that are being developed by the National Committee which in any way touch the interests of the building industry," he said. "We are glad to do everything we can to stimulate a wider demand for short-length and end-matched lumber. I can assure you that the group I represent, composed of 50 local Builders' Exchanges with a total membership of 15,000, is one hundred per cent for grade-marking and for the development of practices in the lumber industry which will insure our members receiving better and well seasoned lumber."

Changing conditions in the industry and changing construction methods have brought about a pressing need for authoritative information on the use of wood in construction, he added. For this reason, he said, builders are vitally interested in the manual on wood construction now being prepared by the Committee, because it will promote wiser and more efficient use of this building material. Two-thirds of the output of the sawmill goes into construction, and while plenty of emphasis is placed upon the proper use of concrete and steel little attention is paid to the product of the sawmill because of the lack of attention-compelling the information on the proper use and application of lumber.

"In my judgment," he said, "This Committee is an outstanding development in co-operative effort between builders and those who produce a building material. It is the first time in the history of the building industry in this country that users of a construction material have had an opportunity to work out ways and means of improved utilization. The campaign of education being conducted should result in distinct public benefits. Real economies that will affect the pocketbook of every taxpayer should follow the general application of the recommendation of this Committee."

DANGEROUSLY DEEP

Northerner: "Pretty mild winter you have down here."

Southerner: "Mild? Do you call two feet of snow mild?"

Northerner: "Two feet! Say, man, the snow was so deep in our country last winter that the farmers had to jack up their cows to milk 'em."

ALAMEDA BUILDING PERMITS

Alameda reports the issuance of fifteen building permits for new buildings during the month of April, 1928, the estimated cost of which was \$73,000. Forty-two permits were issued for alterations and repairs involving an expenditure of \$23,515, bringing the total valuation for the month to \$97,315.

 chausser Lumber Co., announces con-
 struction will be started at once on a
 lumber mill 5 miles from Klamath Falls.
 Will have capacity of between 250,000 and
 275,000-ft. per shift.

FORGET

Forget the kindness that you do
 As soon as you have done it.
 Forget the praise that falls to you
 As soon as you have won it.
 Forget the slander that you hear
 Before you can repeat it.
 Forget each slight, each spite, each sneer
 Wherever you may meet it.
 —Ray Havens, Past Pres. International
 Rotary.

IF WE could only.
 FOLLOW THE above eight lines.
 HOW MUCH happiness.
 WE WOULD give the world.
 MOST OF us.
 AFTER WE do a favor.
 FOR A friend.
 OR SOME unfortunate.
 SIT AROUND day after day.
 AND WAIT for this person.
 TO THANK and thank us.
 WE FORGET.

THAT THE pleasure of doing.
 SHOULD BE our reward.
 WE FORGET.
 THAT IF.
 YOU DO not give.
 YOU NEVER receive.
 AND ABOUT praise.
 IF WE could listen.
 FOR SOMETHING but praise.
 IT IS nice.
 OF COURSE.

TO TELL our friends.
 ABOUT THE nice things.
 THAT THEY do.
 BUT SANDY Pratt, President.
 OF THE Pratt Building Material Co.
 OF SACRAMENTO, Prattrock (near
 Folsom).
 MARYSVILLE, SAN Francisco.
 MAYHEW (SACRAMENTO County).
 ALSO PRATTCO (Monterey County).
 AND PRODUCER.
 OF SAND, rock and gravel.

AT THE above places.
 BELIEVES IN sending the flowers.
 WHILE YOU are alive.
 TO STILL enjoy them.
 YOU CAN'T see them.
 IF THEY are.
 ON TOP of your casket.
 AND NOW about slander.
 ESPECIALLY REGARDING your com-
 petitor.
 NOW DAYS.
 WHEN ANYONE.
 "KNOCKS" HIS competitor.
 PEOPLE BECOME alarmed.
 AT THE knocker.
 AND EITHER don't buy.
 AT ALL.
 OR YOUR competitor.
 GETS THE business.
 SO WHEN Sandy Pratt.
 AND HIS crowd.
 OF FAITHFUL assistants.
 ARE AFTER an order.
 FOR SAND, rock or gravel.
 CLEAN AND sharp.
 IF YOU please.
 THEY SAY.
 ONLY GOOD things.
 ABOUT THE other fellow.
 IN THE sand and rock game.
 "I THANK you."

You can lead them to water, but Sandy
 Pratt, President of the Pratt Building
 Material Co., producer of clean, sharp
 sand, rock and gravel, finds they drink
 water if you put sugar in the water in-
 stead of vinegar.

THE CONTRACTORS' ROOM

BUILDING AND ENGINEERING NEWS maintains a Contractors' Room
 where plans and specifications may be filed by Architects, Engineers and
 Owners for the convenience of bidders in San Francisco and the Bay Coun-
 ties.

Architects, Engineers and Owners are invited to forward plans of
 their projects to BUILDING AND ENGINEERING NEWS. No charge for
 this service. The plans will be returned in good condition when contract
 for work is let.

C. C. Severin	5,700

BANKS, STORES & OFFICES

Plans Being Figured
AUTO BLDG. Cost, \$15,000
WATSONVILLE, Santa Cruz Co., Cal.
One-story reinforced concrete auto sales and display building.
Owner—Louis Normandin, 105 Hanchett St., San Jose.
Architect—De Lange & Collins, Pajaro Valley Bank Bldg., Watsonville.
Lessee—Gunter & Gunter (Hudson-Essex Agency).

May 12, 1928

Contract Awarded
ALTERATIONS Cost, \$25,000
OAKLAND, Alameda Co., Cal. Forty-sixth and Telegraph Aves.
Alter present building for banking quarters.
Owner—Italian American Securities Corp.
Architect—Leonard H. Ford, 1435 Harrison St., Oakland.
Contractor—Fred W. Peters, 1424 Cavanaugh Road, Oakland.

TURLock, Stanislaus Co., Cal.—Architect G. N. Hilburn, Turluck, has completed plans and construction will be started shortly on 75 by 100-ft. store building in Eleventh St., near J St., for T. H. Kewin and Bomberger Bros., of Modesto; est. cost \$60,000. Will be 1½-story, containing five stores.

Sub-Bids Being Taken—Materials Being Purchased
BANK BLDG. Cost, \$20,000
SAN FRANCISCO, Sacramento and Fillmore Sts.
One-story frame and stucco bank bldg.
Owner—Bank of Italy.
Architect—H. A. Minton, Bank of Italy Bldg., Eddy and Powell Sts.
Manager of Construction—James Harkness, premises.

SAN FRANCISCO—See "Apartments." this issue.

LOS ANGELES, Cal.—H. M. Baruch Corp., 1015 Lincoln Bldg., awarded the general contract at \$115,000 for shop and market building in 6th St., extending from Kenmore Ave. to Alexandria Ave., for Chapman Bros.; Morgan, Walls & Clements, 1134 Van Nuys Bldg., architects; will be built around a central patio and will have a frontage of 310 ft. on Sixth St., 166 ft. on Alexandria Ave. and 210 ft. on Kenmore Ave. At

each corner on Sixth St. there will be a 2-story tower section, 82x65 ft. There will also be a 1-story warehouse, 44x135 ft. The remainder will be subdivided for markets and shops; reinforced concrete walls.

SAN BERNARDINO, Cal.—See "Theatres," this issue. \$300,000 store, office and theatre building being figured.

Sub-Contracts Awarded.
STORE BLDG. Cost, \$90,000
RICHMOND, Contra Costa Co., Cal.
Santa Fe Terminal.
One-story reinforced concrete store building.
Owner—Santa Fe Railroad.
Architect—Eng. Dept. of Owner in Los Angeles.
Contractor—Monson Bros., 251 Kearny St., San Francisco.
Reinforcing Steel—Gunn, Carle & Co., 441 Market St., San Francisco.
Pile Driving—Duncanson Harrelson Co., DeYoung Bldg., San Francisco.
Structural Steel—Herrick Iron Works, 18th and Campbell Sts., Oakland.
Metal Windows—Truscon Steel Co., Sharon Bldg., San Francisco.
Steel Sash—Michel & Pfeffer Iron Wks., Tenth and Harrison Sts., S. F.
Tile Work—Malott & Peterson, 3221 20th St., San Francisco.
Lumber—Tilden Lumber Co., 400 High St., Oakland.
Miscellaneous Iron—Fair Mfg. Co., 617 Bryant St., San Francisco.
Sheet Metal Work—Fire Protection Products Co., 3117 20th St., S. F.

Working Drawings Being Prepared.
FITTING UP OFFICE Cost, \$—
SAN FRANCISCO. Ground floor of Russ Building.
Fitting up brokers' offices.
Owner—Lillenthal, Bremer & Co., 310 Montgomery St., San Francisco.
Architect—Kent & Hass, 525 Market St., San Francisco.
Bids will be taken next week.

Specifications Being Written
BUILDING Cost, \$200,000
OAKLAND, Alameda Co., Cal. NW 29th and Summit Sts. (77x102); 5-story class B reinforced concrete medical building, (40 offices).
Owner—Group of San Francisco businessmen (names withheld).
Architect—Ashley, Evers & Hayes, 525 Market St., San Francisco.
Bids will be taken in about two weeks.

Plans Being Figured—Bids Close May 29.
BANK Cost, \$20,000
SAN FRANCISCO. Thirty-eighth Ave. and Balboa St.
One-story frame and stucco bank building.
Owner—Bank of Italy.
Architect—H. A. Minton, Bank of Italy Bldg., Eddy and Powell Sts., San Francisco.

 P. M., bids will be received by Veda B. Young, Secty., Playground Commission, 376 City Hall, for fencing at Jas. Rolph Jr. Playground at 26th St. and Potrero Ave. Specifications obtainable from above office.

OAKLAND, Alameda Co., Cal.—The
 following contracts were awarded by John W. Edgemond, Secty., Board of Education, to furnish and deliver library tables, oak chairs, Vienna chairs and school desks:

Desks

C. F. Weber Co., 601 Mission St., San Francisco, \$8130.

Vienna Chairs

Heywood Wakefield Co., 77 Battery St., San Francisco, \$1300 (for 1300 chairs).

Arm Chairs

Lisel and Lisel, \$990.

Class Chairs and Library Tables

Peck & Hills Furniture Co., 532 Mission St., San Francisco, \$3250 (chairs); \$3600 (tables).

MILL VALLEY, Marin Co., Cal.—
 Northwestern Pacific R. R. is having plans prepared for a modern freight and passenger depot to be erected at Mill Valley. Further mention of this work will be made when the plans are further advanced.

RENO, Nevada—City Engineer Harry
 Chism preparing plans for two new tennis courts at Evans Park, three on city property at Stewart and Wheeler streets and one in Whitaker Park.

SAUSALITO, Marin Co., Cal.—North-
 western Pacific R. R. will expend approx. \$100,000 in terminal improvements at Sausalito involving additional tracks, wharves and train sheds, etc.

19

SAN LUIS OBISPO, Cal.—War De-
 partment has authorized the construction of four additional lavatories and two artillery warehouses east National Guard Camp on Morro road in San Luis Obispo. A permanent gunnery range will also be constructed. R. E. Middlestaedt is Adjutant General in charge of the camp.

BAKERSFIELD, Kern Co., Cal.—Until
 June 4, 11 A. M., bids will be received by F. E. Smith, county clerk, to erect Headquarters Building at Kern County Airport. Chas. H. Biggar, architect, Bank of Italy Bldg., Bakersfield. Cert. check 10% payable to clerk req. with bid. Plans obtainable from architect on deposit of \$10, returnable. See call for bids under official proposal section in this issue.

BERKELEY, Alameda Co., Cal.—Dean
 Chas. Derleth Jr., head of the Engineering Department of the University of California and Geo. W. Kelham, University architect, have worked out preliminary plans for proposed enlargement of the University football stadium to increase the capacity to 100,000 seats. Construction, however, will probably not be undertaken for two years.

SAN MATEO, San Mateo Co., Cal.—
 Until May 21, 8 P. M., bids will be received by E. W. Foster, city clerk, to construct two 20,000-gal. water tanks and replace decking on present tower in city park. Bids to include removal of old tanks and decking to become property of the city. Cert. check 10% req. with bid. Forms for bidding obtainable from clerk. See call for bids under official proposal section in this issue.

YREKA, Siskiyou Co., Cal.—Until June
 4, 10 A. M., bids will be received by W. J. Neilson, county clerk, to erect grand stand, dance hall and exhibition rooms at county fair grounds near Yreka for Tenth District Agricultural Association of California. Cert. check 10% payable to clerk req. with bid. Plans obtainable from J. P. Churchill, secretary of the Fair Assn. at Yreka on deposit of \$10, returnable. See call for bids under official proposal section in this issue.

SAN FRANCISCO—Moore Drydock
 Co., Balfour Bldg., San Francisco, at \$133,700 awarded contract by State Harbor Commission to construct steel dredge. General Engineering & Drydock Co., 1100 Sansome St., San Francisco, at \$39,136 awarded contract to construct two wooden mud scows.

Contract Awarded.

STATION Cost, \$—
PALO ALTO, Santa Clara Co., Cal.
 Steel frame tire and service station.
 Owner—P. M. Lansdale, 505 Emerson St., Palo Alto.

Architect—Birge M. Clark, 310 University Ave., Palo Alto.
 Contractor—Wells P. Goodenough, Ramona and Hamilton Sts., Palo Alto.

PALO ALTO, Santa Clara Co., Cal.—
 City plans to install filter plant at municipal swimming pool; est. cost \$3,500. J. F. Bxybee, Jr., is city engineer.

Contract Awarded

CHAPEL Cost, \$12,000
BERKELEY, Alameda Co., Cal.
 One-story frame and stucco chapel.
 (English type).

Owner—Hull Undertaking Co., 3051 Adeline St., Berkeley.

Architect—Slocome & Tuttle, 337 17th St., Oakland.

Contractor—J. B. Bishop, 587 Athol Ave., Oakland.

BERKELEY, Alameda Co., Cal.—Re-
 gents of the University of California have ordered clearing of structures from two blocks adjacent to the S. W. corner of the campus to provide additional lands for baseball diamond, secret football practice field and supplementary drill grounds.

SANTA BARBARA, Cal.—A. J. Roberts
 3045 Calle Noguerra, Santa Barbara, awarded contract to construct swimming pool, bath house and tennis courts on Santa Barbara Biltmore Hotel grounds. Cost, \$60,000. Reginald D. Johnson, architect, 707 Architects Bldg., Los Angeles.

MISCELLANEOUS SUPPLIES

Concrete "Form-Hold." Culver City, Calif. Mr. G. L. Cunningham, Gen. Mgr., Concrete "Form-Hold" Corporation, Culver City, Calif., manufacturers of a device for use in concrete construction, wish to appoint a firm here to act as their exclusive distributors or jobbers, on a commission basis.

Automatic Oil Burners. Los Angeles, Calif. Mr. G. H. Phelps, Oil Burner Div., The Boyle-Dayton Co., 52nd and Santa Fe Ave., Los Angeles, Calif., distributors of a line of oil burners for use in heating homes, apartments, stores, theatres, churches, schools, hospitals, office buildings and factories, are now perfecting their dealer organizations throughout the state and they have an opening for a dealer in San Francisco.

Combination Die Sawing and Filing Machine. New York, N. Y. Mr. L. C. Marburg, Marburg Bros., Inc., 90 West St., New York, N. Y., is seeking a representative on the Pacific Coast to handle their combination die sawing and filing machine. Their machines are now in operation in many of the well-known manufacturing plants throughout the country.

Pacific Northwest Representation. San

Francisco, Calif. Mr. Frank Deffry, care Overland Freight Transfer Co., 211 Front St., San Francisco, Calif., (Phone Davenport 4100), is leaving San Francisco June 10 for Pacific Northwest, Spokane, Portland, Seattle, Tacoma. All business transacted—personal or commercial. References.

New Orleans Representation. New Orleans, La. Mr. D. S. Pomeky, 2302 Vainmont St., New Orleans, La., desires to connect with San Francisco concerns which require the services of a representative in New Orleans. Would be interested in almost any line. Has excellent connections and is well acquainted in New Orleans.

Pacific Northwest Sales Representative. Mr. R. C. Steepie, Braun-Steeple Co., 1058 Howard St., San Francisco, Calif., sales representative, residing in Seattle and soliciting in Portland, Spokane, Tacoma and other northwestern cities, desires additional line, or lines, applicable to the lighting fixture or ornamental iron trades. Commission basis preferred.

Representation in New York and Europe. Berkeley, Calif. Mr. Fay W. Kiser, 2917 Pine Ave., Berkeley, Calif., (Phone, Berkeley 1906-J), businessman, going abroad this month at his own expense, desires to get in touch with firm or individuals wishing representation in New York or in Europe, or with parties having business calls to make there. He is a university graduate with business and selling experience and can furnish best of local references.

Provisions and Machinery. Leipzig, Germany. Messrs. Goellen and Fritzsche, Dietriching 15, Leipzig C I, Germany, desire representation on a commission basis of American provisions and a special line of machinery. They claim a good selling organization with technical sales ability, and they furnish references.

Machinery and Semi-Finished Metal Products. Rastatt, Bavaria, Germany. Metallhutte Baer & Co., Kommanditgesellschaft, Rastatt in Bavaria, Germany, would like to represent American manufacturers of special machinery or semi-finished metal products, such as bronzes or alloys.

European Representation. Paris, France. Mr. Jean Verrier, 93, rue la Boetie, Paris, France, commission merchant, wishes contact with American manufacturers seeking outlet for products in Europe. He already represents three U. S. concerns and he traveled for several years in this country representing French houses. References.

French Public Works. Paris, France. Mr. Paul Gillon, 25, Due de Liege, Paris, VIII, France, wishes to represent American concerns interested in various public works contemplated by the French Republic. He states that he is well known to engineers of the French Republic, as well as to engineers in various municipalities, departments, etc. References.

Liquid Wallpaper. London, England. The Hycolite Liquid Wallpaper Mfg. Co., Ltd., 36-38 Victoria St., London, S. W. 1, England, manufacturers of a wall and ceiling paint, called liquid wallpaper, are anxious to make arrangements with an American firm who would be interested in manufacturing their product in San Francisco.

Central American Representation. Houston, Texas. Mr. Leo F. Nadeau, Box 4034 Franklin Branch, Houston, Tex., having lived in the Central American countries for a number of years, speaks the language, understands the people, their customs and business methods, desires to represent San Francisco manufacturers and wholesalers who are interested in having a representative in those countries.

GRADUATES GET JOBS

John B. Kiely, C. H. Le Borgne and Nicholas K. Delaney, students of the engineering classes of the University of Santa Clara, who graduated last Sunday, have already obtained positions. John B. Kiely, who graduates in civil engineering, will be employed in the foothill division of the Hetch Hetchy development. C. H. Le Borgne has been engaged by the Southern California Edison Company, where he will take a special course with the company leading to an engineering position on construction work. Nicholas K. Delaney has been employed by San Joaquin Light and Power company for engineering work.

ARCHITECTURAL COMPETITION FOR COLUMBUS LIGHTHOUSE OPENS SEPT. 1

September 1st has been fixed as the date for the opening of the architectural competition for the Columbus Memorial Lighthouse to be erected in the Dominican Republic. Through the cooperation of the governments and peoples of all the nations of the world, will begin, according to an announcement by the Permanent Committee of the Governing Board of the Pan American Union entrusted with this matter.

The architectural competition for the lighthouse will be divided into two stages, the first of which will be opened to all architects without distinction of nationality. The second stage will be limited to the ten architects whose designs are placed first as a result of the first competition. The first stage of the competition will continue until April 1, 1929, when all drawings must be in Madrid, Spain. An International Jury of three, to be selected by the competing architects, will meet in Madrid on April 15, 1929, for the first award. The authors of the ten designs placed first in the preliminary competition will each receive two thousand dollars and these winners will then compete for the final award. There will also be ten honorable mentions of five hundred dollars each.

Second Competition

In the second competition ten thousand dollars will be paid to the author whose design is placed first, who will be declared the Architect of the Lighthouse; \$7,500 to the author of the design placed second; \$5,000 to the design placed third; \$2,500 to the design placed fourth, and \$1,000 to each of the other six competitors.

In announcing the dates of the first competition, the Chairman of the Permanent Committee of the Governing Board of the Pan American Union, Hon. Orestes Ferrara, Ambassador of Cuba at Washington and representative of Cuba on the Governing Board, said:

"The Permanent Committee has fixed these dates for the first stage of the competition in order that architects

throughout the world may have ample opportunity to inform themselves of the conditions governing the competition, to prepare their drawings, and to have them in Madrid in time for the first award. As the Memorial to the Discoverer will be erected through the cooperation of the governments and peoples of all the nations of the world, the Permanent Committee is most anxious that architects of all countries participate in the competition. It is for this reason that the opening date of the competition has been set for September first. New applications to compete are constantly being received, and as other architects may wish to enter, it is desired to give them ample opportunity to file their applications before the competition is inaugurated.

Committee Preparing Report

"The Committee of the Governing Board of the Pan American Union now has in preparation a report containing complete details of the conditions that will govern the competition. The report will be issued in Spanish, French and English. In order that the competing architects may have this book at approximately the same time, no distribution of the book will be made until just before the competition is scheduled to begin on September first. It is also proposed that the books intended for those competitors residing in more distant countries shall be mailed some time prior to those intended for competitors nearer Washington. Given the world wide nature of the competition, it is the desire of the Permanent Committee to establish conditions that will insure equal opportunity to every architect, irrespective of where he may reside."

It has also been decided by the Permanent Committee that the Memorial will include, besides the lighthouse feature, a memorial chapel and a museum. It is believed that it will be possible to secure for such a museum a large number of objects including manuscripts connected with the great navigator's life and voyages.

000,000 in 1927, this was no doubt due to a recession in hotel and apartment-building construction.

Steel Production

Steel ingot production set a new February record and gained 5 per cent in average daily output over January. In addition, the Steel Corporation's unfilled orders, which have been registering gains each month since last September, showed a further increase at the end of February, of 4,400,000 tons—44 per cent higher than a year ago. When it is remembered that the rate of steel production was higher last March than at any time in history, the possibility that a new record was set during the past month is not so remote as some would have us think.

The Calumet district has been the chief beneficiary of increased steel output, as shown by the greater activity of plants and the greater tonnage moved by the railroads in this section. The savings effected in transportation costs through the shiftings of operations away from the Pittsburgh sector benefit many lines of business, but of course are not fully reflected in railroad revenues.

This shifting of production facilities to bring them nearer market outlets is constantly going on in many lines other than steel, and is a bigger factor than many people realize in the railroads' problem of getting satisfactory volume of tonnage.

WORKMEN'S COMPENSATION

A tendency to liberalize workmen's compensation laws by the allowance of larger payments for death or disability is disclosed in a digest of state laws and the federal law issued by the Insurance Department of the Chamber of Commerce of the United States.

"The percentage of wages paid as compensation," the Department says, "is 60 per cent in six states and one territory, 65 per cent in eight states and one territory, 66-2-3 per cent in fourteen states besides the two federal acts, so that twenty-eight states as against twenty in 1920 pay 60 per cent or more. In 1920 twelve states fixed the maximum weekly payments at \$12.00 or less. Now no state has a maximum less than \$12.00 for temporary total disability and only three have as low a maximum as that, while twenty states, one territory and two federal acts pay \$18.00 or more, as against seven states and one territory at the earlier date. The waiting time is now less than one week in seven jurisdictions; one week in twenty-eight states, one territory and one federal act; and more than one week in eight states and one territory. At the earlier date only four laws fixed a waiting time of less than one week; twenty-one, one week; and seventeen states and two territories more than one week."

REFORESTATION PLANS ADOPTED BY THE HOUSE

According to newspaper dispatches from Washington, D. C., the House on May 12 passed a bill (S. 3556) designed to insure adequate supplies of timber by providing a 10-year program of reforestation. The bill sets up a series of authorizations covering the activities of the forest experiment stations. The House amended the Senate bill in passing it by providing for the establishment of additional forest experiment stations in Alaska and Hawaii and one additional station in a Southern State. It is contemplated that appropriations under all of the sections of the bill will approach the maximum authorizations under each section by approximately equal increases over the 1-year period until the maximum amount authorized, \$3,575,000, is reached.

Farmer (to Druggist): "Now, be sure an' write plain on them bottles which is for the Jersey cow and which is for my wife. I don't want nothin' to 'appen to that Jersey cow."

BUILDING MATERIALS WILL ENJOY GOOD YEAR—STEEL PRODUCTION CITED

(Reprint from Business Bulletin, LaSalle Extension University, Chicago, Ill.)

With well-sustained activity in the construction industry, it is natural to presume that building materials will enjoy a good year. That presumption, however, takes into account only one of the two principal factors, supply and demand. The fact that the construction-cost index is running several points below last year, while wage scales are well maintained, points to an over-developed supply situation.

It is true that steel prices are showing some strengthening tendency—and modern construction calls for more steel than the old type—but there is no evidence that the level will be raised appreciably. Lumber and cement prices, while somewhat improved since December, are still below those prevailing a year ago, and production capacity is very large in both lines.

Lumber interests have recently shown some disposition to cooperate in regulating output more closely to demand and, as a consequence, there has been a reduction of stocks. It still remains to be seen whether this healthy condition will be harmoniously maintained.

Cement Producers Expand

Cement producers continue to expand their output, but keen competition keeps

prices down. Stocks at the end of February were 16 per cent higher than a year ago. Imports of foreign cement, while small compared to domestic output, are causing unrest among manufacturers supplying the Atlantic seaboard, and there is talk of asking for legislative protection.

Companies handling specialty lines such as building board, elevators, roofing material, radiators, and gypsum products have a more favorable outlook than concerns dependent on general lines such as lumber and cement.

Easy Money Encourages Building

Easy-money conditions, also, are nearly always a stimulating factor. Since the War we have been building not only to make up for accrued shortages but also to meet an active demand for better housing—both for home and business.

Improved financing methods have helped, too. It is interesting to note that new capital flotations (including long and short term bonds and notes, and stocks) for the classification, "land, buildings, etc.," increased from \$251,000,000 in 1923, to \$715,000,000 in 1925 (according to the summary of New Corporate Issues, compiled monthly by the Financial Chronicle). While there was a decline to \$620,-

MEDUSA

White Portland Cement

(WATERPROOFED)

ONE of the real beauties about Medusa White Portland Cement is the fact that it is the perfect base for color stucco work. Colored aggregates or mineral oxides can be used. The Medusa White Stucco home in a properly-landscaped setting is a picture that grows more beautiful through the years—a lasting tribute to you, its builder.

THE SANDUSKY CEMENT COMPANY ENGINEERS' BUILDING CLEVELAND, OHIO

Manufacturers of Medusa White Portland Cement (Plain and Waterproofed); Medusa Waterproofing (Powder or Paste); Medusa Gray Portland Cement (Plain and Waterproofed); and Medusa Cement Paint.

Official Proposals

STATE OF CALIFORNIA DEPARTMENT OF PUBLIC WORKS DIVISION OF HIGHWAYS NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, at Redding, California, until 2:00 P. M., Monday, May 21, 1928, at which time they will be publicly opened and read, for performing work as follows:

The erection and completion of a foreman's cottage, bunkhouse, truckshed, blacksmith shop, woodshed, oil house and septic tank at the Ft. Goff Creek Maintenance Yard in Siskiyou County.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the above address.

No bid will be received unless it is made on a proposal form furnished by the District Engineer. Each bid must be accompanied by cash, or a certified check made payable to the Director of Public Works, for an amount equal to ten (10%) per cent of the amount bid, such guaranty to be forfeited should the bidder to whom the contract is awarded fail to enter into the contract.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS, DIVISION OF HIGHWAYS,

C. H. PURCELL,

State Highway Engineer.

By H. S. COMLY,

District Engineer, Dist. II

Dated: May 2, 1928.

(D)

NOTICE TO CONTRACTORS

(Fair Buildings—Siskiyou County)

Construction of Grand Stand, Dance Hall and Exhibit Rooms for the 10th District Agricultural Association, on the Siskiyou County Fair Grounds Near Yreka, California.

Pursuant to the order of the Board of Supervisors of the County of Siskiyou, State of California, notice is hereby given that sealed bids will be received by W. J. Neilon, the Clerk of said Board of Supervisors, at his office in the Hall of Records in Yreka, said County and State, until ten o'clock A. M. of Monday, June 4th, 1928, for the erection and completion of a Grand Stand, Dance Hall and Exhibit Rooms, on the Siskiyou County Fair Grounds near Yreka, for the 10th District Agricultural Association of California, in accordance with the amended plans and specifications regularly adopted therefor by said Board of Supervisors on May 7th, 1928.

Plans and specifications can be seen during office hours at the office of J. P. Churchill, the Secretary of the said Fair Association in Yreka, California, and copies thereof may be obtained from said J. P. Churchill, Secretary of said fair association. A cash deposit of \$10 will be required from all prospective bidders on all copies of plans and specifications loaned out as a guarantee of the return of the same.

All bids shall be prepared on blank form which may be procured from the Secretary of said Fair Association.

Each bid must be accompanied by a certified check on some responsible bank for a sum not less than ten per centum of the amount of the bid, made payable to W. J. Neilon, Clerk of said Board of Supervisors, as a guarantee of good faith that the party to whom the contract may be awarded will, within ten days, after the award is made enter into the necessary agreement and furnish the necessary bonds for the faithful performance of said work, and in case the bidder to whom the contract is awarded fails or refuses to enter into said agreement, or to furnish said bonds, said check will be forfeited to Siskiyou County in the man-

ner provided by law. The Board of Supervisors will not accept a bidder's bond in lieu of a certified check.

Each bid must be enclosed in a sealed envelope and addressed to W. J. Neilon, Clerk of the Board of Supervisors, Yreka, California, and endorsed "Proposals for building, Grand Stand, etc."

The Board expressly reserves the right to reject any and all bids and to waive any informality in any bid received.

By order of the Board of Supervisors of the County of Siskiyou, State of Calif.

Dated May 8th, 1928.

(SEAL)

WILLIAM R. LEE,

Chairman.

W. J. NEILON,

Clerk.

NOTICE TO BIDDERS

(Centrifugal Pump—Corcoran, Calif.)

Notice is hereby given that sealed bids will be received by the City Clerk of the City of Corcoran, County of Kings, State of California, at the City Hall in the City of Corcoran, County and State above mentioned up to and until 8 o'clock P. M., May 21, 1928, for furnishing the said City of Corcoran the following described material:

One vertical 3 inch centrifugal sewage pump of 450 gallons capacity per minute, to be installed in a wet pit. 20 ft. shafting and column. One 5 H. P. ball-bearing motor, 3 phase, 220 volt, 60 cycle. Successful bidder to install pump.

Each bid must be accompanied by a certified or cashier's check in a sum not less than 10% of the amount bid, payable to the City of Corcoran as evidence of good faith on the part of the bidder.

The City Council reserves the right to reject any or all bids, or to accept the bid considered by them best for the said City of Corcoran.

Corcoran, California, May 8, 1928.

JAS. C. CONDON,

Clerk of the City of Corcoran, County of Kings, State of California.

(D)

NOTICE TO BIDDERS

(Tractor and Road Maintainer—Madera County)

Notice is hereby given that pursuant to an order of the Board of Supervisors made and entered in its minutes on the 7th day of May, 1928, sealed bids will be received by said Board at their office in the Court House, in the City of Madera, State of California, up to June 4th, 1928, at 10 o'clock A. M., for the following equipment:

1. New "Caterpillar" Thirty Tractor equipped with track links, drop forged steel, heat treated; 4-cylinder; motor-speed 850 R. P. M.; draw bar H. P. 25. Tractor must be furnished with canopy top, and with seat on top. Delivered f. o. b. Friant, California, also

1 New No. 6 Adams One-Man Road Maintainer, f. o. b. Friant, California.

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS, which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

All bids must be sealed and addressed to L. W. Cooper, County Clerk and ex-officio Clerk of the Board of Supervisors of the County of Madera, State of California, delivered and filed with said Clerk prior to the 4th day of June, 1928, at 10 o'clock A. M.

The Board reserves the right to reject any and all bids.

Dated: May 7th, 1928.

L. W. COOPER,

County Clerk and ex-officio Clerk of the Board of Supervisors of Madera County, California.

(Seal.)

NOTICE TO CONTRACTORS

(Additions, Etc.—Kern County Union High School District.)

Notice is hereby given that sealed bids will be received by the Board of Trustees, Kern County Union High School District, Bakersfield, California, up to 7:30 P. M. of June 11, 1928, for furnishing of materials and labor necessary for the erection and completion of Section One of Auditorium and Classroom building and additions to Shops Building, Kern County Union High School, Bakersfield, California, in accordance with plans and specifications for same prepared by Charles H. Biggar, Architect, 405-6 Bank of Italy Building, Bakersfield, California.

Bids will be received separately or as a whole, segregated in accordance with bid form furnished by Architect and on such bids form only.

Plans and specifications for said buildings may be obtained by general contractors and subcontractors for plumbing, electric work and heating and ventilating at the office of the Architect upon deposit of Twenty-five Dollars (\$25.00), which will be returned upon receipt of the said plans and specifications in good order at the time designated by the Architect.

A certified check or bidder's bond in the amount of ten per cent (10%) of amount bid must be furnished, payable to the order of the Clerk of the Board of Trustees, as evidence of good faith and that the bidder, if successful, will enter into a contract satisfactory to said Board of Trustees, and in addition thereto will furnish good and sufficient Surety Company bonds therefor. Personal bonds will not be accepted.

The Board of Trustees reserves the right to reject any and all bids not deemed advantageous to the District and to waive any informality in any bid received.

By order of the Board of Trustees of the Kern County Union High School District, Bakersfield, California, made May 8, 1928.

BOYCE R. FITZGERALD,

President.

D. E. Urner, Clerk.

(D)

NOTICE TO BIDDERS

(Supplies and Equipment—Richmond, Calif.)

Sealed bids are hereby invited and will be received by the High School Board of the Richmond Union High School District at its office in the Lincoln School, 235 Tenth Street, Richmond, California, up to and including the hour of 10:00 A. M. of Friday, May 25, 1928, at which time and place said bids will be opened, for furnishing and supplying certain articles of Machinery, Filing Cases, Supplies, Venetian Blinds and Window Shades for the new High School at 23rd and Tulare Streets, Richmond, California, as enumerated in specifications adopted by this Board and on file in its office. Specifications may be obtained at the office of the Board in the Lincoln School.

The Board reserves the right to reject any or all bids.

By order of the High School Board.

W. T. HELMS,
Secretary.

NOTICE TO BIDDERS

(Two Water Tanks—San Mateo)

NOTICE IS HEREBY GIVEN that sealed bids or proposals will be received by the City Council of the City of San Mateo up to Monday, May 21, 1928, at eight (8) o'clock P. M., for the furnishing of all materials and the construction of two (2) twenty thousand (20,000) gallon water tanks and replacement of the deck on the present tower in the City Park in the City of San Mateo, Calif.

Bids are to include the removal of the present old tanks and decking, which is to become the property of the City, and to be piled along side the site of construction.

Specifications for the work are on file in the office of the City Manager of the City of San Mateo.

A certified check of ten (10%) per cent of the bid must accompany the same.

Payment for the work will be made within thirty (30) days of completion and acceptance.

Bid to be made on form provided in the specifications.

The City Council reserves the right to reject any or all bids.

By order of said Council.

DATED: San Mateo, California, May 9, 1928.

E. W. FOSTER,
City Clerk and ex-officio Clerk of the City Council of the City of San Mateo

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, Bank of Italy Building, Eureka, California, until 10 A. M., May 24, 1928, at which time they will be publicly opened and read, for performing work as follows:

For the furnishing of crushed gravel or stone graded from three-quarters inch (¾-in.) to three-eighths inch (⅜-in.) in designated stock piles along approximately 51.5 miles of State Highway in the Counties of Humboldt and Mendocino between Myers and Laytonville. (I-Mend-Humb-1-J, K, A, B, C).

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the above address.

No bid will be received unless it is made on a proposal form furnished by the District Engineer. Each bid must be accompanied by cash, or a certified check made payable to the Director of Public Works, for an amount equal to ten (10) per cent of the amount bid, such quantity to be forfeited should the bidder to whom the contract is awarded fail to enter into the contract.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS,

C. H. PURCELL,
State Highway Engineer.

By I. G. THOMAS,
Asst. District Engineer, Dist. I

Dated: May 10, 1928.

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Highway Building, Sacramento, California, until 2 o'clock P. M. on June 6, 1928, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Shasta County, between Shotgun Creek and Conant (H-Sha-3-D), about 1.5 and eight-tenths (.8) miles in length to be graded and surfaced with crushed gravel or stone.

Placer and Nevada Counties, between Big Bend and Soda Springs (H-Pla-Nev-3-F-B), about even and four-tenths (.4) miles in length, to be graded and

surfaced with oil treated crushed gravel or stone.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the District Office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the District Office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS.

C. H. PURCELL,
State Highway Engineer.
Dated: May 9, 1928.

ADVERTISEMENT

SEALED BIDS, in triplicate, subject to the conditions contained herein will be received by the U. S. Veterans' Bureau, Room 791, Arlington Building, Washington, D. C., until 11 A. M. June 5, 1928, and then publicly opened, for furnishing all labor and materials and performing all work for Infirmary Building No. 1, including roads, walks and drainage at U. S. Veterans' Hospital, Fargo, North Dakota. This work will include excavating, reinforced concrete construction, hollow tile, brickwork, cast stone, marble work, floor and wall tile, linoleum, rubber tile, iron work, steel sash, iron stairs with slate treads, fire escapes, built-up roofing, roof ventilators, metal lathing, plastering, carpentry, dumb-waiter, metal weather strips, insect screens, painting, glazing, hardware, plumbing, heating, including boiler plant equipment, electrical work, electric elevator, radial brick or concrete chimney and outside sewer, water and electric distribution systems. Separate bids will be received for electric elevator. Bids will be considered only from individuals, firms or corporations possessing satisfactory financial and technical ability, equipment and organization to insure speedy completion of the contract and in making awards, the records of bidders for expedition and satisfactory performance on contracts of similar character and magnitude will be carefully considered. At the discretion of the Director, drawings and specifications may be obtained upon application to the Construction Division, Room 791, Arlington Building, Washington, D. C. Deposit with application of a check or postal money order for \$25.00 payable to the TREASURER OF THE UNITED STATES is required as security for safe return of drawings and specifications within ten days after date of opening bids.

FRANK T. HINES,
Director.
May 12, 1928.

State Board of Control has voted to approve legislation awarding \$15,000 damage to the Terra Cotta Products Company of Rio Vista, on claims that its plant was injured to that extent through dredging operations at the mouth of the Sacramento river. The company contended that soft slush taken from the river and deposited on spoils area back of its plant weakened the clay beds beneath it and caused the plant to sink several inches. This not only damaged the buildings but also ruined the machinery.

The ratio of the operations to the capacity of the American portland cement industry during the month of April was 70 per cent, according to figures released by the Bureau of Mines of the Department of Commerce. During the month 13,468,000 barrels were produced, 13,307,000 barrels were shipped, and there were in stocks on hand at the end of the month 27,605,000 barrels. Production in April, 1928, at 4.1 per cent less, and shipments about 7.3 per cent less, than in April, 1927. Stocks at the mills were 16.7 per cent higher than a year ago.

CONSTRUCTION INDUSTRY CONDITIONS "SERIOUSLY DEMORALIZED"

Describing conditions in the construction industry as "seriously demoralized," leading builders from all parts of the country have organized the Allied Construction Industries Committee" to correct improper practices and to stabilize credit conditions." The new body, composed of representatives of general contractors and sub-contractors, was formed during a session of the recent conference in Washington, D. C., under the auspices of the Associated General Contractors of America.

Loose credits and mushroom growth of construction companies were cited as the leading cause for wasteful, delayed and faulty construction operations.

The organization includes members of the executive committee of the Associated General Contractors of America and two representatives of each of the

following trade organizations: United Roofing Contractors of America, National Association of Sheet Metal Contractors, Elevator Manufacturers Association, Heating and Plumbing Contractors National Association, International Association of Master Painters and Decorators of America; National Association of Building Trades Employers, Association of Electricians, National Association of Master Plumbers, International Cut Stone Contractors and Quarrymen Association, National Association of Marble Dealers, Contracting Plasterers International Association and Tile and Metal Contractors Association of America.

George B. Walbridge, Detroit, chairman of the committee, presided at the organization meeting, held May 9, and submitted a report of the session to the full conference.

In addressing the conference, Mr. Walbridge declared "hundreds of concerns operating in the construction industry are in a state of perpetual insolvency. They secure materials and equipment under loose credits, reaping their profits by failure to pay their bills and by using inferior materials and workmanship."

Development of remedial measures will be undertaken at a meeting of the committee to be held at Detroit next month. Foremost among these measures will be formulation of rules of ethical practices to Government relationship between owners, architects, engineers, general contractors, sub-contractors, material dealers and equipment manufacturers. Establishment of a rational credit system also will be undertaken as a primary move.

SCHOOL SKYSCRAPER IS BEING COMPLETED IN CHICAGO

Chicago's first "skyscraper university" is nearing completion. Classes will convene in it for the first time June 1. The

building erected by De Paul University is 16 stories high. Six additional floors later may be added, according to president, the Very Rev. Thomas Levan, C. M. The structure, costing \$3,000,000, was financed through the efforts of the De Paul Educational Society. Trustees of this corporation include George E. Brennan, political leader; D. F. Kelly, state street department store head; Francis X Busch, former corporation counsel and dean emeritus of De Paul's college of law; F. Lewis, manufacturer and Dean William F. Clarke of the university's law school. On the roof will be club rooms for both the men and the co-eds. A moot court is provided for the legal students.

PROHIBITS ADVERTISING SIGNS ON HIGHWAYS

Billboards, signs, posters or other means of advertising that might hinder the clear vision of the motorist or distract his attention from the road are prohibited along the highways of the Province of New Brunswick, by a new provision of the highway act. Previously the act had prohibited only the erection of signs on curves and approaches to curves.

PLUMBERS INSTITUTE

The Massachusetts State Association of Master Plumbers, Inc., recently held an institute on Heating and Plumbing with the co-operation of the Massachusetts Sanitary Club, and the Massachusetts Institute of Technology. This was the second such conference to be held by the master plumbers of the State the one last year having a registration of 476.

B. F. Martin will operate from 12 Hooper street, San Francisco, under the firm name of San Francisco Wall Board Company.

Larsen Construction Reports

Issued every business day of the year. Furnishes advance information on work projected and contracts awarded for all classes of building, street, sewer and highway projects, bridges, dams and harbor works, machinery, etc. Send for rates in your territory, advising class of work in which you are interested.

Russian Peasant Women Placing Straw
Around Their Dwelling to Keep the
Cold Out

Applying time - proved methods of insula- tion to modern day needs

NO one knows the value of building insulation as do the inhabitants of either extreme cold or extreme hot climates. These natives have realized for hundreds of years the value of insulation—particularly straw insulation. These people, not having a complete scientific knowledge of heat and cold values, made their selection of an insulating material by actual test. After their many crude experiments on different products—straw was finally chosen as their most perfect means of protection against heat and cold.

And today, this time-proved method of insulation is offered in a perfected form—INSO BOARD—manufactured in sturdy panels 7/16" thick, 4 feet wide and any length desired. It has many structural insulation uses such as—(1) Plaster Base, (2) Sheathing under stucco, brick or wood exterior, (3) Roof Insulation, (4) Under Flooring, (5) Wall and Ceiling finishing panels, (6) Sound Deadener, and (7) Insulating inner Walls.

DEALERS will find INSO BOARD a profitable connection, combined with the sales and advertising co-operation which will be WHOLLY AT OUR EXPENSE. Write today for particulars.

FACE LOOMS IN SEATTLE TRADE
5-DAY WEEK CONTROVERSY

Indications point to peace for the next few years between employing contractors and Seattle building trades craftsmen. The recommendation of the citizens industrial conference board that the union carpenters be granted a five-day week for four months of each year has been accepted by the carpenters providing that the four months' "vacation" period be allowed at the same time that the other trades are enjoying the five-day week. The acceptance of the carpenters has been put before the members of the Seattle chapter, Associated General Contractors of America, and that body's special committee will act on the conference board's recommendation. Secretary Bogert of the Seattle chapter, A. G. C., would not definitely state whether the contractors would accept the recommendation but intimated that such action might be taken if assurance is given by the tradesmen that no other issues be raised during the term of the new working agreement. The carpenters had demanded the five-day week throughout the year and the contractors had also been asked to recognize the building laborers' union, which they refused to do.

Should the agreement be signed Seattle will be the first major city in the United States to put the five-day week on an actual test in the entire building trades. For with the carpenters off Saturdays' building laborers, except for a few "clean-up" men would not be needed on the job.

Several Eastern and Middle West cities, notably Baltimore and St. Paul, are now on a partial five-day week basis in the building trades.

Seventeen building trades unions would be embraced in the blanket agreement which is contemplated, and which union officials believe will be adopted on a three-year basis as soon as the carpenters' issue is finally settled and a referendum ballot of all union members is held.

SIMPLIFIED PRACTICE RECOMMENDATION FOR FORMS FOR CONCRETE RIBBED FLOOR CONSTRUCTION NOW BEFORE INDUSTRY

Manufacturers, distributors, and organized users of concrete ribbed floor construction, are being circularized by the Division of Simplified Practice of the Department of Commerce, for written acceptance to the simplified practice recommendation for Forms for Concrete Ribbed Floor Construction, approved by a general conference held March 21, 1923, at Biloxi, Mississippi.

At least 80 per cent of the known manufacturers, distributors, and organized users must accept the recommendation in writing before it will be published by the Department of Commerce.

In the communication sent the industry the Division of Simplified Practice stated that "while the action of the first general conference is based on a careful study of conditions and requirements, it will be susceptible of such modifications as future trends in the industry may render desirable. In order to make the schedule conform with the best current practice of the industry, the conference appointed a standing committee to which any comments or suggestions should be sent that will make the recommendation more beneficial."

The recommendation will be reviewed by the standing committee for possible revision or reaffirmation one year from the effective date, which is July 1, 1923.

TIME LIMIT EXTENDED FOR CIVIL SERVICE EXAMINATIONS

The time limit for filing applications for positions of Mechanical Engineering Draftsmen, Architectural Designers and Estimators, in the Division of Architecture, has been extended to June 15th, according to W. A. Johnstone, President of the California State Civil Service Commission.

It would seem from application records that Civil Engineering Draftsmen are more interested in State service than Mechanical Engineering Draftsmen, since the proportion of applications stands at approximately 200 to 12. Mechanical Engineering Draftsmen connected with the Division are concerned with the design of heating, ventilating and water supply systems, plumbing and vacuum systems. These positions pay from \$170 to \$230 a month.

Junior Estimators with the Division estimate the quantity of materials necessary and the cost of constructing various buildings erected by the State. This position pays from \$170 to \$230 monthly.

The position of Architectural Designer involves the preparation of designs and estimates for important groups of institutional buildings and other important State buildings. The salary of this position ranges from \$285 to \$350 a month.

While but few new appointments are to be made, the Commission desires an eligible list for each of these positions to take care of necessary staff increases or replacements. Further information may be secured by communicating with the Commission's office, 331 Forum Bldg., Sacramento.

The James bill, to authorize the appropriation of \$15,066,260 for barrack construction at various military posts in the United States and territorial possessions, was approved May 21st at Washington by the House Military Committee.

OPINION ON CITY BUILDING RULE GIVEN BY LAWYER

In regard to the ordinance, adopted several weeks ago by the Palo Alto City Council, limiting the area to 50 per cent on which buildings can be erected in the apartment house zone, Breed, Burpee & Robinson, lawyers, answer an inquiry by E. H. Helm of Palo Alto regarding the validity of the city's law in the California State Real Estate Association's magazine as follows:

"You state in your letter that you own a lot in the apartment house zone in the city of Palo Alto, and that the council has passed an ordinance that lots in the apartment house district be built upon not to exceed 50 per cent of their area, the former percentage being 70 per cent. You ask whether such regulation is valid.

"Recent decisions, both in California and in other states, have definitely established the right of a city to establish reasonable zoning regulations. Likewise, there is no question but that setback lines, and also restrictions upon the total area of a lot which may be built upon, are valid, subject to the qualification, however, that the restrictions must be reasonable. To the extent that any such regulation is a cloak for confiscation, the courts will hold the same invalid. Whether or not the regulation is reasonable or is unreasonable, is a question which must be determined in consideration of all the surrounding circumstances, the nature of the city, the character of the surrounding improvements, the area available for the type of structure restricted, and the average size of the lots in the district affected. A restriction on the area which might be built upon would be valid in a residential district, where a restriction to the same extent would be doubtful in an apartment house district, and unquestionably invalid in a business district. We cannot say, therefore, as a matter of law, that the particular restriction to which you refer is valid or invalid. The question is one which, of presented in court, might be decided either way.

"You inquired with regard to the approximate cost of a case to determine the legality of the ordinance. This is impossible to estimate, as it depends upon the vigor of the defense of the city of Palo Alto, and also whether or not there would be any appeal from a decision given by the superior court."

BRITISH ARCHITECTS REQUESTED TO PLAN FUTURE AIRPORT

Budding British architects have been invited to peep into the future and submit plans of their idea of the best imaginative scheme for a London aircraft terminus suitable fifteen years hence.

The Royal Institute of British Architects is to decide the competition which originated with the Gloucester Aircraft Company and approved by other aviation interests.

The idea of the competition is to stimulate the imagination and foresight of architectural students and to assist them to visualize the influence which aerial development must have upon the design of a first class aerial terminus for land planes or amphibians only.

Designs will be submitted in September, and the awards made in October, the first prize being \$625 and the second \$100. The competition is limited to students under the age of thirty.

WORLD'S GREATEST BUILDING PROJECT—THE MERCHANDISE MART— ABOUT TO BE STARTED IN CHICAGO

Announcement is made in Chicago of one of the greatest and most interesting of modern building projects—the construction in that city of a gigantic Merchandise Mart to be twice the size of the largest business building in the world. This massive edifice, whose architecture will typify the Great American Building of today, will be two city blocks in length, 18 to 23 stories high, and will represent an investment of \$30,000,000. Construction will begin immediately.

The Mart will have a total floor space of about 4,000,000 square feet, as compared with slightly less than 2,000,000 square feet, which is the floor area of the Chicago Furniture Mart—the next largest building. Each of the eighteen main floors will have an area of over 200,000 square feet. The structure will be topped by a five-story tower.

This project includes the largest single development of air rights so far scheduled. The property, except for the 553 caissons extending to bed-rock, begins 23 feet above "datum." The site is that of the former passenger station of the Chicago and Northwestern Railway. The building will extend 724 feet on Kinzie street, 577 feet on the Chicago river front and 324 feet on Wells street, with a diagonal frontage facing Orleans and Franklin.

This massive structure will be one of the most imposing masses in the country, according to the architects, Graham, Anderson, Probst & White, and will be set back from the river about eighty feet, and a drive, which will be the start of a North Bank Boulevard, will run between the river and the facade of the building. A river wall of stone, similar to the Wacker Drive walls, will make a stylobate for the whole.

The lower three stories will form a base of stone from which the main structure rises fifteen additional stories, and a broad tower of five stories, not high considering its width of 120 feet, will mark the center of the facade. At the base of the tower will be the main entrance, simple and impressive, flanked by two great basereliefs of a heroic scale. These sculptures will be compositions representing the romance of industry and merchandising, and will be of sufficient strength to be admired from across the river. Between the broad pilasters on the facades there will be large show windows for display. In the entire structure there will be a total of 5500 glass windows.

The general shape of the lot is a rhomboid and the angles are turned by having the four street fronts terminate in octagonal towers. These towers, as well as the central tower, also octagonal, are roofed with flat stone roofs, giving a feeling of strength and stability and the three upper stories are terraced back in steps as they butt into the towers.

Entrances on Franklin and Wells streets lead to the main lobby on the center of the river front. The lobby opens up into the many activities and facilities which will greet the buyers of the world and make them at home.

The masonry exterior partly stone will be carried out in a soft gray material with a conservative use of color, and the pier and window relation has been studied to convey to the quick glance of the passerby an appreciation of the colossal character of the project.

Comparison of the cubage of the largest buildings in the world shows the Merchandise Mart will be more than twice the size of the largest business

building ever constructed. Here are the figures in cubic feet:

1. The Merchandise Mart, \$53,000,000.
2. Chicago Furniture Mart, \$25,370,000.
3. Equitable Building, New York City, 24,000,000.
4. General Motors, Detroit, \$20,411,000.
5. Union Trust, Cleveland, 20,000,000.
6. Railway Exchange, St. Louis, 18,898,000.
7. Illinois Merchants Bank, Chicago, 17,850,000.
8. Continental & Commercial Bank, Chicago, 13,200,000.
9. Woolworth Building, New York City, 13,200,000.
10. Straus Building, Chicago, 10,000,000.

The big business of the country is now done in concentrated market places, as evidenced by the Garment Center and Cotton Goods Center in New York City, automobile rows in all the leading cities, financial buildings, and the Furniture Mart in Chicago. The establishment of the Merchandise Mart is a dramatic development in the program to make Chicago the Great Center Market, a movement which the Chicago Association of Commerce started a number of years ago.

This great Mart, which will house several hundred of the country's foremost manufacturers, wholesalers and importers will be located in the rapidly developing new river district, and will occupy a distinctly conspicuous position just across the river from Wacker Drive at Wells street where the southern facade of the structure will be visible for blocks.

Within the walls of this huge edifice the retail merchants of the United States, Canada and foreign countries will be able to see, under one roof, hundreds of lines of the world's best merchandise. The manufacturers' exhibits will include textiles, ready-to-wear, toys, laces, gloves, hosiery, corsets, millinery, silverware, glass, rugs, knit goods, shoes, men's wear, notions, fancy goods, art and antiques, jewelry, trunks, toilet articles, house furnishings, office equipment and scores of other merchandise displays. Among the largest tenants will be the wholesale and manufacturing sales departments of Marshall Field & Company.

On all floors of the Mart will be great corridors, with all the appearance of boulevards, 650 feet in length, on either side of which will be the shops displaying their varied lines—veritable "business streets." These great corridors will be impressively treated architecturally and with the large space available it will be possible to house the selling activities and warehousing of many allied concerns on the floor, thus attaining the advantages of concentrated groupings.

The facilities of handling merchandise within the building will embody the best and most modern achievements of engineering science, including fast elevators, freight conveyors of both the gravity and endless chain type and quick horizontal distribution on every floor.

Probably no building in the world will have such facilities for receiving and shipping merchandise as the new Merchandise Mart. The entire ground level below the street floor will be a modern freight station. Private tracks for incoming carload freight will extend under the center of the building. The Chicago and Northwestern Railway will operate an inbound freight station for less than carload lots, as well as an outbound station, which will connect with all other roads through its new Proviso yards. The merchandise as it comes into this big freight station will be loaded into high-

speed conveyors, which will transport the merchandise to the exact floor and aisle of the merchant for whom it is intended.

Connection will be made with the Illinois Tunnel Company's system of freight transportation, which has more than sixty miles of tracks beneath the streets and buildings of the city, reaching all other railroad terminals. A river dock for vessels will connect with the south freight elevators of the building.

Every possible facility will be provided for the comfort and convenience of the retail merchant, who under one roof will be able to see hundreds of lines, thus saving time and money by doing in a few hours what ordinarily would take him days to accomplish.

One of the interesting features planned for the Mart will be a Merchants' Club in the tower of the building, with lounge rooms, reading and smoking rooms, where the retailer may relax and meet his friends. The Mart will give the retailer everything but a place to sleep. He can go direct from the train to the Mart with his baggage. Here his hotel reservations will be taken care of, his baggage transported to his hotel and placed in his room. Restaurants, lunch rooms and grills in the Mart will further economize his time. He will have the facilities of a barber shop, and a branch postoffice, telegraph office and public stenographers will afford him the opportunity to handle his correspondence without leaving the building. One of the biggest telephone exchanges in the world will be installed in the Mart.

SEE ILLUSTRATION OF BUILDING
ON NEXT PAGE

SACRAMENTO PROPOSES TO LIMIT BUILDING HEIGHTS

Sacramento architects and builders are showing considerable interest in the proposed ordinance to be submitted to the city council for adoption or rejection which would limit the design, height and construction of commercial buildings in the city in order to insure proper sunshine and light in the streets and circulation of air.

The idea of restricting the erection of tall buildings in order to avoid the dark channel streets so common in New York City has been in the minds of the city officials for some time and was discussed recently at an informal meeting of the council and city planning board.

The proposed ordinance would allow the construction of buildings no higher than six stories in the area between Eleventh and Twentieth, N and Q streets; between Front and Twenty-first, North B and R streets; Twenty-first street and Alhambra boulevard, North A and North B streets; and on R street between Twenty-first street and Alhambra boulevard.

Higher buildings may be built in the present downtown area, although the ordinance would limit the height at the property line to one and one-half times the street width. Above that, setbacks would be constructed on the basis of one foot for each three feet of additional height.

The setbacks are declared necessary in order to allow sunlight to reach the lower floors of buildings on the opposite side of the street.

Public hearings on the proposed ordinance will be held soon before the draft is formally submitted to the council for action.

Saturday, May 26, 1928

The Merchandise Mart—pictured above—will be twice the size of the largest business building in the world. It will be two city blocks in length, 18 to 23 stories high, and will have a total floor space of about 4,000,000 square feet. The structure will be topped with a five-story tower. *Graham, Anderson, Tinker, & Looney*

MOREHEAD NAMED ARCHITECTURAL CHIEF AT CARNEGIE INSTITUTE

Dr. James C. Morehead, Associate Professor and Curator of the Department of Architecture, it is announced, will be in charge of the summer courses in architecture this year at the Carnegie Institute of Technology in Pittsburgh. Professor Camille E. Grapin, the eminent French architect, who is a member of the regular faculty staff, will also be available to conduct courses in architectural design and outdoor sketching. Associate Professor Harry S. Lightcap will be in charge of the course in mathematics for architectural students. Other courses listed for the summer session include descriptive geometry, shades and shadows, and perspective.

The summer courses in architecture are scheduled for the six weeks' period between June 11 and July 21. They are intended primarily, it is announced, for draftsmen from architects' offices who desire to supplement their office experience by school training and for students who wish to continue their work in the vacation period for credit or entrance preparation.

CEMENT PLANT FOR AMADOR COUNTY BEING CONSIDERED

Representatives and members of an eastern firm intending to take over the development of the cement industry in the Volcano section of Amador county were recently inspecting the holdings.

At the present time surveyors are in the field and a survey is now being made embracing a tract of between 350 and 400 acres. Already representatives of the company have secured options from different property owners.

Different surface tests have been made on the properties embraced in the tract and with excellent results. At present drilling is under way to determine the extent of the cement producing rock, and from indications there is an extensive supply. Officials of the company who are promoting the project are enthusiastic over the possibilities.

The development of the project in Amador county will necessitate the expenditure of a large sum of money. At present plans are being made for the extension of a broad gauge railroad line to the workings at Volcano, it is claimed an extension from Ione. Contracts are now pending for drilling on the property with a diamond drill. It is estimated that between \$3,000,000 and \$4,000,000 will be required to finance the proposition.

NEW MANUFACTURING PLANTS IN U. S. FOR 1927 LISTED

Announcement is made by the Chamber of Commerce of the United States (Washington, D. C.), that the report "1927 New Manufacturing Plants" has been prepared and is now available upon request. This report is an attempt to analyze the distribution, kinds and relative sizes of manufacturing industries which were started new, from the viewpoint of the community, during the year 1927, whether entirely new or primary plants, or branches, or removed plants.

The Chamber defines, for the purpose of this report, a manufacturing plant as an organization which changes the character of material by a manufacturing process. A primary plant is one started de novo. A branch plant is a branch established in a city other than where the parent or main plant is located, and does not include new departments, expansions, or branches established in the same city where the main plant is located. A removed plant is one removed from one city to another and does not include removed branch plants. Additions to existing plants, warehouses, sales offices, wholesale and retail concerns are not included in this report.

HOWARD SIMMONS IS ADVANCED BY STEWART INSO BOARD CO.

Howard Simmons, for the past seven years general sales manager of the Wood Conversion Co., Minneapolis, Minnesota, has been appointed assistant to the president of the Stewart Inso Board Co., St. Joseph, Missouri, according to an announcement just made by Mr. A. D. Stewart, president.

Simmons has been in charge of the sales of Balsam Wool and has spent twenty years in work closely associated with the lumber and building material industry.

The Stewart Inso Board Co., started shipping their new product March 1st and their plant at St. Joseph, Missouri, has been running day and night since

HOWARD SIMMONS

that time. Carloads of Inso Board have been shipped to the four corners of the United States, and one shipment has been made to Holland, during the past sixty days, it is announced. Delay, due to mechanical problems caused shipments to be held up during the winter months, but difficulties have now been overcome, according to Mr. Stewart, and shipments will proceed without any further trouble.

Arrangements have already been made by some of the best known lumber and building material jobbers in the country for franchises for Inso Board and the list of dealers includes well known firms in the industry.

CALVARY PRESBYTERIAN CHURCH GETS AEOLIAN-VOTEY ORGAN

Calvary Presbyterian Church in San Francisco is to have a new four manual and echo Aeolian-Votey Pipe organ, a gift of Mr. and Mrs. John A. McGregor, is the announcement made today by Theodore Strong, Manager of the Aeolian-Organ Department of Sherman, Clay & Company. The specifications of the organ were drawn up by Mr. Otto Fleissner well known San Francisco organist, and will give Calvary Church one of the finest and most complete pipe organs on the Pacific Coast. Mr. Frederick Meyer is the architect in charge of alterations to the church auditorium. It is planned to have the organ ready for dedication at the Christmas season.

ADOPTS TRADE NAME

Louis Martin and Al Galeria will operate from 4339 E-Fourteenth Street, Oakland, under the firm name of Airport Sheet Metal Works.

ENGINEERING SOCIETIES EMPLOYMENT SERVICE

Further information regarding positions listed in this column is obtainable from Newton D. Cook, Room 715 57 Post Street, San Francisco, (Phone Sutter 1684).

K-61-X-4809-C-S CIVIL ENGINEER
to teach steel and reinforced concrete design. May also give some graduate courses in structural engineering. Term 10 months. Apply by letter. Location, South.

R-1666-S STRUCTURAL ENGINEER
35-40, pref. technical graduate with good record of experience on structural steel work for sales promotion to architects and contractors. Sales experience preferred, but not required. Salary open. Apply by letter. Location, San Francisco.

R-1654-S SALESMAN, preferably with some training or experience in combustion of fuels to sell standard line of oil burner equipment to owners at architects. Commission only. Location, San Mateo County.

R-1647-S ESTIMATOR AND DRAFTER of reinforcing steel. Must have both inside and outside experience and be able to do rapid work. Salary open. Location, San Francisco.

PATENTS

Granted to Californians as reported by Munn & Co., Patent Attorneys

Edward E. Stevenson, of Los Angeles **HOISTING HOOK**. This invention has to do generally with hoisting hooks and is more particularly concerned with "safety" hooks, that is, hooks with means for closing their throats after they have been applied to work. Mr. Stevenson assigns his patent to D. & B. Pump and Supply Company.

Fred F. Conwill, of Berkeley, **PAINT FOR DECORATING**. One of the objects of this invention is the provision of a paint which a decorator may simultaneously obtain a stippling effect and produce a design on a freshly painted surface.

Frank William Grady, of Los Angeles **ELEVATOR LINK FOR SUCKER RODS**. An object of this invention is to provide a link which may be readily and easily connected with the usual tubing elevator without making changes in the construction thereof.

STANDARDIZATION OF DESIGN IS HIT BY A. I. A.

Standardization of design threatens the Nation's architecture, the board of directors of the American Institute of Architects declared in a report for submission to the sixty-first convention of the institute, meeting in St. Louis, May 17. Fear was expressed that design may become "ordinary, humdrum, and nondescript," reducing communities all over the United States to a common level. "There is even now becoming evident in our work from coast to coast, from the Great Lakes to the gulf, a universal product made to sell, and this cannot be attributed alone to the efforts of the uneducated or inefficient architect," the report said. "Historical associations appear to be more and more neglected and considered by members of the profession as of diminishing or little importance," the report continued. "In consequence a certain charm and the resulting surprises that might properly be anticipated in traveling, here or there, are less easily found as time goes by."

THE OBSERVER

**What He Hears
and Sees
On His Rounds**

Joseph Unger will operate from 210 North St., San Francisco, under the firm name of Unger Electric Company.

R. Arnold of Martinez has been appointed city engineer of Concord, Contra Costa County, succeeding R. L. Clee, resigned.

V. C. Blean, general contractor of Cusa, died in that city May 20. His death, occurring at the age of 57 years, came after a protected illness.

Circle Equipment & Construction Co. of San Francisco, has been incorporated. Directors are: Helmer Dickey, O. B. Smith and J. B. Currie.

I. E. Macauley of 5344 Lawton Ave., Oakland, and F. M. Butler of 635 El Dorado Ave., Piedmont, will operate under the firm name of Pacific Construction Company.

F. McCarthy, Harry A. Booth and C. Little will operate from 443 Fulton St., San Francisco, under the firm name of Diamond Point Roofing Company.

An ordinance regulating roofing has been passed by the San Diego city council. It prescribes the quality of materials and workmanship required and will require roofing contractors to give bond guaranteeing work to be in conformity to the ordinance.

California Vibrolithic Company, Citizens National Bank Bldg., Los Angeles, announces change of firm name to Compressed Concrete Company, as more fully expressing the type of pavement which it builds.

Exports of electrical equipment from the United States during the month of March amounted to \$9,668,279, a gain of \$100,200 as compared with the corresponding month in 1927, according to the electrical equipment division, Department of Commerce.

Builders' Exchange of Monterey County held a banquet-meeting May 15 at Pine Bluff, Carmel, with thirty-six members of the organization present. W. O. Raiguel of the Del Monte Properties Company and M. J. Murphy were the principal speakers.

Samuel S. Sproat, president and general manager of the Ward Heater Co., died suddenly May 9 at Dallas, Texas, of heart disease. He had gone to Dallas to attend the convention of the National Association in that city and also to open a distributing branch for his company.

Production of pig iron in Great Britain during April totaled 555,000 tons, compared with 680,000 tons in April of last year. The output of steel ingots and castings was 644,000 tons, as against 9,000 tons in April, 1927. Furnaces in blast at the end of the month numbered 9, a decrease of one during the month.

Sixty members of the Stockton Chamber of Commerce were guests at a luncheon meeting May 17 in the plant of the Stockton Paint Company, Market and Buren streets, Stockton. Previous to the luncheon an inspection of the plant was made. The process of manufacture was explained to the visitors by Everett Wolf, president of the company.

Chas. S. Howard, auto dealer and capitalist, is reported to have purchased the property at the northeast corner of Post and Stockton streets for a price of \$1,250,000. The site is improved with a six-story Class B building.

Four hundred delegates to the annual convention of the California Master Plumbers' Association journeyed to Richmond, Contra Costa County, May 17 to inspect the plant of the Standard Sanitary Manufacturing Company. The inspection tour was ably handled by fifteen employees of the plant who explained the process of manufacture from the preliminary stages to the finished product.

Suit has been filed in the U. S. District Court at Sacramento by the United States Government against the Sugar Pine Investment Company to set aside patents to 3,000 acres of timber land, valued at \$300,000, located in Humboldt County. The patents were issued in 1902 and the government alleges in its suit that they were fraudulently issued to "straw" men by the company in filing on the lands.

Plans for a uniform building code for the entire Peninsula will be discussed at a meeting to be held in the San Mateo City Hall next Monday night. J. C. Mackie of Long Beach, manager of the Pacific Coast Building Officials' Conference, will be the principal speaker at the meeting which will be attended by building inspectors, contractors and material dealers, building loan executives and others.

An offer of a free round trip ticket to Alaska has been made by the Pacific Coast Cement Company to the individual who selects the best name for the first of the two steel steamships to enter service of the Pacific Coast Steamship Company in transporting limberock from Dall Island, Alaska, to the million-barrel capacity cement plant now under construction at Seattle. The contest closes May 26. Further information obtainable from Pacific Coast Cement Co., 615 L. C. Smith Bldg., Seattle.

"Mundet Jointite Cork Tile" is the name of a new bulletin just published by L. Mundet & Son, Inc., 461 Eighth Ave., New York City, specialists in the manufacture of cork products. Copies will be furnished on request. Ask for "A.I.A. File No. 23b—Cork Tile Floors."

Billie George, president of the San Francisco Builders' Exchange, was a topic of discussion down in Pasadena last week. George W. Israel, secretary-manager of the Pasadena Builders' Exchange, in his weekly bulletin in speaking of "our Billie" says: "W. H. George is a substantial and powerful man in the North Exchanges, as is evidenced in his San Francisco Exchange and when he talks he is listened to, for he talks construction right from the shoulder. He says a lot in a few words." Such statements as these bear out the fact that the Southern California construction interests are sincere in their statement "there is no North and South in California—it's all one state." The writer recalls this statement of a leader in the Southern California construction field at the last convention of the State Builders' Exchanges in Santa Cruz. The spirit of co-operation exists on both ends which means greater accomplishments for the construction industry.

The American Federation of Labor inaugurated the five-day week for its Washington, D. C., office force, effective May 18. All employees having Saturday and Sunday off with no loss in pay. The schedule will be effective the year round.

During the first fifteen days of May, 1928, the Los Angeles city building department issued 1692 permits with an estimated valuation of \$4,518,721. For the corresponding period in April, 1928, the number of permits issued was 1521 and the estimated valuation was \$5,227,595 while for the first fifteen days of May a year ago the number of permits was 1700 and the estimated valuation \$4,274,535. For the current year up to and including May 15 Los Angeles' building total was \$38,389,122 as compared with \$41,549,034 for the corresponding period last year.

Antonio G. Canalizo, la. De Cante No. 1, Mexico, D. F., owner of 167,402 acres of virgin forest on the Gulf of Mexico, clear of indebtedness, is interested in making the proper financial connections to exploit these vast natural resources of hardwoods such as—mahogany, cedar, zapota tree, balsamo of Peru, logwood, etc. The property, partially developed, is self-supporting with 47 miles of tramway, telephone line, numerous buildings, warehouses and other valuable improvements. Taxation is low on forest lands in Mexico. Further information is available from Mr. Canalizo if you are interested.

The proposal of the Northern California Chapter, Associated General Contractors of America, to the executive board to hold the national convention for 1929 aboard the Steamship California en route from San Francisco to New York, via the Panama Canal, has been accepted, conditional on sufficient reservations being made to assure the success of the affair. Should these not be obtained the next convention will probably be held at Chicago.

Geo. E. Taylor, Manager, Central American Agencies, Apartados 679, San Jose, Costa Rica, (manufacturers' agents), is desirous of establishing connections with interested exporters of Douglas fir, California redwood, etc., for which there is an extensive market in Costa Rica. He is also in a position to introduce lines of other San Francisco manufacturers of merchandise or building materials, wishing to market their products in Costa Rica on a commission basis.

Licensing of all plastering contractors in Richmond and the posting of a bond of \$1000 by each licensed contractor is provided for under the terms of an ordinance being studied by the Richmond city council and which is to be introduced at an early meeting. The ordinance is similar to those now in effect in Oakland, San Leandro and Hayward, and has the approval of the Richmond plasterers. It is designed to prevent "fly by night" plasterers from operating in Richmond on small jobs, and to insure better plastering work. Provision is made for inspection of plastering work by the city building inspector, and a fee is included. It was declared that the additional cost of each job would be nominal under the new ordinance. Plumbers are now the only building contractors required to post a bond in Richmond.

Building News Section

APARTMENTS

BONDS

SANTA CRUZ, Santa Cruz Co., Cal.—
Santa Cruz School District sets June 12
as date to vote bonds of \$365,000 to fi-
nance erection of new schools and for
additions and alterations to standing
structures.

SAN CARLOS, San Mateo Co., Cal.—
Election will be held June 12 in San Car-
los Grammar School District to vote
bonds of \$40,000 to finance purchase of
additional school lands and erection of
new school.

BAKERSFIELD, Kern Co., Cal.—Elec-
tion will be held June 8 in Pershing
School District to vote direct tax of \$5,-
000 to finance one-classroom addition to
present school. Walter A. Garvey, clerk
of district.

SAN DIEGO, Cal.—By vote of 4 to 1,
city endorsed bond issue for \$2,313,000 to
finance erection of new schools and ad-
ditions and alterations to standing struc-
tures.

MOUNTAIN VIEW, Santa Clara Co.,
Cal.—Mountain View School District con-
templates direct tax for \$15,000 to finance
completion of improvements at new high
school grounds.

PASKENTA, Tehama Co., Cal.—Elkins
School District will call election shortly
to vote bonds of \$8,000 to finance erection
of new school. Trustees of district are:
Clarence Ruff, Fred Whitlock and Albert
Hanks.

ALHAMBRA, Los Angeles Co., Cal.—
Alhambra board of education has set
June 15 as the date for holding the school
bond election. Recommendations of Ford
& Huu, who recently completed a survey
of the school situation, will be carried out
disposition of the funds to be made as
follows: \$1,475,000 for developing the jun-
ior high school program and extending
the present senior high school plant on
6th St., and \$200,000 for purchasing ad-
ditional elementary school sites. Architects
John C. Austin, Frederic M. Ashley and
John Walker Smart will prepare plans for
the new buildings in the event the bonds
are affirmed.

CORNING, Tehama Co., Cal.—Bond
election will be held in the Elkins School
District on June 9, 1928, for voting \$8,000
for construction of a new school building.
Clarence Ruff, F. W. Whitlock, Albert
Hanks, trustees.

CULVER CITY, Los Angeles Co., Cal.—
The proposed bond issue of \$125,000
was defeated at the election held May
18. School officials state that the bond
issue failed by a small majority and that
a new election will probably be
called shortly.

BEARDSLEY, Kern Co., Cal.—County
supervisors sell \$120,000 bond issue of
Beardsley School District; proceeds of
sale to finance erection of new school
building.

Street Illumination and Constr.
Co., Oakland 5337.50
Bids taken under advisement for one
week.

NOTE:—Next Wednesday is Decoration Day and one year ago I visited the old home town at Tulare, and then ran the following story in this space. I repeat the same, for many said this same experience always happens at their picnics.—Sandy Pratt.

SANDY PRATT joined the multitude.

AND WENT to the country.

FOR THE Memorial Day vacation.

SANDY VISITED Tulare.

WHERE THOUSANDS of relatives.

BOTH BLOOD and marriage live.

AND A picnic.

ON THE Kaweah River.

WAS SUGGESTED for May 30th.

AND AFTER hours of arguing.

THE PARADE of three loaded autos.

WAS STARTED at 10:30 A. M.

SOON THE river was reached.

AND THE problem.

OF SELECTING a suitable spot.

FOR THE lunch started.

MAY, SANDY'S sister-in-law.

DID NOT like the first place.

ON ACCOUNT of limited shade.

ALTHOUGH HER husband.

SAID THIS particular spot.

WAS THE best.

ON THE river.

WE THEN drove miles.

TILL THE parade was halted.

AND THE river bank.

WAS AGAIN explored.

BUT JESSIE, another sister-in-law.

OBJECTED TO too many rocks.

CLARENCE (SANDY) Pratt, producer.

OF ROCK, sand and gravel.

LIKED THE "rocky" shore.

BUT THE women won.

AS USUAL.

AND WE drove for miles.

UP THE stream.

STOPPING AT thousands of places.

BEAUTIFUL, SHADY and everything.

BUT IF May liked it.

IT DID not suit Charley.

OR LUKE knew a better place.

AND FINALLY late.

IN THE afternoon.

WHEN ALL were exhausted.

FROM ARGUING.

AND THE long ride.

AND WEAK from lack of food.

WE STOPPED.

BEHIND A prospector's cabin.

AND ATE our lunch.

IN HIS back yard.

NOT HALF so clean.

AS THE grass-covered back yards.

OF ANY of the sisters-in-law.

THAT WERE in the party.

AND AFTER the lunch.

WE FOUND it was late.

AND THAT we had.

SPENT THE whole day.

SELECTING A picnic ground.

SO WE packed up hurriedly.

SO WE could get.

DOWN ON the main highway.

OFF OF the steep grades.

BEFORE DARKNESS came.

"I THANK you."

Did you ever go on a picnic and argue for hours on which spot was the best? Clarence (Sandy) Pratt, president of the Pratt Building Material Company, and producer of clean sand, rock and gravel at Sacramento, Marysville, Prattrock (near Folsom), Pratteo (Monterey County) and Mayhew (Sacramento County), just returned from such a trip (see above K.C.B.-like part of "Pratt's Concrete Mix.")

THE CONTRACTORS' ROOM

BUILDING AND ENGINEERING NEWS maintains a Contractors' Room where plans and specifications may be filed by Architects, Engineers and Owners for the convenience of bidders in San Francisco and the Bay Counties.

Architects, Engineers and Owners are invited to forward plans of their projects to BUILDING AND ENGINEERING NEWS. No charge for this service. The plans will be returned in good condition when contract for work is let.

risson Ave., bet. The Alameda and San Fernando St., and bet. San Fernando St. and Park Ave., involv. grade; 1 1/2-in. asph. conc. surface, 2 1/2-in. asph. conc. base pavement; hyd. conc. curb; cem. conc. walks; conc. gutters; 4-in. sewer laterals. 1911 Act, Bond Act 1915. Protests June 4. John J. Lynch, city clerk. Wm. Popp, city engineer.

LUMBER TRADE

Seattle reports curtailment of production at the fir mills and a tendency to firmer prices as a result. Long-Bell mills at Longview have gone on a 5-day week basis. St. Paul & Tacoma Lumber Co. has laid off 1000 men in mills and woods. Portland reports a large volume of lumber moving but export slow. Tacoma also reports curtailment of operations to meet over-production. Wholesale prices in Los Angeles are reported to be reflecting the action of mills in cutting down production, higher prices being bid for both common and clear fir.

ARCHITECTS ELECT

C. Herrick Hammond of Chicago was elected president of the American Institute of Architects at the annual convention recently held in St. Louis, Mo. Mr. Hammond, who succeeds Milton E. Medary of Philadelphia, won over William L. Steele of Sioux City, Iowa. J. Monroe Hewlett of Brooklyn, N. Y., was chosen first vice-president and William J. Sayward of Atlanta, Ga., second vice-president. Frank C. Baldwin of Washington, D. C., secretary and Edwin Dergstrom of Los Angeles, treasurer, were re-elected.

ENGINEER NAMED

Despite the protest of organized city employees, John B. Leonard has been appointed temporary superintendent of the Bureau of Building Inspection of the Department of Public Works. Leonard, a San Francisco structural engineer, was named for the office on recommendation of an advisory committee of architects, builders and insurance men who are engaged in revising the city's building code.

METAL DOOR AND TRIM COMPANY ISSUES NEW CATALOG

Metal Door and Trim Company of La Porte, Indiana, has issued a new catalog for the exclusive use of architects and contractors. The catalog is being delivered personally by factory salesmen together with agents in their respective territories. The catalog is useable for any and all hollow metal door and trim work.

FIRE DESTROYS LUMBER MILL

The Neff Lumber Company's mill at Hoquiam, Wash., was destroyed by fire May 18th with a loss estimated at more than \$250,000. The flames originated in a corner of the building and fanned by a strong breeze, leveled the structure despite efforts of the fire departments of Hoquiam and Aberdeen.

CALIFORNIA SCHOOLS COST \$143,819,221 FOR 1927

California's public schools cost her \$143,819,221.15 in 1927. Reports to the State made by county superintendents show that kindergartens cost \$3,605,842, elementary schools, \$76,692,515.17, and high schools, \$63,520,863.62.

Los Angeles Board of Education has authorized the secretary to send out a questionnaire to all persons who apply for plans upon which to base bids for proposed building contracts, the questionnaire being designed to show the responsibility of prospective bidders. This action was taken on representations of a committee of Southern California Chapter, Associated General Contractors of America, of which K. R. Bradley is chairman.

Official Proposals

NOTICE TO CONTRACTORS

(Salt Water Pump Station—San Diego)

Until 11 A. M., June 13, bids will be received by the bureau of yards and docks, Washington D. C., for salt water pump station, Naval Operating Base (Air Station) San Diego. The project consists of a reinforced concrete pump house on concrete piles; a creosoted pile dolphin; the installation of power transformers, and pumps with their motors and starters, all furnished by the government; piping, the provision and installation of a power transformer, cutouts and cables; a lighting system; sump ejector; and miscellaneous appurtenances. In the event that bidding data is desired there should be forwarded to the Public Works Officer, Headquarters, Eleventh Naval District, foot of Broadway, San Diego, a check or postal money order for \$10 payable to the Chief of the Bureau of Yards and Docks, as security for the safe return of the drawings and specification (No. 5478). W. H. Smith, Lieut. Comdr. U. S. N., Assistant Public Works Officer.

ADVERTISEMENT FOR BIDS

Sealed bids will be received at the Office of the Comptroller, 220 California Hall, University of California, Berkeley, California, at or before 11:00 A. M. Monday, June 4, 1928, for the construction of (a) Poultry buildings, yards and fences; (b) Superintendent's cottage; (c) Laboratory building for the University of California in Strawberry Canyon, Oakland, California.

Drawings and Specifications may be obtained from Room 218 California Hall upon a deposit of \$25.00 for each set of Drawings and Specifications. Deposit will be refunded only on submission of a regular bid and on return of the Drawings and Specifications in good condition.

No bids will be considered unless attached by a certified check or bid bond of an acceptable Surety Company in favor of the undersigned equal to ten per cent of the bid to secure the execution of the contract by the successful bidder.

The right is reserved to reject any or all bids.

THE REGENTS OF THE UNIVERSITY OF CALIFORNIA.

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Highway Building, Sacramento, California, until 2 o'clock P. M., on June 13, 1928, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Lake County, across Cache Creek about 36 miles west of Williams (III-Lak-15-C), a reinforced concrete girder bridge consisting of eight 57-foot spans on concrete piers and abutments.

Solano County, between Cordelia and Rockville (X-Sol-8-7-A,B), about three and one-tenth (3.1) miles in length to be graded and surfaced with oil treated crushed gravel or stone.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the District office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the District office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

Dated: May 18, 1928.

(D) NOTICE TO CONTRACTORS

(Construct Irrigation Dam—Oregon)

Sealed proposals will be received at the office of T. J. Higgins, Citizens National Bank Building, Baker, Oregon, until five (5) o'clock P. M., June 1, 1928, for furnishing materials and labor and constructing the Camp Creek Irrigation Dam.

Plans and specifications may be obtained upon application to the undersigned and deposit of Ten (\$10) Dollars. The deposit of Ten (\$10) Dollars will be returned to contractors submitting bona fide bids for the work.

Each proposal shall be accompanied by a deposit of five (5%) per cent of the amount of the bid, either in cash or by a certified check.

The right is reserved to reject any and all bids or to accept such bid or bids as are to the best interest of the Company.

CAMP CREEK WATER COMPANY,
T. J. HIGGINS,
President.

NOTICE TO CONTRACTORS

(Pumping Equipment—Alameda County)

OFFICE OF THE CLERK OF THE BOARD OF SUPERVISORS, ALAMEDA COUNTY, CALIFORNIA.

Sealed Bids will be received by the Clerk of the Board of Supervisors of Alameda County, California, at his office Monday, the 18th day of June, 1928, at 10:30 A. M. (the day when said bids will be opened and the contract awarded) for the furnishing and installing of pumping equipment in the Oakland Alameda Portal Buildings and in Segment "D" of the Estuary Subway, Alameda County, California.

Plans and specifications for said work are on file in the office of the County Clerk of Alameda County, in the Hall Records Building, in the City of Oakland, County of Alameda, State of California, where copies may be obtained in the following manner, viz:

Contractors may secure complete copies of the specifications by depositing with the County Clerk the sum of Twenty-five (\$25.00) Dollars.

Contractors will be required to return copies of the specifications in good condition to the office of the County Clerk of Alameda County, California, not later than the day upon which bids are to be opened for the above specified equipment.

Deposits of contractors failing to return said specifications on or before the day of opening of bids will immediately become forfeited to the County of Alameda.

Each bid must be accompanied by a certified check of a bank of the State of California, or a National Bank doing business in the State of California, for a sum equal to ten (10) per cent of the total amount bid made payable to Geo. E. Gross, Clerk of the Board of Supervisors of Alameda County, to be forfeited to the County as agreed, and liquidated damages should the party or parties to whom the contract shall be awarded, fail to enter into the contract after the award or to give the bond required by law as by the said specifications.

The Board of Supervisors reserves the right to reject any and all bids.

DATED May 21st, 1928.
GEO. E. GROSS,
County Clerk and Ex-Officio Clerk of the Board of Supervisors.

NOTICE TO CONTRACTORS

Plans and specifications necessary for the supplying of labor and materials required for the construction of the West Addition to East Main Street School Santa Maria, California, may be obtained on and after May 21st, 1928, by application to Louis N. Crawford, Architect, 8 Jones Bldg., Santa Maria, California.

Plans and specifications provided may be returned at the time of submitting proposal in order for proposal to be considered.

Each proposal must be accompanied by a certified check in the amount of five per cent (5%) of the proposal price.

Surety bond to the total amount of the proposal price will be required of the successful bidder.

Sealed proposals will be received by the Board of School Trustees, M. Purkiss, Clerk, Santa Maria School District, Santa Maria, California, on or before 7:30 P. M., on Friday, June 1st, 1928, at a meeting to be held in the Main Street School, Santa Maria, California, which time and place bids for the erection of the above mentioned building will be considered.

The Board of School Trustees also mentioned, reserves the right to reject any proposal not in compliance with the conditions above stated, or to reject proposals or to accept any proposal which it considers to be in the best interest of the Santa Maria School District.

By order of the Board of School Trustees, Santa Maria School District, Santa Maria, California.

M. M. PURKISS, Clerk

NOTICE INVITING SEALED PROPOSALS OR BIDS

Livingston Municipal Water System

Pursuant to resolution of the City Council of Livingston, California, directing this notice, the said City Council hereby invites sealed proposals or bids for the furnishing of labor, materials and equipment necessary for and completely constructing the division of the Livingston Municipal Water System hereinafter specified in accordance with the plans and specifications on file in the office of the City Clerk of the City of Livingston, County of Merced, State of California.

DIVISION E. The drilling and lining of two wells, one eighteen (18) inches in diameter, and the other sixteen (16) inches in diameter.

Proposals are to be made on the blank form to be obtained from the City Clerk, and shall be sealed and filed with the clerk at or before eight o'clock P. M., Monday, June 4th, 1928, at which time they will be publicly opened by the City Council of said City at its regular Council Chamber.

Proposals shall comply with the instructions contained in the plans and specifications.

All proposals or bids shall be accompanied by a certified check upon a responsible bank, drawn to the order of the City of Livingston for a sum not less than ten per cent of the amount of the bid, or by a bond for said amount and so payable, signed by the bidder and surety company or two sureties, who shall justify before an officer competent to administer oaths, in double the said amount over and above all statutory exemptions.

The City Council reserves the right to reject any and all bids.

EDWARD J. HICKS,
City Clerk of the City of Livingston,
California.

----- (D) -----

NOTICE TO CONTRACTORS

Notice is hereby given that sealed bids will be received and opened by the Board of Trustees of the Los Altos Grammar School District at 7:30 P. M. on the 4th day of June, 1928, at the present Grammar School Building in Los Altos, for the erection and completion of a 2-room addition for the Los Altos Grammar School District, all as described and shown on the plans and specifications prepared for the same by W. H. Weeks, Architect.

Plans and specifications may be seen in the office of the Architect, W. H. Weeks, San Francisco, during office hours, or at the office of the Clerk of the Board in Los Altos.

All bids to be presented in strict accordance with the "Notice to Bidders" in the specifications.

Each bid must be accompanied by a certified check on some responsible California bank in a sum not less than ten per cent of the amount bid, made payable to the Board of Trustees of the Los Altos Grammar School District as a guarantee that contract will be signed within five days of date of opening of bids, and approved surety bonds furnished as required.

Each bid must be delivered in a sealed envelope and addressed to the Clerk of the Board of Trustees, and endorsed: "Proposal for Addition to Grammar School Building."

The Board reserves the right to reject any and all bids.

HARRY A. DUTTON,
Clerk, Board of Trustees.

----- (D) -----

NOTICE TO CONTRACTORS

Notice is hereby given that the Board of Education of the City of Berkeley and Berkeley School Dist. of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said board, 2325 Milvia Street, Berkeley, California, until the 4th day of June, at 8 o'clock P. M., at which time and place bids will be opened for the furnishing of fish hardware to be used in the erection and completion of the addition to the Harfield School, located at Rose and Grant Streets, Berkeley, California.

Specifications for said work are on file in the office of James W. Plachek, architect of said Board of Education, Chamber of Commerce Building, corner of

Shattuck and Center Streets, Berkeley, California.

The specifications may be retained for a period of five days.

Price, fitness and quality being equal, preference will be given to the products of the State of California.

Persons or firms desiring to be on the mailing list of the Berkeley Board of Education may list themselves with the purchasing department.

CLARA F. ANDREWS,
Secretary of the Board of Education,
Berkeley, California.

NOTICE TO BIDDERS

(Water Pipe—Eureka, Calif.)

Sealed proposals or bids are hereby invited by the Council of the City of Eureka, California, for the use of the Water Department, for furnishing Ten Thousand (10,000) lineal feet of two inch and Two Thousand (2000) lineal feet of three inch Standard Black Pipe, random lengths, f. o. b. Dock, Eureka, Calif. Delivery to be made within sixty days after award of contract.

The said bids will be received in a sealed envelope marked Bids for two and three inch pipe at the office of the Superintendent of Public Works of the City of Eureka, California, up to the hour of 5 P. M., Tuesday, June 5th, 1928.

Bids will be opened by the City Council of the City of Eureka, at 8 o'clock P. M. on the 5th day of June, 1928. The right is reserved to reject any or all bids.

Dated May 16, 1928.

JOHN GRIFFITH,
Superintendent of Public Works of the City of Eureka.

----- (D) -----

NOTICE TO BIDDERS

(Water Pipe—Coalinga, Cal.)

Notice is hereby given that the city council of the City of Coalinga, Fresno County, California, will receive sealed bids and proposals for the following:

2100 feet pipe for conveying water from new auxiliary municipal well to city storage reservoir.

New or second-hand approximately 8 or 8 1/2 inches o. d. Weight approximately 25 to 28 pounds per foot. Lap weld or screw end.

Said bids or proposals must be delivered to the city clerk at his office in the City Hall, Coalinga, California, not later than 7:30 P. M., Monday, June 4th, 1928, said bids or proposals to be opened by the council at its regular meeting on said date, June 4th, 1928.

The council reserves the right to reject any or all bids or proposals received.

E. J. McCROSKEY,
City Clerk.

Dated May 16, 1928, Coalinga, Calif.

----- (D) -----

NOTICE TO BIDDERS

At the regular meeting of the Board of Trustees of the Hanford Joint Union High School District, held Monday, May 14th, 1928, at 8:00 P. M., a motion was regularly made and carried to make all necessary repairs to the garage damaged by fire on or about the night of March 14th, 1928, and that the clerk of said Board of Trustees cause to be published in the Hanford Daily Journal, the required number of issues, a notice to bidders calling for sealed proposals to furnish materials and make all necessary repairs in accordance with specifications in the hands of the Clerk of Board, which may be secured upon application.

A certified check or bidders' bond for 10% of the amount of the bid must accompany same.

The said Board of Trustees reserves the right to reject any or all bids.

All bids must be in the hands of G. W. Armstead, Clerk of the Board, on or before June 4th, 1928, at 8:00 P. M., at which time the bids will be opened at the regular meeting-place of the Board.

G. W. ARMSTEAD, Clerk,
Hanford Joint Union High School Dist.

----- (D) -----

NOTICE TO CONTRACTORS

Pursuant to a resolution of the Board of Education of the City of Chico, in and for the Chico School District, adopted in adjourned regular session, May 3, 1928, notice is hereby given that the said Board will receive sealed bids until the hour of 5 o'clock P. M. of Tuesday, June

5, 1928, for the construction of two rooms at Paradise, California, in accordance with the plans and specifications prepared therefor by Mr. A. G. Atkinson, architect, of Chico, California. This proposal shall be made upon a form prepared for the same. Said plans, specifications and proposals may be had in the office of the clerk of the Board of Education, Municipal Building, Fifth and Main Streets, Chico, California.

Said construction will also include the extension and enlargement of the present heating plant in accordance with these plans.

A deposit of \$10.00 will be required for each set of plans and specifications furnished the bidder; said deposit to be returned to the bidder upon the return to the office of the plans and specifications.

Said bid shall be signed by the bidder and be accompanied by a certified check for at least five per cent of the amount of the bid or proposal, certified to by some responsible bank or banker and made payable to the President of the Board of Education of the Chico School District, or order; said certified check to be forfeited to and retained by the Chico School District should the party or parties to whom the contract shall be awarded fail to enter into the contract after award has been made, or to give bonds as required. Bids must be plainly marked on the exterior as to content.

The successful bidder will be required, upon the signing of the contract, to furnish all necessary bonds in the amount of fifty per cent of the contract for compliance with the laws of the State, both in the matter of guaranteeing the execution of the contract and in the matter of protection to material, men and labor, also will be required to furnish all necessary compensation protection.

The Board of Education of the Chico School District reserves the right to reject any or all bids.

BOARD OF EDUCATION OF THE
CHICO SCHOOL DISTRICT.

CHAS. H. CAMPER, Secretary.
